**U.S. Army Institute for Water Resources
Policy and Special Studies Programs**

The Corps of Engineers Institute for Water Resources (CEWRC-IWR) is part of the Water Resources Support Center in Alexandria Virginia. It was created in 1969 to analyze and anticipate changing water resources management conditions, and to develop planning methods and analytical tools to address economic, social, institutional, and environmental needs in water resources planning and policy. Since its inception, IWR has been a leader in the development of tools and strategies to plan and execute Corps water resources planning.

IWR's program emphasizes planning concepts for use by Corps field offices. Initially, this work relied heavily on the experience of highly respected planners and theorists, gained in the many river basin and multiple purpose studies undertaken in the 1960s. As these concepts matured and became a routine part of Corps planning, the emphasis shifted to developing improved methods for conducting economic, social, environmental, and institutional analyses. These methods were essential to implementation of the Water Resources Council's (WRC) Principles and Standards (P&S) and later, Principles and Guidelines (P&G) for water resources planning, which required a multi-objective analysis of tradeoffs among national and regional economic development, environmental quality, and social effects.

Increasingly over the years, IWR has also responded to Corps program development needs by studying policy issues resulting from changes in national objectives and priorities. In addition to directly supporting Corps needs, IWR has established an analytic and strategic competence through the direction of such efforts as the National Drought Management Study, National Waterways Studies, the National Wetlands Mitigation Banking Study, the Federal Infrastructure Strategy, and as a lead participant in the development of policy and procedures for environmental planning and management.

Many of these forward-looking policy and strategic studies were accomplished by the Policy and Special Studies Division. The mission of the Division is to support the Director of Civil Works by assessing and evaluating changing national water resources and related public works infrastructure management needs as they affect Corps Civil Works missions, policies, practices, legislative mandates, and executive directives.

The Division supports the Office of the Assistant Secretary of Civil Works [OASA(CW)] and the Headquarters, U.S. Army Corps of Engineers (HQUSACE) in analyzing current policy issues, and conducting special studies of national and international significance. The Division's work encompasses the following thematic areas:

- | | |
|-------------------|-------------------------|
| • Policy Studies | • Strategic Studies |
| • Special Studies | • Environmental Studies |

For further information related to the program, call either:

*Dr. Eugene Stakhiv
Chief, Policy and Special
Studies Division

Casey Building, 7701 Telegraph Road
Alexandria, VA 22315-3868*

Reports may be ordered by writing (above address) Arlene Nurthen, IWR Publications, at arlene.nurthen@inet.hq.usace.army.mil or by fax 703-428-8171.

PREFACE

This document is intended to serve as a desk top reference on environmental statutes and environmental executive policy for Corps of Engineers Civil Works personnel. It contains summary profiles of environmental laws, and full text of a number of environmental executive orders. The information in this document is for reference purposes, and is not intended as a substitute for HQUSACE policy or implementation guidance, nor is this reference intended to replace the advice of Corps counsel. Implementation of the laws in the Civil Works program may be affected by changes in policy, and by amendments to the laws. Federal case law may also determine how the laws are interpreted and influence policy development and implementation. Users should check the latest HQUSACE guidance for details regarding Corps policy on implementing and complying with these statutes. Users should also consult Corps counsel regarding assistance in applying legislative information in light of the context of the project, circumstances, or action that defines their need for this information.

Acknowledgments

This document was developed by the Institute for Water Resources (IWR) at the direction of the Directorate of Civil Works, Headquarters, U.S. Army Corps of Engineers. The Project Manager is Lynn R. Martin of IWR's Policy and Special Studies Division, headed by Eugene Stakhiv, Chief. The Director of IWR is Kyle Schilling.

Headquarters oversight was provided by William Klesch, Policy Review and Analysis Division, and David Sanford, Chief, HQ Policy Review and Analysis Division provided overall guidance and encouragement for the effort.

There were many contributors to the development of this document. Ken Orth (IWR) helped define the concept for the desk reference, and James Comiskey (IWR) provided oversight for the first phase of the effort. Margaret Gaffney-Smith, formerly of IWR, is gratefully acknowledged for her work to research, develop, and organize information for the document, as well as compile the first draft.

A special thanks is due to the many HQUSACE and field personnel who contributed their time and experience, and many of whom drafted portions of the summary profiles, especially those pertaining to Corps implementation policy and compliance requirements. In particular: Terrence Breyman and David Reece of the Environmental Branch, Policy Review and Analysis Division, headed by Robert Soots; and Chip Smith, and Russell Bellmer formerly from the Environmental Branch, contributed substantively to development of the profile material. Mark McKevitt provided detailed review of the first draft. David Hanson, and Lance Wood, of the Office of Chief Council provided detailed legal review.

A number of individuals from Corp districts contributed time and effort to develop this desk reference. In particular: Gene Buglewicz (Lower Mississippi Valley Division), Dick Gorton (Omaha District), William Hubbard (New England Division), Chris Hyland (Walla Walla District), Michael Passmore (formerly of the Walla Walla District), James Preacher and Wayne Bogan (Charleston District), participated on an Environmental Desk Reference Task Force to help define the scope for the document in relation to field needs, as well draft and review portions of the summary profiles. David Olson (Baltimore District) also reviewed and provided comments on a number of the profiles. Sandra Zebrowski and staff of the Hazardous, Toxic and Radioactive Waste Center of Expertise, developed a number of the profiles.

A special thanks is extended to Pamela Cole, IWR research assistant, who worked painstakingly to complete and verify many of the citations in the profiles and the tables, compiled the Executive Orders, and provided general support in organizing and compiling the final version of the document.

CIVIL WORKS ENVIRONMENTAL DESK REFERENCE

INTRODUCTION

Numerous environmental laws and executive orders influence and guide water resources planning, development and management within the Civil Works program of the U.S. Army Corps of Engineers. Many of these laws identify compliance requirements, and several establish regulatory programs that the Corps of Engineers implements in support of National environmental objectives. These directives also support Federal responsibility for environmental quality and Corps involvement in the restoration of ecological resources.

The **Environmental Desk Reference** IS a document intended to serve as a desk top reference on environmental statutes and executive policy for Corps of Engineers personnel. It contains summary profiles of environmental laws applicable to the Civil Works program. Included in these profiles are legal citations, common names and summaries of the statutes and the Corps implementation guidance. Each profile also identifies the general requirements for environmental compliance.

Appendices. Appendix A contains full text copies of a number of executive orders relevant to the environment and environmental resources. Users should check with HQUSACE regarding implementation policy and guidance on these orders. Appendix B is a cross reference table to help users find citations for laws using common names. This table uses the most "popular" names and Public Law citations for the environmental laws, however users should note that these popular names often differ from the legislative titles of the parent laws, or the amendments. It is critical to note that new legislation frequently amends existing environmental laws, and that often these amendments are included in laws that are not typically or intuitively related to the original legislation. Users should also be aware that most environmental legislation must be implemented in conjunction with other laws. Appendix C provides a summary of the Corps guidance identified in the summary profiles. The table is organized by Civil Works functional area, and identifies guidance issued by or relevant to the functional area. It also includes references to relevant Army and Department of Defense guidance.

The **Environmental Desk Reference** is NOT the authority on Corps policy regarding implementation of these laws. The information in this document is for reference purposes, and is not intended as a substitute for HQUSACE policy or implementation guidance. Nor is this reference intended to replace the advice of Corps counsel. Implementation of the laws in the Civil Works program may be affected by changes in policy, and by amendments to the laws. In some instances, Federal case law may also determine how the laws are interpreted and influence policy development and implementation. Users should check the latest HQUSACE guidance for details regarding Corps policy on implementing and complying with these statutes. Users should also consult Corps counsel regarding assistance in applying legislative information in light of the context of the project, circumstances, or action that defines their need for this information.

Why this document? While many Corps water resources staff are familiar with the more popular laws (e.g.,

NEPA, Clean Water Act, WRDAs), other laws are less frequently encountered and less well known. In many instances, copies of environmental laws and their implementing regulations, as well as information on citations, are not easily or readily accessible to working staff on a day to day basis.

Corps Civil Works staff have frequently asked for a ready reference that includes the information contained in this desk reference (e.g., summaries of laws, basic lists of citations, and a cross-reference to available Corps guidance.) From the onset of the development of this document, it was recognized that numerous sources of information on environmental laws exist. It was also recognized that it may be difficult to assure that this document is kept up-to-date, given the uncertainty of funding and personnel resources. These are additional reasons to consult HQUSACE or Corps Counsel when users require information on the latest Corps policies and guidance concerning environmental directives.

A number of existing references were examined in the early stages of developing this document. It was found that a number of good references are available that describe environmental laws, their citations and history. However, few references pull together this information in the context of the Civil Works program.

Electronic Resources. A number of electronic resources with full text of environmental laws, regulations and case law are available, and the number of these resources continue to increase. Users are reminded that like any other data base, these sources are only as current as the most recent update. A number of these sources are identified below.

Web Sites:

- United States Code (full text): <http://www.law.cornell.edu/uscode/>
- Code of Federal Regulations (full text): <http://www.pls.com:8001/his/cfr.html>
- Thomas (text of pending legislation and Congressional Record): <http://thomas.loc.gov/>
- Corps Office of Policy Homepage: <http://www.usace.mil/cecw-a/pglindex.html>
- The Defense Environmental Network & Information eXchange (DENIX) was designed to provide DoD personnel in the environmental security arena, timely access to environmental legislative, compliance, restoration, cleanup, safety & occupational health, security, and DoD guidance information. DENIX is accessible from: <http://denix.cecer.army.mil/denix/denix.html>. Environmental compliance information such as the Environmental Review Guide for Operations (ERGO) Manual and The Environmental Assessment and Management (TEAM) guide are also available on DENIX. The TEAM guide, published in 1994 by a DoD working group, provides compilations of applicable Federal regulations, synthesizes environmental regulations and describes management actions to be used in conducting environmental compliance assessment.

Subscription Services: There are two electronic resources generally only used by Corps attorneys:

- LEXIS - is an electronic database that provides information on statutes, executive orders, and regulations, which can be searched using key words. It is available by subscription through LEXIS-NEXIS Services.

Subscriber and hourly access fees vary depending upon the service and subscription option selected. Within the Corps, this service is usually used by offices of counsel.

- WESTLAW - is an electronic database that provides access to the USCA, federal regulations, case law, and administrative materials, as well as other law information and specialized data bases. West Publishing Company has a contract with the Library of Congress through the Federal Library and Information Center Committee (FLICC). The Army Corps of Engineers has an agreement with FLICC which has contracted with West Publishing Company for WESTLAW under a network arrangement. Corps offices can subscribe to WESTLAW; subscriber and hourly access fees vary depending upon the subscription option selected. Within the Corps, this service is usually used by offices of counsel.

CITATIONS USED IN THIS ENVIRONMENTAL DESK REFERENCE

1. Why are citations for laws provided as United States Code (U.S.C.) in the profiles of this desk reference, instead of as Public Law (P.L.) numbers? A description of the two different systems of citation will help answer this question.

The Public Law is a general classification of law. Public Laws are acts which relate to the public as a whole. When passed, they are given a **Public Law** number and then given a **Statutes at Large** number. Then the law is codified in the **United States Code (U.S.C.)**.

Subsequent laws, with new Public Law numbers, may amend the original law. Sometimes the amendment is an extensive revision of the entire law, and other times only minor changes are made. Also, the legislative title of the amending laws may be the same or different. In each instance however, a new Public Law number is assigned to the law. In addition, some of the amendments to a given law appear as parts of other laws not related to the "parent" law. This makes it particularly difficult to obtain up-to-date information on an environmental law by using Public Law citations. For example, in developing this desk reference, over a dozen Public Laws were identified that amend the "Clean Water Act" (the Clean Water Act is just one of the amendments to the Federal Pollution Control Act which was originally passed in 1948). Usually, amendments contain only the modified portion(s) of the law. Special printings of a law, with the cumulative amendments, at the time of printing, are sometimes available, but not always.

Another system, the **United States Code, Annotated (U.S.C.A.)**, is a more practical source of the text of laws that includes amendments to date. The Code contains a consolidation and codification of the general laws of the United States. The laws are organized by subject matter under 50 title headings. These titles are shown in Table 1. The U.S.C.A. provides the current status of the laws, as amended. It is intended to present the laws in a concise form so that one does not have to go to the many volumes of the Statutes at Large containing the individual amendments.¹

In the U.S.C.A., a statute is found under a designated title, chapter and section number in the principal volume, and any recent amendments or changes will be found under the same title, chapter and section number in the supplementary pocket part. The U.S.C.A. is kept up to date via Cumulative Annual

¹Willett, E.F., *How Our Laws are Made*, House Document No. 101-139. 1990.

Pocket Parts, also known as Supplemental Pamphlets. *Citations from the U.S.C.A. are usually presented as U.S.C., with the "annotated" being implied. The U.S.C. citations in this desk reference are actually from the annotated volumes.*

2. What are other citations that are sometimes used to refer to a law or the implementing regulations of a law?

Statutes at Large (STAT) is an official compilation of the acts and resolutions of each session of Congress. It is published by the Office of the Federal Register in the National Archives and Records Service. The Statutes at Large are a chronological arrangement of the laws exactly as they have been enacted; the laws are not arranged according to their subject matter, and the Statutes at Large do not show the current status of an earlier law that has been amended one or more times.

Code of Federal Regulations (C.F.R.) is the annual cumulation of executive agency regulations published in the daily Federal Register, combined with regulations issued earlier that are still in effect. The C.F.R. is divided into 50 titles, each representing a broad subject area. The C.F.R. titles are shown in Table 2. The C.F.R. contains the general body of regulatory laws governing practice and procedure before federal administrative agencies. Some of the regulations developed by HQUSACE, that affect the general public or other agencies, are codified in the C.F.R. A number of the codified regulations of other agencies that affect the Corps Civil Works program are identified in this desk reference. Citation format is: "33 C.F.R. 325", where 33 is the title number, and 325 is the section number.

Federal Register (F.R.): Federal agencies publish documents in the Federal Register. The F.R. and the C.F.R. publications must be used together to determine the latest version of any given rule. The F.R. is published daily and includes texts of new agency rules and regulations, proposed rules and regulations, and a calendar of the meetings and proceedings of rule-making bodies. The F.R. also publishes the texts of executive orders and publications. The F.R. groups documents under 5 headings: Presidential Documents, Rules and Regulations, Proposed Rules, Notices, and Sunshine Meetings. The section on Rules contains a summary of each rule, and cites the title and chapter numbers that are affected. After final rules are published in the F.R., they are eventually codified in the C.F.R.

CORPS GUIDANCE DOCUMENTS

Official Corps guidance publications:

ENGINEER REGULATIONS (ER)
ENGINEER CIRCULARS (EC)
ENGINEER MANUALS (EM)
ENGINEER TECHNICAL LETTERS (ETL)
ENGINEER PAMPHLETS (EP)

ER 1105-2-100, "Guidance for Conducting Civil Works Planning Studies" is commonly referred to as the "Planning Guidance Notebook" or the "PGN" (pronounced "pigeon").

Codified policy and implementing guidance:

Corps guidance and policy developed by the Corps that has implications for other agencies or the general public is first published in the Federal Register for comment; the final rules are also published in Federal Register, and later in the Code of Federal Regulations.

Supplemental guidance:

The Corps supplements its regulations with Guidance Letters that provide guidance to districts on specific issues:

POLICY GUIDANCE LETTERS (PGL) (See: <http://www.usace.mil/cecw-a/pglindex.html>)
REGULATORY GUIDANCE LETTERS (RGL)
DREDGING GUIDANCE LETTERS (DGL)
COUNSEL GUIDANCE LETTERS (CGL)
PLANNING GUIDANCE LETTERS (PGL)
POLICY GUIDANCE MEMORANDA (PM)

ABANDONED SHIPWRECK ACT OF 1987

LEGISLATIVE TITLE: Abandoned Shipwreck Act of 1987

UNITED STATES CODE CITATION: 43 U.S.C. §§ 2101- 2106

OTHER TITLES AND POPULAR NAMES: ASA

SUMMARY: This law for the United States to assert ownership over any abandoned shipwreck in State waters and submerged lands. Submerged lands means lands that are "lands beneath navigable waters" as defined in Section 2 of the Submerged Lands Act (43 U.S.C. 1301). It also provides guidelines for the designation of abandoned shipwrecks as national historic parks, recreation areas and marine biological sanctuaries. The act provides Federal authority to transfer ownership of abandoned shipwrecks to the state on whose submerged lands the wreck is located. The act provides Federal protection to any shipwreck that meets the criteria for eligibility for inclusion in the National Register for Historic Places. Therefore, disposal of dredged or other material on or in the near vicinity of such wrecks is prohibited.

The Department of the Interior administers the act through regulations issued by the National Park Service. The act requires that study and evaluation standards be promulgated by the National Park Service. Federal agencies and States are to develop companion regulations. The Corps does not have a specific companion regulation at this time, but uses the National Park Service's Abandoned Shipwreck Act Guidelines, and has integrated consideration of shipwrecks into the general planning, engineering, operations, and regulatory Corps regulations cited below. Basically, for Federal actions, the Section 106 process, National Historic Preservation Act, applies, as set forth in implementing regulations 36 C.F.R. 800. The act allows for appropriate public and private sector recovery of shipwrecks consistent with the protection of historical values and environmental integrity of the shipwrecks and the sites.

RESOURCES COVERED: Historic and cultural properties; abandoned shipwrecks, cargo, and other contents.

COMPLIANCE REQUIREMENTS: Corps reports and NEPA documents must show evidence of consultation with the State Historic Preservation Officers (SHPOs) and, if necessary, the Advisory Council on Historic Preservation (ACHP) for significance and impact determinations, and agreements about mitigation stipulations, if required. If public or private sector recovery is proposed for a shipwreck or submerged site under Corps jurisdiction, a permit must be obtained from the appropriate Corps office under the Archaeological Resources Protection Act of 1979, as amended.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: National Park Service, SHPOs, and appropriate public and private sector interests (Secretary of Commerce, ACHP, sport divers, professional dive operators, archaeologists, historic preservationists, fishermen).

Process: Submerged resources are considered by the Corps in accordance with Section 106 of the National Historic Preservation Act, and as set forth in the implementing regulation 36 C.F.R. 800. The act authorizes States to issue permits to non-Federal entities to work with submerged resources.

However, since States can not issue permits to Federal agencies under this act or the National Historic Preservation Act, Corps offices coordinate with State officials and, to the extent practicable, provide information similar in scope to that required under the State permit process.

Product: Determinations of significance (National Register of Historic Places) and effect are made in consultation with the SHPO and ACHP, and plans are made to preserve (avoid) or recover (mitigate) significant remains that would be affected by Corps activities.

Timing/Schedule: Depending upon available information and the nature and significance of resources, effect determinations may take 30 days (No Effect) to over a year. Studies and significance and effect determinations should be completed during the feasibility phase. Mitigation is ordinarily done just prior to construction.

CORPS GUIDANCE When Sec. 106 of the National Historic Preservation Act is triggered, the following regulations apply:

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 7, Environmental Planning and Evaluation Considerations

Civil Works Engineering: None specific to this statute.

Civil Works Construction: ER 1130-2-438, Project Construction and Operation, Historic Preservation Program

Civil Works Operations: ER 1130-2-438, Project Construction and Operation, Historic Preservation Program [Note: Will be superseded by material in ER 1130-2-540, chapter 6, and EP 1130-2-540 later in 1996]; Dredging Guidance Letter No. 89-01, Policy and Procedures for the Conduct of Underwater Historic Resource Surveys for Maintenance Dredging and Disposal Activities

Regulatory: 33 C.F.R. 325, Appendix C, Processing Department of the Army Permits, Procedures for Protection of Historic Properties.

FOR MORE INFORMATION SEE: None identified

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: National Park Service

Guidance Title: Guidelines for Recreational Use and Preservation of Abandoned Shipwrecks and to Administer and Manage Underwater Resources; National Register Nominations for Submerged Resources; Historic American Engineering Record Guidelines for Ships

Federal Register Citation: Abandoned Shipwreck Act Guidelines (proposed regulations) F.R. Vol. 54, No. 63, Tuesday, April 4, 1989; Final guidelines, F.R. Vol. 55, No. 50116, December 4, 1990; Correction, F.R. Vol 55 No. 51528, December 14, 1990; Final guidelines correction, F.R. Vol. 56, No. 7875, February 26, 1991.

Code of Federal Regulations Citation: None applicable

MANAGEMENT OPPORTUNITIES: Management of abandoned shipwrecks and submersed resources is vested with the Secretary of Interior, National Park Service and delegated SHPO. The Corps, while having no direct authority, has limited opportunity to work in coordination with the Secretary of Interior and SHPOs on Corps projects to incorporate elements within the design and operations that facilitate access and utilization of cultural resources by recreational and historical interests.

AMERICAN FOLKLIFE PRESERVATION ACT

LEGISLATIVE TITLE: American Folklife Preservation Act

UNITED STATES CODE CITATION: 20 U.S.C. §§ 2101 - 2107

OTHER TITLES AND POPULAR NAMES: None identified.

SUMMARY: This act establishes, in the Library of Congress, an American Folklife Center to preserve and present American folklife. The Center is to encourage research and training, foster awareness, and promote performances, festivals, exhibits, workshops, and educational programs. The act does not routinely affect Corps day-to-day operations. However, the Library of Congress could contact the Corps and request use of a site, or objects.

RESOURCES COVERED: Historic and Cultural Properties; American folklife - traditional expressive culture within the various groups in the United States.

COMPLIANCE REQUIREMENTS: Use of sites or objects would be regulated under other historic preservation laws regarding impacts and curation standards.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Library of Congress

Process: Coordination

Product: Loan of cultural items

Timing/Schedule: None specified

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 7, Environmental Planning and Evaluation Considerations.

Civil Works Engineering: None specific to this statute

Civil Works Construction: None specific to this statute

Civil Works Operations: None specific to this statute

Regulatory: None specific to this statute

FOR MORE INFORMATION SEE: None identified

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: None identified

Guidance Title: None identified

Code of Federal Regulations Citation: None

MANAGEMENT OPPORTUNITIES: The Corps may participate in Library of Congress and American Folklife Center educational programs by providing information, records, displays, exhibits, and artifacts.

AMERICAN INDIAN RELIGIOUS FREEDOM ACT

LEGISLATIVE TITLE: American Indian Religious Freedom Act

UNITED STATES CODE CITATION: 42 U.S.C. § 1996

OTHER TITLES AND POPULAR NAMES: None identified.

SUMMARY: This act that states the policy of the U.S. is to protect and preserve for American Indians, Eskimo, Aleut, and native Hawaiians, their inherent rights of freedom to believe, express, and exercise traditional religions. These rights include, but are not limited to, access to sites, use and possession of sacred objects, and the freedom to worship through ceremony and traditional rites. A related law, the National Historic Preservation Act (16 U.S.C. 470) greatly strengthens the requirements for Federal agencies to ensure that tribal values are taken into account. Tribes are given greater control over patrimonial objects and are allowed to establish their own culturally-specific criteria of significance.

RESOURCES COVERED: Historical and Cultural Properties; Sacred sites, use and possession of sacred objects, and traditional Native American ceremonies and rites.

COMPLIANCE REQUIREMENTS: Federal agencies must make reasonable efforts to locate and coordinate with organizations, and communities of groups covered by the Act to insure that religious rights are accommodated during project planning, construction, and operation. Efforts must be documented in Corps project reports and NEPA documents.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Organizations, and communities of groups covered by the Act

Process: Formal and informal correspondence and meetings.

Product: Presidential report to Congress regarding changes in administrative policy and procedure in fulfillment of this act. If sacred sites and objects are involved for a Federal project, the product may be an agreement between the Federal agency and organizations and communities of groups covered by the Act regarding access and use.

Timing/Schedule: Consultation begins, whenever the Federal agency is made aware of relevant resources, or upon the request of traditional organizations and communities of groups covered by the Act.

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 7, Environmental Planning and Evaluation Considerations

Civil Works Engineering: None specific to this statute.

Civil Works Construction: ER 1130-2-438, Project Construction and Operation, Historic Preservation Program [Note: ER 1130-2-438 will be superseded by material in ER 1130-2-540, chapter 6, and EP 1130-2-540 later in 1996].

Civil Works Operations: ER 1130-2-438, Project Construction and Operation, Historic Preservation Program [Note: ER 1130-2-438 will be superseded by material in ER 1130-2-540, chapter 6, and EP 1130-2-540 later in 1996].

MANAGEMENT OPPORTUNITIES: None identified.

ANADROMOUS FISH CONSERVATION ACT

LEGISLATIVE TITLE: Anadromous Fish Conservation Act

UNITED STATES CODE CITATION: 16 U.S.C. §§ 757a to 757g

OTHER TITLES AND POPULAR NAMES: None identified.

SUMMARY: This act authorizes the Secretary of the Interior to enter into a cooperative agreements with the States and other non-Federal interests for the conservation, development, and enhancement of the Nation's anadromous fishery resources that are subject to depletion from water resources developments and other causes, or with respect to which the Federal government has made conservation commitments concerning such resources by international agreements. [Administration of the program authorized by this Act was transferred to the Secretary of Commerce by Reorg. Plan No. 4 of 1970 (historical note accompanying 16 U.S.C. 755; 35 F.R. 15627).] The program emphasizes the conservation and enhancement of anadromous fishery resources and the fish in the Great Lakes and Lake Champlain that ascend streams to spawn. The Act established a grant program to provide funding to states for habitat or fish enhancement work, and specifies cost-sharing and appropriation provisions.

RESOURCES COVERED: Anadromous fish, their habitat and fishery resources in the Great Lakes and Lake Champlain that ascend streams to spawn are specifically mentioned. With the exception of the State of Idaho, projects in the Columbia River system are specifically excluded from the grant program authorized by this Act (16 U.S.C. 757e). Grant funds are not to be used for law enforcement, public relations, or to construct facilities primarily for the commercial harvest, handling and processing of fishery products.

COMPLIANCE REQUIREMENTS: No compliance requirements for the Civil Works program specified in this Act.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: There are no consultation requirements specified in the Act. Consultation, if necessary, would be with the state agencies that have received grants under the terms of the Act, as well as the granting agency.

Process and Product: Guidance on applying for the grants is provided in 50 C.F.R. 401. States provide progress and final reports to National Marine Fishery Service (NMFS) regional offices.

Timing/Schedule: Progress reports are prepared periodically, financial reports are prepared annually to the NMFS Regional offices.

CORPS GUIDANCE

Civil Works Planning: ER 1150-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 7, Environmental Planning and Evaluation Considerations.

Civil Works Engineering: None specific to this statute
Civil Works Construction: None specific to this statute
Civil Works Operations: None specific to this statute
Regulatory: None specific to this statute

FOR MORE INFORMATION SEE: Catalog of Federal Domestic Assistance, Chapter 11.405, General Services Administration. This catalog is a compendium of Federal programs, projects, services and activities which provide assistance or benefits to the American public. It contains financial and nonfinancial assistance programs administered by departments and established by the Federal Government. Chapter 11.405 specifically discusses the scope, procedures and eligibility requirements for the grant program authorized by this Act.

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: National Marine Fisheries Service (NMFS) and U.S. Fish and Wildlife Service. Administration of the program authorized by this Act was transferred to the Secretary of Commerce by Reorg. Plan No. 4 of 1970 (16 U.S.C. 755).

Guidance Title: NMFS - Departmental Administrative Order 203-26; 50 C.F.R. Part 401.

Code of Federal Regulations Citation: 50 C.F.R. 401

MANAGEMENT OPPORTUNITIES: Under the program authorized by this Act, money is granted to state agencies and/or non-Federal interests. Funds can be used to improve spawning areas, install fishways, construct fish protection devices and hatcheries, conduct research to improve management, and increase anadromous fish resources. At the earliest stage in planning, when identifying problems and opportunities, planners should determine if opportunities exist to contribute to the objectives of this Act, including opportunities to complement state anadromous fishery habitat restoration efforts. Also, participants in the grant program prepare reports on their activities; this information may be useful in Corps reconnaissance or feasibility studies.

This Act authorizes the Secretary (of Interior originally, now Commerce) to conduct studies that contribute to the objectives of the Act, and make such recommendations as the Secretary determines to be appropriate, regarding the development and management of any stream or other body of water for the conservation and enhancement of anadromous fishery resources, and the fish in the Great Lakes and Lake Champlain that ascend streams to spawn. *The reports on such studies and the recommendations of the shall be transmitted to the States, the Congress, and the Federal water resources construction agencies for their information.* This Act shall not be construed as *authorizing the formulation or construction* of water resources projects, *except* that water resources projects which are determined by the Secretary to be needed solely for the conservation, protection, and enhancement of such fish *may be planned and constructed by the Corps of Engineers, (other agencies were also listed) or by the States, with funds made available by the Secretary under this Act and subject to the cost-sharing and appropriations provisions this Act* (16 U.S.C. 757b). The Corps can examine the recommendations in these reports in light of ecosystem restoration opportunities discussed in EC 1105-2-210, Ecosystem Restoration in the Civil Works Program, taking into account current Administration policies and budgetary priorities.

ANTIQUITIES ACT OF 1906

LEGISLATIVE TITLE: Antiquities Act of 1906

UNITED STATES CODE CITATION: 16 U.S.C. §§ 431 - 433

OTHER TITLES AND POPULAR NAMES: None identified.

SUMMARY: The Act provides for the protection of historic and prehistoric ruins and objects of antiquity on lands owned or controlled by the Federal Government, and authorizes scientific investigation of antiquities on Federal lands, subject to permits and other regulatory requirements. Paleontological resources are covered by this Act. The Act also provides for criminal penalties for anyone desecrating, injuring, excavating, or otherwise destroying any historic or prehistoric ruin or monument without express Federal permission. Authorizes the President to declare by public proclamation historic and prehistoric landmarks as national monuments. Federal agencies are permitted to transfer objects of antiquity to properly qualified institutions.

RESOURCES COVERED: Historical and Cultural Properties; Historic or prehistoric ruins or monuments, or any objects of antiquity, including landmarks, prehistoric structures, and landmarks.

COMPLIANCE REQUIREMENTS: None. The Antiquities Permit has been replaced by the permit required under the Archeological Resources Protection Act of 1979.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Designated agency representatives from the Departments of Interior, Agriculture and Army may issue permits to reputable museums, universities, colleges, or other recognized scientific or educational institutions.

Process: Persons must apply for permits for the examination of ruins, the excavation of archeological sites, and the gathering of objects of antiquity upon lands under the jurisdiction of the Secretaries of the Interior, Agriculture, and Army.

Product: Permit - the permit required under this act has been replaced by the Archeological Resources Protection Act permit.

Timing/Schedule: Prior to any work.

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 7, Environmental Planning and Evaluation Considerations

Civil Works Engineering: None specific to this statute.

Civil Works Construction: ER 1130-2-438, Project Construction and Operation, Historic Preservation Program [Note: ER 1130-2-438 will be superseded by material in ER 1130-2-540, chapter 6, and EP 1130-2-540 later in 1996].

Civil Works Operations: ER 1130-2-438, Project Construction and Operation, Historic Preservation Program [Note: ER 1130-2-438 will be superseded by material in ER 1130-2-540, chapter 6, and EP 1130-2-540 later in 1996].

Regulatory: 33 C.F.R. 325, Appendix C, Processing Department of the Army Permits

FOR MORE INFORMATION SEE: Archaeological Resources Protection Act of 1979, as amended

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Department of Interior

Guidance Title: None identified

Code of Federal Regulations Citation: 43 C.F.R. 3

MANAGEMENT OPPORTUNITIES: The President is authorized to declare historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Government of the United States to be national monuments and to afford them proper protection. Further, the Corps can pursue national monument status for significant historic properties under agency control. If obtained, appropriate protection is to be provided to such properties. The Act states that the Secretary of the Army may grant permits for the examination of ruins, the excavation of archaeological sites, and the gathering of objects of antiquity upon lands under his control. Permits should only be granted to properly qualified individuals and the work should be undertaken for the benefit of reputable museums, universities, colleges, or other recognized scientific or educational institutions.

ARCHEOLOGICAL RESOURCES PROTECTION ACT OF 1979

LEGISLATIVE TITLE: Archeological Resources Protection Act of 1979

UNITED STATES CODE CITATION: 16 U.S.C. § 470 et seq

OTHER TITLES AND POPULAR NAMES: ARPA

SUMMARY: The Act was enacted to preserve and protect resources and sites on Federal and Indian lands. It fosters cooperation between governmental authorities, professionals, and the public. The Act prohibits the removal, sale, receipt, and interstate transportation of archaeological resources obtained illegally (i.e., without permits) from public or Indian lands and authorizes Federal agency permit procedures for investigations of archeological resources on public lands under the agency's control. Permits are required to excavate and remove those cultural remains covered by the Act.

The purpose of the ARPA permit process is to insure that individuals and organizations wishing to work with Federal resources have the necessary professional qualifications, and that Federal standards and guidelines for research and curation are followed. The process also allows the SHPO to review and comment on ARPA permit applications. Federal agencies do not issue ARPA permits to themselves or to contractors. The Scope of Work and contractors proposal, which constitute the contract, insure that contractors comply with Federal standards and guidelines. The ARPA permit replaces the permit required by the Antiquities Act of 1906.

RESOURCES COVERED: Historical and Cultural Properties; Any material remains of past human life or activities which are of archaeological interest. Material shall include but not be limited to: pottery, basketry, bottles, weapons, weapon projectiles, tools, structures or portions of structures, pit houses, rock paintings, rock carvings, intaglios, graves, human skeletal materials, or any portion or piece of any of the foregoing items.

COMPLIANCE REQUIREMENTS: ARPA requires Federal agencies to conduct archaeological investigations on lands under their jurisdiction to determine the nature and extent of the protected cultural resources present, and to help manage extant resources in accordance with permit and enforcement provisions of the Act.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: State Historic Preservation Officer (SHPO)

Process: Persons wishing to excavate or remove any archeological resource located on public lands or Indian lands must apply for a permit from the appropriate Federal land manager as defined by the Act and its implementing regulations. The application must include information on the time, scope, location, and specific purpose of the proposed work, and describe professional qualifications and anticipated scientific contributions. Permit applications are approved by the Federal land managers in consultation with their historic preservation staff and the SHPO. Criminal penalties are also established for violations of the Act.

Product: The applicant receives a permit, while, as a condition of the permit, the agency receives a report of investigations and documentation of appropriate curation of materials.

Timing/Schedule: No time frame is established for permit processing. The permit must be received prior to any archeological work being done on Federal land.

BALD EAGLE PROTECTION ACT

LEGISLATIVE TITLE: Bald Eagle Protection Act

UNITED STATES CODE CITATION: 16 U.S.C. §§ 668, 668 note, 668a-668d

OTHER TITLES AND POPULAR NAMES: Bald Eagle Act; Bald and Golden Eagle Protection Act

SUMMARY: This Act prohibits wantonly possessing, selling, transporting, or trading of a bald or golden eagle or eagle part, alive or dead. Whoever so violates will be subject to criminal or civil penalties. The statute authorizes searches, seizures and arrests for enforcement purposes. The Secretary of the Interior can issue a permit for taking, possession and transporting of bald and golden eagles for scientific, exhibition, and religious purposes, and may permit the taking of golden eagle nests if they interfere with resource development or recovery operations 16 (U.S.C. 668(a)).

RESOURCES COVERED: Wildlife; American or golden eagle, alive or dead and any part, nest or egg.

COMPLIANCE REQUIREMENTS: The Endangered Species Act (16 U.S.C. 1531-1542) contains requirements on Corps projects concerning bald and golden eagles. See Section 7 coordination and consultation of the Endangered Species Act for additional requirements regarding bald eagles.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: See requirements under the Endangered Species Act

Process: See requirements under the Endangered Species Act

Product: Permits for the taking, possession and transportation of eagles for scientific, religious, conservation or agricultural purposes.

Timing/Schedule: See requirements under the Endangered Species Act

Guidance Title: Interagency Cooperation- ESA of 1973, as amended; Final Rule

Code of Federal Regulations Citation: 50 C.F.R. 402; Exemption Procedures 50 C.F.R. 450

MANAGEMENT OPPORTUNITIES: Opportunities to provide protection to bald and golden eagles may be possible as part of ecosystem restoration initiatives, or as part of natural resource management initiatives.

CLEAN AIR ACT

LEGISLATIVE TITLE: Clean Air Act

UNITED STATES CODE CITATION: 42 U.S.C. §§ 7401-7671g

OTHER TITLES AND POPULAR NAMES: CAA; Air Pollution Prevention and Control Act

SUMMARY: The purpose of this Act is to protect public health and welfare by the control of air pollution at its source, and to set forth primary and secondary National Ambient Air Quality Standards (NAAQS) to establish criteria for States to attain, or maintain, these minimum standards. Section 118 (42 U.S.C. 7418) specifies that each department, agency, and instrumentality of the executive, legislative, and judicial branches of the Federal Government (1) having jurisdiction over any property or facility or (2) engaged in any activity resulting, or which may result, in the discharge of air pollutants, shall be subject to, and comply with, all Federal, State, interstate, and local requirements respecting the control and abatement of air pollution in the same manner, and to the same extent as any non-governmental entity.

States are responsible for developing a State Implementation Plan (SIP) for the prevention, control and abatement of air pollution according to National Ambient Air Quality Standards (NAAQS). National Emissions Standard for Hazardous Air Pollutants (NESHAPs) and Federal emissions standards for motor vehicles are largely determined by the Environmental Protection Agency. Section 176(c) (42 U.S.C. 7596(c)) requires that Federal agencies do not (1) engage in, (2) support in any way or provide financial assistance for, (3) license or permit, or (4) approve, any activity which does not conform to a SIP. EPA has published its final General Conformity Rule (40 C.F.R. Part 93) to implement Section 176(c) addressing how Federal agencies are to demonstrate that activities in which they engage, support, permit, or approve conform to CAA State Implementation Plans. The EPA rule contains a number of "exempted" or "presumed to conform" activities which include a number of Corps activities. CAA conformity determinations will be completed during feasibility studies and included in feasibility reports.

Section 309 (42 U.S.C. 7609) calls for the Administrator of the EPA to review and comment on the environmental impact of (1) legislation proposed by any Federal agency, (2) newly authorized Federal projects for construction and any major agency action, and (3) proposed regulations published by any department or agency of the Federal Government. The Act also provides for financial and technical assistance to State agencies for research and training in air pollution control and prevention. Technical advisory committees are established to provide support, as well as publish information on air pollution control techniques. A Federal program is established for research into alternative fuel technology.

RESOURCES COVERED: Air; air pollution; criteria pollutants (sulphur dioxide, particulate matter, carbon monoxide, volatile organic compounds, nitrogen dioxide, lead), ozone depleting substances, and the 189 hazardous air pollutants regulated under Section 112 of the Act (42 U.S.C. 7412).

COMPLIANCE REQUIREMENTS: Corps activities resulting in the discharge of air pollutants must conform to NAAQS and SIPs, unless the activity is explicitly exempted by EPA regulations. Section 173 (42 U.S.C. 7503) requires a permit from EPA to construct or operate a new or modified major stationary source. Major stationary sources are required to obtain a Title V Operating Permit

in addition to permits to construct. Maximum achievable control technology (MACT) must be attained for sources for which a MACT standard has been promulgated. It is important to consult with State air regulatory personnel to determine regulatory requirements, as many non-major sources that do not require a Federal permit may require operating permits under State programs.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: State and local agencies; EPA. As of this time, all but a few States have approved or proposed for approval Title V operating permit programs. Permits required under State SIPs are also done at the State level.

Process: EPA reviews and comments upon the environmental impact of proposed legislation and newly authorized projects for construction and any other major agency action. Permit must be secured to construct or operate new or modified major stationary source in certain areas of the U.S. SIPs are the primary mechanisms used by the state to ensure compliance with EPA area wide standards.

Product: EPA Permits for stationary sources of air pollution.

Timing/Schedule: Permitting authority must approve or disapprove a complete permit application within 18 months of the date it receives the application. At least one-third of the permit applications will be acted upon within a three year period.

CLEAN WATER ACT

LEGISLATIVE TITLE: Clean Water Act

UNITED STATES CODE CITATION: 33 U.S.C. 1251 et seq.²

OTHER TITLES AND POPULAR NAMES: Water Pollution Control Act, Federal Water Pollution Control Act Amendments; Water Quality Act; FWPCA; CWA

SUMMARY: This Act is the principle law governing pollution control and water quality of the Nation's waterways. The objective of this Act is to restore and maintain the chemical, physical and biological integrity of the Nation's waters (33 U.S.C. 1251). The Act has been amended numerous times and given a number of titles and codification (see footnote below). It was originally enacted as the Water Pollution Control Act in 1948 (P.L. 80-845), and was totally revised by the 1972 amendments, the Federal Water Pollution Control Act Amendments (P.L. 92-500). The 1972 amendments gave the Act its current form, and established a national goal of eliminating all pollutant discharges into U.S. waters by 1985 and an interim goal of making the waters safe for fish, shellfish, wildlife and people by July 1, 1983 (86 Stat. 816, 33 U.S.C. 1251). The 1977 amendments (the Clean Water Act of 1977 (P.L. 95-217)) gave the Act its current title. Additional amendments were enacted in 1981 (Municipal Wastewater Treatment Construction Grants Amendments (P.L. 97-117)) and in 1987 (Water Quality Act of 1987 (P.L. 100-4). At the time of publication of this desk reference, there were ongoing efforts to again amend the Act.

The Act provides standards and enforcement, a number of regulatory programs with permits and licenses, grants and revolving funds, as well as general provisions and provisions for research and related programs. Because of the extensiveness of the Act and the complexity of the numerous implementing regulations and guidance documents that have been developed in response to the various provisions of the Act, it is not possible to provide a detailed summary of these provisions, documents, policies and guidance in this profile. Instead, those provisions particularly relevant to the Civil Works program are briefly summarized below. Corps personnel requiring more detailed information are encouraged to refer to Corps guidance documents, interpretation from Corps counsel and seek guidance from HQUSACE.

Reservoir Storage for Streamflow Augmentation. Section 102(b) of the 1972 amendments (33 U.S.C. 1252) provided that in the planning of any Corps reservoir, consideration shall be given to inclusion of storage for regulation of streamflow. Such storage is not to be provided as a substitute for adequate treatment or other methods of controlling waste at the source.

State Water Quality Certification. Section 401 of the 1972 amendments (33 U.S.C. 1341) requires certification from the State or interstate water control agencies that a proposed water resources project is in compliance with established effluent limitations and water quality standards. Corps projects, as well as applicants for Federal permits or licenses are required to obtain this certification.

² The law was originally codified at 33 U.S.C. 466 et seq. and later classified as 33 U.S.C. 1151 et seq. Because of extensive amendment and reorganization of the law's provisions by PL 99-500 in 1972, codification was transferred to 33 U.S.C. 1251 et seq.

National Pollution Discharge Elimination System)(NPDES). Section 402 of the 1972 amendments (33 U.S.C. 1342) establishes conditions and permitting for discharges of pollutants under the National Pollution Discharge Elimination System)(NPDES), and replaces the Corps Refuse Act Permit Program under the Act of 1899 without repealing the Act.

Ocean Discharges. Section 403 of the 1972 amendments (33 U.S.C. 1343) addresses criteria and permits for discharges into the territorial seas, the contiguous zone, and the oceans.

Permits for Dredged or Fill Material. Section 404 (33 U.S.C. 1344) authorizes a separate permit program for the disposal of dredged or fill material in the Nation's waters, to be administered by the Secretary of the Army, acting through the Chief of Engineers. Under Section 404 of the amended Act, the Corps of Engineers retains primary responsibility for permits to discharge dredged or fill material into waters of the United States. The Act also defines the conditions which must be met by Federal projects before they may make discharges into the Nation's waters. Under the program, permits are to be issued, after notice and opportunity for public hearings for disposal of such material at specified sites. Sites are to be selected in compliance with guidelines developed by EPA in conjunction with the Secretary of the Army. EPA is authorized to forbid or restrict the use of specified areas whenever it determines that disposal of material at a specific site would have an unacceptable adverse effect on municipal water supplies, shellfish, and fishery areas, or recreational activities.

RESOURCES COVERED: Waters of the United States, but does not include groundwater; Pollutants discharged into the waters of the U.S. and water quality that provides for the protection and propagation of fish, shellfish, and wildlife and provides for recreation.

Jurisdiction under Section 404: Traditionally navigable waters; all interstate waters, including interstate wetlands, all other waters including lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds, the use, degradation or destruction of which could affect interstate or foreign commerce; all impoundments of water that fit these definitions; territorial seas; and wetlands adjacent to waters, other than adjacent to other wetlands (33 C.F.R. 328.3). Although some of these definitions were phased in over a period of years, the current regulations provide for the Clean Water Act's jurisdiction over all of the above mentioned waters. Regulatory jurisdiction over isolated waters depends on the Corps finding that the degradation of those waters would impact interstate commerce.

COMPLIANCE REQUIREMENTS:

Reservoir Storage for Streamflow Augmentation. In the planning of any Corps reservoir, consideration shall be given to inclusion of storage for regulation of streamflow. Such storage is not to be provided as a substitute for adequate treatment or other methods of controlling waste at the source. The need for, value of, and the impact of storage for the purpose of water quality control are determined by the Administrator of the Environmental Protection Agency (EPA). The need for and value of storage for regulation of streamflow for other purposes are to be determined by the Corps. The costs of storage are to be non-reimbursable if the benefits are widespread or National in scope.

State Water Quality Certification. Section 401 of the CWA requires that the Corps obtain

certification from the State or interstate water control agencies that a proposed water resources project is in compliance with established effluent limitations and water quality standards. If the State in question has assumed responsibilities for the 404 regulatory program, a State 404 permit would be obtained which would serve as the certification of compliance. Section 404(r) waives the requirement to obtain the State Water Quality certificate if the information on the effects of the discharge are included in an EIS on the proposed project submitted to Congress before the discharge takes place and prior to either authorization of the project or appropriation of construction funds. It is the general policy of the Corps to seek State water quality certification rather than utilizing the Section 404(r) exemption (ER 1105-2-100). Applicants for Corps permits must obtain certification from the State for activities involving discharges.

Civil Works Projects. Corps projects involving the discharge of dredged or fill material into the waters of the United States, shall be developed in accordance with guidelines promulgated by the Administrator of the Environmental Protection Agency (EPA) in conjunction with the Secretary of the Army under the authority of Section 404(b)(1) of the CWA (40 C.F.R. 230) unless the activity is exempt under Section 404(f). Procedures for the evaluation of potential contaminant-related impacts associated with the discharge of dredged material, as required by the Section 404(b) (1) Guidelines are contained in the "Evaluation of Dredged Material Proposed for Discharge in the Waters of the U.S. - Testing Manual" commonly referred to as the Inland Testing Manual which was jointly developed by the EPA and the Corps. The investigations and analysis required by the Section 404(b)(1) Guidelines shall be included in feasibility reports. (ER 1105-2-100)

Dredged Material Testing. Dredged material and sediments beneath the navigable waters proposed for dredging shall be tested and evaluated for their suitability for disposal in accordance with the appropriate guidelines and criteria adopted pursuant to Section 404 of the Clean Water Act and/or Section 103 of the Marine Protection Research and Sanctuaries Act (MPRSA) and supplemented by the Corps of Engineers Management Strategy for Disposal of Dredged Material: Containment Testing and Controls (or its appropriate updated version) as cited in Title 33 C.F.R. Section 336.1.

National Pollution Discharge Elimination System (NPDES) Storm Water Discharge Permit Requirements. Point source discharge of pollutants into "navigable water" is regulated through the NPDES. All point source discharges must have an NPDES permit (33 U.S.C. 1311). All Corps facilities and activities that meet the definition of an "industrial activity" under 40 C.F.R. 122.26 are subject to the requirement to obtain storm water permits. One Corps activity covered by the storm water rule is any construction activity that disturbs five acres or more of land. Storm water permits are issued by the states if they have an authorized NPDES storm water permit program or by the EPA for areas not covered by an authorized state program. Activities regulated under Section 404 of the CWA do not require permits under the NPDES program.

Reservoir Management and Water Control. ER 1110-2-8154, Water Quality and Environmental Management for Corps Civil Works Projects (31 May 1995), establishes a policy for water quality management program at Corps Civil Works Projects. The guidance requires development of water quality management objectives and operational procedures for each water control project in order to ensure that water quality is suitable for authorized project purposes, existing water uses, and public health and safety and is in compliance with applicable Federal water quality criteria and state standards. It discusses the development and implementation of water quality data collection

programs in order to understand and manage the environmental resources of the Corps' water control projects effectively. Consideration is given to both upstream activities and downstream water quality and ecological conditions. (See Management Opportunities).

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Depending on the provisions: Army Corps of Engineers; Environmental Protection Agency; National Marine Fisheries Service; Fish and Wildlife Service; State and Local agencies; Applicants; the Public.

Process: Depending on the provisions: NPDES Permitting Process; Section 401 Water Quality Certification; Section 404 Permitting Process

Product: Depending on the provisions: NPDES Permits; State Water Quality Certificates; Individual, general, or nationwide permits may be issued under the Section 404 program depending upon the type and scope of activity involved.

Timing/Schedule: NPDES applications in response to Section 402 requirements, must be submitted at least 180 days prior to the date the discharge is expected to commence or the current permit is due to expire (40 C.F.R. 122.21). When an application for a regulated activity in waters of the United States is submitted under Section 404 requirements, the Corps will review the application for completeness. Within 15 days of receipt of a complete application the Corps will issue a public notice (if required) soliciting comments or notify the applicant that additional information is needed. All comments will be considered and a decision to issue or deny the application will be made. The length of time between receipt of a complete application and decision to issue or deny the permit varies depending upon the type of permit issued. (See 33 C.F.R. 325)

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 7 and Appendix N.

Civil Works Engineering: ER 1110-2-8154, Water Quality and Environmental Management for Corps Civil Works Projects; ER 1165-2-116 Pollution Control at Civil Works Projects [Note: This regulation will be superseded by ER 200-2-3, Environmental Compliance Policies and EP 200-2-3, Environmental Compliance Guidance and Procedures, to be published later in 1996]; ER 1130-2-307 Dredging Policies and Practices; ER 1165-2-132, Hazardous, Toxic and Radioactive Waste Guidance for Civil Works Projects; 33 C.F.R. 222.

Civil Works Construction: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies; ER 1165-2-132, Hazardous, Toxic and Radioactive Waste Guidance for Civil Works Projects.

Regulatory: 33 C.F.R. 320-330; 33 C.F.R. 330 updated November 22, 1991; The Corps supplements its Regulatory regulations with Regulatory Guidance Letters (RGL's) that provide guidance to districts on specific issues. RGLs are published annually in the Federal Register.

ALSO: CECC-E Memorandum NPDES Storm Water Discharge Permit Requirements, 23 June 1992; CECC-E Memorandum NPDES Storm Water Discharge Permit Requirements, 21 January 1993.

FOR MORE INFORMATION SEE: Marine Protection Research and Sanctuaries Act

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Environmental Protection Agency

Guidance Title: See below

Code of Federal Regulations Citation: 40 C.F.R. 230, Interim Regulations on Discharge of Dredged or Fill Material into Navigable Waters.

MANAGEMENT OPPORTUNITIES: There are numerous opportunities to contribute to the goals of the Act within the Civil Works program. The water quality management programs carried out as part of water control management provide both information about water quality and ecological conditions as well as restoration implementation opportunities associated with Corps reservoir and lock and dam projects. Some of these opportunities can be implemented as part of either day-to-day operations, or special operations. Others may be implemented through the Section 1135 program, examined as part of Section 216 studies, or pursued in conjunction with major rehabilitation studies.

COASTAL BARRIER RESOURCES ACT

LEGISLATIVE TITLE: Coastal Barrier Resources Act of 1982

UNITED STATES CODE CITATION: 16 U.S.C. § 3501 et seq; 12 U.S.C. § 1441 et seq

OTHER TITLES AND POPULAR NAMES: Coastal Barrier Resources Act; CBRA; Coastal Barrier Improvement Act of 1990, CBIA.

SUMMARY: This act reauthorizes and amends the Coastal Barrier Resources Act of 1982 (16 U.S.C. 3501-3510). The original act established a policy that coastal barriers, in certain geographic areas of the U.S., and their adjacent inlets, waterways and wetlands resources are to be protected by restricting Federal expenditures which have the effect of encouraging development of coastal barriers. The act provided for a Coastal Barrier Resources System (CBRS) which identified undeveloped coastal barriers along the Atlantic and Gulf Coasts, including islands, spits, tombolos, and bay barriers that are subject to wind, waves, and tides such as estuaries and nearshore waters (the extent of which is defined by a set of maps approved by Congress dated 30 September 1982). Except for specific exempted projects (e.g. dredging, Federal navigation projects, some habitat management and enhancement efforts), no new Federal expenditures or financial assistance are allowed for areas within the system. The purpose was to minimize loss of human life, wasteful expenditure of federal revenues, and damage to fish, wildlife and other natural resources associated with the development of coastal barriers. The 1990 reauthorization, Coastal Barrier Improvement Act (16 U.S.C. 3501 et seq) provides for the technical revision of maps, modification of boundaries, and additions to the CBRS. A similar resource inventory is to be created for coastal barrier resources of the U.S. Pacific Coast under the Pacific Coast Barrier Resources Study and Mapping. A Coastal Barriers Task Force is created to report on the management of coastal barrier resources.

RESOURCES COVERED: Undeveloped and underdeveloped U.S. coastal barriers, bay barriers, barrier islands, and sediment features that protect the mainland and associated fish, wildlife, and other natural resources.

COMPLIANCE REQUIREMENTS: For activities within the Coastal Barrier Resources System, Corps must document that they are in compliance with this Act. Documentation must be reviewed by the Secretary of the Interior.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: The Secretary of the Interior must review reports for compliance with the Act.

Process: Reports must be sent to the Secretary for review.

Product: Technical revision, modification of Coastal Barrier Resources System; Pacific Coast Barrier Protection Study and Maps; Report to Congress regarding Coastal Barrier Management.

Timing/Schedule: None specified

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 5.

Civil Works Engineering: None specific to this statute

Civil Works Construction: None specific to this statute

Civil Works Operations: None specific to this statute

Regulatory: 33 C.F.R. 220-230

FOR MORE INFORMATION SEE: None identified

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Department of Commerce, States

Guidance Title: None identified

Code of Federal Regulations Citation: 13 C.F.R. 116.40

MANAGEMENT OPPORTUNITIES: Although the Act restricts federal expenditures for coastal barrier development, Section 6(a)(6)(A) contains a broad exemption for projects relating to the study, management, protection, or enhancement of fish and wildlife resources and habitats, including recreational projects. Section 6(a)(6)(G) also exempts nonstructural projects for shoreline stabilization that are designed to mimic, enhance, or restore natural stabilization systems. However, care must be taken when interpreting any exemptions described, as they are limited to projects that are consistent with the purpose of the CBRA as interpreted by the lead agency, Department of Interior. Specific activities undertaken by the Corps under the guise of a CBRA-exemption must be evaluated to ensure that they comply with the limitations described within CBRA and DOIs implementing regulations. The value of CBRS units as fish and wildlife habitats is recognized to be consistent with the purpose of the legislation. Therefore, the full range of Federal financial assistance authorized for protecting and managing fish and wildlife habitats is available, including funding for acquisition of important habitat under authorities such as the Migratory Bird Treaty Act or the Pittman-Robertson Act.

Exceptions to the federal expenditure restrictions also include maintenance or construction of improvements to existing Federal navigational channels and related structures (e.g. jetties), including the disposal of dredge materials related to maintenance and construction. Projects authorized under the Land and Water Conservation Fund Act (16 U.S.C. 4601-4-11) and the Coastal Zone Management Act of 1972 (16 U.S.C. 1451 et seq.) are also not subject to limited and/or restricted Federal expenditure under this act. Management of the Coastal Barrier Resources Act activities is vested with the Department of Interior, Fish and Wildlife (FWS); however, the Corps has the opportunity to coordinate closely with the FWS on Corps projects that lie within the CBRA units for some activities in restoration, shoreline stabilization, and development of fish and wildlife habitat. Additionally, the Corps can offer design and construction assistance to the FWS for fish and wildlife protection and enhancement features in non-Corps related CBRA units.

COASTAL WETLANDS PLANNING, PROTECTION AND RESTORATION ACT

LEGISLATIVE TITLE: Coastal Wetlands Planning, Protection and Restoration Act

UNITED STATES CODE CITATION: 16 U.S.C. §§ 3951 to 3955

OTHER TITLES AND POPULAR NAMES: Breaux-Johnston Act; Breaux Bill; Title III of PL 101-646, "Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990"

SUMMARY: Sections 303 (16 USC 3952) and 304 (16 USC 3953) direct a Task Force chaired by the Secretary of Army to identify a list of coastal wetland restoration projects in Louisiana to provide for the long-term conservation of such wetlands and dependent fish and wildlife populations in order of priority, based on cost-effectiveness of such projects in creating, restoring, protecting, or enhancing coastal wetlands. The quality of such wetlands, and provisions for small-scale projects to demonstrate the use of new techniques or materials for coastal wetlands restoration will also be taken into account (16 USC 3952). The task force is also to develop a plan for a comprehensive approach to restore and prevent loss of wetlands in Louisiana. Section 305 (16 USC 3954) directs the Director of the U.S. Fish and Wildlife Services to make matching grants to any coastal State to carry out cost-shared coastal wetlands conservation projects.

RESOURCES COVERED: Wetlands; fish and wildlife

COMPLIANCE REQUIREMENTS: None specified.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: The Department of the Army, the Department of Interior, Department of Agriculture, Department of Commerce, the Environmental Protection Agency, and the Governor of Louisiana jointly develop annual priority project lists and the restoration plan. The Department of the Army, the Director of the FWS, the Administrator of the EPA and the Governor of Louisiana develop the Louisiana Coastal Wetlands Conservation Plan.

Process: Task force agencies work together on a continuing basis to identify, develop, plan, and implement coastal restoration projects.

Product: Annual priority project lists; a Louisiana Coastal Wetlands Restoration Plan, and a Louisiana Coastal Wetlands Conservation Plan.

Timing/Schedule: Priority project lists are submitted annually. The Louisiana Coastal Wetlands Restoration Plan was completed in 1994. The Louisiana Coastal Wetlands Conservation Plan is under development.

Code of Federal Regulations Citation: None identified

MANAGEMENT OPPORTUNITIES: There may be opportunities for the Corps to contribute to the goals of this Act through ecosystem restoration initiatives (e.g., Section 1135, Section 204 and General Investigation Studies) as well as through other Civil Works programs and activities such as through the authority provided by Section 22, "Planning Assistance to States", when the primary purpose is to complement comprehensive State planning for effective management of its coastal zone. Available data or other information collected in the course of ongoing research, surveys, studies or regulatory activities can be provided the states.

COASTAL ZONE MANAGEMENT ACT

LEGISLATIVE TITLE: Coastal Zone Management Act of 1972

UNITED STATES CODE CITATION: 16 U.S.C. § 1451-1464

OTHER TITLES AND POPULAR NAMES: CZMA; Coastal Zone Act Reauthorization Amendments of 1990 (CZARA); Coastal Zone Management Act Amendments of 1976; Coastal Zone Management Improvement Act of 1980; Coastal Zone Management Reauthorization Act of 1985

SUMMARY: The Act (as amended) establishes a policy: 1) to preserve, protect, develop and where possible, restore and enhance the resources of the Nation's coastal zone for current and future generations; and, 2) to encourage and assist states in their responsibilities in the coastal zone through development and implementation management programs to achieve wise use of the land and water resources of the coastal zone, giving full consideration to ecological, cultural, historic, and esthetic values, as well as the needs for compatible economic development (16 U.S.C. 1452).

Guidelines are set forth to develop a program for the management, beneficial use, protection and development of the land and water resources of the Nation's coastal zones through protection of natural resources, management of development, providing public access, and establishment of pollution control. It delegates responsibility to coastal states to exercise their responsibilities as owners of coastal zone areas to develop and implement management programs to achieve wise use of the land and water resources. [More specific details on the state programs is provided at the end of this summary.] Participation and cooperation is encouraged among state and local governments, interstate regional agencies and Federal agencies to help states manage competing demands in coastal areas. The Secretary of Commerce is authorized to award Federal grants to assist the states in developing and administering management programs land and water use for the coastal zone giving full consideration to ecological, cultural, historic and esthetic values as well as to the need for economic development.

The 1980 amendments provided for the development of *special area management plans* (SAMPs) for areas of the coastal zone considered to be of particular importance. SAMPs are comprehensive plans that provide for natural resource protection and reasonable coastal-dependent economic growth containing a detailed and comprehensive statement of policies; standards and criteria to guide public and private uses of lands and waters; and mechanisms for timely implementation of the designated geographic areas (16 U.S.C. 1453(17)). They are also intended to provide for increased specificity in improved protection of life and property in hazardous areas, including those areas likely to be affected by land subsidence, sea level rise, or fluctuating water levels of the Great Lakes, and improved predictability in governmental decision making (16 USC 1452(3)).

Section 307 (16 U.S.C. 1456(c)(1)(A)) directs Federal agencies proposing activities or development projects including Civil Works activities, whether within or outside of the coastal zone, that are reasonably likely to affect any land or water use or natural resource of the coastal zone, to assure that those activities or projects are consistent, to the maximum extent practicable, with the approved state programs. Non-Federal projects requiring a Federal permit for an activity in or outside of the coastal zone, affecting any land or water use or natural resource of the coastal zone of the state, must provide certification to the permitting agency that the proposed activities complies with the enforceable policies of the states approved program.

No License or permit shall be granted by a Federal agency until the state has concurred with the applicants certification or until the state has waived its right to do so (16 U.S.C. 1456 (c)(3)(A)).

The Coastal Zone Act Reauthorization Amendments (CZARA) of 1990 authorized NOAA to undertake a Coastal Nonpoint Pollution Control Program. Through state and local authorities are to develop and implement management measures for nonpoint source pollution to restore and protect coastal waters (16 U.S.C. 1455(b)).

State management programs are to provide for: (A) the protection of natural resources, including wetlands, flood plains, estuaries, beaches, dunes, barrier islands, coral reefs, and fish and wildlife and their habitat, within the coastal zone; (B) the management of coastal development to minimize the loss of life and property caused by improper development in flood-prone, storm surge, geological hazard, and erosion-prone areas and in areas likely to be affected by or vulnerable to sea level rise, land subsidence, and saltwater intrusion, and by the destruction of natural protective features such as beaches, dunes, wetlands, and barrier islands; (C) the management of coastal development to improve, safeguard, and restore the quality of coastal waters, and to protect natural resources and existing uses of those waters; (D) priority consideration to coastal-dependent uses and orderly processes for siting major facilities related to national defense, energy, fisheries development, recreation, ports and transportation, and the location, to the maximum extent practicable, of new commercial and industrial developments in or adjacent to areas where such development already exists; (E) public access to the coasts for recreation purposes; (F) assistance in the redevelopment of deteriorating urban waterfronts and ports, and sensitive preservation and restoration of historic, cultural, and esthetic coastal features; (G) the coordination and simplification of procedures in order to ensure expedited governmental decision making for the management of coastal resources; continued consultation and coordination with, and the giving of adequate consideration to the views of, affected Federal agencies; (I) the giving of timely and effective notification of, and opportunities for public and local government participation in, coastal management decision making; (J) assistance to support comprehensive planning, conservation, and management for living marine resources, including planning for the siting of pollution control and aquaculture facilities within the coastal zone, and improved coordination between State and Federal coastal zone management agencies and State and wildlife agencies; and, (K) the study and development, where appropriate, of plans for addressing the adverse effects upon the coastal zone of land subsidence and of sea level rise. (16 USC 1452 (2)).

RESOURCES COVERED: All coastal zone areas (described as the coastal waters, and lands therein and thereunder, and the adjacent shorelines strongly influenced by each other and in proximity to shorelines of the several coastal states) including islands, transitional and intertidal areas, salt marshes, wetlands, beaches, estuaries, bays, ponds, lagoons bayous, dunes, barrier islands, reefs, or fish and wildlife habitat. (16 U.S.C. 1453)

COMPLIANCE REQUIREMENTS: If a state has an approved coastal zone management program through the Office of Coastal Zone Management (NOAA), Federal agencies with development projects within the coastal zone, including Civil Work activities, must assure that those activities or projects are consistent to the maximum extent practicable, with the approved state program. Non-Federal applicants proposing activities affecting land or water uses in the coastal zone are required to furnish certification that the activity is in compliance with the approved state coastal zone management plan. Generally, no permit will be issued until the state has concurred with the non-Federal applicant's certification, unless the State has waived its right to do so.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Department of Commerce through its Office of Ocean and Coastal Resource Management, National Oceanic and Atmospheric Administration (NOAA), States

Process: State management plans should be reviewed by the Corps to determine whether Civil Works projects or activities will impact coastal zone resources.

Product: Documentation of a "determination of consistency" with the state coastal zone management program to the appropriate State agency (16 U.S.C 1456).

Timing/Schedule: State must be notified at least 90 days before final approval of project. State has 45 days to respond to Federal notification (CCD and transmittal letter). If final response has not been issued within 45 days from State receipt of CCD, the Federal Agency may presume State consistency. State may be given a 15 day extension to the 45 days.

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 7, Planning Guidance Notebook

Civil Works Engineering: None specific to this statute.

Civil Works Construction: None specific to this statute.

Civil Works Operations: 33 C.F.R. Parts 209, 335, 336, 337, 338

Regulatory: 33 C.F.R. 220-230; 33 C.F.R. 320, 325, 330 (Updated November 29, 1991); Regulatory Guidance Letter 86-10, Special Area Management Plans (SAMPs).

FOR MORE INFORMATION SEE: None identified

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: National Oceanic and Atmospheric Administration (NOAA)

Guidance Title: See below

Code of Federal Regulations Citation: 15 C.F.R. 923, Coastal Zone Management Program Development and Approval Regulations; 15 C.F.R. 930 Subpart D, NOAA Regulations of Federal Consistency; 15 C.F.R. 933, Coastal Zone Management Research and Technical Assistance.

MANAGEMENT OPPORTUNITIES

The Secretary of Commerce administers the program and provides grants to states for coastal resource

improvement programs. The funds can in turn be cost shared as part of a coastal state's share of costs required under any other federal program that is consistent with the purpose of this Act. Improvement opportunities may include:

- a. The preservation or restoration of specific coastal areas of the state because of their conservational, recreational, ecological, or aesthetic values.
- b. The redevelopment of deteriorating and under-utilized urban waterfronts and ports.
- c. Provide access to public beaches and to other public coastal areas and coastal waters.

Corps opportunities exists by partnering with State Coastal Zone Management Offices in providing technical, design, and construction assistance with the improvement projects. Corps participation in the development of SAMPs, ecosystem restoration projects, watershed and other comprehensive studies may contribute to state coastal zone management plan objectives.

The Coastal Nonpoint Pollution Control Program may provide data and other information useful to Corps planning studies and management activities.

COMPREHENSIVE ENVIRONMENTAL RESPONSE, COMPENSATION, AND LIABILITY ACT

LEGISLATIVE TITLE: Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), amended by Superfund Amendments and Reauthorization Act of 1986 (SARA)

UNITED STATES CODE CITATION: 42 U.S.C. § § 9601 - 9675

OTHER TITLES AND POPULAR NAMES: CERCLA; Superfund; SARA.

SUMMARY: CERCLA (PL 96-510), as amended by SARA of 1986 (PL 99-499), provides for liability, compensation, cleanup, and emergency response for hazardous substances released into the environment and cleanup of inactive hazardous substances disposal sites. CERCLA also established a fund which is financed by hazardous waste generators and is used to financially support cleanup and response actions of abandoned hazardous waste sites when no financially responsible party(ies) can be found. Parties responsible for the contamination of sites are liable for all costs incurred in the cleanup and remediation process. The Environmental Protection Agency (EPA) has a hazard ranking system for assessing sites. The most severely contaminated sites are placed on the National Priorities List (NPL). Although federal agency hazardous wastes sites may be placed on the NPL, no federal facilities are eligible to receive financial assistance from the Superfund program. Civil Works projects are not eligible for Defense Environmental Restoration Program (DERP) funding.

RESOURCES COVERED: Sites contaminated with hazardous substances. The definition for hazardous substances is found at 42 USC 9601(14) and includes substances regulated under the Clean Water Act (33 USC 1317), the Resource Conservation and Recovery Act (42 USC 6921), the Clean Air Act (42 USC 7412), and the Toxic Substances Control Act (15 USC 2606). A list of hazardous substances is provided in 40 C.F.R. 302 and 40 C.F.R. 355. CERCLA does not cover petroleum contamination, unless the petroleum has been mixed with hazardous wastes, or a hazardous substance was added to the petroleum after the refining process, as an additive. Oil spills are covered under the Clean Water Act. Contaminated dredged material and sediments beneath navigable waters proposed for dredging may qualify as a hazardous substance unless the materials are designated as part of a federal permitted release.

COMPLIANCE REQUIREMENTS: 42 U.S.C. 9620 provides that Federal facilities and agencies must comply with the substantive and procedural requirements of CERCLA, including liability under §9607. As Federal facilities, Civil Works projects must comply with CERCLA. The remediation requirements can be found in 40 C.F.R. 300. In addition, Federal real property which is transferred by Federal agencies by contract for sale or other transfer must, pursuant to §9620(h), include a contract notice of the type, quantity and time for which any hazardous substance was stored, release, or disposed on the property in accordance with 40 C.F.R. 373, and must place covenants in the deed which warrant that all remedial actions necessary to protect human health and the environment have been taken. Spills must be reported in accordance with the requirements set forth in 40 C.F.R. 302 and 355.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Environmental Protection Agency, State Environmental Agencies, Other Federal agencies, the public.

Process: Typically CERCLA is triggered by (1) the release or substantial threat of a release of a hazardous substance into the environment; or (2) the release or substantial threat of a release of any pollutant or contaminant into the environment which presents an imminent threat to the public health and welfare. In practical terms, the CERCLA investigation and remediation process may be triggered when a Civil Works project is added to the Federal Agency Hazardous Waste Compliance Docket (the Docket) or when there is a release or substantial threat of a release of a hazardous substance into the environment or when the release or substantial threat of a release of any pollutant or contaminant into the environment which presents an imminent threat to the public health and welfare. The remediation process itself can be found in 40 C.F.R. 300, the National Contingency Plan. The spill reporting requirements are found in 40 C.F.R. 302 and 355.

* Due to the complexity and often times large financial concerns associated with RCRA issues, your Office of Counsel should be consulted regarding liability and compliance with RCRA. Also, given their experience with Formerly Used Defense Sites (FUDS), Base Realignment and Closure (BRAC), and Installation Restoration (IR), the Center For Expertise in Hazardous, Toxic and Radioactive Waste should be consulted regarding legal and technical matters.

Product: When a spill of a reportable quantity occurs, spill notification to the National Response Center is required. Spills may also be required to be reported under other laws to other federal or state agencies. For projects listed on the Docket, a Preliminary Assessment and possibly a Site Inspection may be performed. For sites on the National Priorities List (NPL) a Remedial Investigation/Feasibility Study will be performed. For removal actions, an Engineering Evaluation/Cost Analysis (EE/CA) may be performed.

Timing/Schedule: Spills requiring notification must be reported to the National Response Center (NRC) immediately. Emergency response procedures should be immediately undertaken. For remediations, removal actions are short term response actions typically characterized by the limits of \$2 million dollars and 12 months. Remedial actions are longer term remediations (6-8 years).

DODD 5030.41, Oil and Hazardous Substance Pollution Prevention and Contingency Program (26 Sep 78)
AR 200-1, Environmental Protection and Enhancement (Draft)
AR 200-2, Environmental Effects of Army Actions (Draft);
ER 1165-2-132, Hazardous, Toxic and Radioactive Waste Guidance for Civil Works Projects
ER 385-1-92, Safety and Occupational Health Document Requirements for Hazardous, Toxic and Radioactive Waste (HTRW) and Ordnance and Explosive Waste (OEW) Activities

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 5 Planning Guidance Notebook; EP 1165-2-1, Water Resources Policies and Authorities; Real Estate Policy Letter 4 dated 13 September 1991 and amended 8 May 1992.

Civil Works Engineering: ER 1110-1-263, Chemical Data Quality Management for Hazardous Waste Remedial Activities; ETL 1110-1-154, HTRW Guide Scopes of Work. Also, ER 200-2-3, Environmental Compliance Policies and EP 200-2-3, Environmental Compliance Guidance and Procedures, to be published later in 1996.

Civil Works Construction: EP 200-1-2, Process and Procedures for RCRA Manifesting

Civil Works Operations: ER 1130-2-434, Response to Oil and Hazardous Substance Incidents, 1 July 1985 [Note: This regulation will be superseded by ER 200-2-3, Environmental Compliance Policies and EP 200-2-3, Environmental Compliance Guidance and Procedures, to be published later in 1996].

Regulatory: None specific to this statute

FOR MORE INFORMATION SEE: USACE Operated Facilities Environmental Compliance Guidance Letter, Spill Planning and Response Requirements; Executive Order 12580, Superfund Implementation; Executive Order 12088, Federal Compliance with Pollution Control Standards

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: The majority of guidance is prepared by the Environmental Protection Agency.

Guidance Title: See below

Code of Federal Regulations Citation: There are many guidance documents pertaining to spill notification procedures, spill response and remediation. You may contact NTIS or the Environmental Protection Agency RCRA/CERCLA hotline (800-424-9346) in Washington, DC to inquire as to the availability of additional guidance documents. The following is a list of just a few of the more useful documents:

40 C.F.R. 300 The National Oil and Hazardous Substance Contingency Plan

40 C.F.R. Part 302 Designation, Reportable Quantities, and Notification

40 C.F.R. Part 355 Emergency Planning and Notification

40 C.F.R. Part 373 Reporting Hazardous Substance Activity when selling or transferring Federal Real Property

MANAGEMENT OPPORTUNITIES: The purchasing of contaminated properties should be avoided whenever possible. Construction of Civil Works projects on contaminated properties should also be avoided whenever possible. This can be accomplished by early identification of potential problems in the reconnaissance, feasibility, and PED phases before any land acquisition begins. The plan for, and execution of, each Civil Works project will routinely include a phased and documented review to provide for early identification of HTRW problems at Civil Works projects.

In addition, spills of reportable quantities of hazardous substances must be reported in accordance with 40 C.F.R. 302 and 40 C.F.R. 355.

CONSERVATION PROGRAMS ON MILITARY RESERVATIONS

LEGISLATIVE TITLE: Conservation Programs on Government Lands

UNITED STATES CODE CITATION: 16 U.S.C. § 670a-670f

OTHER TITLES AND POPULAR NAMES: Sikes Act; Fish and Wildlife Conservation on Military Reservations; Subchapter I: Conservation Programs on Military Reservations

SUMMARY: The Act authorizes the Secretary of Defense to carry out a program of planning, development, maintenance and coordination of wildlife, fish and game conservation and rehabilitation on military lands, in coordination with the Secretary of Interior, appropriate state agencies. Cooperative plans shall provide for 1) fish and wildlife habitat improvements or modifications, 2) range rehabilitation where necessary for support of wildlife, 3) control of off-road vehicle traffic, and 4) specific habitat improvement projects and related activities and adequate protection for species of fish, wildlife, and plants considered threatened or endangered (16 U.S.C. 670(a)). The Act also authorizes programs for the development, enhancement, operation and maintenance of public outdoor recreation resources at military reservations, in coordination with the previously mentioned agencies (16 U.S.C. 670(c)). In addition, the Act promotes the conservation, restoration and management of migratory game birds on military reservations (16 U.S.C. 670(b)). While this Act specifically excludes the Corps of Engineers, Corps districts providing support to military installations may be able to provide assistance to installation natural resource managers in developing these plans.

RESOURCES COVERED: Fish and wildlife resources and habitat.

COMPLIANCE REQUIREMENTS: None identified.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: U.S. Fish and Wildlife Service, state resource agencies

Process and Product: Development of joint-Federal and State natural resources plans for military reservations.

Timing/Schedule: Plans are developed based on Federal-State coordinated schedules.

CORPS GUIDANCE

MANAGEMENT OPPORTUNITIES: Corps districts providing assistance to military installations may be able to assist the installation natural resource managers in developing the plans authorized by this Act.

DEEPWATER PORT ACT OF 1974

LEGISLATIVE TITLE: Deepwater Port Act of 1974

UNITED STATES CODE CITATION: 33 U.S.C. § 1501-1524

OTHER TITLES AND POPULAR NAMES: None identified

SUMMARY: This Act provides authority for Secretary of Transportation to issue a license for the ownership, construction and operation of a deepwater port (33 U.S.C. 1503). "Deepwater port" means any fixed or floating manmade structures other than a vessel, or any group of such structures, located beyond the territorial sea and of the coast of the United States, and intended for the loading or unloading and further handling of oil for transportation, except as excluded in 33 U.S.C. 1522. Included are all associated components and equipment, including pipelines, pumping stations, service platforms, mooring buoys, and similar apurtances to the extent they are located seaward of the highwater mark. (33 U.S.C. 1502). The Act provides for licenses to be issued if applicants meet the required criteria, including the demonstration that the project will be constructed with the best technology to minimize adverse impacts on the marine environment and compliance with the Clean Water Act, Federal Water Pollution Control Act, Coastal Zone Management Act, and Marine Protection, Research and Sanctuaries Act. The license applications will be coordinated with Federal Agencies and departments with jurisdiction (33 U.S.C. 1504(e)).

RESOURCES COVERED: Coastal zone; Coastal environment - transitional and intertidal areas - bays, lagoons, salt marshes, estuaries, beaches; and fish and wildlife resources; water, air.

COMPLIANCE REQUIREMENTS: The Act prohibits the ownership, construction, or operation of a deepwater port beyond the territorial seas without a license issued by the Secretary of Transportation. Authorization for a deepwater port requires that applications for Section 10, 404 and 103 permits be issued by the Corps if appropriate.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Secretary of Transportation in consultation with other agencies and departments.

Process: Outlined in 33 U.S.C. 1504.

Product: Licenses for the construction and ownership of deepwater ports.

Timing/Schedule: None specified

FOR MORE INFORMATION SEE: None identified

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Department of Transportation

Guidance Title: None identified.

Code of Federal Regulations Citation: 33 C.F.R. 62, 64, 66, 67, 70, 137, 140, 142-146, 148-150, 320; 40 C.F.R. 110; 46 C.F.R. 2, 4, 50, 54, 56, 58, 61, 108-110, 170, 173, 174, 197; 49 C.F.R. 146

MANAGEMENT OPPORTUNITIES: The Corps is encouraged to coordinate closely with the Department of Transportation during early stages of planning and siting deep water ports.

**EMERGENCY PLANNING AND COMMUNITY RIGHT-TO-KNOW ACT OF 1986
AND THE POLLUTION PREVENTION ACT OF 1990**

LEGISLATIVE TITLE: The Emergency Planning and Community Right-to-Know Act of 1986 and the Pollution Prevention Act of 1990

UNITED STATES CODE CITATION: 42 U.S.C. §§ 11001 - 11050, and 42 U.S.C. §§ 13101 TO 13109

OTHER TITLES AND POPULAR NAMES: SARA Title III, EPCRA and PPA

SUMMARY: This Act, also known as SARA Title III, was designated to promote emergency planning and preparedness at both the state and local level. It provides citizens, local governments, and local response authorities with information regarding the potential hazards in their community. EPCRA requires use of emergency planning and designates state and local governments as recipients for information regarding certain chemicals used in the community.

The Pollution Prevention Act of 1990 (PPA) was enacted to prevent or reduce pollution at the source whenever feasible; pollution that cannot be prevented should be recycled in an environmentally sound manner whenever feasible; pollution that cannot be prevented or recycled should be treated in an environmentally safe manner whenever feasible; and disposal or other release into the environment should be employed only as a last resort and conducted in an environmentally safe manner.

The PPA required owners or operators of facilities required to file an annual toxic chemical release form under EPCRA Section 313 to also include with each annual filing a toxic source reduction and recycling report for the preceding calendar year. Not only did EO 12856 require Federal Agencies to comply with the provisions of EPCRA and file a Toxic Release Inventory (TRI) reports for those chemicals exceeding the threshold, it also requires Federal facilities to prepare pollution prevention plans.

RESOURCES COVERED: Hazardous substances, hazardous chemicals, extremely hazardous substances, and toxic chemicals.

COMPLIANCE REQUIREMENTS: The key compliance requirements are: emergency planning, Right-To-Know requirements, reporting requirements, and notification requirements.

Emergency Planning: Facilities with extremely hazardous substances in amounts equal to or greater than the amounts shown in 40 C.F.R. 355 are required to notify the state emergency response commission (SERC) and designate a representative to participate in the local emergency planning committee (LEPC).

Right-To-Know Requirements: Facilities are required to prepare or have available a MSDS for hazardous chemicals and are required to submit the MSDSs to the emergency commission and the fire department with jurisdiction over the facility for each hazardous chemical present at the facility according to varying threshold amounts.

Reporting: Section 312 of EPCRA requires facilities to submit annual Emergency and Hazardous

Chemical Inventory forms (Tier I and II forms) to the state emergency response commission (SERC), the local emergency planning committee (LEPC), and the fire department having jurisdiction over the facility for the chemicals manufactured, processed or otherwise used in quantities exceeding established minimum threshold values. EO 12856 requires Federal facilities to comply regardless of the facility's SIC code.

Notification: Section 304 of EPCRA establishes spill reporting requirements for facilities that release any extremely hazardous substance listed in 40 C.F.R. 355 or the release of a reportable quantity of a hazardous substance (40 C.F.R. 302).

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Environmental Protection Agency and State Emergency Response Commissions, Local Emergency Planning Committees, and the local community.

Process: Facilities must first perform an internal evaluation to determine what types of chemicals are onsite and the amount stored or used onsite. Facilities may then have to provide appropriate notifications to the LEPC, SERC and fire departments pending the internal evaluation. Facilities may have to file Tier I/II reports. As a result of EO 12856, Federal agencies are required to develop a Pollution Prevention Plan and program.

Product: Pollution Prevention Plan and associated program. Tier I/II reports as appropriate.

Timing/Schedule: None specified

CORPS GUIDANCE

AR 200-1, Environmental Protection and Enhancement (Draft)

Civil Works Planning: None specific to this statute.

Civil Works Engineering: ER 200-2-3, Environmental Compliance Policies and EP 200-2-3, Environmental Compliance Guidance and Procedures, to be published later in 1996.

Civil Works Construction: None specific to this statute.

Civil Works Operations: ER 200-2-3, Environmental Compliance Policies and EP 200-2-3, Environmental Compliance Guidance and Procedures, to be published later in 1996.

Regulatory: None specific to this statute.

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: The Environmental Protection Agency, State Emergency Response Commissions, Local Emergency Planning Committees

Guidance Title: Guidance for Implementing E.O. 12856: Federal Compliance with Right-To-Know Laws and Pollution Prevention Requirements - March 28, 1995 (EPA 300-B-95-005, April 1995); E.O. 12856, Questions and Answers, March 1995 (EPA 745-R-95-011)

Code of Federal Regulations: 40 C.F.R. 355 Emergency planning and notification; 40 C.F.R. 370 Hazardous chemical reporting: Community right-to-know; 40 C.F.R. 372 Toxic chemical release reporting: Community right-to-know; EO 12856, Federal Compliance with Right-To-Know laws and Pollution Prevention Requirements; EO 12088, Federal Compliance with Pollution Standards

MANAGEMENT OPPORTUNITIES: Corps Civil Works facilities must be assessed to determine necessary reporting requirements. Also, coordination with the LEPC and SERC may be necessary. Pollution Prevention Plans and programs should be developed.

EMERGENCY WETLANDS RESOURCES ACT

LEGISLATIVE TITLE: Emergency Wetlands Resources Act of 1986

UNITED STATES CODE CITATION: 16 U.S.C. §§ 3901-3932

OTHER TITLES AND POPULAR NAMES: None Identified.

SUMMARY: The purpose of this Act is to promote the conservation of wetlands in order to maintain the public benefits they provide, and to fulfill international obligations contained in various migratory bird treaties and conventions (16 U.S.C. 3901 (b)). The means for this identified in the Act include: cooperative management and conservation efforts among private interests, local, state and Federal governments; and acquisition in fee, easements or other interests and methods. Under the Act, the U.S. Fish and Wildlife Service has developed a National Wetlands Priority Conservation Plan (16 U.S.C. 3921) to identify the locations and types of wetlands that should be priorities for state and Federal acquisition through the Land and Water Conservation Fund. The Act requires that each state consider wetlands as an important outdoor resource in preparing State Comprehensive Outdoor Recreation Plans (SCORPs) required under the Land and Water Conservation Fund Act (16 C.F.R. 460/-8). The Act also requires continuation of the National Wetland Inventory project to complete preparation of wetland maps for all the contiguous states by 1998 (16 U.S.C. 3931). The Act also requires the Department of Interior to report to Congress on the status, condition, and trends of wetlands and the effects of Federal programs on wetlands in certain regions of the United States.

RESOURCES COVERED: Wetlands; migratory waterfowl; fish; spawning, nesting, migration, wintering and breeding habitat essential to the survival of migratory and resident fish and wildlife.

COMPLIANCE REQUIREMENTS: None identified for Corps.

REVIEW AND CONSULTATION REQUIREMENTS:

Who Reviews and Consults: Department of Interior(U.S. Fish and Wildlife Service); Department of Commerce (National Marine Fisheries Service); Environmental Protection Agency; States

Process: None specified

Product: Regional Wetland Concept Plans are developed by regional FWS offices, using information from the wetland components of State Comprehensive Outdoor Recreation Plans (SCORPs), required by the Land and Water Conservation Fund Act.

Timing/Schedule: None specified

CORPS GUIDANCE

Civil Works Planning: None specific to this statute.

Civil Works Engineering: None specific to this statute.

Civil Works Construction: None specific to this statute.

Civil Works Operations: None specific to this statute.

Regulatory: None specific to this statute.

FOR MORE INFORMATION SEE: Land and Water Conservation Fund Act

IMPLEMENTING GUIDANCE OF OTHER AGENCIES:

Agency: US Fish & Wildlife Service

Guidance Title: National Wildlife Refuge System Administrative Provisions

Code of Federal Regulations Citation: 50 C.F.R. Part 25

MANAGEMENT OPPORTUNITIES: Regional offices of the USFWS develop Regional Wetland Concept Plans, with lists of priority wetland sites. While these lists may focus primarily on sites for acquisition, the plans themselves may be useful in identifying significant opportunities for ecosystem restoration. Maps and other information from the National Wetlands inventory may be useful in Civil Works planning and natural resources management initiatives.

ENDANGERED SPECIES ACT

LEGISLATIVE TITLE: Endangered Species Act of 1973

UNITED STATES CODE CITATION: 16 U.S.C. 1531 et seq.

OTHER TITLES AND POPULAR NAMES: ESA; Conservation, Protection and Propagation of Endangered Species

SUMMARY: The purposes of this Act are to provide a means whereby the ecosystems upon which endangered species and threatened species depend may be conserved and to provide a program for the conservation of such endangered species and threatened species (16 U.S.C. 1531). It establishes a policy that all Federal departments and agencies seek to conserve endangered species and threatened species and utilize their authorities in furtherance of the purposes of this Act (16 U.S.C. 1531 and 1536).

Section 7 (16 U.S.C. 1536) states that all Federal departments and agencies shall, in consultation with and with the assistance of the Secretary of the Interior/Commerce, insure that any actions authorized, funded, or carried out by them do not jeopardize the continued existence of any endangered species or threatened species, or result in the destruction or adverse modification of habitat of such species which is determined by the Secretary (Interior/Commerce) to be critical, unless an exception has been granted by the Endangered Species Committee (16 U.S.C. 1536(a)(2)).

Section 9 (16 U.S.C. 1538) identifies prohibited acts related to endangered species, and prohibits all persons, including all federal, state and local governments, from taking listed species of fish and wildlife, except as specified under the provisions for exemptions (16 U.S.C. 1539). The term "take" is defined as to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct (16 U.S.C. 1532(18)). Provisions for civil penalties, criminal violations, enforcement, and citizen suits are found at 16 U.S.C. 1540. Additional guidelines for protection of marine mammals are established in the Marine Mammal Protection Act of 1972, as amended. Consultation procedures are administered by the Fish and Wildlife Service (FWS), Department of the Interior, and the National Marine Fisheries Service (NMFS), Department of Commerce.

RESOURCES COVERED: Fish, wildlife and their habitat, and plants; Any mammal, fish, bird, (including any migratory, nonmigratory, or endangered bird for which protection is also afforded by treaty or other international agreement), amphibian, reptile, mollusk, crustacean, arthropod or other invertebrate, and includes any part product, egg, or offspring thereof, or the dead body parts thereof (16 U.S.C. 1532 (8)). Also, any member of the plant kingdom, including seeds, roots and other parts thereof (16 U.S.C. 1532(14)).

COMPLIANCE REQUIREMENTS: Federal agencies must request that the FWS or NMFS, as appropriate, furnish information as to whether any listed species or designated critical habitat are in the proposed project area. If the FWS/NMFS provides listed or proposed species or designated critical habitat, the Corps shall prepare a *biological assessment* to determine if the proposed project may affect the species or their habitat. The biological assessment shall be completed within a time period mutually agreed to by the Corps, the USFWS, and/or the NMFS, and before any contract for construction is entered into and before construction is begun. Areas that should be avoided or

critically considered, as well as opportunities for conserving these resources will be considered during formulation of alternative plans (ER 1105-2-100, 7-33, b(2)(a).)

If, biological assessment indicates that an alternative plan(s) may affect a listed species or critical habitat, the Corps will request formal *consultation* with the FWS/NMFS. If the assessment determines that the alternative plan(s) is not likely to adversely affect the species or critical habitat, then the Corps may request informal consultation with the FWS/NMFS to receive their written concurrence with the determination of no adverse affect. If the FWS/NMFS do not concur with the no adverse determination, the FWS/NMFS may request that the Corps initiate formal consultation (ER 1105-2-100, 7-33, b(2)(b).).

The finding, by the Corps, that a proposed construction or operational activity will negatively impact an endangered or threatened species, or its critical habitat, will initiate the preparation of a *biological opinion* by the USFWS and/or the NMFS. This biological opinion will include a detailed discussion of the effects of the proposed action on the species or its critical habitat, and a summary of the information upon which the opinion is based. The biological opinion will also include a determination on whether the proposed action is likely to *jeopardize* the continued existence of a listed species or adversely modify its critical habitat. If a jeopardy decision is reached, the resource agencies will suggest *reasonable and prudent alternatives* for the proposed action, if any are possible. The Corps is required to carefully consider the reasonable and prudent measures to protect and conserve the species and critical habitat. The biological opinion may also include a conservation plan, which the Corps is not required to implement, but should consider to see if the plan or portions of the plan may be implementable.

An incidental take provision is included in all biological opinions, where an anticipated take may occur, whether there is a "no jeopardy" or "likely jeopardy" opinion. This provision permits the district commander to "take" a specified number of the protected species, or impact a specified acreage of habitat in the project area, without being subject to the penalties established in 16 U.S.C. 1540. The incidental take statement will also specify "reasonable and prudent" measures necessary to minimize impacts; set forth terms and conditions; and specify procedures to be used to handle or dispose of any individuals of a species taken (ER 1105-2-100, 7-33, b(5)).

Consultation shall be concluded within a 90 day period (or other period mutually acceptable to the agency and FWS/NMFS). During consultation, the Corps cannot make any irreversible or irretrievable commitment of resources that would have the effect of foreclosing the formulation or implementation of any reasonable and prudent alternative measures.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews and Consults: U.S. Fish and Wildlife Service and/or National Marine Fisheries Service

Process: Section 7 Consultation (50 C.F.R. 402).

Product: Species List, Biological Assessment, Biological Opinion.

Timing/Schedule: FWS/NMFS will provide list of species, within 30 days of request; Biological Assessment completed by Corps within 180 days from receiving Species List, or within a time period mutually agreed to by the Corps and resource agencies, and before any contract for construction is entered into and before construction is begun; Biological Opinion completed by the FWS/NMFS within 90 days, and 45 days to deliver, a total of 135 days.

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies., Chapter 7, Environmental Planning and Evaluation Considerations.

Civil Works Engineering: None specific to this statute

Civil Works Construction: None specific to this statute

Civil Works Operations: None specific to this statute

Regulatory: 33 C.F.R. 320, 323, 325, 330 (Updated November 22, 1991)

FOR MORE INFORMATION SEE: Marine Mammal Protection Act of 1972

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: U.S. Fish and Wildlife Service and/or National Oceanic and Atmospheric Administration (National Marine Fisheries Service)

Guidance Title: Interagency Cooperation-Endangered Species Act of 1973, as amended; Final Rule

Code of Federal Regulations Citation: 50 C.F.R. Part 402, Joint Regulations on Endangered Species" establishes the procedural regulations governing interagency cooperation under Section 7 of the Endangered Species Act; 50 C.F.R. 450: Exemption Procedures. There are additional C.F.R. titles that provide related guidance for programs of other agencies.

MANAGEMENT OPPORTUNITIES: On 28 September 1994, a Memorandum of Understanding was signed by the Acting Assistant Secretary of the Army, along with six other federal departments, to establish a general framework for cooperation and participation among the departments in the exercise of their responsibilities under the Act. The departments will work together to achieve the common goals of (1) conserving species listed as threatened or endangered under the Act; (2) using existing federal authorities and programs to further the purposes of the Act; and , (3) improving the efficiency and effectiveness of interagency consultations conducted pursuant to Section 7(a)(2) of the Act.

There may be opportunities for the Corps to restore or protect habitat for threatened and endangered species, or to contribute to endangered species recovery plans, as part of ecosystem restoration, natural resources management, dredged material management and water control management projects and initiatives.

ENVIRONMENTAL QUALITY IMPROVEMENT ACT OF 1970

LEGISLATIVE TITLE: Environmental Quality Improvement Act of 1970

UNITED STATES CODE CITATION: 42 U.S.C. § 4371 to 4375

OTHER TITLES AND POPULAR NAMES: None identified.

SUMMARY: This Act was implemented as Title II of P.L. 224 (Federal Water Pollution Control Act Amendments of 1970) to assure that each Federal department and agency conducting or supporting public works activities which affect the environment shall implement policies established under existing law, and to authorize an Office of Environmental Quality in the Executive Office of the President to provide professional and administrative staff for the Council on Environmental Quality (established by NEPA (42 U.S.C. 4343). The Chairman of the CEQ is appointed Director of the Office of Environmental Quality. This office is directed to (1) assist Federal agencies and departments in appraising the effectiveness of their existing and proposed facilities, programs, policies, and activities which affect environmental quality, (2) reviewing the adequacy of existing systems to monitor and predict environmental change, (3) promote the advancement of scientific knowledge of effects of actions and technology on the environment, and (4) assist in coordination among Federal departments and agencies in those programs and activities which affect, protect, and improve environmental quality (42 U.S.C. 4341-4347).

RESOURCES COVERED: Overall environmental policy for protection and enhancement of environmental quality.

COMPLIANCE REQUIREMENTS: None specified that are applicable to the Corps.

ESTUARY PROTECTION ACT

LEGISLATIVE TITLE: Estuaries-Inventory-Study

UNITED STATES CODE CITATION: 16 U.S.C. § 1221 et seq

OTHER TITLES AND POPULAR NAMES: Estuarine Protection Act; Estuary Protection Act

SUMMARY: This Act authorizes the Secretary of Interior, in cooperation with the States, Secretary of the Army and other Federal agencies, to conduct an inventory and study of the Nation's estuaries, to facilitate estuary protection, conservation and restoration in a manner that maintains the balance between conserving the natural resources and natural beauty of the Nation and the need to develop these estuaries for further growth and development of the Nation. Considerations of this study are to include: (1) wildlife and recreational potential of estuaries, their ecology, their value to the marine, anadromous and shell fisheries, and their esthetic value; (2) their importance to navigation, value for flood, hurricane, and erosion control, mineral value, and value of submerged lands; and, (3) the value of such areas for more intensive development for economic use as part of urban, commercial and industrial development (16 U.S.C. 1222). The Act requires Federal agencies, in planning for the use or development of water and related land resources, to give consideration to estuaries and their natural resources. All plans and projects submitted to Congress shall include a discussion by the Secretary of Interior of such estuaries and resources, and the potential impact of the proposed project on them, as well as his recommendations thereon (16 U.S.C. 1224).

RESOURCES COVERED: Estuaries; coastal marshlands, bays, sounds, seaward areas, lagoons, and the land and waters of the Great Lakes (16 U.S.C. Section 1222(a)).

COMPLIANCE REQUIREMENTS: As part of its planning for the use and development of water and water related land resources, the Corps must give consideration to estuaries and their natural resources. Reports to Congress on projects in and around estuaries shall include a discussion of such estuaries and resources, and the potential impact of the proposed project on them.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Secretary of the Interior, Secretary of the Army, other Federal agencies, States

Process: Circulation of project reports for review by the appropriate Department of the Interior agencies

Product: Study and inventory reports of the Nation's estuarine areas.

Timing/Schedule: Secretary of the Interior has 90 days to make recommendations on Corps reports.

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: None identified.

Guidance Title: None identified.

Code of Federal Regulations Citation: None identified.

MANAGEMENT OPPORTUNITIES: The Corps can coordinate studies and other initiatives in and around estuaries with Department of Interior agencies and State agencies implementing programs to further the purposes of this Act. The Corps may also be able to contribute data and other information to their studies. There may be opportunities to implement eco-restoration projects that are responsive to estuary restoration and protection needs.

FARMLAND PROTECTION POLICY ACT

LEGISLATIVE TITLE: Subtitle I of Title XV of the Agriculture and Food Act of 1981

UNITED STATES CODE CITATION: 7 U.S.C. §§ 4201 et seq

OTHER TITLES AND POPULAR NAMES: None identified.

SUMMARY: The purpose of this Act is to minimize the extent to which Federal programs contribute to the unnecessary and irreversible conversion of farmland to nonagricultural uses, and to assure that Federal programs are administered in a manner that will be compatible with State, local government and private programs and policies protecting farmland. The Act instructs the Department of Agriculture, in cooperation with other departments, agencies, independent commissions and other units of the Federal government, to develop criteria for identifying the effects of Federal programs on the conversion of farmland to nonagricultural uses. It does not provide a basis for any action, either legal or equitable, by any person

RESOURCES COVERED: Prime and unique farmlands

COMPLIANCE REQUIREMENTS: This Act (Subtitle I of Title XV of the Agriculture and Food Act of 1981) is implemented under Department of Agriculture final rule effective 6 August 1984 (7 C.F.R. 658). The final rule requires that Corps FOAs contact the Natural Resource Conservation Service (NRCS) for identification of prime or unique farmland which might be impacted by proposed Corps actions. Prior to taking any action that would result in conversion of designated prime or unique farmland to nonagricultural uses, the Corps must examine the potential impacts of the proposed action and if there are adverse effects on farmland preservation, consider alternatives to lessen the adverse effects. It is the Corps discretion to proceed with a project once the required examination is completed. The analysis is an integral part of the environmental assessment process under NEPA and the analysis and results will be included as part of the final NEPA document.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Department of Agriculture (Natural Resources Conservation Service (formerly the Soil Conservation Service))

Process: Early in a feasibility study, the Corps fills out parts I and III of the Farmland Conversion Impact Rating Form (Form AD 1006) and, via the form and transmittal letter, provides basic project and site information to the NRCS. The NRCS assesses the information provided, measures the relative value of the site as farmland, and provides other pertinent information. NRCS returns form AD 1006 with parts II, IV, and V completed. The Corps uses the evaluation criteria provided by NRCS and site assessment criteria (part VI of the form) and derives a combined score (part VII of form). The combined score helps determine the level of consideration that an area should receive in plan formulation.

Product: Form AD 1006 should be included as an attachment to the NEPA document.

Timing/Schedule: NRCS must return Form 1006 (with parts II, IV, and V complete) within 45 calendar days from receipt of the Corps request.

FEDERAL FACILITIES COMPLIANCE ACT

LEGISLATIVE TITLE: Federal Facility Compliance Act of 1992

UNITED STATES CODE CITATION: This Act, P.L. 102-386 (106 STAT 1505) amends the Resource Conservation and Recovery Act (RCRA); readers are referred to RCRA for a summary of the Federal Facilities Compliance Act as it amends RCRA.

OTHER TITLES AND POPULAR NAMES: FFCA

SUMMARY: This Act provides for a waiver of sovereign immunity with respect to federal, state, and local procedural and substantive requirements relating to the Resource Conservation and Recovery Act (RCRA) solid and hazardous waste laws and regulations at federal facilities. Federal agencies are responsible for compliance and government agents or employees are subject to criminal sanctions under any federal or authorized state solid or hazardous waste law. In addition, EPA is authorized to issue Administrative Orders to Federal agencies and may, as are authorized states, levy fines in the event of non-compliance (42 U.S.C. 6961). It also directs the Environmental Protection Agency to make annual inspections of facilities owned or operated by the United States which treat, store, or dispose of hazardous waste to insure compliance with applicable regulations. Authorized states may also conduct inspections to insure compliance with authorized State hazardous waste programs (42 USC 6927(c)). Additionally, it defines hazardous waste in relation to public vessels, expands the definition of mixed waste, and discusses waste discharges to federally owned treatment works.

See: Resource Conservation and Recovery Act

FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT

LEGISLATIVE TITLE: Federal Insecticide, Fungicide, and Rodenticide Act

UNITED STATES CODE CITATION: 7 U.S.C. § 136 et seq.

OTHER TITLES AND POPULAR NAMES: FIFRA; Federal Environmental Pesticide Control Act, FEPCA

SUMMARY: This Act requires that all pesticides used in the United States be submitted for registration by the Environmental Protection Agency (EPA)(7 U.S.C. 136(a)). To be approved for registration, pesticides must meet criteria set forth by the EPA regarding the quantity, quality and impact upon the environment by the active ingredient(s). Approved pesticides must also be labeled as such. The EPA is required to publish a list of all registered pesticides by the classification and certification by specific use. FIFRA requires registration of chemicals used to control pests. It also requires EPA to establish regulations for the storage and disposal of pesticide containers, excess pesticides and pesticides for which registration has been canceled. Under FIFRA, no manufacturer or importer may make or sell a product for use to control pests unless the compound is registered with EPA. The Act also outlines penalties, indemnities, and administrative procedures (7 U.S.C. 136(l-n)). In addition, the Administrator may, at his discretion, exempt any Federal or state agency from any provision of this Act, if he determines emergency conditions, requiring such exemption, exist (7 U.S.C. 136(p)).

RESOURCES COVERED: Pesticides, fungicides, rodenticide, and insecticides.

COMPLIANCE REQUIREMENTS: Mostly applicable to operations activities; Corps or contractor personnel applying pesticides must use registered pesticides, use properly licensed applicators, provide proper training, and store materials in approved containers and buildings.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: The EPA requires registration of all pesticides, issues guidelines for use by states, and maintains regulations for several restricted use pesticides. States generally regulate pesticide applicator licensing and certification, pesticide application regulations and record keeping, restricted use pesticides, pesticide storage, container disposal, aquatic applications, and numerous other rules.

Process: Decision to register pesticide can result in (1) granting registration in form requested by manufacturer; (2) deny of registration outright; or (3) grant of registration with specific use limitations.

Product: Pesticide registration and approval for use.

Timing/Schedule: None specified

CORPS GUIDANCE: ER 1130-2-413, Pest Control Program for Civil Works Projects; applies to all

Corps' activities performed on fee-owned lands, regardless of Division or office.

Civil Works Engineering: ER 1130-2-413, Pest Control Program for Civil Works Projects

Civil Works Construction: None specific to this statute

Civil Works Operations: ER 1130-2-413, Pest Control Program for Civil Works Projects

Regulatory: None specific to this statute

FOR MORE INFORMATION SEE: None identified

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Environmental Protection Agency

Guidance Title: None identified.

Code of Federal Regulations Citation: 40 C.F.R. 152-180, except section 157

MANAGEMENT OPPORTUNITIES: Executive Orders and Corps policy guidance offers the opportunity to utilize more biological controls, encourage alternatives to chemicals, and require more stringent controls over chemical use and choices.

FEDERAL LAND POLICY AND MANAGEMENT ACT

LEGISLATIVE TITLE: Federal Land Policy and Management Act of 1976

UNITED STATES CODE CITATION: 43 U.S.C. § 1701 et seq

OTHER TITLES AND POPULAR NAMES: None identified.

SUMMARY: This Act establishes the public land policy and guidelines for the administration of public lands administered by the Department of Interior, through Bureau of Land Management (BLM), and gives the BLM their mission statement. Direction is given to other agencies that undertake activities that would result in the "withdrawal" of such public lands. As paraphrased from the Act, "withdrawal" means withholding an area of Federal land from settlement, sale or entry, for the purpose of limiting activities or reserving the area for a particular purpose or program (43 U.S.C. 1702). The Secretary of Defense and the Secretaries of military departments within the Department of Defense (43 U.S.C. 1732), are directed to manage the lands under their jurisdictions, that are adjacent to lands referenced in this Act, in a manner consistent with the Act, wherever practicable. The Department of Defense activities noted in the Act, and its amendments, address military functions and activities. Restrictions on military activities on public lands in Alaska, including environmental requirements for avoiding impacts are addressed in 43 U.S.C. 1732. This law may be applicable to the Civil Works program if the issue of withdrawn public lands arises in connection with a civil works program or activity.

RESOURCES COVERED: Public lands.

COMPLIANCE REQUIREMENTS: To be determined on a case-by-case basis.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Department of Interior, Bureau of Land Management; Department of Agriculture

FEDERAL WATER PROJECT RECREATION ACT

LEGISLATIVE TITLE: Federal Water Project Recreation Act

UNITED STATES CODE CITATION: 16 U.S.C. §§ 4601-12 -4601-22, 662

OTHER TITLES AND POPULAR NAMES: None identified.

SUMMARY: The Act establishes the policy that consideration be given to the opportunities for outdoor recreation and fish and wildlife enhancement in the investigating and planning of any Federal navigation, flood control, reclamation, hydroelectric or multi-purpose water resource project, whenever any such project can reasonably serve either or both purposes consistently (16 U.S.C. 4601-12). Recreational use of projects will be coordinated with other existing and planned Federal, State, or local recreational developments. The Act does not apply to local flood control, beach erosion control, small boat harbors, or hurricane protection projects (16 U.S.C. 4601-17(e)). Non-Federal bodies will be encouraged to operate and maintain project recreational and fish and wildlife enhancement facilities. If non-Federal bodies agree in writing to administer the facilities at their expense and to pay one-half the separable first cost, the recreation and fish and wildlife benefits shall be included in project benefits and project costs allocated to recreation and fish and wildlife. Fees may be charged by the non-Federal interests to repay their costs. If non-Federal bodies do not so agree, no facilities for recreation and fish and wildlife may be provided except those justified to serve other purposes or as needed for public health and safety. However, project land may be acquired to preserve the recreational potential. If within 10 years after initial project operation there is no local agreement the land may be used for other purposes or sold (16 U.S.C. 4601-13).

Benefits for recreation should be included in the economics of a contemplated project, provided that non-Federal public entities agree (letter of intent) to participate in the recreation development. Recent Corps policy resulting from the Water Resources Development Act of 1986 is that a non-Federal public body must cost share recreation (50% of separable costs), and bear all costs of operation, maintenance, repair, and rehabilitation (OMRR). The Corps is authorized to construct minimum health, safety, and access facilities without cost sharing. The Act also contains a provision that non-Federal public bodies may elect to lease recreation facilities and lands as long as they agree to bear OMRR responsibilities and costs.

The Secretary of Interior is authorized to enter into agreements with Federal agencies to promote development and operation of lands or facilities for recreation and fish and wildlife enhancement purposes (16 U.S.C. 4601-18(b)).

RESOURCES COVERED: Water resources development projects; outdoor recreation; fish and wildlife enhancement.

COMPLIANCE REQUIREMENTS: Documentation in Corps reports and NEPA documents that recreation opportunities were considered during the planning and design processes.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Non-Federal project sponsors and community

Process and Product: Recreation lands and facilities incorporated into flood control, navigation, reservoir, and storm damage and hurricane protection projects

Timing/Schedule: Recreation planning is accomplished at the same level of detail as other aspects of civil works projects during reconnaissance, feasibility, and detailed design phases.

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 6, Section VIII, Chapter 7, and Appendix J; ER 1165-2-400, Recreational Planning, Development, and Management Policies, Chapter 1; Policy Guidance Letter No. 30, Recreation Cost Sharing Credit for Increased Real Estate Interest for Recreation Development at Non-Reservoir Projects; Policy Guidance Letter No. 36, Recreation Development at Structural Flood Control Projects (Non-Reservoir).

Civil Works Construction: ER 1130-2-400, Management of Natural Resources and Outdoor Recreation at Civil Works Water Resource Projects

Civil Works Operations: ER 1130-2-400, Management of Natural Resources and Outdoor Recreation at Civil Works Water Resource Projects.

Regulatory: None specific to this statute

FOR MORE INFORMATION SEE: Fish and Wildlife Coordination Act (16 U.S.C. 662); Reclamation Projects Authorization and Adjustments Act of 1992 (16 U.S.C. 4601-13(a)).

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: None identified

Guidance Title: None identified

Code of Federal Regulations Citation: None identified.

MANAGEMENT OPPORTUNITIES: The Act encourages state, regional and local agencies to more fully participate in the planning and operation of outdoor recreation and fish and wildlife facilities and enhancement at Corps constructed projects. Through state and local participation in the funding and management of outdoor recreation and fish and wildlife related features, design and operation can be more in accordance with local and regional needs and desires. Further the Act allows Corps construction of minimal health, safety and access facilities in the absence of local cost sharing agreements. These minimal facilities will assist the Corps in protecting the health and safety of the public visiting Corps managed lands, where state and local agencies have declined to participate in recreation and fish and wildlife planning and operation for the completed project.

FISH AND WILDLIFE CONSERVATION ACT

LEGISLATIVE TITLE: Fish and Wildlife Conservation Act of 1980

U.S. CODE CITATION: 16 U.S.C. §§ 2901-2911

OTHER TITLES AND POPULAR NAMES: None identified.

SUMMARY: This Act declares that fish and wildlife are of ecological, educational, esthetic, cultural, recreational, economic and scientific value to the Nation. The Act acknowledges that historically, fish and wildlife conservation programs have focused on more recreationally and commercially important species within any particular ecosystem, with out provisions for the conservation and management of non-game fish and wildlife. The purposes of this Act are to encourage all Federal departments and agencies to utilize their statutory and administrative authority, to the maximum extent practicable and consistent with each agency's statutory responsibilities, to conserve and to promote conservation of non-game fish and wildlife and their habitats, in furtherance of the provisions of this chapter, and to provide financial and technical assistance to States to conduct inventories and conservation plans for conservation of non-game wildlife (16 U.S.C. 2901(b)). The Act defines "fish and wildlife" as "wild vertebrate animals in an unconfined state, including, but not limited to, nongame fish and wildlife," and "nongame fish and wildlife" as wild vertebrate animals in an unconfined state, that are not ordinarily taken for sport, fur or food, not listed as endangered or threatened species, and not marine mammals within the meaning of 16 U.S.C. 1362(5). (16 U.S.C. 2902 (6) (A), (B), (C)).

RESOURCES COVERED: Nongame fish and wildlife, excluding listed endangered species or threatened species, and marine mammals as defined in 16 U.S.C. 1362(5).

COMPLIANCE REQUIREMENTS: None specified.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews and Consults: Department of the Interior, Department of Commerce, States

Process and Product: State conservation plans.

Timing/Schedule: Upon receiving State's application, the Secretary of the Department of the Interior has 180 days to approve or disapprove the State's application

CORPS GUIDANCE

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: None identified

Guidance Title: None identified

Code of Federal Regulations Citation: 50 C.F.R. 83

MANAGEMENT OPPORTUNITIES: The Secretary of the Army may loan to any state such personnel and equipment, share information, and provide financial and such other assistance as the Secretary determines appropriate for the purposes of assisting any State to develop or revise conservation plans (16 U.S.C. 2908).

FISH AND WILDLIFE COORDINATION ACT

LEGISLATIVE TITLE: Fish and Wildlife Conservation And Water Resource Developments-Coordination

UNITED STATES CODE CITATION: 16 U.S.C. § 661 et seq.

OTHER TITLES AND POPULAR NAMES: Fish and Wildlife Coordination Act; Coordination Act; FWCA

SUMMARY: The purpose of the Act is to recognize the contribution of wildlife resources to the Nation, the increasing public interest and significance thereof due to expansion of our national economy and other factors, and to provide that wildlife conservation receives equal consideration and be coordinated with other features of water-resources development programs (16 U.S.C. 661). The terms "wildlife" and "wildlife resources", as used in this Act, "include birds, fishes, mammals and all other classes of wild animals and all types of aquatic and land vegetation upon which wildlife is dependent" (16 U.S.C. 666(b)). The Secretary of the Interior, through the U.S. Fish and Wildlife Service (USFWS) is authorized to assist and cooperate with Federal, state and public or private agencies and organizations in the conservation and rehabilitation of wildlife. (The National Marine Fisheries Service (NMFS) provides similar assistance and cooperation for wildlife species under the management responsibilities of the Department of Commerce). 16 U.S.C. 662(a) provides that whenever the waters of any stream or other body of water are proposed to be impounded, diverted, the channel deepened or otherwise controlled or modified, the Corps shall consult with the U.S. Fish and Wildlife Service (FWS), the National Marine Fisheries Service (NMFS) as appropriate, and the agency administering the wildlife resources of the state. The consultation shall consider conservation of wildlife resources with the view of preventing loss of and damages to such resources as well as providing for development and improvement in connection with such water resources development.

Any reports and recommendations of the wildlife agencies shall be included in authorization documents for construction or for modification of projects (16 U.S.C. 662(b)). The Corps shall give full consideration to the reports and recommendations of the wildlife agencies, and include such justifiable means and measures for wildlife mitigation or enhancement as the Corps finds should be adopted to obtain maximum overall project benefits.

The costs of planning, construction or installation, and maintenance of adopted conservation means and measures shall be integral to the cost of the water resources project, provided that costs attributable to the development of wildlife shall not extend beyond those necessary for land acquisition, facilities as recommended in project reports, modification of the project, modification of project operations, but shall not include the operation of wildlife facilities (16 U.S.C. 662(d)).

16 U.S.C. 662(e) authorizes the Corps, to transfer investigation, engineering, or construction funds to USFWS and NMFS, as appropriate, to conduct all or part of the investigations to carry out 16 U.S.C. 622. The Corps has entered into a Memorandum of Agreement (MOA) with the USFWS for funding their activities pursuant to this law. Funding is provided for general investigation, special studies, continuing authority projects, advanced engineering and design studies, and construction and significant post-authorization change reports. Reports to Congress are to include an estimation of the wildlife benefits or losses for projects including benefits for measures recommended specifically for enhancement, the part of the

cost of joint-use facilities allocated to wildlife, and the part of the costs to be reimbursed by non-Federal interests (16 U.S.C. 662(f)). Congressional authorization is required before the Corps can acquire lands, waters and interests for wildlife conservation (16 U.S.C. 663(c)).

Consistent with primary purposes, project land and water areas are to be made available for conservation, maintenance, and management of wildlife and its habitat by the states or the Secretary of the Interior (16 U.S.C. 663(a) and (e)). Use of these shall be in accordance with general plans approved by the Corps and the USFWS/NMFS, and the state wildlife resources management agency (16 U.S.C. 662(b)). 16 U.S.C. 665(a) describes provisions for maintaining adequate water levels and management of existing facilities (locks, dams and pools) in the Mississippi River between Rock Island, Illinois and Minneapolis, Minnesota. The Corps is directed to give full consideration of fish and wildlife resources and their habitat dependent on such waters, without increasing additional liability to the Government, and without causing damage to levee and drainage districts, adjacent railroads, highways, farm lands, and dam structures, operation for navigation. Impoundments with a maximum surface area less than ten acres are exempt from the provisions of 16 U.S.C. 661-666(c).

RESOURCES COVERED: Fish and wildlife and their habitats; the birds, fishes, mammals, and all other classes of wild animals and all types of aquatic and land vegetation upon which wildlife is dependent. (16 U.S.C. 666(b)).

COMPLIANCE REQUIREMENTS: The Corps and other Federal agencies involved in water resource are to consult with the FWS and with the agency exercising administration over wildlife resources of the particular state wherein the proposed project is to be constructed or action taken. Corps regulations require that the coordination begin with the initiation of the reconnaissance report phase and continue through feasibility and planning, engineering, and design phases of project development. The district must make the reports and recommendations of these entities an integral part of any report presented to Congress or to any agency or person having authority or power (1) to authorize the construction of water resource development projects or (2) to approve a report on the modification or supplementation of plans for previously authorized projects. Recommendations provided by the FWS in Coordination Act Reports must be specifically addressed in Corps feasibility reports. Specific guidance is provided in sections 7-33 through 35, 7-43, and 7-44 of ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies.

Regulatory program: The Corps will consult with the Regional Directors of the USFWS and the NMFS, and the head of the agency responsible for fish and wildlife for the state in which the work is to be performed, with a view to the conservation of wildlife resources by prevention of their direct or indirect loss and damage due to the activity proposed in a permit application. The District Engineer will give full consideration to these views in evaluating the application.

REVIEW AND CONSULTATION REQUIREMENTS

Agency: U.S. Fish and Wildlife Service, National Marine Fisheries Service, state wildlife resource management agencies

Process: An outline of the process is provided below. For more detail, see the MOA between the US Fish and Wildlife Service and the US Army Corps of Engineers for Funding of Fish and Wildlife Coordination Act Activities, 1982 (also known as the "Transfer Funding Agreement").

Program Review- At the beginning of each fiscal year (FY), the Corps districts develop a list of potential projects for which transfer funding may be required, and provide this list to the regional USFWS to aid in planning their workload for the FY.

Initial Coordination- Very early in the planning process, a meeting is held to identify potential environmental issues that must be addressed; attendees typically will include US FWS staff, Corps district staff, and if appropriate, representatives of NMFS or the state wildlife resources management agency.

Development of Scope of Work (SOW)- After a conceptual plan of study has been developed by the Corps study managers and environmental staff, a draft SOW is negotiated with the USFWS for each specific project for each FY. After the SOW is finalized, the Corps district prepares a cover letter and a DA 2544 to authorize expenditure of funds, and sends these to the USFWS. The USFWS approves this package and returns a signed copy to the district. The funding arrangement is on a cost reimbursable basis, and the district receives quarterly billings.

Product: The FWS conducts habitat surveys, evaluating likely impacts of proposed actions, and making recommendations for avoiding or ameliorating impacts or enhancing fish and wildlife resources. Their input to the Corps is provided both verbally and in written documents such as Coordination Act Reports, Planning Aid Reports, and Planning Aid Letters.

Timing/Schedule: The USFWS should provide a timely and useful product, which has been reviewed in draft form by the district. At the completion of each SOW task, the Corps and the USFWS should review and evaluate the product. The USFWS should finalize the report. The Fish and Wildlife Coordination Act Report should be included in the Corps report before going to Congress.

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 7, sections 7-33 through 35, 7-43 and 44; EC 1105-2-209, Implementing Ecosystem Restoration Projects in Connection with Dredging; EC 1105-2-210, Ecosystem Restoration in the Civil Works Program.

Civil Works Engineering: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 7, sections 7-33 through 35, 7-43 and 44; EC 1105-2-209, Implementing Ecosystem Restoration Projects in Connection with Dredging; EC 1105-2-210, Ecosystem Restoration in the Civil Works Program; 33 C.F.R. 222.

Regulatory: 33 C.F.R. 320

FOR MORE INFORMATION SEE: Agreement Between the US Fish and Wildlife Service and the US Army Corps of Engineers for Funding of Fish and Wildlife Coordination Act Activities, signed by Director of Civil Works and Director, U.S. Fish and Wildlife Service in 1980.

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: None identified.

Guidance Title: None identified

Code of Federal Regulations Citation: 43 C.F.R. 24.1-24.7

MANAGEMENT OPPORTUNITIES: Federal agencies are authorized to modify or add to the structures and operations of water-control projects, and to acquire lands in accordance with 16 U.S.C. 663, in order to accommodate the means and measures for such conservation of wildlife resources as an integral part of water resources projects. Ecosystem restoration projects may be formulated to address degraded habitat and the wildlife resources identified in this Act (see EC 1105-2-210).

16 U.S.C. 663 provides for the use of Civil Works projects for conservation, maintenance and management of fish and wildlife resources and wildlife habitat. This is accomplished through the licensing of lands and waters to state wildlife agencies or by cooperative agreement with the Secretary of the Interior under terms of a General Plan ER 1130-2-435, Preparation of Project Master Plans; ER 1130-2-540, Project Operations and Environmental Stewardship

FLOOD CONTROL ACT of 1944

LEGISLATIVE TITLE: Flood Control Act of 1944

UNITED STATES CODE CITATION: 16 U.S.C. § 460d et seq; 33 U.S.C. § 701 et seq

OTHER TITLES AND POPULAR NAMES: None identified

SUMMARY: Section 4 of this Act authorizes the Corps, under the supervision of the Secretary of the Army, to construct, maintain and operate public park and recreational facilities at water resources development projects (16 U.S.C. 460(d)). Local interests are also permitted to construct, operate and maintain such facilities with permission from the Secretary of the Army. Water areas of all such projects shall be open to public use generally, for boating, swimming, bathing, fishing, and other recreational purposes, and ready access to and exit from such water areas along the shores of such reservoirs shall be maintained for general public use, when such use is not found to be contrary to the public interest. The lease of public lands and structures at water projects is also authorized. Recreational uses must be consistent with State laws for the protection of fish and game. All persons designated by the Chief of Engineers for enforcement shall have the authority to issue a citation for violation of the regulations adopted by the Secretary of the Army. Amendments to this Act extend the development of recreation to non-reservoir projects.

RESOURCES COVERED: Reservoirs, water resources, recreation facilities.

COMPLIANCE REQUIREMENTS: Consider recreation during planning of Corps projects.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Corps with communities, State governmental agencies, and project sponsor.

Process: Coordination

Product: Mutually acceptable recreation features and operation plan

Timing/Schedule: Identification of potential opportunities during reconnaissance phase; development of feasible alternatives and willing cost sharing local partner in feasibility phase; refinement of recreation plan details during detailed design.

CORPS GUIDANCE

Regulatory: 33 C.F.R. 222, Corps of Engineers, Department of the Army, Engineering and Design.

FOR MORE INFORMATION SEE: Senate Document 97, Land and Conservation Fund Act of 1964; Federal Water Project Recreation Act of 1965; also, Water Resources Development Act of 1992, Section 225 (33 U.S.C. 2328) and Section 203 (33 U.S.C. 2325).

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: None identified

Guidance Title: None identified

Code of Federal Regulations Citation: 36 C.F.R. 327; 33 C.F.R. 208, 209, 211

MANAGEMENT OPPORTUNITIES: The Corps' new Challenge Cost-Sharing Program provides opportunities for non-federal public and private groups and individuals to contribute to and participate in the operation and/or management of recreation facilities and natural resources at Corps water resource development projects (33 U.S.C. 2328).

FOOD SECURITY ACT OF 1985

LEGISLATIVE TITLE: Food Security Act of 1985

UNITED STATES CODE CITATION: 16 U.S.C. 3801-3862

OTHER TITLES AND POPULAR NAMES: "Swampbuster"; 1985 Farm Bill; 1996 Farm Bill; Federal Agriculture Improvement and Reform Act of 1996; Erodible Land and Wetland Conservation and Reserve Program.

SUMMARY: The 1985 Act contains provisions designed to discourage the conversion of wetlands into non-wetland areas. These provisions collectively, are commonly referred to as the "Swampbuster" provisions (Food Security Act of 1985 (Title XII, Subtitle C)). Swampbuster provisions denied Federal farm program benefits to producers who converted wetlands after December 23, 1985. The Food, Agriculture, Conservation, and Trade Act of 1990 strengthened Swampbuster by making violators ineligible for farm program benefits for that year and subsequent years. The Act also created a system for inadvertent violations allowing farmers to regain lost Federal benefits if they restore converted wetlands.

The 1996 Farm Bill, (Federal Agriculture Improvement and Reform Act of 1996, PL 104-127) contains numerous provisions that purportedly modify the operation of certain agricultural programs. In particular, Subtitle C, Wetland Conservation, modifies Sections 1221 and 1222 (16 USC 3821, and 16 USC 3822) of the Food Security Act of 1985 regarding program ineligibility, wetland delineation, consultation and cooperation requirements, and clarifies the definition of agricultural lands in the Memorandum of Agreement signed with the Department of the Army, the Department of Interior, and the Environmental Protection Agency, January 6, 1994. It also authorizes the Secretary of Agriculture to operate a pilot program for mitigation banking of wetlands to assist persons to increase the efficiency of agricultural operations while protecting wetland functions and values.

The Conservation Reserve Program (Title XII) (16 USC 3831) authorizes the Federal government to enter into contracts with agricultural producers to remove highly erodible cropland from production, in return for annual rental payments. The Wetlands Reserve Program (16 USC 3837) authorizes enrollment of wetlands for protection and restoration through permanent and temporary (30 year) easements.

RESOURCES COVERED: Wetlands; agricultural lands; highly erodible land; converted wetlands.

COMPLIANCE REQUIREMENTS: The Corps coordinates its flood control plans involving agricultural lands with the Natural Resources Conservation Service, and alerts project sponsors and affected farmers of their responsibilities for meeting requirements set forth in the "Swampbuster" provisions of the Food Security Act of 1985. The Act provides for certain "third party" exemptions that may be available to landowners who receive ancillary drainage benefits from Corps projects. It is the responsibility of the individual landowner, not the Corps, to request such an exemption.

The U.S. Department of Agriculture's (USDA) implementing guidance for the Swampbuster provisions establishes the terms and conditions under which a person, who has produced an agricultural commodity on newly converted wetlands, shall be declared ineligible for certain benefits

provided by USDA. Such benefits include: commodity price support or production adjustment payments; farm storage facility loans; disaster payments; payments for storage of grain owned or controlled by the Commodity Credit Corporation; Federal crop insurance; and FmHA loans. Farmers who plant commodity crops, after 23 December 1985, on lands that were converted from a wetland to a non-wetland condition by a Corps project will trigger "Swampbuster" considerations, which may lead to the cited USDA program ineligibilities. This could result in lessening of sponsor support for a project and a reduction in estimated benefits that might otherwise have been attributed to the project proposal. It could also change the with and without project assumptions used to establish environmental impacts and associated mitigation needs; this is particularly significant where habitat preservation credit is a component of mitigation plans.

The Memorandum of Agreement between the Department of Agriculture, the Environmental Protection Agency, the Department of the Interior, and the Department of the Army on January 6, 1994, gives NRCS authority to make Section 404 (33 USC 1344) jurisdictional determinations on agricultural lands using the Food Security Act Manual, and the 1996 Amendments further clarify the definition of agricultural lands for the purposes of implementing that agreement. Implementing guidance is currently under development by an interagency working group (as of May 1996).

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: The Secretary of Agriculture is to assist, through contracts, owners and operators of such land to help them comply with this act.

HAZARDOUS MATERIALS TRANSPORTATION ACT

LEGISLATIVE TITLE: Hazardous Materials Transportation Act of 1974

UNITED STATES CODE CITATION: 49 U.S.C. §§ 1801-1819

OTHER TITLES AND POPULAR NAMES: HMTA, DOT regulations.

SUMMARY: The Act, as last amended in November 1990, is the federal legislation which governs the transportation of hazardous materials in the nation. The policy of Congress is to improve the regulatory and enforcement authority of the Secretary of Transportation to protect the Nation adequately against the risks to life and property which are inherent in the transportation of hazardous materials in commerce.

RESOURCES COVERED: Transportation of hazardous materials, including, but not limited to, solvents, asbestos, PCBs, paints, pesticides, hazardous wastes, etc.

COMPLIANCE REQUIREMENTS: Persons transporting hazardous materials, including hazardous wastes, must comply with the DOT requirements for shipping papers, container marking and labeling, vehicle placarding, record keeping and all other requirements associated with the safe transportation of hazardous materials.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Department of Transportation

Process: Hazardous materials, including hazardous wastes must be properly packaged, labeled and marked. The transport vehicle must be properly placarded. Shipping papers must accompany the shipment and the shipment must be in all aspects in good condition. Records must be maintained.

Product: Shipping papers (manifests for hazardous wastes), labels and marks on containers, placards on transport vehicle.

Timing/Schedule: None specified

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Department of Transportation and the Environmental Protection Agency

Guidance Title: See below

Code of Federal Regulations Citation: 49 C.F.R. 170-178 Hazardous Materials Regulations;
40 C.F.R. 263 Standards Applicable to Transporters of Hazardous Wastes

MANAGEMENT OPPORTUNITIES: Corps Civil Works facilities must prepare shipping papers, properly mark and label containers, and properly placard vehicles carrying hazardous materials. Manifests will be required for hazardous wastes. Training and certification requirements must be met. Records must be maintained.

HISTORIC SITES ACT OF 1935

LEGISLATIVE TITLE: Historic Sites Act of 1935

UNITED STATES CODE CITATION: 16 U.S.C. §§ 461 to 467

OTHER TITLES AND POPULAR NAMES: Historic Sites, Buildings and Antiquities Act, Historic Sites Act

SUMMARY: This Act establishes a national policy to preserve for public use, historic sites, buildings, and objects of national significance for the inspiration and benefit of the American people. The Act authorizes the designation of national historic sites and landmarks, authorizes interagency efforts to preserve historic resources, and establishes a maximum fine of \$500 for violations of the Act. The Act authorizes surveys of historic and archeological sites, buildings, and objects to determine which are significant, and provides for the restoration, reconstruction, rehabilitation, preservation, and maintenance of historic or prehistoric properties of national significance. The Secretary of the Interior, through the National Park Service, is authorized to conduct surveys and studies, collect information, and purchase significant historic properties. The Secretary is also authorized to restore, preserve, maintain, and rehabilitate structures and sites. Museums may be established, and the National Park Service may operate and manage historic sites, and develop educational programs.

RESOURCES COVERED: Historical and Cultural Properties; historic sites, buildings, and objects of national significance.

COMPLIANCE REQUIREMENTS: None specified.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Secretary of the Interior, through the National Park Service, with Federal agencies, States, municipal subdivisions, corporations, associations, or individuals.

Process: Contracts, cooperative agreements

Product: Plans to restore, reconstruct, rehabilitate, preserve, and maintain historic or prehistoric sites, buildings, objects, and property of national historical or archaeological significance, and where deemed desirable, establish and maintain museums and educational programs in connection therewith.

Timing/Schedule: None specified.

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 7.

Civil Works Engineering: None specific to this statute.

Civil Works Construction: ER 1130-2-438, Project Construction and Operation, Historic Preservation Program [Note: ER 1130-2-438 will be superseded by material in ER 1130-2-540, chapter 6, and EP 1130-2-540 later in 1996].

Civil Works Operations: ER 1130-2-438, Project Construction and Operation, Historic Preservation Program [Note: ER 1130-2-438 will be superseded by material in ER 1130-2-540, chapter 6, and EP 1130-2-540 later in 1996].

Regulatory: None specific to this statute

FOR MORE INFORMATION SEE: None identified

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: National Park Service

Guidance Title: See below

Code of Federal Regulations Citation: Implementing Regulation 36 C.F.R. 62 and 65-National Historic Landmarks; 36 C.F.R. 68- Standards for Historic Preservation.

MANAGEMENT OPPORTUNITIES: The Secretary of the Interior, through the National Park Service, may seek and accept the assistance of any Federal (i.e., Corps), State or municipal department or agency, or any educational or scientific institution, or any patriotic association, or any individual in the accomplishment of the historic preservation activities cited in the above "Summary" (16 U.S.C. 464 (a)).

HISTORICAL AND ARCHEOLOGICAL DATA-PRESERVATION

LEGISLATIVE TITLE: Historical and Archeological Data - Preservation

UNITED STATES CODE CITATION: 16 U.S.C. §§ 469 et. seq.

OTHER TITLES AND POPULAR NAMES: Moss-Bennett Act; Historical Data - Dam Construction; Reservoir Salvage Act Amendment; Archeological and Historic Preservation Act; An Act to Provide for the Preservation of Historic American Sites, Buildings, Objects and Antiquities of National Significance

SUMMARY: The intent of the Act is to make authorized Federal construction programs, dam construction and specified related activities, and all other Federal projects licensed or assisted by Federal agencies responsive to the damage they will cause to scientific, prehistoric, historical and archeological resources. The Act provides a mechanism through which resources can be salvaged after a decision has been made to proceed with a project. The Act directs Federal agencies to notify the Secretary of the Interior when they find that any Federal construction project or Federally licensed activity or program may cause irreparable loss or destruction of significant resources or data. It also provides for criteria for funding historical and archeological protection for such projects. Section 7 of the Act is interpreted to mean that historic preservation as part of mitigation for Corps projects shall be limited to 1 percent of the total estimated Federal appropriation required for construction of a project, and that this expenditure is a Federal cost. The 1 per centum limitation of this section does not apply in the event that the project involves \$50,000 or less. A waiver request must be submitted to the National Park Service, through the Assistant Secretary of the Army for Civil Works, to exceed the 1 percent limitation. Costs over the 1 percent limitation are shared on the same basis as other joint and separable costs.

RESOURCES COVERED: Historical and cultural resources; historic American sites, buildings, objects (relics and specimens), and antiquities of national significance that would be altered, lost, or destroyed by dam construction and operation projects. Archeological data are the focus of the act.

COMPLIANCE REQUIREMENTS: Coordinate with Secretary of the Interior, National Park Service, Regional Consulting Archeologist

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Regional Consulting Archeologist (RCA)

Process: Federal agencies notify RCA, typically through the Sections 106/110 compliance process, and solicit comments and willingness to provide funding (rarely occurs).

Product: Comment letter from RCA

Timing/Schedule: Along with overall routine project and NEPA coordination.

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 7, Environmental Planning and Evaluation Considerations

MANAGEMENT OPPORTUNITIES: None identified.

LAND AND WATER CONSERVATION FUND ACT

LEGISLATIVE TITLE: Land and Water Conservation Fund Act of 1965

UNITED STATES CODE CITATION: 16 U.S.C. § 460/-4 et seq

OTHER TITLES AND POPULAR NAMES: Land and Water Conservation Act, LWCFA

SUMMARY: The Act established a fund from which Congress can make appropriations for outdoor recreation. The fund derives revenue from entrance and user fees, sale of surplus Federal property, and the Federal motorboat fuel tax. The National Park Service provides assistance to the states and territories in preparing and maintaining Statewide Comprehensive Outdoor Recreation Plans (SCORPs), under the Act. Planning for recreation development at Corps projects is coordinated with the appropriate states so that the plans are consistent with public needs as identified in the SCORPs. The Corps must coordinate with the Secretary of the Interior to insure that no property acquired or developed with assistance from this Act will be converted to other than outdoor recreation uses. The Secretary must assure that conversions are in accordance with existing comprehensive outdoor recreation plans, and that any substitution of other recreation properties are of at least fair market value and of reasonably equivalent usefulness and location.

RESOURCES COVERED: Recreation Facilities and Fish and Wildlife Resources; (See list of recreation facilities per ER 1105-2-11, Appendix J).

COMPLIANCE REQUIREMENTS: Documentation of coordination with the Secretary of the Interior is provided in feasibility reports in situations where Corps undertakings will or may affect (convert) properties or facilities acquired or developed with assistance from this Act. If conversion is necessary, approval of the Secretary is required and plans are usually developed to relocate or recreate affected recreational opportunities.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Department of the Interior (National Park Service), States

Process and Product: Statewide Comprehensive Outdoor Recreation Plans (SCORPs), developed by the states which identify recreation opportunities and priorities for land acquisition and development of recreational facilities. Federal agencies are to consider the information in SCORPS during their planning activities (16 U.S.C. 460/-8).

Timing/Schedule: Impacts to recreation areas and facilities are considered and coordinated throughout the Corps planning process. An initial assessment is made during the reconnaissance phase. Specific, formal coordination with Local and State officials, and the Secretary of the Interior, occurs during the feasibility phase.

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 6- Section VIII, Chapter 7, and Appendix J; ER 1165-2-400, Recreational Planning, Development, and Management Policies.

Civil Works Engineering: None specific to this statute.

Civil Works Construction: None specific to this statute.

Civil Works Operations: ER 1165-2-400, Recreational Planning, Development, and Management Policies.

Regulatory: None specific to this statute.

FOR MORE INFORMATION SEE: Emergency Wetlands Resources Conservation Act

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Department of Interior

Guidance Title: None identified

Code of Federal Regulations Citation: 43 C.F.R. 71.1 et seq; 36 C.F.R. 291.9; 36 C.F.R. 327.23

MANAGEMENT OPPORTUNITIES: The Emergency Wetlands Resources Conservation Act amends this Act and requires states to consider wetlands in their SCORPs (16 U.S.C. 4601-8) States are to identify agencies and organizations involved in wetlands management, evaluate wetlands protection mechanisms, assess wetland resources, identify wetlands loss and degradation factors, and establish priorities for protection. There may be a potential for the ecosystem restoration projects implemented in the Civil Works program to contribute to or compliment the wetland priorities outlined in the SCORPs developed by the states.

MAGNUSON FISHERY CONSERVATION AND MANAGEMENT ACT

LEGISLATIVE TITLE: Reauthorization of and Amendments to the Magnuson Fishery Conservation and Management Act

UNITED STATES CODE CITATION: 16 U.S.C. § 1801 et seq.

OTHER TITLES AND POPULAR NAMES: Magnuson Fishery Conservation and Management Act; Fishery Conservation Amendments of 1990.

SUMMARY: The purpose of this Act is to conserve and manage the fishery resources found off the coasts of the U.S., the anadromous species, and Continental Shelf fishery resources of the U.S. The Act promotes domestic commercial and recreational fishing under sound conservation management principles, and establishes standards for fishery conservation and management, and directs the Secretary of Commerce to establish advisory guidelines, based on the national standards, to assist the development of fishery management plans (16 U.S.C. 1851). The Act establishes eight Regional Fishery Management Councils, to prepare, monitor and revise fishery management plans, which will achieve and maintain the optimum yield from each fishery (16 U.S.C. 1852). The Secretary of Commerce has review and approval authority for the regional plans (16 U.S.C. 1854). Members of the Councils include the principal state officials with marine fishery management responsibility and expertise, the regional directors of the National Marine Fisheries Service, and individuals appointed by the Secretary of Commerce who are knowledgeable regarding the conservation, management, or the commercial or recreational harvest, of fishery resources of the geographical area. The Councils are to: 1) enable the states, fishing industry, consumer and environmental organizations, and any other interested parties to participate in, and advise on the establishment and administration of such plans; and 2) take into account the social and economic needs of the States (16 U.S.C. 1801). Each Council may comment on or make recommendations concerning any activity undertaken, or proposed to be undertaken, by any state or Federal agency that the Council feels may substantially affect the habitat of a fishery resource that is under its jurisdiction, or the habitat of an anadromous fishery under its jurisdiction (16 U.S.C. 1852).

RESOURCES COVERED: Fishery resources found off the coast of the U.S., anadromous species (defined as species of fish which spawn in fresh or estuarine waters of the U.S. and which migrate to ocean waters), and Continental Shelf fishery resources (Coelenterata (jellyfish), Crustacea, Mollusca, and Porifera (Sponges)).

COMPLIANCE REQUIREMENTS: Within 45 days after receiving a comment or recommendation from a regional Council, a Federal agency will provide a written detailed response to the Council regarding the matter raised and including, in the case of a comment or recommendation concerning any activity the Council views as likely to substantially affect the habitat of an anadromous fishery resource under its jurisdiction, description of the measures being considered by the agency for mitigating or offsetting the impacts of the activity on such habitat (16 U.S.C. 1852).

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: The Secretary of the Commerce Department; Regional Management Councils (New England; Mid-Atlantic; South Atlantic; Caribbean; Gulf of Mexico; Pacific; North Pacific; Western Pacific)

Process and Product: The Secretary of Commerce develops advisory guidelines, and regulations for implementation of this Act, and evaluates the plans prepared by the Regional Councils. The eight Regional Management Councils prepare and submit fishery management plans, periodic reports to the Secretary of Commerce, and provide comments or recommendations to state or Federal agencies regarding actions that may affect the habitat of resources their jurisdiction.

Timing/Schedule: Agencies must respond in writing to comments or recommendations from a Council within 45 days.

CORPS GUIDANCE

Civil Works Planning: None specific to this statute.

Civil Works Engineering: None specific to this statute.

Civil Works Construction: None specific to this statute.

Civil Works Operations: None specific to this statute.

Regulatory: None specific to this statute.

FOR MORE INFORMATION SEE: The Federal Advisory Committee Act (5 U.S.C. App)

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Department of Commerce (National Oceanic and Atmospheric Administration)

Guidance Title: None identified.

Code of Federal Regulations Citation: 50 C.F.R. 600-695, excluding Part 697.

MANAGEMENT OPPORTUNITIES: The Corps may be able to participate in opportunities to complement the fishery management plans through ecosystem restoration initiatives in the Civil Works program, and as part of participation in the Coastal America Initiative, and through participation in ongoing regional coordination and assistance efforts.

MARINE MAMMAL PROTECTION ACT

LEGISLATIVE TITLE: Marine Mammal Protection Act of 1972

UNITED STATES CODE CITATION: 16 U.S.C. § 1361 et seq, 1401-1407, 1538, 4107

OTHER TITLES AND POPULAR NAMES: Marine Mammal Act

SUMMARY: This Act establishes a moratorium on the taking and importation of marine mammals and marine mammal products, with exceptions for scientific research, allowable incidental taking, exemptions for subsistence activities by Alaskan natives and hardship exemptions (16 U.S.C. 1371).

RESOURCES COVERED: Wildlife; marine mammals that are: a) morphologically adapted to the marine environment (including sea otters and members of the order Sirenia, Pinnipedia and Cetacea), and b) primarily inhabit the marine environment (e.g., polar bears)

COMPLIANCE REQUIREMENTS: During preparation of the NEPA document, coordination with U.S. Fish and Wildlife Service (USFWS) and the National Marine Fisheries Service (NMFS) will include the discussion of potential impacts to any species covered by this Act. USFWS will provide their comments in the form of a letter or as part of the Fish and Wildlife Coordination Act Report. NMFS will provide their comments in a letter. The concerns and/or recommendations of either agency must be addressed. All practicable efforts will be made to avoid taking of a marine mammal. If the taking of a marine mammal is unavoidable, then the responsible agency (USFWS or NMFS) will be contacted to begin the process of obtaining a permit for any take.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Secretary of Interior (U.S. Fish and Wildlife Service) and/or Secretary of Commerce (National Marine Fisheries Service)

Process: See Compliance Requirements above.

Product: See Compliance Requirements above.

Timing/Schedule: It usually takes a minimum of a year to obtain a permit, if no additional studies are necessary. This lengthy time period is necessary because the issuance of a permit must be in the form of a regulation that must appear in the Federal Register and be coordinated with the Marine Mammal Commission, Committee of Scientific Advisors on Marine Mammals, and the public.

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 7.

Civil Works Engineering: None specific to this statute
Civil Works Construction: None specific to this statute
Civil Works Operations: None specific to this statute

Regulatory: 33 C.F.R. 320

FOR MORE INFORMATION SEE: None identified

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Marine Mammal Commission, Department of the Interior; National Oceanic and Atmospheric Administration

Guidance Title: None identified

Code of Federal Regulations Citation: None Identified.

MANAGEMENT OPPORTUNITIES: The Corps, while given no direct authority by this Act, may have opportunities to work in coordination with the USFWS or the NMFS to incorporate design elements into Civil Works projects that are beneficial to marine mammals (e.g., breakwater designed to incorporate areas for marine mammal haul out). Corps offices are encouraged to coordinate closely with the Marine Mammal Commission for exchange of technical information regarding marine mammals to avoid duplication of research (e.g. Hopper dredging, endangered Atlantic Right Whale design).

MARINE PROTECTION, RESEARCH, AND SANCTUARIES ACT

LEGISLATIVE TITLE: Marine Protection, Research, and Sanctuaries Act of 1972

UNITED STATES CODE CITATION: 33 U.S.C. §§ 1401- 1445; 16 U.S.C. §§1431 et seq; also 33 U.S.C. 1271

OTHER TITLES AND POPULAR NAMES: Ocean Dumping Act; MPRSA

SUMMARY: The Act regulates the dumping of materials into ocean waters. It prevents, or restricts, dumping of materials that would degrade or endanger human health, welfare, or amenities, or the marine environment, ecological systems, or economic potentialities. The Act provides for a permitting process to control the ocean dumping of dredged material. The Act also establishes the marine sanctuaries program, which designates certain areas of the ocean waters as sanctuaries in order to preserve or restore these areas for their conservation, recreational, ecological, or aesthetic values.

Section 102 (33 U.S.C. 1412) authorizes the Administrator of the Environmental Protection Agency (EPA) to promulgate the ocean dumping criteria, to designate recommended ocean disposal sites, and to issue permits for dumping of materials into ocean waters (except for dredged material, which is regulated by the Corps). Section 103 (33 U.S.C. 1413) authorizes the Secretary of the Army to issue permits for the transportation and disposal of dredged material in ocean waters. The disposal must meet the criteria established by the EPA (40 C.F.R. 227 & 228).

Section 302 (16 U.S.C. 1433) of the Act authorizes the Secretary of Commerce to designate areas as marine sanctuaries for the purpose of preserving or restoring such areas for their conservation, recreational, ecological, or aesthetic values.

Title V of the Water Resources Development Act of 1992 (WRDA 92), "National Contaminated Sediment Assessment and Management Act" (33 U.S.C. 1271) establishes a National Contaminated Sediment Assessment and Management program, and amends a number of sections of the MPRSA.

Section 502(a) (33 U.S.C. 1271) establishes a National Contaminated Sediment Task Force to advise the Secretary of Army and EPA Administrator on implementation of Title V; review reports, programs and pollutants selected for criteria; advise and make recommendations on guidelines and prevention and control measures; and review and advise on means and methods to locate long-term disposal sites. The Administrator and Secretary co-chair the Task force whose membership also includes the National Oceanic and Atmospheric Administration, the U.S. Fish and Wildlife Service, the Geological Survey and the Department of Agriculture. Provisions are made for clerical and technical assistance and compensation of non-Federal members, and the Task Force is directed to provide a report to Congress within two years on findings and recommendations.

The Administrator is directed to conduct a comprehensive survey of aquatic sediment quality in the US, including potential sources of pollution, and within 24 months of enactment to report to Congress on findings with recommendations to prevent contamination. The EPA is also directed to conduct a comprehensive and continuing monitoring program to assess aquatic sediment quality. The monitoring program includes location and extent of pollution; methods and protocols for monitoring; system for data management; assessment of

trends over time; identify locations of where pollutants may pose threats to specific resources; establish clearinghouse for information; and, provide a report to Congress on findings within two years.

Section 504(a) amends Sections 103 (c) & (e) of the MPRSA of 1972 (33 U.S.C. 1413(c)) to set procedures and time limits for the Administrator to review and concur with conditions, or nonconcur with a proposed permit by the Secretary for sediment disposal. The permit cannot be issued if a "nonconcur" is issued. If a "concur with conditions" determination is made, the permit issued has to include the specific conditions and require compliance.

Section 505 amends Section 106(d) of the MPRSA of 1972 (33 U.S.C. 1416(d)) to define the applicability of State rules and establish an exception for Federal projects.

The Administrator is directed to designate sites or time periods for dumping, and in conjunction with Secretary, to develop a site management plan for each designated site and describe what should be included in plan and periodic review time frames (33 U.S.C. 1412(c)). A deadline of 1 January 1997 is established for development of management plans at all sites. These amendments also establish a basis for selection and time limits on use of "alternative" disposal sites, designated by the Secretary (33 U.S.C. 1413(b)), provide provisions to ensure consistency with site management plans as part of permit conditions, and to set a time limit of 7 years for permits (33 U.S.C. 141(a)(4)), and establish criminal penalties for violation of provisions and authorize seizure and forfeiture of vessels involved in violation (33 U.S.C. 1415(b)).

Existing reports required to Congress will include a description of permits issued under this title, including number of permits issued with concurrence of EPA, as well as, actions taken for each permit, and descriptive information on permitted site, material disposed and management practices implemented (33 U.S.C. 1412)

RESOURCES COVERED: Marine resources in ocean waters.

COMPLIANCE REQUIREMENTS: For projects involving transportation of dredged material through the territorial sea for the purpose of ocean disposal, or involving dredged material disposal within the territorial seas for the primary purpose of disposal, the discharge will be evaluated under Section 103 of the MPRSA. The disposal must meet the criteria established by the EPA (40 C.F.R. 227 & 228). Procedures for evaluating the potential contaminant-related impacts of disposing dredged material in the ocean are contained in the "Evaluation of Dredged Material Proposed for Ocean Disposal - Testing Manual" (EPA/COE-503/8-91/001). The Corps will generally utilize ocean disposal sites designated by the EPA to the maximum extent practical. Where no EPA designated site is available, the Corps may select a suitable ocean disposal site or sites using procedures and outlined criteria in 40 C.F.R. 228.4(e), 228.5 and 228.6. Potential ocean disposal sites will be specified in feasibility reports and, to the fullest extent practicable, the Section 103 evaluation will be completed during the feasibility study. (ER 1105-2-100). Efforts are currently underway to develop joint guidance between the Corps and EPA on site management plans and monitoring pursuant to 33 U.S.C. 1271 et seq.

Activities in sanctuary areas may be authorized only if the Secretary of Commerce certifies that the activities are consistent with Title III of the Act and can be carried out within in the regulations for the sanctuary.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Environmental Protection Agency (EPA), Army Corps of Engineers (Corps), National Oceanic and Atmospheric Administration (NOAA), States (if within State's jurisdiction). With a few exceptions, states normally have control over the sea out to the three mile limit.

Process and Product: EPA is responsible for issuing permits for the disposal of non-dredged materials in ocean waters. The Corps is responsible for issuing permits for the transportation and disposal of dredged material for disposal in ocean waters. The Corps shall apply the same testing criteria for the issuance of permits as EPA, and will issue permits in consultation with EPA and with any State having jurisdiction over the disposal site.

Timing/Schedule: Permits issued under this Act are limited to 7 years.

MANAGEMENT OPPORTUNITIES: Protection of marine resources, research on impacts and disposal management practices, management of disposal sites and disposal methods are part of the Corps responsibilities for stewardship of marine resources. The Corps can utilize appropriate opportunities to support the goals of this Act as part of Civil Works initiatives.

MIGRATORY BIRD CONSERVATION ACT

LEGISLATIVE TITLE: Migratory Bird Conservation Act

UNITED STATES CODE CITATION: 16 U.S.C. § 715 to 715s

OTHER TITLES AND POPULAR NAMES: None identified.

SUMMARY: This Act establishes the Migratory Bird Conservation Commission (MBCC) consisting of the Secretary of the Interior, Secretary of Agriculture, two members of the Senate, and two members of the House of Representatives (16 U.S.C. 715a). The committee is authorized to consider the purchase or rental of land, water or transitional area where the Secretary of Interior has determined that such an area is necessary for the conservation of migratory birds (sanctuaries, preservations, refuges), and where he has consulted with the county or local government, and the Governor of the State where the property is located (16 U.S.C. 715c). The Migratory Bird Conservation Fund is established to acquire lands for conservation, to maintain acquired lands for habitat preservation, and for any expenses necessary for the administration development, and maintenance of such areas including construction of dams, dikes, ditches, spillways, and flumes for improving habitat, and mitigating pollution threats to waterfowl and migratory birds (16 U.S.C. 715k). No lands acquired, held, or used by the United States for military purposes is subject to any provision of this Act (16 U.S.C. 715d).

RESOURCES COVERED: Migratory birds, waterfowl, and associated habitat

COMPLIANCE REQUIREMENTS: None specific to the Corps.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Secretary of Interior, Migratory Bird Conservation Commission, States, Local governments

Process: Not specified

MANAGEMENT OPPORTUNITIES: There may be opportunity for the Corps to assist the Secretary of Interior through a Cooperative Agreement with restoration of important waterfowl habitat through the Support-for-Others program.

NATIONAL ENVIRONMENTAL POLICY ACT

LEGISLATIVE TITLE: National Environmental Policy Act of 1969

UNITED STATES CODE CITATION: 42 U.S.C. §§ 4321- 4347

OTHER TITLES AND POPULAR NAMES: NEPA; also mistakenly called the National Environmental "Protection" Act.

SUMMARY: The National Environmental Policy Act (NEPA) is the basic national charter for protection of the environment. The Act declares it a national policy to "encourage productive and enjoyable harmony between man and the environment; to promote efforts which will prevent or eliminate damage to the environment and biosphere and stimulate the health and welfare of man; and to enrich the understanding of the ecological systems and natural resources important to the Nation" (42 USC 4321). The profound impacts of man's activities "on the interrelations of all components of the natural environment" are recognized (e.g., urbanization, population growth, industrial expansion, resource exploitation) (42 USC 4331). The Act specifically declares a "continuing policy of the Federal Government, in cooperation with State and local governments, and other public and private organizations to use all practicable means and measures ... to create and maintain conditions under which man and nature can exist in productive harmony, and fulfill the social, economic, and other requirements of present and future generations of Americans" (42 USC 4331).

The Act also states that it is the continuing responsibility of the Federal Government to use all practicable means, consistent with other essential considerations of National policy, to improve and coordinate Federal plans, functions, programs, and resources to, among other things: assure safe, healthful, productive and esthetically and culturally pleasing surroundings for all Americans; attain the widest beneficial use of the environment without degradation, risk to health or safety; preserve important historic, cultural and natural aspects of our national heritage; achieve balance between population and resource use which will permit high standards of living and a wide sharing of life's amenities; and, enhance the quality of renewable resources and approach the maximum attainable recycling of depletable resources (42 USC 4331).

The Act authorized and directed "that, to the fullest extent possible, the policies, regulations and public laws of the United States shall be interpreted and administered in accordance with the policies of the Act", and imposes general and specific requirements on all Federal agencies (42 USC 4332).

Agencies are required to "utilize a systematic, interdisciplinary approach which will ensure the integrated use of the natural and social sciences and the environmental design arts in planning and decision making...". They are also to insure that "unquantified environmental amenities and values may be give appropriate consideration in decision making along with economic and technical considerations" (Section 102(2)(A)) (42 USC 4332 (2)(A)).

Section 102(2)(C) (42 U.S.C. 4332) requires that every recommendation or report on proposals for legislation and other major Federal actions significantly affecting the quality of the human environment, include a statement on: the environmental impacts of the proposed action; any adverse environmental effects which cannot be avoided should the proposal be implemented; alternatives to the proposed action; the relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity; and, any irreversible and irretrievable commitments of resources which would be

involved in the proposed action should it be implemented. Agencies responsible for the action shall consult with and obtain comments from other agencies with jurisdiction by law or special expertise, with response to any environmental impact.

NEPA also establishes the Council on Environmental Quality (CEQ), in the Executive Office of the President (42 USC 4341). The Council advises and assists the President in providing leadership in protecting and enhancing the quality of the Nation's environment. It develops and evaluates Federal policies and activities on environmental quality. One of CEQ's primary functions in relation to water resources is the preparation of regulations concerning the development of environmental impact statements developed by the Corps and other agencies. The Office of Environmental Quality (OEQ), which was established in 1970, by the Environmental Quality Improvement Act, (P.L. 91-224) (42 USC 4371 et seq), provides staff for the Council.

RESOURCES COVERED: The quality of the historic, cultural and natural aspects of the human environment in general; the natural and physical environment and the relationship of people with that environment.

COMPLIANCE REQUIREMENTS: NEPA requires that a detailed statement accompany every recommendation or report on proposals for legislation and other major Federal actions significantly affecting the quality of the human environment. The Corps of Engineers normally prepares EISs for feasibility reports for authorization and construction of major projects, for changes in projects which increase size substantially or incorporate additional purposes, and for major changes in the operation and/or maintenance of completed projects. Environmental assessments are normally prepared for other Corps actions except for certain minor and/or routine actions which are categorically excluded from NEPA documentation. A finding of no significant impact is prepared by the reporting officer to accompany an assessment when it is determined that an EIS will not be prepared. NEPA documentation is accomplished prior to implementation of emergency work, if practicable. (ER 200-2-2)

Notice of Intent. A notice of intent to prepare a draft EIS is published in the Federal Register as soon as practicable after reporting officers decide to prepare a draft EIS (ER 200-2-2). Record of Decision. A Record of Decision is prepared to document the Corps final decision on a proposed action requiring an EIS. The Record of Decision identifies the reasonable alternatives; designates the environmentally preferable alternative or alternatives and the agency's preferred alternative; the relevant factors including economic and technical considerations, statutory missions, and national policy which were balanced to make the decision; and whether all practicable means to avoid or minimize environmental harm have been adopted, and if not, why not. (ER 200-2-2)

The Council on Environmental Quality developed Regulations For Implementing the Procedural Provisions of the National Environmental Policy Act (40 C.F.R. 1500-1508). Part 1500, Sec 1500.1(b) of this guidance requires that provisions must be made to insure that environmental information is available to public officials and citizens before decisions are made and before actions are taken. Section 1506.6 provides requirements for public involvement, requiring that ... agencies shall make diligent efforts to involve the public in preparing and implementing their NEPA

procedures. These regulation go on to mandate that the general public be involved in scoping of the project, and be invited to comment after release of the draft EIS and the final EIS and responses to those comments are provided.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Federal agencies, State and local agencies, Indian tribes, applicants, the public.

Process and Product: Environmental Assessment (EA) and a Finding of No Significant Impact (FONSI); or, Environmental Impact Statement (EIS) and a Record of Decision (ROD).

The Council on Environmental Quality (CEQ) regulations implementing the provisions of NEPA (40 C.F.R. 1500-1508) require the Federal agency having primary responsibility for preparing an environmental impact statement (EIS) to determine whether any other Federal agencies have jurisdiction by law, a statutorily mandated consultive role, or special expertise on environmental quality issues. "Jurisdiction by law" is defined as authority to approve, deny, or finance all or part of a proposal, and encompasses permits and licenses. "Special expertise" is defined as statutory responsibility, agency mission or related program experience. Appendix II of CEQ regulations lists Federal agencies so defined. The Corps review of another agency's EIS should be specific and may address either the adequacy of the EIS or the merits of the alternatives, or both, where the Corps has jurisdiction by law (Section 10, Section 404, etc.) or special expertise (flood control, navigation, water supply, etc.). District Engineers are designated as responsible NEPA officials for providing comments on other agencies EIS's except proposals requiring HQUSACE or ASA(CW) review (ER 200-2-2).

Timing/Schedule: Minimum 45-day review of draft statement; no Federal decision until at least 90 days after draft notice and 30 days after final notice is published in the Federal Register.

CORPS GUIDANCE

Civil Works Planning: ER 200-2-2, Procedures for Implementing NEPA (also published as 33 C.F.R. 230); ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies. Civil Works Engineering: ER 200-2-2, Procedures for Implementing NEPA; ER 1105-2-100 Guidance for Conducting Civil Works Planning Studies, Chapter 7 and Appendix F; ER 1165-2-132, Hazardous, Toxic and Radioactive Waste Guidance for Civil Works Projects; 33 C.F.R. 222.

Civil Works Construction: ER 200-2-2, Procedures for Implementing NEPA; ER 1165-2-132, Hazardous, Toxic and Radioactive Waste Guidance for Civil Works Projects.

Civil Works Operations: ER 200-2-2, Procedures for Implementing NEPA; ER 1165-2-132, Hazardous, Toxic and Radioactive Waste Guidance for Civil Works Projects.

Regulatory: 33 C.F.R. 320, 325 (Appendix C)

FOR MORE INFORMATION SEE: 40 C.F.R. 1500-1508; 45 FR 57488-57514, NEPA Implementation Procedures, Appendix I (Federal Agency NEPA Contacts) and Appendix II (Agencies with Jurisdiction by Law or Special Expertise on Environmental Quality Issues; Council on Environmental Quality, 28 August 1980; 46 FR 18026-18038, Forty Most Asked Questions Concerning CEQ's NEPA Regulations, Council on Environmental Quality, 23 March 1981.

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Council on Environmental Quality (CEQ). One of CEQ's primary functions in relation to water resources is the preparation of regulations concerning the development of environmental impact statements developed by the Corps and other agencies.

Guidance Title: Regulations for Implementing the Procedural Provisions of the National Environmental Policy Act

Code of Federal Regulations Citation: CEQ regulations on implementation of the procedural provision of NEPA are presented in 40 C.F.R. 1500-1508.

MANAGEMENT OPPORTUNITIES: The policy declared as by NEPA: encourages productive and enjoyable harmony between man and the environment; promotes efforts which will prevent or eliminate damage to the environment and biosphere and stimulate the health and welfare of man; and encourages enrichment of the understanding of the ecological systems and natural resources important to the Nation (42 USC 4321). In addition to complying with the procedural aspects of the Act, there may be opportunities to contribute to the policy established by NEPA in carrying out the numerous programs and activities within the Civil Works program.

NATIONAL HISTORIC PRESERVATION ACT OF 1966

LEGISLATIVE TITLE: National Historic Preservation Act of 1966

UNITED STATES CODE CITATION: 16 U.S.C. §§ 470 et seq

OTHER TITLES AND POPULAR NAMES: National Historic Preservation Act; NHPA

SUMMARY: The Act establishes preservation as a national policy and directs the Federal government to provide leadership in preserving, restoring and maintaining the historic and cultural environment of the Nation. Preservation is defined as the protection, rehabilitation, restoration, and reconstruction of districts, sites, buildings, structures, and objects significant in American history, architecture, archeology, or engineering. The Act authorizes the Secretary of the Interior to expand and maintain a national register of districts, sites, buildings, structures, and objects significant in American history, architecture, archaeology and culture, referred to as the National Register. Also establishes the Advisory Council on Historic Preservation composed of 29 members, one of which is the Secretary of Defense.

The 1980 amendments established guidelines for nationally significant properties, curation of artifacts, and data documentation of historic properties, and preservation of Federally owned historic sites; required designation of a Preservation Officer in each Federal Agency; authorized the inclusion of historic preservation costs in project planning costs; and, authorized the withholding of sensitive data on historic properties when necessary. Federal agencies are directed to maintain historic properties in ways that consider the preservation of historic, archeological, architectural, and cultural values. Federal historic preservation programs shall insure that the preservation of properties not under the jurisdiction or control of agencies, but subject to be potentially affected by agency actions, are given full consideration in planning.

RESOURCES COVERED: Historic and cultural properties; Any prehistoric, and/or historic district, site, building, monument, deposit, structure, or object, listed in or determined eligible for listing in the National Register of Historic Places.

COMPLIANCE REQUIREMENTS: Federal agencies having direct or indirect jurisdiction over a proposed Federal or federally assisted undertaking shall take into account the effect of the undertaking on any district, site, building, structure, or object that is included in or eligible for inclusion in the National Register. Federal agencies shall afford the Advisory Council on Historic Preservation a reasonable opportunity to comment on each undertaking (Section 106 (16 U.S.C. 470f)). In addition, federal agencies shall assume responsibility for the preservation of historic properties that are owned or controlled by the agencies. They also shall establish a program to locate, inventory and nominate all properties under the agency's ownership or control that are eligible for inclusion on the National Register (Section 110(16 U.S.C. 470h-2)).

The Corps must be able to document compliance with the Act by including relevant coordination or consultation correspondence, study results, agency views and comments, and, if required, mitigation plans in Corps project reports and NEPA documents. The Corps must prepare historic preservation plans for projects under its jurisdiction that discuss survey and evaluation strategies, costs, and schedules, and that establish management objectives for historic properties. The Act requires Federal agencies to develop and implement professional qualification standards for Federal

employees and contractors. A key requirement is that the Corps must ensure that tribal values are taken into account to the extent feasible and Native American and Native Hawaiian groups are authorized to establish their own culturally-specific criteria of significance. Furthermore, these groups may develop their own Section 106 compliance process for resources on lands under their jurisdiction. *Compliance requirements for the Regulatory Program are found in 33 C.F.R. 320, 325, 325-Appendix C, Processing Department of the Army Permits, Procedures for the Protection of Historic Properties Dredging Guidance.*

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Advisory Council on Historic Preservation; State Historic Preservation Officers

Process: Section 106 Review Process, directs Federal agencies, with direct or indirect jurisdiction over proposed Federal or Federally assisted undertakings, to take into account effects on historic properties, in accordance with regulations issued by the Advisory Council on Historic preservation, and in consultation with the Council and the State Historic Preservation Officer.

Section 110 requires Federal agencies to assume responsibility for the preservation of historic properties owned or controlled by them and requires them to locate, inventory, and nominate all properties that qualify for the National Register. Agencies shall exercise caution to assure that significant properties are not inadvertently transferred, sold, demolished, substantially altered, or allowed to deteriorate.

Product: Consultation determination of significance (National Register Eligibility) and Effect - No Effect, No Adverse Effect, or Adverse Effect [may require studies, mitigation plan, and data recovery or architectural recording]

Timing/Schedule: Depending upon available information and the nature and significance of resources, effect determinations may take 30 days (i.e. a "no effect" determination) to over a year. Studies and significance and effect determinations should be completed during the feasibility phase. Mitigation is ordinarily done just prior to construction.

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 7, Section VII Historic Preservation

Civil Works Engineering: None specific to this statute.

Civil Works Construction: ER 1130-2-438, Project Construction and Operation, Historic Preservation Program [Note: ER 1130-2-438 will be superseded by material in ER 1130-2-540, chapter 6, and EP 1130-2-540 later in 1996].

Civil Works Operations: ER 1130-2-438, Project Construction and Operation, Historic Preservation Program [Note: ER 1130-2-438 will be superseded by material in ER 1130-2-540, chapter 6, and EP 1130-2-540 later in 1996]; Dredging Guidance Letter No. 89-01, Policy and Procedures for the Conduct of Underwater Historic Resource Surveys for Maintenance Dredging and Disposal Activities [33 C.F.R. 336.1(c)(6)]

Regulatory: 33 C.F.R. 320, 325, 325-Appendix C, Processing Department of the Army Permits, Procedures for the Protection of Historic Properties Dredging Guidance

FOR MORE INFORMATION SEE: Water Resources Development Act of 1986, Section 943 (33 U.S.C. 2303); Reclamation Projects Authorization and Adjustments Act of 1992 (16 U.S.C. 470h-2).

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Advisory Council on Historic Preservation

Guidance Title: See below

Code of Federal Regulations Citation: 36 C.F.R. 800, Protection of Historic Properties (implementing regulation for the Section 106 and Section/110 processes)

The Section 106 and Section 110 processes usually require application of these regulations:

- 36 C.F.R. 60, National Register of Historic Places
- 36 C.F.R. 63, Determination for eligibility for inclusion in the National Register of Historic Places
- 36 C.F.R. 78, provides a waiver of responsibility from these requirements in the event of a major natural disaster imminent threat to national security
- 36 C.F.R. 79, Curation of Federally Owned Archeological Collections

MANAGEMENT OPPORTUNITIES: As a federal agency, the Corps has the opportunity to implement the Federal Government's policy of providing leadership in the preservation of the cultural resources of the United States. This can be done through the use of both financial and technical assistance and in partnership with the States, local governments, Indian tribes, and private organizations and individuals. In addition to implementing the goals of the Act as part of planning Civil Works projects, surveys are conducted and measures are implemented to protect sites and structures as part of the operation and maintenance of Corps projects.

NATIONAL TRAILS SYSTEM ACT

LEGISLATIVE TITLE: National Trails System Act

UNITED STATES CODE CITATION: 16 U.S.C. §§ 1241 - 1251

OTHER TITLES AND POPULAR NAMES: None identified

SUMMARY: This Act acknowledges the increasing popularity of outdoor recreation, the need to promote access to and enjoyment of outdoor areas of the Nation, both near urban areas and in more remote scenic areas. It establishes the National Trails System (NTS), composed of: recreation trails; scenic trails; historic trails; connecting or side trails; and uniform markers. National recreational trails provide for a variety of outdoor recreation uses in or reasonably accessible to urban areas. National historic trails generally follow original trails or routes of travel of national historical significance. They can include land and water components as well as historic artifacts. Connecting and side trails provide additional points of public access to national recreation, national historic or national scenic trails, or connections between such trails. Recreation and connecting and side trails can be established by the Secretary of Interior or the Secretary of Agriculture with the consent of the Federal Agency, State, or political subdivision with jurisdiction over the lands involved. National scenic trails are extended trails located to provide for the conservation and enjoyment of Nationally significant scenic, historic, natural or cultural qualities of the areas through which such trails may pass. Scenic trails may be located so as to represent desert, marsh, grassland, mountain, canyon, river forest, and other areas, as well as landforms that exhibit significant characteristics of the physiographic regions of the Nation.

The Act establishes a number of National scenic trails (16 U.S.C. 1244), including the Appalachian National Scenic Trail, and the Pacific Crest National Scenic Trail, and includes provisions for administration and development of the NTS (16 U.S.C. 1246). The appropriate Secretary, in consultation with the heads of any other Federal agency administering the lands through which a trail may pass may issue regulations for the use, protection, management, and development of trail right-of-way.

RESOURCES COVERED: Natural resources; national recreation trails; scenic and historic areas.

COMPLIANCE REQUIREMENTS: The Corps must identify, evaluate, and coordinate with the National Park Service, or other appropriate agency, regarding any impacts to the NTS as a result of ongoing or proposed Civil Works activities.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Department of the Interior, Department of Agriculture

Process: None specified.

Product: None specified.

Timing/Schedule: None specified.

CORPS GUIDANCE

Civil Works Planning: ER 1130-2-435, Project Operations, Preparation of Master Plans, December 30 1987; ER 1130-2-400, Recreation Planning, Development, and Management Policies, August 9, 1985 with change dated August 9, 1988

Civil Works Operations: ER 1130-2-400, Management of Natural Resources and Outdoor Recreation at Civil Works Water Resource Projects, June 1, 1986; ER 1130-2-435, Preparation of Master Plans, December 30, 1987

Regulatory: None specific to this statute

FOR MORE INFORMATION SEE: None identified

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Department of the Interior, National Park Service

Guidance Title: National Recreation Trails - Information and Application Procedures for Designation

Code of Federal Regulations Citation: 43 C.F.R. 8342, 8351 et seq.

MANAGEMENT OPPORTUNITIES: The Corps recognizes that the aesthetic attractiveness of scenic corridors available on project lands can be enhanced by incorporation of trails or trail systems. Accordingly, wherever warranted by current or potential public use of Corps water resource projects, consideration is given in planning to the incorporation of trails.

NATIVE AMERICAN GRAVES PROTECTION AND REPATRIATION ACT

LEGISLATIVE TITLE: Native American Graves Protection and Repatriation Act

UNITED STATES CODE CITATION: 25 U.S.C. §§ 3001 et seq

OTHER TITLES AND POPULAR NAMES: NAGPRA

SUMMARY: The Act provides for the protection of Native American and Native Hawaiian cultural items, and establishes a process for the authorized removal of human remains, funerary objects, sacred objects, and objects of cultural patrimony from sites located on lands owned or controlled by the Federal Government. The Act also explains the transfer of ownership of cultural items to Native American or Native Hawaiian individuals (e.g., direct lineal or cultural descendants), organizations or tribes. It addresses the recovery, treatment, and repatriation of Native American and Native Hawaiian cultural items by Federal agencies and museums. In accordance with Section 3(c), (25 U.S.C. 3002) USACE Commands should not claim ownership or permanent control of *specified* cultural items discovered on Federal or tribal lands after 16 November 1990: 1) when lineal descendants are identified who claim human remains and associated funerary objects; 2) if the Native American tribe or Native Hawaiian organization with the closest affiliation presents a claim; or, 3) when the tribe or organization which aboriginally occupied the territory presents the strongest claim. (There may be instances in which the Corps may take temporary custody until ownership is determined.) The Act distinguishes between pre-enactment and post-enactment (November 16, 1990) resources. NAGPRA contains data gathering, reporting, consultation, and permitting provisions. The Corps interim guidance covers the basis for repatriation, the timing of repatriation, and how to handle competing claims for pre- and post-enactment covered resources. The emphasis of the Act is on consultation with Native American tribes and Native Hawaiian organizations to ensure that these entities play a major role in the treatment of specific cultural objects.

CECW-AO/CECW-PD/CECC 1995 Memorandum, "Application of the Native American Graves Protection and Repatriation Act to Water Resources Development Activities", explains that NAGPRA does not apply to lands in which the Federal government has merely been provided access by a landowner and/or local sponsor, for water resources development studies or projects. "However, as the Corps may accept ownership of cultural items it recovers, when they are voluntarily offered by a landowner and/or local sponsor, transferred items are subject to NAGPRA-like activities, at such time as the transfer of ownership is executed."

RESOURCES COVERED: Historic and cultural properties; cultural items, specifically, human remains, associated funerary objects, unassociated funerary objects, sacred objects, or objects of cultural patrimony.

COMPLIANCE REQUIREMENTS:

- a. The Act directs the Corps to inventory holdings or collections of human remains and associated funerary items currently under their jurisdiction by the end of 1995. Inventories were to contain item descriptions, cultural and geographical affiliation information, and a discussion of the circumstances surrounding acquisition of all "covered resources". Summaries, defined as general narratives describing the character and extent of collections, kinds of objects, locational data, circumstances of

acquisition, and cultural affiliation, were to be prepared, for unassociated covered resources, within 3 years of enactment of the law. Summaries could be prepared, in lieu of item-by-item inventories.

b. Following completion of inventories and summaries, Commands should consult with Native American tribal governments, Native Hawaiian organizations, Alaskan Native Villages, and traditional religious leaders regarding repatriation of existing collections. Programmatic consultation is recommended with tribal organizations which routinely could claim affiliation with covered resources on Corps fee lands. Commands should not delay arranging for the transfer of cultural items, unless the items are an integral part of a specific or on-going scientific study, whose outcome is "of major benefit to the United States". In these instances, transfer should occur within 90 days of completion of studies.

c. In cases where unanticipated covered resources are encountered during construction, Commanders must cease undertakings or activities, in whole or in part, for at least 30 days, and make a reasonable effort to protect the items discovered.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Department of the Interior, Tribal governments, Native Hawaiian organizations, Alaskan Native Villages

Process: Identification of geographical and cultural affiliation of associated (with human remains) and unassociated covered resources; consultation prior to excavation and removal and repatriation; and, transfer/repatriation.

Product: Inventories, narrative summaries, permits, repatriation agreements

Timing/Schedule: Existing collections - inventories of associated covered resources within 5 years and summaries of unassociated covered resources within 3 years; Archeological Resource Protection Act (ARPA) permits for excavation and removal prior to undertaking new work; transfer/repatriation agreements as required as a result consultation, or within 90 days of completion of "specific scientific studies".

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies. CECW-O/CECW-P, Interim Guidance for the Native American Graves Protection and Repatriation Act, Public Law 101-601, 5 June 1991. CECW-AO/CECW-PD/CECC 1995 Memorandum, Application of the Native American Graves Protection and Repatriation Act to Water Resources Development Activities

Civil Works Engineering: See planning

Civil Works Construction: See planning

Civil Works Operations: See planning; ER 1130-2-540, Project Operations: Environmental Stewardship; ER 1130-2-433, Storage and Curation of Archeological and Historic Data [Note: ER 1130-2-433 will be superseded by material in ER 1130-2-540, chapter 6, and EP 1130-2-540 later in 1996].

Regulatory: 33 C.F.R. 320 and 325, Appendix C: Processing of Department of the Army permits
Procedures for the Protection of Historic Properties
FOR MORE INFORMATION SEE: None identified

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: National Park Service

Guidance Title: Uniform Guidance is pending, Native American Graves Protection and Repatriation Act Regulations

Code of Federal Regulations Citation: Title 43 - Public Lands: Interior, Subtitle A - Office of the Secretary of the Interior, Part 10 (Pending)

MANAGEMENT OPPORTUNITIES: Information acquired from ARPA inventories can also be incorporated into the curation management of Corps cultural resources collections. For this reason and to the extent possible, ARPA inventories should be conducted in such a manner so as to produce types of information which also can be used for curation purposes. The opportunity exists to acquire information basic to the needs of both NAGPRA and curation. This includes such items as insuring all objects are properly identified, labeled, and bagged along with identifying objects which are missing, damaged, or in need of stabilization.

NOISE CONTROL ACT OF 1972

LEGISLATIVE TITLE: Noise Control Act of 1972

UNITED STATES CODE CITATION: 42 U.S.C. § 4901 to 4918

OTHER TITLES AND POPULAR NAMES: None identified.

SUMMARY: This Act establishes a national policy to promote an environment for all Americans free from noise that jeopardizes their health and welfare. To accomplish this, the Act establishes a means for the coordination of Federal research and activities in noise control, authorizes the establishment of Federal noise emissions standards for products distributed in commerce, and provides information to the public respecting the noise emission and noise reduction characteristics of such products (42 U.S.C. 4901). The Act authorizes and directs that Federal agencies, to the fullest extent consistent with their authority under Federal laws administered by them, carry out the programs within their control in such a manner as to further the policy declared in 42 U.S.C. 4901. Each department, agency, or instrumentality of the executive, legislative and judicial branches of the Federal Government having jurisdiction over any property or facility or engaged in any activity resulting, or which may result in, the emission of noise shall comply with Federal, State, interstate, and local requirements respecting control and abatement of environmental noise. Each Federal agency shall, upon request, furnish information to the Environmental Protection Agency (EPA) regarding the nature, scope, and results of the noise research and noise-control programs of that agency, and shall consult with EPA, as required, in prescribing standards or regulations respecting noise. Certified low-noise-emission products shall be acquired for use by the Federal Government in lieu of other products if the Administrator of General Services determines that reasonably priced, reliable substitutes exist (42 U.S.C. 4914). The Act includes provision for citizen suits (42 U.S.C. 4911(a)) whereby any person may commence civil action against the United States or any governmental instrumentality or agency who is alleged to be in violation of any noise control requirement.

RESOURCES COVERED: Environmental noise - intensity, duration and character of sounds from all sources

COMPLIANCE REQUIREMENTS: Each Federal agency is required to limit noise emissions to within compliance levels. The Corps is responsible for operating its facilities within compliance noise levels set forth in Federal regulations, and state and/or local laws. The Corps also may be required to investigate the purchase of alternative machinery or equipment that has been certified as "low-noise-emission" by the GSA.

NORTH AMERICAN WETLANDS CONSERVATION ACT

LEGISLATIVE TITLE: North American Wetlands Conservation Act

UNITED STATES CODE CITATION: 16 U.S.C. § 4401 et seq

OTHER TITLES AND POPULAR NAMES: None identified

SUMMARY: The Act is designed to encourage partnerships among public agencies and other interests to protect, enhance, restore, and manage an appropriate distribution and diversity of wetland ecosystems and other habitats for migratory birds and other fish and wildlife. Emphasis is on maintenance and improved distributions of migratory bird populations and North American waterfowl. The Act establishes the North American Wetlands Conservation Council (16 U.S.C. 4403) (NAWCC) to recommend wetlands conservation projects to the Migratory Bird Conservation Commission (MBCC)(16 U.S.C. 715a). In recommending such projects, consideration is given to availability of non-Federal matching funds, partnerships among public agencies and private entities, consistency with the National Wetlands Priority conservation plan (16 U.S.C. 3921), conservation of migratory nongame birds, other fish and wildlife, and species that are listed, or are candidates for listing, as threatened or endangered under the Endangered Species Act (16 U.S.C. 1531 et seq.)

Section 9 of the Act (16 U.S.C. 4408) addresses the restoration, management, and protection of wetlands and habitat for migratory birds on Federal lands. Federal agencies acquiring, managing, or disposing of Federal lands and waters are to cooperate with the Fish and Wildlife Service to restore, protect, and enhance wetland ecosystems and other habitats for migratory birds, fish and wildlife on their lands, to the extent consistent with their missions and statutory authorities.

The Fish and Wildlife Service is authorized to enter into cooperative agreements and grants with public and private agencies, organizations, institutions and individuals to implement the Act on a public-private cost-shared basis. The non-Federal share of contributions to the costs of projects undertaken pursuant to this Act may not be derived from Federal grant programs (16 U.S.C. 4407b).

RESOURCES COVERED: wetlands, wetland ecosystems, migratory birds, waterfowl, fish and wildlife.

COMPLIANCE REQUIREMENTS: The Corps should manage projects to enhance wetland habitat for waterfowl, whenever possible and practicable.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Fish & Wildlife Service, North American Wetlands Conservation Council

Process and Product: NAWCC submits wetlands conservation projects to the Migratory Bird Conservation Commission for joint review and consideration of those projects which should be pursued. Secretary of Interior is responsible for submitting an annual report to Congress on estimated number of acres of wetlands and habitat restored, trends in populations size of migratory

birds and waterfowl, status of efforts to establish cooperative agreements for wetland habitat projects, and status of ongoing or in-progress projects.

Timing/Schedule: None specified.

CORPS GUIDANCE:

Civil Works Planning: None specific to this statute.

Civil Works Engineering: None specific to this statute.

Civil Works Construction: None specific to this statute.

Civil Works Operations: None specific to this statute.

Regulatory: None specific to this statute.

FOR MORE INFORMATION SEE: Fish and Wildlife Conservation Act; Migratory Bird Conservation Act; Emergency Wetland Resources Act; Endangered Species Act.

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Fish and Wildlife Service

Guidance Title: None identified.

Code of Federal Regulations Citation: None.

MANAGEMENT OPPORTUNITIES: There may be opportunities for the Corps to contribute to the goals of this Act through Section 1135 projects or as part of other ecosystem restoration initiatives. In addition, there may be opportunities to support the goals of this Act through Civil Works stewardship initiatives undertaken as part of Natural Resource Management programs.

OIL POLLUTION ACT OF 1990

LEGISLATIVE TITLE: Oil Pollution Act of 1990

UNITED STATES CODE CITATION: 33 U.S. Code §§ 2701-2761 et seq

OTHER TITLES AND POPULAR NAMES: OPA, Great Lakes Oil Pollution Research and Development Act

SUMMARY: Spurred by the March 1989 *Exxon Valdez* oil spill and other large spills occurring within months of that catastrophe, the Oil Pollution Act of 1990 (Public Law 301-308) represents the culmination of 15 years of congressional efforts to reach a consensus on comprehensive federal oil spill legislation. The Act has six major provisions: an expanded federal role in oil-spill response, contingency planning requirements for vessels and certain facilities, the establishment of the Oil Spill Liability Trust Fund, the increase of liability for spills of oil or hazardous substances from vessels and facilities, the requirements for double hulls on new tankers, and the requirements for increased research and development into spill response technologies.

RESOURCES COVERED: Oil and hazardous substances, damage to natural resources

COMPLIANCE REQUIREMENTS: Facility response plans may be required for vessels and on-shore facilities which, because of their locations, could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters or adjoining shorelines. The regulations further discuss what facilities would be reasonably expected to cause substantial harm. Also Spill Prevention, Control and Countermeasures (SPCC), and/or Facility Response Plans may be required for certain facilities.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: US Coast Guard and the Environmental Protection Agency

Process and Product: Facility Response Plan, Spill Prevention, Control and Countermeasures (SPCC) Plan

Timing/Schedule: None specified

CORPS GUIDANCE:

Civil Works Planning: None specific to this statute

Civil Works Engineering: None specific to this statute

Civil Works Construction: None specific to this statute

Civil Works Operations: ER 200-2-3, Environmental Compliance Policies and EP 200-2-3, Environmental Compliance Guidance and Procedures, to be published later in 1996.

Regulatory: None specific to this statute

FOR MORE INFORMATION SEE: Prior to the enactment of OPA, federal oil spill liability law was embodied in four primary statutes: the Clean Water Act, the Outer Continental Shelf Lands Act, the Deepwater Port Act, and the Trans-Alaska Pipeline Authorization Act. OPA replaces this approach by amending and expanding section 311 of the Clean Water Act, to create a comprehensive liability, compensation and prevention scheme under one statute.

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: US Coast Guard and the Environmental Protection Agency

Guidance Title: Executive Order 12777, Implementation of Section 311 of the Federal Water Pollution Control Act of October 18, 1972, as Amended, and the Oil Pollution Act of 1990; C.F.R. titles below.

Code of Federal Regulations Citation: 40 C.F.R. part 112: Oil Pollution Prevention; 33 C.F.R. Part 150 et seq.: Response Plans; 49 C.F.R. Part 106 et seq: Oil Spill Prevention and Response Plans; 15 C.F.R. 990; 33 C.F.R. 135; 33 C.F.R. 137.

MANAGEMENT OPPORTUNITIES: None identified.

OUTER CONTINENTAL SHELF LANDS ACT

LEGISLATIVE TITLE: Outer Continental Shelf Lands Act

UNITED STATES CODE CITATION: 43 U.S.C. § 1331 et seq; 43 U.S.C. § 1801 et seq

OTHER TITLES AND POPULAR NAMES: None identified.

SUMMARY: The Act establishes policy for the management and exploitation of oil and natural gas in the Outer Continental Shelf, and for protecting the marine and coastal environment, in part, by creating an oil spill liability fund. The authority for the Secretary of the Army to prevent obstructions to navigation in navigable waters of the United States is extended to artificial islands and fixed structures located on the outer continental shelf (43 U.S.C. 1333(e)). In addition, the Secretary of Interior may, by agreement, utilize, with or without reimbursement, the services, personnel, or facilities of any Federal agency for environmental studies or information for assessment of management of impacts on the environment or impacts on marine biota from pollution or large spills. Federal agencies must notify the Department of Interior regarding their activities that will have a direct and significant effect on the Outer Continental Shelf or its development (43 U.S.C. 1334(h)).

43 U.S.C. 1337(k) was amended by Public Law 103-426 by authorizing the Secretary of the Interior to negotiate agreements for the use of sand, gravel and shell resources from the Outer Continental Shelf for use in 1) shore protection, beach restoration or coastal wetlands restoration programs or projects undertaken by a Federal, State or local government entity, or 2) a construction project that is funded in whole or in part by or authorized by the Federal Government. The Secretary may assess a fee based on an assessment of the value of the resources and the public interest served by promoting development of the resources. The amendment requires any Federal agency proposing to make use of sand, gravel and shell resources under provisions of this Act to enter into an MOA with the Secretary concerning the potential use of those resources; and Secretary of the Interior to notify the House Committee on Merchant Marine and Fisheries, the House Committee on Natural Resources, and the Senate Committee on Energy and Natural Resources.

RESOURCES COVERED: Natural resources in the subsoil and seabed of the coastal zone; oil, gas and minerals; fish and wildlife.

COMPLIANCE REQUIREMENTS: The Department of Interior oversees Outer Continental Shelf resources, and the Corps must develop a memorandum of Agreement with the Minerals Management Agency for coastal projects that have borrow areas extending beyond the three-mile limit.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Department of Interior (Minerals Management Agency)

POLLUTION PREVENTION ACT

LEGISLATIVE TITLE: Pollution Prevention Act of 1990

UNITED STATES CODE CITATION: 42 U.S.C. § 13101 et seq

OTHER TITLES AND POPULAR NAMES: PPA

SUMMARY: The Act establishes the policy that pollution should be prevented or reduced at its source whenever feasible; pollution that cannot be prevented should be recycled in an environmentally safe manner, whenever feasible; pollution that cannot be prevented or recycled should be treated in an environmentally safe manner whenever feasible; and disposal or other release into the environment should be employed only as a last resort and should be conducted in an environmentally safe manner (42 U.S.C. 1301(b)). The Environmental Protection Agency (EPA) is authorized to develop and implement a strategy for a multi-media approach to source reduction, and establish a standard method of measuring source reduction (42 U.S.C. 1303). The Act also authorizes grants to states for programs to promote the use of source reduction by businesses (42 U.S.C. 1304) and a Source Reduction Clearinghouse (42 U.S.C. 1305) to foster the exchange of information on source reduction techniques, and disseminate this information to businesses and provide technical assistance to businesses.

The Act required owners or operators of facilities required to file an annual toxic chemical release form under Emergency Planning and Community Right-to Know Act, Section 313 to also include with each annual filing a toxic source reduction and recycling report for the preceding calendar year. Not only did EO 12856 require Federal Agencies to comply with the provisions of EPCRA and file a Toxic Release Inventory (TRI) reports for those chemicals exceeding the threshold, it also requires Federal facilities to prepare pollution prevention plans.

RESOURCES COVERED: Hazardous substances, hazardous chemicals and extremely hazardous substances, toxic and radiological waste; toxic chemicals as described in 42 U.S.C. 11023.

COMPLIANCE REQUIREMENTS: Executive Order 12856, Federal Compliance with Right-to Know Laws and Pollution Prevention requirements, August 3, 1993, requires all executive agencies to comply with the PPA to the same extent as any private person. Each owner or operator of a facility required to file an annual toxic chemical release form under Section 313 of the Superfund Amendments and Reauthorization Act of 1986 (SARA Title III) is required by the Pollution Prevention Act to also file a toxic source reduction and recycling report.

REVIEW AND CONSULTATION REQUIREMENTS

Regulatory: None specific to this statute.

FOR MORE INFORMATION SEE: EO 12856, Federal Compliance with Right-to Know Laws and Pollution Prevention requirements, August 3, 1993; EO 12872, Federal Acquisition, Recycling, and Waste Prevention, 22 Oct 1993; and EO 12780, Federal Agency Recycling and the Council on Federal Recycling and Procurement Policy.

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Environmental Protection Agency

Guidance Title: See Emergency Planning and Community Right-to-Know Act

Code of Federal Regulations Citation: See Emergency Planning and Community Right-to-Know Act.

MANAGEMENT OPPORTUNITIES: Opportunities include waste prevention and waste reduction through the use of acquisition controls, life cycle cost and analysis, process modifications, modification of contract and product specifications, recovery of spent or used material for recycling, and use of recycled materials.

RECLAMATION PROJECTS AUTHORIZATION AND ADJUSTMENTS ACT OF 1992

LEGISLATIVE TITLE: Reclamation Projects Authorization and Adjustments Act of 1992

UNITED STATES CODE CITATION: 43 U.S.C. § 390h-1 et seq; 16 U.S.C. § 460l-31-460l-34; 16 U.S.C. 470a, et seq.

OTHER TITLES AND POPULAR NAMES: None identified.

SUMMARY: This Act contains 40 titles; some of which are cited as individual acts. Most titles in this Act authorize initiatives for which the Secretary of the Interior is responsible, primarily through the Bureau of Reclamation. However, the Secretary is authorized collaborate with other Federal as appropriate. Two titles of this Act amend other acts which are applicable to the Civil Works Program.

Title XXVIII (16 U.S.C. 460l-31 - 460l-34), known as the *Reclamation Recreation Management Act*, amends provisions of the Federal Water Project Recreation Act (P.L. 89-72). Section 2804 (16 U.S.C. 460l-32) amends P.L. 89-72 regarding cost sharing requirements for the provision of new recreation facilities, for recreation and fish and wildlife enhancement, and for the expansion or modification of existing recreation facilities. The requirement for the sponsor to assume 100 percent of operations, maintenance, and replacement costs is changed to "not less than one half the costs (16 U.S.C. 460l-13(a))." *Although the original law was directed at the Bureau of Reclamation, these amendments extend to the Corps as well. Civil Works policy continues to require 100 percent non-Federal operations, maintenance, and replacement costs.*

Title XL (16 U.S.C. 470a et seq, & 470 note) amends the *National Historic Preservation Act* (P.L. 89-665)(NHPA) by setting forth a review process for existing threats to properties on, or eligible for inclusion in, the National Register, and for periodic evaluation of State programs for consistency with the Act. Section 4006 (16 U.S.C. 470a) expands the Tribal Historic Preservation Programs to authorize the Secretary of Interior to assist Indian tribes in preserving their historic properties in consultation with the State Historic Preservation Officers through program management and grants. Section 4012 (16 U.S.C. 470h-2) addresses Federal Agency historic preservation programs and directs Federal Agencies with jurisdiction or control over historic properties listed or eligible for the National Register to manage and maintain these properties in such a way to reserve their historic, archaeological, architectural, and cultural value, and that such programs be carried out in consultation with Federal, State, and local agencies, including Indian tribes and Native Hawaiian organizations. Properties not under jurisdiction or control of a Federal agency, but may be potentially affected by an agency's actions, should also be given full consideration in the planning process as to the effects of the activity on the property. Section 4014 (16 U.S.C. 470h-4) amends the NHPA by establishing professional standards for personnel and contractors responsible for historic resources. Title XL also creates Title IV in the National Historic Preservation Act (16 U.S.C. 470x et seq.) to establish a National Center for Preservation Technology and Training to develop and distribute preservation and conservation skills and technologies, to develop and facilitate training for Federal, State and local resource preservation professionals, cultural resource managers, maintenance personnel and others working in the preservation field, and for other purposes. The center is to be established within the Department of Interior, and located at Northwestern State University of Louisiana.

RESOURCES COVERED: recreation; fish and wildlife; historic and cultural resources.

COMPLIANCE REQUIREMENTS: Title XXVIII requires sponsor to contribute at least one half funding for recreation opportunities and allows for documentation in Corps reports and NEPA documents that recreation opportunities were considered during the planning and design processes. Title XL requires that the Corps prepare historic preservation plans for projects under its jurisdiction that discuss survey and evaluation strategies, costs, and schedules, and that establish management objectives for historic properties to ensure that tribal values are taken into account to the extent feasible. Native American and Native Hawaiian groups are authorized to establish their own culturally-specific criteria of significance. Furthermore, these groups may develop their own Section 106 compliance process for resources on lands under their jurisdiction.

RESERVOIR AREAS-FOREST COVER

LEGISLATIVE TITLE: Reservoir Areas-Forest Cover

UNITED STATES CODE CITATION: 16 U.S.C. § 580m

OTHER TITLES AND POPULAR NAMES: Forest Conservation Act

SUMMARY: This Act establishes policy to provide that reservoir areas of projects for flood control, navigation, hydroelectric power development, and other related purposes owned in fee and under the jurisdiction of the Secretary of the Army and the Chief of Engineers be developed and maintained to encourage, promote, and assure adequate and dependable future resources of readily available timber, through sustainable yield programs, reforestation, and accepted conservation practices. The Act also provides for the increase in value of such areas for conservation, recreation, and other beneficial uses provided that such development and management are accomplished to the extent practicable and compatible with other uses of the project. The Chief of Engineers, under the supervision of the Secretary of the Army, is directed to provide for the protection and development of forest or other vegetative cover and the establishment and maintenance of other conservation measures on reservoirs under his jurisdiction, so as to yield the maximum benefit and otherwise improve such areas. Programs and policies developed pursuant to this Act shall be coordinated with the Secretary of Agriculture, and with appropriate State conservation agencies.

RESOURCES COVERED: Forests; forest cover; reservoir areas; timber.

COMPLIANCE REQUIREMENTS: Forest management programs are to be developed at Corps reservoir projects to increase the value of project lands for recreation and wildlife, and to promote natural ecological conditions by following accepted conservation practices. Where the preservation of natural conditions are the paramount consideration, there is no justification for using practices appropriate to commercial forestry production such as thinning, pruning and release cutting for stand improvement. Vegetation, living or dead, will be removed only with justification such as urgent disease control, urgent insect pest control, fire hazard reduction, wildlife management practice, removal for construction of recreational facilities or other specific essential uses (ER 1130-2-400).

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Department of Agriculture; State conservation agencies

Process: None specified.

Product: Forest conservation programs in reservoir areas.

Timing/Schedule: None specified.

CORPS GUIDANCE

Civil Works Planning: ER 1130-2-400 Management of Natural Resources and Outdoor Recreation at Civil Works Water Resource Projects.

Civil Works Engineering: None specific to this statute

Civil Works Construction: None specific to this statute

Civil Works Operations: ER 1130-2-400 Management of Natural Resources and Outdoor Recreation at Civil Works Water Resource Projects.

FOR MORE INFORMATION SEE: None identified

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: None identified.

Guidance Title: None identified

Code of Federal Regulations Citation: None.

MANAGEMENT OPPORTUNITIES: The Act provides for management programs focusing on conservation and recreation, as well as a general category for "other beneficial uses". Opportunities may exist for the Corps to apply ecosystem management and restoration programs to improve the forest resources associated with Civil Works reservoir projects. Forest management program development may present opportunities for collaborative efforts between the Corps and other resource agencies, where both are undertaking programs to address sustainable yield/sustainable development practices and incorporating the principals of ecosystem management.

RESOURCE CONSERVATION AND RECOVERY ACT

LEGISLATIVE TITLE: Resource Conservation and Recovery Act of 1976

UNITED STATES CODE CITATION: 42 U.S.C. § 6901 et seq

OTHER TITLES AND POPULAR NAMES: RCRA; Solid Waste Disposal Act; SWDA; Federal Facilities Compliance Act; FFCA

SUMMARY: This federal law governs the disposal of solid waste. Subtitle D of the Act, as amended November 1984 (42 U.S.C. 6941-6949a), establishes Federal standards and requirements for state and regional solid waste authorities. The objectives of this subtitle are to assist in developing and encouraging methods for the disposal of solid waste which are environmentally sound and which maximize the utilization of valuable resources recovered from solid wastes.

Subtitle C of this law establishes standards and procedures for the handling, storage, treatment and disposal of hazardous wastes. The Act provides a "cradle to grave" approach to the regulation of solid and hazardous waste. Generators, transporters, and owners of treatment, storage, and disposal (TSD) facilities are subject to its regulatory scheme. RCRA also regulates the transportation and tracking of hazardous waste; establishes standards for the storage and treatment of hazardous wastes by generators; provides a procedure for identifying waste as hazardous; provides minimum technology standards for TSDs; provides for corrective actions for historic solid and hazardous waste management units; establishes land disposal prohibitions and restrictions; regulates the installation, testing, and removal and remediation of underground storage tanks; regulates the management of used oil; and provides an enforcement mechanism.

The Federal Facilities Compliance Act (FFCA) (P.L. 102-386, 106 STAT 1505) amended RCRA. The Act provides for a waiver of sovereign immunity with respect to federal, state, and local procedural and substantive requirements relating to the Resource Conservation and Recovery Act (RCRA) solid and hazardous waste laws and regulations at federal facilities (42 U.S.C. 6961). The Environmental Protection Agency is directed to make annual inspections of facilities owned or operated by the United States which treat, store, or dispose of hazardous waste to insure compliance with applicable regulations. Authorized States may also conduct inspections to insure compliance with authorized State hazardous waste programs (42 U.S.C. 6927(c)). Additionally, it defines hazardous waste in relation to public vessels, expands the definition of mixed waste, and discusses waste discharges to federally owned treatment works.

RESOURCES COVERED: Solid waste; hazardous, and mixed wastes.

COMPLIANCE REQUIREMENTS: Federal and state laws pertaining to solid waste are applicable to civil works projects. Also, RCRA may impose substantial requirements on Corps projects that manage even small amounts of hazardous waste. A Corps project may be regulated as a generator and/or potentially as a storer of hazardous waste (e.g., waste solvents, waste pesticides, waste cleaning compounds, etc). Corps underground storage tanks may also be regulated under RCRA, Subtitle I. Other RCRA regulated activities may include, for example, disposal of construction debris such as cleaning solvents and paints containing lead and chromium, off-site disposal of contaminated dredge material, and maintenance activities, e.g., sandblasting debris containing lead or chromium.

The Federal Facility Compliance Act of 1992 (P.L. 102-386 (106 STAT 1505)) waived Federal sovereign immunity under Federal, state, and local laws relating to RCRA solid and hazardous waste laws and regulations for the payment of punitive and coercive fines, administrative orders and injunctive relief, reasonable service charges and other nondiscriminatory fees. If any Corps facility generates hazardous waste, it is subject to all "Federal, state, interstate, and local or solid waste requirements, both substantive and procedural" (42 U.S.C. 6961). By Presidential Proclamation, fines are paid out of operating funds.

The EPA is required to undertake annual inspections of federal facilities that treat, store, or disposed of hazardous wastes, and requires the federal agency to reimburse EPA for the costs of the inspection. A state with an authorized state program may also inspect such facilities (42 U.S.C. 6927(c)). The states and EPA are able to charge fees for a wide range of activities, including inspection fees, and to assess penalties against federal agencies. The Act also adds a provision under 42 U.S.C. 6939d, that "public vessels", vessels owned or operated by the US government, are essentially not subject to RCRA's storage, manifest, inspection, or record keeping requirements, and that the hazardous waste become regulated once they are transferred ashore. There are some exceptions.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: U.S. Environmental Protection Agency (EPA), and state and local agencies if program has been approved by EPA. Most states are currently authorized to administer the solid waste programs as well as various parts of the hazardous waste program. States laws may be more stringent than federal requirements and must be consulted when managing solid and hazardous wastes at a Civil Works project.

Process: All solid wastes generated will have to be managed in accordance with state and local solid waste regulations. If a Civil Works project is generating a solid waste that is a hazardous waste, the project must determine the appropriate generator status. The project will then determine generator status according to state or federal hazardous waste regulations and manage the waste accordingly.

Product: For Civil Works projects covered under RCRA or state solid and hazardous waste regulations the applicable reporting and record keeping requirements of the regulations must be met.

Timing/Schedule: For hazardous wastes, federal and state regulations contain specific time and quantity limitations for various types of generators, i.e. Large Quantity Generators, Small Quantity Generators, or Conditionally Exempted Small Quantity Generators. Application of the regulations is dependant upon your generator status.

Regulatory: None specific to this statute.

** Due to the complexity and often times large financial concerns associated with RCRA issues, your Office of Counsel should be consulted regarding liability and compliance with RCRA. Also, given their experience with Formerly Used Defense Sites (FUDS), Base Realignment and Closure (BRAC), and Installation Restoration (IR), the Center For Expertise in Hazardous, Toxic and Radioactive Waste should be consulted regarding legal and technical matters.*

FOR MORE INFORMATION SEE: The Solid Waste Disposal Act of 1965, was amended in its entirety by RCRA. The 1980 Amendments to the Solid Waste Disposal Act are cited at Pub. L No. 96-482 (42 U.S.C. 6901 et seq). Federal Facility Compliance Act of 1992 (P.L. 102-386 (106 STAT 1505)); Executive Order 12873, Federal Acquisition, Recycling, and Waste Prevention, October 1993; Executive Order 12780, Federal Agency Recycling and the Council on Federal recycling and Procurement Policy, November 1991.

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Environmental Protection Agency. The RCRA waiver of sovereign immunity (42 U.S.C. 6961) includes state and local agency requirements which are not inconsistent with RCRA. Additionally, the Federal Facility Compliance Act of 1992 (PL 102-386) modified 42 U.S.C. 6961 by waiving federal sovereign immunity from state enforcement of state solid and hazardous waste laws including payment of punitive or coercive fines, administrative orders and injunctive relief, reasonable service charges and other nondiscriminatory fees. If EPA approves a state RCRA program or a portion thereof, then the Federal facility must follow the applicable approved state regulations rather than the Federal rules. State law and state interpretation of that law may differ substantially from Federal RCRA regulations and EPA interpretation.

Guidance Title: A variety of EPA guidance manuals and other environmental publications are available through National Technical Information Service (NTIS) at 800-553-6847. EPA has a contractor operated RCRA/Superfund/UST Hotline, 800-424-9346 or 703-412-9810. Department of Transportation operates a transportation (49 C.F.R.) hotline, 202-366-4488. The US Army also operates an environmental response line, 1-800-872-3845.

FFCA: Enforcement Authorities Implementation; Hazardous Waste: Technical Revision for the FFCA of 1992 Amendments

Code of Federal Regulations Citation: 40 C.F.R. 240-280. For transportation of hazardous waste, also see the Hazardous Materials Transportation Act and Department of Transportation (DOT) regulations 49 C.F.R. 171-179. Federal Register Vol. 58, No. 181, page 49044, September 21, 1993; Federal Register Vol. 60, No. 55, page 15208, March 22, 1995.

MANAGEMENT OPPORTUNITIES: Acquisition Planning and Procurement: in developing work plans, specifications, or product descriptions, consider the following factors: elimination of virgin material requirements; use of recovered materials; reuse of product; life cycle costs; recyclability; use of environmentally preferable materials; and waste prevention. Hazardous waste management plans to address waste management procedures as well as waste minimization plans should be developed for Civil Works projects. Facilities should make sure that they are in compliance with federal and state hazardous waste regulations. Facilities should also self audit through the ERGO program.

RIVERS AND HARBORS ACTs

LEGISLATIVE TITLE: Rivers and Harbors Appropriation Act of 1899

UNITED STATES CODE CITATION: 33 U.S.C. §§ 401, 403, 407

OTHER TITLES AND POPULAR NAMES: River and Harbors Act of 1899

SUMMARY: The Rivers and Harbors Acts address projects and activities in navigable waters and harbor and river improvements. Several of these Acts provided a number of regulatory authorities, the implementation of which has evolved over time. This profile addresses only those sections that relate to the Corps Regulatory program.

Section 9 of the Rivers and Harbors Act approved March 3, 1899, (33 U.S.C. 401) prohibits the construction of any dam or dike across any navigable water of the United States in the absence of Congressional consent and approval of the plans by the Chief of Engineers and the Secretary of the Army. Where the navigable portions of the water body lie wholly within the limits of a single state, the structure may be built under authority of the legislature of that state, if the location and plans or any modification thereof are approved by the Chief of Engineers and by the Secretary of the Army. Section 9 also pertains to bridges and causeways but the authority of the Secretary of the Army and Chief of Engineers with respect to bridges and causeways *was transferred to the Secretary of Transportation under the Department of Transportation Act of October 15, 1966.*

Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403) prohibits the unauthorized obstruction or alteration of any navigable water of the United States. This section provides that the construction of any structure in or over any navigable water of the United States, or the accomplishment of any other work affecting the course, location, condition, or physical capacity of such waters is unlawful unless the work has been recommended by the Chief of Engineers and authorized by the Secretary of the Army. The Secretary's approval authority has since been delegated to the Chief of Engineers.

Section 13 of the Rivers and Harbors Act of 1899 (33 U.S.C. 407) provides that the Secretary of the Army, whenever the Chief of Engineers determines that anchorage and navigation will not be injured thereby, may permit the discharge of refuse into navigable waters. In the absence of a permit, such discharge of refuse is prohibited. While the prohibition of this section, known as the Refuse Act, is still in effect, the permit authority of the Secretary of the Army has been superseded by the permit authority provided the Administrator, Environmental Protection Agency (EPA), and the states under Sections 402 and 405 of the Clean Water Act, respectively.

Section 14 of the Rivers and Harbors Act of 1899 (33 U.S.C. 408) provides that the Secretary of the Army, on the recommendation of the Chief of Engineers, may grant permission for the temporary occupation or use of any sea wall, bulkhead, jetty, dike, levee, wharf, pier or other work built by the United States. This permission will be granted by an appropriate real estate instrument in accordance with existing real estate regulations.

Section 7 of the Rivers and Harbors Act approved 8 August 1917 authorizes the Secretary of the Army to

promulgate regulations for the use, administration, and navigation of the navigable waters of the United States as public necessity may require for the protection of life and property or for operations of the United States in providing channel improvements. Procedures followed for promulgation of such regulations, although they do not involve issuance of permits, are similar to those for the permit program. (33 C.F.R. Part 324)

Danger Zones. Regulations can be prescribed for the use and navigation of any area likely to be endangered by Department of Defense operations. The authority to prescribe danger zone regulations is exercised so as not to interfere with or restrict unreasonably the commercial fishing industry. (33 C.F.R. Part 324)

Restricted Areas. When required for the protection of life and property at Department of Defense (DoD) installations, certain areas maybe set aside and reserved, such as naval restricted areas. Reasonable regulations may be prescribed, after public notice, restricting or prohibiting the use of such areas by vessels. The Coast Guard is authorized to establish restricted areas for safety but not restricted areas for DoD facilities. (33 C.F.R. Part 324)

RESOURCES COVERED: Shorelines and navigable waterways, dredged material transport and disposal; all tidal waters and /or waters that have been used, are currently used, or could be used to transport interstate or foreign commerce (33 C.F.R. 329.4).

COMPLIANCE REQUIREMENTS: Activities that involve the construction of dams, bridges, dikes etc. across any navigable water, or placing obstructions to navigation outside established Federal lines and excavating from or depositing material in such waters, require permits from the Corps. The Act prohibits the use of Federal funds for activities which would have adverse affect on those characteristics which caused a river to be classified as wild, scenic, or recreational.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: The Corps conducts public interest reviews to ensure that proposed projects comply with Section 10, and as part of these reviews coordinates with other Federal, State, and local agencies. Final determinations are made by the Corps after consideration of this information.

Process: See C.F.R.

Product: Permits for work in or affecting navigable waters.

Timing/Schedule: For Section 10 permits: if the permit application is complete, the Corps should issue a public notice within 15 days, allow a comment period of 15 to 30 days, address concerns and objections, and make a permit decision shortly thereafter (33 C.F.R. 325.2).

SAFE DRINKING WATER ACT

LEGISLATIVE TITLE: Safe Drinking Water Act

UNITED STATES CODE CITATION: 42 U.S.C. § 300f et seq, 6939b; 15 U.S.C. § 1261 et seq

OTHER TITLES AND POPULAR NAMES: SDWA

SUMMARY: The primary objective of the SWDA is twofold: (1) to protect the nation's sources of drinking water, and (2) to protect public health to the maximum extent possible, using proper water treatment techniques. The Act directs the EPA and states to establish national primary and secondary drinking water standards and to establish techniques to meet those standards. States are responsible for enforcement and must submit regulatory programs to the EPA for approval. Facilities that treat drinking water supplies are regulated by the states through permits. Underground sources of drinking water are also protected through applying the same drinking water standards, identifying critical aquifer protection areas, and programs to protect wellhead areas from contaminants. The Act also requires states to submit procedures for inspection, monitoring, record-keeping, and reporting, as part of their regulatory programs.

Section 1447 of the Act (42 U.S.C. 300j-6) requires that each Federal agency having jurisdiction over any Federally owned or maintained public water system or engaged in an activity resulting, or which may result in, underground injection that endangers drinking water shall be subject to, and comply with, Federal, State, and local requirements, programs, and administrative authorities.

RESOURCES COVERED: Public drinking water supplies; reservoirs; aquifers.

COMPLIANCE REQUIREMENTS: To comply with Section 1447 (42 U.S.C. 300j-6) the Corps must ensure that any facility in their jurisdiction that is used, or may be used, for public drinking water complies with the water requirements of the state in which the facility is located. Any Corps activities that may impact or endanger underground drinking water supplies are also subject to the requirements of the state program. The Corps is also subject to any permitting requirements from EPA and/or states for operating a drinking water facility or conducting activities affecting groundwater supplies.

In addition, Corps activities that may impact underground drinking water supplies must be reviewed and approved by the state agency designated to administer drinking water quality standards, and permits may be issued. Opportunities to plan and operate activities which are sensitive to such critical areas will have increased application in environmental mitigation or restoration projects.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Environmental Protection Agency, States

Process: None specified.

Product: Any underground injection of wastewater must be authorized by a permit from EPA.

Timing/Schedule: None specified.

SOIL AND WATER RESOURCES CONSERVATION ACT

LEGISLATIVE TITLE: Soil and Water Resources Conservation Act of 1977

UNITED STATES CODE CITATION: 16 U.S.C. § 2001-2009

OTHER TITLES AND POPULAR NAMES: None identified.

SUMMARY: This Act directs the Department of Agriculture to develop a National Soil and Water Conservation Program (SWCP), and to conduct an appraisal of the Nation's soil, water, and related resources at five year intervals (16 U.S.C. 2004-2005). The SWCP and the appraisals cover activities and resources under the jurisdiction of the Soil Conservation Service, now called the National Resources Conservation Service (NRCS). The appraisals involve compiling data on the quantity and quality of soil and water, State and Federal laws regarding development and use of these resources, and costs and benefits of alternative conservation techniques. The SWCP is developed to be a guide in carrying out activities of the NRCS, taking into account current and future needs of the Nation, landowners, and land users. The SWCP includes analyses of (1) the Nation's soil, water, and related resource problems, (2) ongoing Federal, State, and local programs addressing soil and water conservation (3) alternative methods for conservation, protection, improvement, or enhancement of soil and water resources (16 U.S.C. 2005). Analyses conducted by the Department of Agriculture, NRCS in carrying out the provisions of this Act are to be in conjunction with State soil and water conservation agencies, conservation districts, and appropriate citizen groups.

RESOURCES COVERED: Soil, water and related resources such as forestry, and fish and wildlife.

COMPLIANCE REQUIREMENTS: This Act imposes no requirements on Corps projects, however the Corps and the Natural Resource Conservation Service do coordinate their activities under interagency agreements. (See EP 1165-2-2, Interagency Agreements, November 1, 1979, Appendix B, and EP 1165-2-1, Digest of Water Resources Policies and Authorities, March 27, 1981, paragraphs 24-3, 25-55, 27-3(a), 27-3(d)).

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: U.S. Department of Agriculture, Natural Resources Conservation Service, State conservation districts, State soil and water conservation agencies

Process: Not specified

Product: Appraisal of the soil, water and related resources of the Nation

Timing/Schedule: Appraisals required every five years.

CORPS GUIDANCE

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Department of Agriculture

Guidance Title: None identified

Code of Federal Regulations Citation: None.

MANAGEMENT OPPORTUNITIES: Authority for the Act is vested with the Secretary of Agriculture, however other Federal agencies (Corps) are encouraged to exchange Interagency Agreements as a tool for providing existing information and data exchange.

SOLID WASTE DISPOSAL ACT

LEGISLATIVE TITLE: Solid Waste Disposal Act

UNITED STATES CODE CITATION: 42 U.S.C. §§ 3251 (??) et seq, §§6901 et seq

OTHER TITLES AND POPULAR NAMES: None identified.

SUMMARY: The aim of the Act was to initiate national research and development programs for new and improved methods of disposal, with provisions for recovery and recycling. Technical and financial assistance was to be provided to state and local governments in the development of programs.

This Act was amended by the Resource Recovery Act of 1970 (Public Law 91-512) and later by the Resource Conservation and Recovery Act (RCRA) (42 U.S.C. 6901, et seq). Subtitle D, of RCRA, as last amended in November 1984 by 42 U.S.C. 69-41-6949a, established Federal standards and requirements for state and regional authorities respecting solid waste disposal. Current Federal requirements for solid waste management are found in RCRA, Subtitle D, Section 4001-4010 which is also referred to by its original name, the Solid Waste Disposal Act. The definition of "solid waste" is found in Subtitle A, Section 1004 of the Act. The requirements of the original Solid Waste Disposal Act of 1965 has for the most part been replaced by RCRA.

RESOURCES COVERED: Solid waste; garbage, refuse and other discarded solid waste materials, including solid waste material resulting from industrial, commercial, and agricultural operations, and from community activities (42 U.S.C. 3252 (4)).

COMPLIANCE REQUIREMENTS: Refer to Subtitle D of RCRA as amended and implementing regulations in 40 C.F.R. 240, 241, 243, 245, 246, and 258. Comply with Executive Order No. 12780 of October 31, 1991, Federal Agency Recycling and the Council on Federal Recycling and Procurement Policy and Executive Order No. 12873 of October 20, 1993, Federal Acquisition, Recycling, and Waste Prevention.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: See Resource Conservation and Recovery Act

Process and Product: See Resource Conservation and Recovery Act

Timing/Schedule: See Resource Conservation and Recovery Act

CORPS GUIDANCE:

Civil Works Planning: ER 1165-2-132, Hazardous, Toxic and Radioactive Waste Guidance for Civil Works Projects.

Civil Works Engineering: ER 1165-2-132, Hazardous, Toxic and Radioactive Waste Guidance for Civil Works Projects.

Civil Works Construction: ER 1165-2-132, Hazardous, Toxic and Radioactive Waste Guidance for Civil Works Projects.

Civil Works Operations: ER 1165-2-132, Hazardous, Toxic and Radioactive Waste Guidance for Civil Works Projects; Memorandum, USACE, CECW-OA, 24 November 1992, subject: USACE Facilities Environmental Compliance Guidance Letter No. 1, Solid Waste Recycling.

Regulatory: None applicable.

FOR MORE INFORMATION SEE: Resource Conservation and Recovery Act (42 U.S.C. 6901, et seq) and the Used Oil Recycling Act of 1980; Federal Facilities Compliance Act (42 U.S.C. 6901, et seq).

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Originally Secretary of Health, Education and Welfare, then Environmental Protection Agency after the passage of RCRA.

Guidance Title: See Resource Conservation and Recovery Act

Code of Federal Regulations Citation: Resource Conservation and Recovery Act

MANAGEMENT OPPORTUNITIES: The Corps may incorporate recycling initiatives into solid waste management programs for Civil Works projects, through acquisition planning and procurement actions use recovered and recycled materials. Beverage container management programs to reduce solid waste and litter will also support the goals of this Act. Work with supporting Defense Reutilization and Marketing Office (DRMO) to recycle solid wastes. Establish local recycling committees to manage solid waste such as cardboard, paper and other reusable post-consumer solid wastes. Work in concert with State and local solid waste reduction/recycling regulations and programs. Promote solid waste reduction and recycling in all phases of Civil Works activities.

SUBMERGED LAND ACT

LEGISLATIVE TITLE: Submerged Land Act

UNITED STATES CODE CITATION: 10 U.S.C. §§ 7421-7426, 7428-7438; 43 U.S.C. §§ 1301-1303, 1311-1315

OTHER TITLES AND POPULAR NAMES: None identified.

SUMMARY: This Act establishes that seaward boundaries of original coastal states extend to three geographical miles from the coastline, and are therefore, under the jurisdiction of the States in which the submerged land is located. Section 3 (a)(2) (43 U.S.C. 1311(a)) confirms the rights of states to manage, develop, administer, and lease those resources on submerged lands, including any leasing arrangements to any organization public or private, including departments or agencies of the Federal Government. Section 6 (43 U.S.C. 1314) states that the United States retains all its navigational servitude and rights, and powers of regulation and control of lands and navigable waters for the purposes of commerce, navigation, national defense and international affairs. However, these rights are not deemed to include proprietary rights of ownership, rights of management, administration, use, and development of lands and natural resources. The Act places no restrictions on the use, development, improvement, or control of lands or waters for the purposes of navigation flood control, or the production of power.

RESOURCES COVERED: Coastal Zone, Natural Resources; Oil, gas, minerals, fish, and wildlife on lands beneath water.

COMPLIANCE REQUIREMENTS: This Act imposes no restrictions on Corps water resources projects. It places no restrictions on the use, development, improvement, or control of lands or waters for the purposes of navigation or flood control.

SURFACE MINING CONTROL AND RECLAMATION ACT

LEGISLATIVE TITLE: Surface Mining Control and Reclamation Act of 1977

UNITED STATES CODE CITATION: 30 U.S.C. §§ 1201 - 1328; 18 U.S.C. § 1114

OTHER TITLES AND POPULAR NAMES: Surface Mining Reclamation Act

SUMMARY: This Act establishes a nationwide program to protect society and the environment from the adverse effects of surface coal mining operations, and to set forth reclamation guidelines for surface coal mining areas. Under Title V, Section 502 (30 U.S.C. 1253), States in which there are surface coal mining operations on non-Federal lands are directed to develop programs which provide for environmental regulations, establish permit programs, and provides for enforcement procedures for requirements of the state program. Any state which does not have a management program, approved by the Department of Interior, will be governed by the rules and regulations set forth in the Federal program, as developed by the Department of Interior. Similar programs are to be developed by the Department of Interior, in conjunction with the States, for surface mining operations on Federal lands (30 U.S.C. 1273).

Grants are provided for research in mining technology and the Abandoned Mine Reclamation fund is established (30 U.S.C. 1231) for the construction of water treatment facilities for pollution resulting from mine drainage. The Office of Surface Mining and Reclamation is established in the Department of Interior to enforce and administer this Act (30 U.S.C. 1211)

Environmental performance standards are required for permits issued to surface mining operations to maximize utilization and conservation of the resources recovered, and that future land disturbance from surface mining is minimized (30 U.S.C. 1265). The standards also include requirements for restoring the affected land (30 U.S.C. 1265), including surface area stabilization/erosion control, revegetation, creating impoundments for water quality, minimizing disturbance to original hydrologic balances, and proper disposal of mine waste products and other requirements. The Secretary of Interior and the Chief of Engineers, are to establish standards and criteria regulating the design, location, construction, operation, maintenance, enlargement, modification, removal and abandonment of new and existing coal mine waste piles when used as dams or embankments (30 U.S.C. 1265(f)).

RESOURCES COVERED: surface mines and adjacent lands; coal and other minerals; impoundments and other water and land resources affected by surface mining operations.

COMPLIANCE REQUIREMENTS: State programs must be adhered to, including appropriate permitting procedures, for any person or entity pursuing surface coal mining operations in the United States. However, 30 U.S.C. 1278 provides that extraction of coal as an incidental part of government financed highway or other construction (e.g., dam construction) is not subject to regulation under this Act.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Department of the Interior, States, other Federal agencies (as appropriate)

Process: None specified.

Product: Permit issued to surface mining operation stipulating environmental impacts, restoration/mitigation practices, environmental performance standards, and reclamation plans.

Timing/Schedule: Permits typically issued for 5 year increments.

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 7, Environmental Planning and Evaluation Considerations.

Civil Works Engineering: None specific to this statute

Civil Works Construction: None specific to this statute

Civil Works Operations: None specific to this statute

Regulatory: 33 C.F.R. 330

FOR MORE INFORMATION SEE: None identified.

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Office of Surface Mining and Reclamation, Department of the Interior

Guidance Title: None identified

Code of Federal Regulations Citation: Chapter VII of 30 C.F.R. (Sections 700-899)

MANAGEMENT OPPORTUNITIES: The Corps has opportunities to provide technical expertise (personnel) to the Secretary of Interior in developing technical standards and criteria for coal mine waste dams, or embankments. There also may be the potential for the Corps to assist or collaborate with the Department of Interior in the restoration of ecosystems degraded due to surface mining operations.

TOXIC SUBSTANCES CONTROL ACT

LEGISLATIVE TITLE: Toxic Substances Control Act

UNITED STATES CODE CITATION: 15 U.S.C. §§ 2601 - 2671

OTHER TITLES AND POPULAR NAMES: TSCA; ToSCA; The Asbestos Hazard Emergency Response Act of 1986

SUMMARY: Concern about many toxic chemicals lead Congress to pass the Toxic Substances Control Act in 1976. This Act, as last amended in 1986, is the federal legislation which deals with the control of toxic substances. The Act consists of three subchapters, one of which regulates the control of toxic substances (such as polychlorinated biphenyls (PCBs)), another governs asbestos hazard emergency response, and another subchapter regulates indoor radon abatement. TSCA was designed to establish a system in which all chemicals would be evaluated before they are used to ensure they pose no unnecessary risk to human health, other living organisms and the environment. The risks and benefits of the chemicals "use" are to be balanced. The Administrator can waive compliance with any provision of this Act upon a request and determination by the President that the requested waiver is necessary in the interest of National Defense (15 U.S.C. 2621).

TSCA was also designed to mitigate the hazards of certain chemicals already in use. Because environmental contamination caused by stable PCB compounds and ozone layer destruction caused by chlorofluorocarbons could not be controlled under existing environmental legislation, Congress specifically included bans on the manufacture of PCBs and bans on the use of chlorofluorocarbon propellants under TSCA. By regulating these substances, Congress intended to control these problems at the source rather than legislating corrective actions once the materials were released to the environment.

RESOURCES COVERED: PCBs, asbestos in schools, lead-based paint hazards, and indoor radon abatement; chlorofluorocarbon propellants.

COMPLIANCE REQUIREMENTS: State and local regulations should be consulted when engaging in PCB, Asbestos, Radon, or Lead-Based Paint activities on Civil Works projects or properties.

The Environmental Protection Agency has worked for several years to discover and reduce PCB related risks, and these efforts have produced many rules on the chemicals. Environmental Protection Agency regulations are specific and complex regarding the requirements for PCB use, servicing, marking, storage for disposal, disposal, registration, spill cleanup, reporting, record keeping and manifesting. Environmental Protection Agency considers PCBs to be toxic, persistent, and bioaccumulative, and Environmental Protection Agency and industry are using the PCB rules to minimize many of the dangers of PCB exposure. *(TSCAs primary impact on federal facilities is in the management of PCB articles, equipment, transformers, capacitors, and wastes, which includes paints, waterproofing materials, light ballasts, and dielectric fluid in transformers and capacitors.)*

PCBs - Any substance with a PCB concentration of 50 ppm or greater must be controlled. TSCA bans the manufacture, processing, distribution in commerce, and the use of PCBs unless the PCBs

are totally enclosed. In some cases, state regulations are in place that regulate PCBs more stringently than the Federal Program (40 C.F.R. 761). State regulations may supersede Federal Regulations in areas such as regulating PCBs as a hazardous waste. Also, Federal regulations, as well as some state regulations are very stringent regarding PCB spill reporting, and spill clean up levels.

Asbestos - Many states have enacted asbestos standards that are more stringent than the Federal Program (40 C.F.R. 61 and 763) concerning the certification of asbestos workers and the disposal of asbestos wastes. Asbestos in schools is regulated under TSCA. Renovation and Demolition involving asbestos is regulated under the Clean Air Act.

Radon and Lead - Many states have radon control standards and restrictions on the use of lead-based paint in place.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Environmental Protection Agency and State regulatory agencies.

Process: At a minimum, Civil Works study and project managers must know where their PCBs are, their quantities, how they are being used, and what Environmental Protection Agency rules affect their activities. They must insure safe and proper PCB disposal, and must also keep an inventory of PCBs to maintain an annual report onsite. The rules also give them long and short term storage requirements, and specifications for marking, labeling, and record keeping. In addition, transformers must now be register with local fire departments.

For Civil Works projects involved in PCB activities (such as using, storing, or disposing of PCBs), certain regulatory requirements must be met. TSCA regulations specify marking requirements for PCB equipment; inspection requirements to identify PCB leaks; special handling requirements for storage and disposal of PCBs; decontamination requirements for PCB spills; manifesting requirements; prohibitions on use or storage of PCB transformers in areas that may contaminate food or feed; requirements for registering PCB transformers with fire response personnel with primary jurisdiction, and prohibitions on installation of PCB transformers except in emergency situations.

Product, Timing/Schedule: PCB spills have special notification requirements and clean up requirements. Any PCB spill which poses a substantial risk to human health or environment or equals or exceeds 1 lb or more must be reported to the National Response Center (NRC) at (800) 424-8802. All spills, except minor leaks, should be reported. The criteria for cleanup is based on whether the spill is of high or low concentration of PCBs (40 C.F.R. 761.120, 761.123, and 761.125). Spill clean up should be initiated within 24 hours (48 hours for a transformer).

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies; ER 1165-2-132, Hazardous, Toxic and Radioactive Waste Guidance for Civil Works Projects

Civil Works Construction: ER 1165-2-132, Hazardous, Toxic and Radioactive Waste Guidance for Civil Works Projects.

Civil Works Operations: ER 1165-2-132, Hazardous, Toxic and Radioactive Waste for Civil Works Projects. Also, ER 200-2-3, Environmental Compliance Policies and EP 200-2-3, Environmental Compliance Guidance and Procedures, to be published later in 1996].

Regulatory: None specific to this statute.

FOR MORE INFORMATION SEE: Memorandum, Secretary of the Army (Installations, Logistics and Environment), 28 April 1993, Lead-Based Paint Policy Guidance

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Environmental Protection Agency

Guidance Title: A Guide on Remedial Actions at Superfund Sites with PCB Contamination, Environmental Protection Agency Fact Sheet, August 1990; Superfund Records of Decision Update (Guidance on Remedial Actions with PCB Contamination), Environmental Protection Agency Fact Sheet, September 1990; Environmental Protection Agency Part V: Guidance on Identification of Lead-Based Paint Hazards; Notice (60 Federal Register 47257); C.F.R. titles below.

Federal Register Citation: 60 F.R. 47257

Code of Federal Regulations Citation: 40 C.F.R. Part 761: Polychlorinated Biphenyls (PCBs) Manufacturing, Processing, Distribution in Commerce, and Use Prohibitions; 40 C.F.R. Part 61: National Emission Standards for Hazardous Air Pollutants; 40 C.F.R. Part 763: Asbestos; 40 C.F.R. 766 Dibenzo-para-dioxins/dibenzofurans; 40 C.F.R. 790-2: Procedures Governing Test Consent Agreements and Test Rules; 40 C.F.R. 795: Provisional Test Guidelines; 40 C.F.R. 796: Chemical Fate Testing Guidelines; 40 C.F.R. 797: Environmental Effects Testing Guidelines; 40 C.F.R. 798: Health Effects Testing Guidelines; 40 C.F.R. 799: Identification of Specific Chemical Substance and Mixture Testing Requirements; 40 C.F.R. Part 403 Lead-based Paint Hazards (Not yet proposed).

MANAGEMENT OPPORTUNITIES: Good management practices include complying with the Use, Marking and Record keeping requirements; preparing a PCB Risk Management Plan; Complying with PCB

Storage for Disposal and Disposal Requirements; keeping records of PCB inventories, shipments and disposal, preparing Annual Document Logs, and responding to PCB spills in accordance with the Spill Cleanup Policy. Survey all operations to determine where PCBs or PCB items are, or could be used, stored, or disposed of at your facility. If PCBs are present at any concentration, identify and record the source of contamination. Establishment of site specific plans/procedures for PCB equipment replacement with non-PCB equipment, e.g., transformer, ballasts, capacitors. Replacement of asbestos containing material (ACM) with non-AMC during routine operation and maintenance (O&M) activities on civil works projects. Inspecting Corps of Engineering owned/leased housing or buildings for indoor radon, asbestos in schools and lead-based paint hazards. Implementing abatement projects for property found to have lead-based paint or radon exceeding established health risk criteria.

WATER RESOURCES DEVELOPMENT ACTS

The Water Resource Development Acts authorize the Secretary of the Army to study and/or implement various projects and programs for improvements to rivers and harbors of the United States and for other purposes. While not specifically environmental laws, a number of Water Resources Development Acts contain general environmental provisions pertinent to the Civil Works water resources development program or to the management of environmental resources. This section provides summaries of these provisions, as well as statements about implementation guidance where available. A number of other sections from these Acts pertain to specific projects or studies for environmental purposes. These provisions are not included with these summaries.

Water Resources Development Act of 1976 (PL 94-587)

Section 150 (42 U.S.C. 1962d-5e) Water Resources Planning, Wetland Areas, authorizes the Chief of Engineers to plan and establish wetland areas as part of an authorized water resources development project under his jurisdiction. The Act identifies several conditions in which the Chief of Engineers may establish wetland areas under this authority: 1) environmental, economic and social benefits of the wetland area justify the increased cost of there of above the cost required for alternative methods of disposing of dredged material for such water resources project; 2) the increased cost of such wetland area shall not exceed \$400,000; and 3) there is reasonable evidence that the wetland area to be established will not be substantially altered or destroyed by natural or man-made causes. *This provision does not include any requirement for non-Federal cost-sharing and has been supplanted with the partnership principles established by WRDA 1986. Instead, Section 204 of WRDA 1992 (33 U.S.C. 2326) is currently the primary authority for implementation of projects for the use of dredged material to protect, restore, or create aquatic and related habitats. See: EC 1105-2-209*

Water Resources Development Act of 1986 (PL 99-662)

Section 704(b) (33 U.S.C. 2263) Study of Corps Capability to Conserve Fish and Wildlife, authorizes the Secretary of the Army to conduct projects of alternative or beneficially modified habitats for fish and wildlife, including but not limited to man-made reefs for fish. A non-Federal cost share of 25 percent is required. A limit was not placed on the Federal expenditures per project; however, a \$5 million limit on total Federal expenditures for the program was established. *EC 1105-2-209 states that: "This authority will not be utilized since more specific authorities are available".*

Section 906 (33 U.S.C. 2283) Fish and Wildlife Mitigation. This section provides that, for new projects, necessary mitigation measures shall be undertaken before or concurrently with project construction, as determined appropriate by the Secretary of the Army. It provides general authority to undertake mitigation measures for projects, whether completed, underway or unstated, including acquisition of any needed related lands (excluding condemnation in connection with projects already completed or well underway). Mitigation costs shall be allocated to the project purposes and cost shared accordingly. It requires that feasibility reports contain a specific plan to mitigate fish and wildlife losses, unless a determination is made that there would be negligible adverse impact. Section 906(a)(2) states that projects authorized prior to the enactment of this Act

on which more than 50 percent of the land needed for the project, exclusive of mitigation lands, has been acquired shall be deemed to have commenced construction under this subsection.

Subsection 906(b) authorized the Secretary to provide limited mitigation for projects under his jurisdiction without project-specific congressional legislation. The limitations are: (1) Land acquisition will be on a willing seller basis if 10 percent or more of the project is physically completed as of 17 November 1986; (2) Acquisition of water or interest therein shall not be by condemnation; and (3) No more than \$30,000,000 may be obligated in any fiscal year to study and implement fish and wildlife mitigation under this authority, with a single project limit of \$7,500,000 or 10 percent of total project costs (including the mitigation), whichever is greater. *Policy under current budget constraints does not provide for implementation of subsection 906(b).*

Subsection 906(c) requires that costs for implementation and operation, maintenance, and rehabilitation to mitigate damages to fish and wildlife shall be allocated among the purposes which caused the need for mitigation, and cost shared to the same extent as other costs for such project purposes are shared or reimbursed. These provisions apply to all costs incurred after the date of the Act for the above specified purposes. When such costs are covered by contracts entered into prior to the date of enactment of this Act, the costs shall not be recovered without the consent of the non-Federal sponsor, or when costs are recovered when the contracts are complied with or renegotiated.

Subsection 906(d) requires that reports to Congress contain either a determination by the Secretary that such projects will have negligible adverse impacts on fish and wildlife, or a recommendation with a specific plan to mitigate fish and wildlife losses created by the project. Mitigation plans are to ensure that impacts to bottomland hardwood forests are mitigated in-kind, to the extent possible. *The requirement for justification of measures as outlined in ER 1105-2-100 was not rescinded, and the extent of mitigation is still dependent upon the extent of justifiable measures.*

Section 906(e) provides that for any project measures recommended to enhance fish and wildlife, the first costs of such enhancement shall be a Federal cost when the benefits are determined to be national, including: 1) benefits to species that are identified to be of national economic importance, as identified by the National Marine Fisheries Service, species that are subject to treaties or international convention, and anadromous fish; 2) benefits to listed threatened or endangered species, as listed by the Secretary of the Interior; and, 3) activities on lands managed as national wildlife refuges. When benefits do not qualify under the preceding criteria, non-Federal interests are to reimburse 25 percent of the costs. The non-Federal share of operations, maintenance and rehabilitation costs will, in all cases, be 25 percent. *Policy under current budgetary constraints does not provide for implementation of subsection 906(e).*

Section 906(g) states that subsections (a), (b) and (d) shall be deemed to supplement the responsibility and authority for the Secretary pursuant to the Fish and Wildlife Coordination Act (16 U.S.C. 661), and nothing in this section is intended to affect that Act.

Section 907 (33 U.S.C. 2284) Benefits and Costs Attributable to Environmental Measures, states that in the evaluation of benefits and costs of a water resources project, the benefits attributable to environmental

quality, including improvement of the environment and fish and wildlife enhancement, shall be deemed equal to the costs for measures to produce those benefits.

Corps guidance states that the purpose of this language is to prevent the costs of fish and wildlife (EQ) measures included in a project from depressing the benefit-cost ratio of a project below 1.0 because benefits attributable to such EQ features are not expressed in monetary terms. Environmental measures, whether for mitigation or for ecosystem restoration, must still be justified, with consideration given to both non-monetary and monetary benefits and costs. At this time, traditional benefit cost analysis are not utilized because benefits from environmental measures are generally not quantified in dollars. Instead, benefits are quantified in appropriate units, and "with" and "without" conditions are described. A cost effectiveness analysis is conducted to ensure that least cost alternatives are identified for various levels of environmental output. Subsequently, an incremental cost analysis is conducted to compare the relative changes in outputs and costs for the various levels of expenditures being considered. If, in conjunction with ecosystem restoration alternatives, monetary benefits can be identified (e.g., commercial fishing or recreation), these benefits are described as incidental outputs. (See ER 1105-2-100, EC 1105-2-210, and EC 1105-2-206; also, Cost Effectiveness and Incremental Analysis, IWR Report 95-R-1.)

Section 908 (33 U.S.C. 2285) Mitigation Fund, authorizes establishment of an Environmental Protection and Mitigation Fund, intended to support authorized pre-construction fish and wildlife mitigation activities for which the Fund would be reimbursed from initial project construction implementation funding. *Section 908 has not been implemented since normal project funding would allow for accomplishing mitigation as an early project implementation item.*

Section 924 (33 U.S.C. 2294) Office of Environmental Policy, authorizes establishment of the Office of Environmental Policy in the Directorate of Civil Works in the Office of the Chief of Engineers. The section states that the Office shall be responsible for formulation, coordination, and implementation of all matters concerning environmental quality and policy as they relate to the water resources program of the Corps of Engineers. *As implemented, the Office is intended to serve an internal and external coordination role for ensuring compliance with policies relating to environmental aspects of planning projects.*

Section 943 (33 U.S.C. 2303) Historical Properties, authorizes the Secretary to preserve, restore, and maintain those historic properties on water resource development project lands under the jurisdiction of the Department of the Army, if such properties have been entered into the National Register of Historic Places. (See ER 1130-2-438 [Note: ER 1130-2-438 will be superseded by material in ER 1130-2-540, chapter 6, and EP 1130-2-540 later in 1996]; also the National Historic Preservation Act, Historic Sites, Buildings and Antiquities Act, and the Historical and Archeological Data Preservation Act)

Section 1135 (33 U.S.C. 2294 note) Project Modifications for Improvement of Environment. Subsection 1135(a) authorizes the review of existing water resources projects to determine the need for modifications in the structures and operations of projects constructed prior to the authorization of this Act for the purpose of improving the quality of the environment in the public interest.

Subsection 1135(b) initially authorized a two year demonstration* program for the purposes of making such modifications, in the structures and operations of water resources projects which are feasible and consistent with the authorized project purposes, and will improve the environment. A non-Federal cost share of 25 percent the cost was specified, and modifications exceeding \$5 million

require specific Congressional authorization. (*Section 304 of the Water Resources Development Act of 1990 (33 U.S.C. 2309a) amended this section to make it a continuing program.) Subsection 1135(e) authorized maximum annual appropriations of \$25 million for this section. *Corps guidance on implementing this section is provided in EC 1105-2-206 and ER 1105-2-100.*

Water Resources Development Act of 1990 (PL 101-640)

Section 304 (33 U.S.C. 2309a) Project Modifications for Improvement of Environment, amended Section 1135 (33 U.S.C. 2294 note) of WRDA 1986 from a "demonstration program" to a continuing program. Maximum annual appropriations were established as \$15,000,000.

Section 306 (33 U.S.C. 2316) Environmental Protection Mission, directs the Secretary to include environmental protection as one of the primary missions of the Corps of Engineers in planning, designing, constructing, operating, and maintaining water resources projects. (*See EC 1105-2-210.*)

Section 307 (33 U.S.C. 2317) Wetlands, established, as part of the Corps water resources development program, an interim goal of no overall net loss of the Nation's remaining wetland base, as defined by acreage and function, and a long-term goal to increase the quality and quantity of the Nation's wetlands as defined by acreage and function. The section directs the Secretary to utilize all appropriate authorities, including those to restore and create wetlands, in meeting the interim and long-term goals. *See ER 1105-2-100, and EC 1105-2-210.* Subsection 307(e) authorizes the Secretary to establish a training and certification program for wetland delineators.

Section 313 (33 U.S.C. 2320) Protection of Recreational and Commercial Uses. Directs the Secretary of Army to consider recreational impacts in planning projects and in operating and maintaining them. The Secretary may expend up to \$2 million annually to mitigate for adverse recreational impacts of maintenance, repair, rehabilitation, or reconstruction activities. A non-Federal sponsor must agree to share the costs. *Policy Guidance Letter No. 33, Protection of Recreational Uses at Civil Works Projects*, provides implementation guidance for this section.

Water Resources Development Act of 1992 (PL 102-580)

Section 202 amended Section 1135 of WRDA 1986 (33 U.S.C. 2309a) by increasing the annual funding of the program to \$25,000,000, and specifying that Congressional approval is required for modifications with costs estimated to exceed \$5,000,000.

Section 203 (33 U.S.C. 2325) Voluntary Contributions for Environmental and Recreation Projects. This section authorizes the Secretary, in carrying out water resource projects for environmental protection and restoration, or a water resources project for recreation, to accept contributions of cash funds, materials, and services from persons, including governmental entities, but excluding the project sponsor. *Under the authority of this section, the Corps may accept and use contributions (cash, funds, materials, and services) to provide for operation and/or maintenance of recreation areas and the protection and restoration of natural resources at water resource development projects.* [Guidance on implementing this provision is published in ER 1130-2-500 later in 1996.]

Section 204 (33 U.S.C. 2326) **Beneficial Uses of Dredged Material.** This section authorizes implementation of projects for the protection, restoration, and creation of aquatic and ecologically related habitats, including wetlands, in connection with dredging for construction, operation or maintenance of an authorized navigation project. Section 204(c) requires that projects can be undertaken pursuant to this section only after non-Federal interests have entered into a cooperative agreement in accordance with the requirements section 221 of the Flood Control Act of 1970 (42 U.S.C. 1962d-5b) in which the non-Federal interests to agree to provide 25 percent of construction costs including all lands, easements rights-of-way, and necessary relocations, as well as 100 percent of operations, maintenance, replacement, an rehabilitation costs associated with the project for the protection, restoration, and creation of aquatic and ecologically related habitats. Section 204(e) establishes an annual program limit of \$15 million. (See EC 1105-2-209).

Section 225 (33 U.S.C. 2328) **Challenge Cost-Sharing Program for the Management of Recreation Facilities.** This section authorizes the Secretary of Army to develop and implement a program to accept contributions of funds, materials, and services from non-Federal public and private entities to be utilized in operating and managing recreation facilities and natural resources. *The Corps is authorized to enter into cooperative agreements with non-Federal public and private entities to provide for operation and/or management and development of recreation facilities and natural resources where such facilities and resources are being maintained at complete Federal expense. The Corps' new Challenge Cost-Sharing Program provides many opportunities for non-federal public and private groups and individuals to contribute to and participate in the operation and/or management of recreation facilities and natural resources at Corps water resource development projects. (ER 1130-2-426)* [Note: ER 1130-2-426 will be superseded by ER 1130-2-500 later in 1996, and the material on Challenge Cost-Sharing will be in Chapter 12 of this new regulation.]

Section 333 amended Section 906(c)(33 U.S.C. 2283(c)) of WRDA 86 (Public Law 99-662) to provide that costs of lands, easements, rights-of-way, and relocations, required for fish and wildlife mitigation shall be allocated the same as other costs specified in the section, i.e., among the purposes which caused the need for mitigation, and cost shared to the same extent as other costs for such project purposes are shared or reimbursed.

Title V Contaminated Sediment and Ocean Dumping.

Section 502 (33 U.S.C. 1271) established a National Contaminated Sediment Assessment and Management Task Force, co-chaired by the Administrator of the Environmental Protection Agency, the Secretary of the Army, with membership consisting of representatives of the, the National Oceanic and Atmospheric Administration, the U.S. Fish and Wildlife Service, the Geological Survey, and the Department of Agriculture. The Administrator and the Secretary can add a limited number of state representatives, representatives of ports, agriculture, and manufacturing, as well as representatives from limited public interest organizations. In addition to advising the Administrator and the Secretary, Section 502 (33 U.S.C. 1271 note) states that Task Force shall: review and comment on reports concerning aquatic sediment quality and aquatic sediment contamination throughout the Nation, programs for the research and development of sediment restoration methods, practices and technologies, selection of pollutants for development of aquatic sediment criteria and the schedule of development of such criteria; advise appropriate officials in development of guidelines for restoration of contaminated sediments; make recommendations to appropriate officials concerning practices and measures to prevent contamination of aquatic sediments and to control sources of sediment contamination; review and assess means and methods for locating and constructing

permanent, cost-effective, long-term disposal sites for dredged material not suitable for ocean dumping (as determined under the Marine Protection, Research and Sanctuaries Act (33 U.S.C. 1401 et seq.)).

WATER RESOURCES PLANNING ACT

LEGISLATIVE TITLE: Water Resources Planning Act

UNITED STATES CODE CITATION: 42 U.S.C. § 1962 et seq

OTHER TITLES AND POPULAR NAMES: WRPA

SUMMARY: The Act provides for the optimum development of the Nation's natural resources through the coordinated planning of water and related land resources, through the establishment of a water resources council (42 U.S.C. 1962a) and river basin commissions (42 U.S.C. 1962b), and by providing financial assistance to the States in order to increase State participation in such planning (42 U.S.C. 1962c). It established a policy to encourage the conservation, development, and utilization of the water and related land resources of the United States on a comprehensive and coordinated basis by the Federal government, states, localities, an private enterprise with the cooperation of all affected agencies, governments, individuals, corporations, business enterprises, and others concerned (42 U.S.C. 1962).

The U.S. Water Resources Council, (42 U.S.C. 1962a) includes the Secretaries of Interior, Agriculture, Army Health, Education and Welfare, and the Chairman of the Federal Power Commission, with the heads of other agencies participating on matters affecting their responsibilities are to be considered by the Council. The Chairman of the Council is to be designated by the President.

The Council was charged with (a) maintaining a continuing study and preparing biennial assessments, or at such less frequent intervals as the Council may determine, of the adequacy of supplies of water necessary to meet the water requirements in each water resource region in the United States and the national interest therein; and (b) maintaining a continuing study of the relation of regional or river basin plans and programs to the requirements of larger regions of the Nation and of the adequacy of administrative and statutory means for the coordination of the water and related land resources policies and programs of the several Federal agencies. It was also to appraise the adequacy of existing and proposed policies and programs to meet such requirements and make recommendations to the President with respect to Federal policies and programs. The Council was to review plans developed by the river basin commissions for (1) the efficacy of such plan or revision in achieving optimum use of the water and related land resources in the area involved; (2) the effect of the plan on the achievement of other programs for the development of agricultural, urban, energy, industrial, recreational, fish and wildlife, and other resources of the entire Nation; and (3) the contributions which such plan or revision will make in obtaining the Nation's economic and social goal (42 U.S.C. 1962a-3).

The Act required the Council to establish principles, standards, and procedures for Federal participants in the preparation of comprehensive regional or river basin plans and for the formulation and evaluation of Federal water and related land resources projects (42 U.S.C. 1962a-2). Such procedures could include provision for Council revision of plans for Federal projects intended to be proposed in any plan or revision thereof being prepared by a river basin planning commission. The Council was also instructed to develop standards and criteria for economic evaluation of water resource projects (42 U.S.C. 1962a-2).

RESOURCES COVERED: Water and land related resources.

COMPLIANCE REQUIREMENTS: The Principles and Standards were replaced by the Economic and Environmental Principles and Guidelines for Water and Related Land Resources Implementation Studies in 1983. The Corps must follow these Principles and Guidelines in formulating and evaluating water resources implementation studies as part of the Civil Works program. Guidance is found in ER 1105-2-100.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: Water Resources Council; other Federal and state agencies, localities, and private enterprise.

Process: Assessment of water supply and demand; review of river basin plans. The Council was not given a project review function.

Product: Reports and recommendations. Principles and Standards.

Timing/Schedule: Biennial assessments, or at such less frequent intervals as the Council may determine.

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies

Civil Works Engineering: None specific to this statute.

Civil Works Construction: None specific to this statute.

Civil Works Operations: None specific to this statute.

Regulatory: None specific to this statute.

FOR MORE INFORMATION SEE: None identified

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: None identified.

Guidance Title: None identified.

Code of Federal Regulations Citation: 18 C.F.R. 701

MANAGEMENT OPPORTUNITIES: While the Water Resources Council has not been funded in a number of years, some of the river basin commissions continue. There may be opportunities for the Corps to work with these commissions as part of ecosystem restoration initiatives, and through Section 22, Planning Assistance to States initiatives.

WATERSHED PROTECTION AND FLOOD PREVENTION ACT

LEGISLATIVE TITLE: Watershed Protection and Flood Prevention Act

UNITED STATES CODE CITATION: 16 U.S.C. §§ 1001 et seq; 33 U.S.C. § 701b

OTHER TITLES AND POPULAR NAMES: None identified.

SUMMARY: This Act authorizes the Secretary of Agriculture to cooperate with states and other public agencies in works for flood prevention and soil conservation, as well as the conservation, development, utilization, and disposal of water. It established the Small Watershed Program through which the Natural Resource Conservation Service (NRCS) (formerly the Soil Conservation Service)(7 U.S.C. 6962) constructs dams and implements other measures in upstream watershed for a variety of purposes including flood control.

RESOURCES COVERED: water use, disposal, control, soil conservation

COMPLIANCE REQUIREMENTS: This Act imposes no requirements on Corps Civil Works projects. The Corps cooperates fully with the NRCS in carrying out its program and strives to bring about coordination between the this program and the programs of the Corps through interagency agreements. (See EP 1165-2-2, Interagency Agreements, Appendix B.)

REVIEW AND CONSULTATION REQUIREMENTS: Any plans for works of improvement involving an estimated Federal contribution to construction costs in excess of \$5 million or including any structure having total capacity in excess of 2500 acre-feet [which affects public land or health, or water pollution] shall be submitted to the Secretary of the Interior, Secretary of the Army, Secretary of Health and Human Services, or the Administrator of the EPA for his views and recommendations at least 30 days prior to transmission of the plan to the Congress through the President. The views and recommendations of [the above mentioned Secretaries], if received by the Secretary [of Agriculture] prior to the expiration of the above 30 day period shall accompany the plan transmitted by the Secretary to the Congress through the President (16 U.S.C. 1005(4)).

Who Reviews or Consults: US Department of Agriculture, Natural Resources Conservation Service

Process: None specified.

Product: None specified.

Timing/Schedule: None specified.

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 7, Environmental Planning and Evaluation Considerations.

Civil Works Engineering: None specific to this statute.
Civil Works Construction: None specific to this statute.
Civil Works Operations: None specific to this statute.
Regulatory: None specific to this statute.

FOR MORE INFORMATION SEE: Executive Order 10913, 18 January 1961, Amending Executive Order No. 10584 Prescribing Rules and Regulations Relating to the Administration of the Watershed Protection and Flood Prevention Act. Sections 3 and 4 provide for notification and coordination of agencies in the use, conservation, and development of water and related land resources.

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: US Department of Agriculture (Natural Resources Conservation Service)
Guidance Title: None identified.
Code of Federal Regulations Citation: 7 C.F.R. 622; 33 C.F.R. 222

MANAGEMENT OPPORTUNITIES: The Corps can coordinate with the NRCS as part of water resources planning activities. Watershed studies and comprehensive studies in particular provide opportunities to share information and coordinate initiatives.

WILD AND SCENIC RIVERS ACT

LEGISLATIVE TITLE: Wild and Scenic Rivers Act

UNITED STATES CODE CITATION: 16 U.S.C. § 1271 et seq.

OTHER TITLES AND POPULAR NAMES: WSRA

SUMMARY: The Act establishes the policy that certain rivers of the Nation which, with their immediate environments, possess outstandingly remarkable scenic, recreational, geologic, fish and wildlife, historic, cultural, or other similar values, shall be preserved in free-flowing condition, and that they and their immediate environments shall be protected for the benefit and enjoyment of present and future generations (16 U.S.C. 1271). The Act both identifies specific river reaches for designation as wild or scenic, and provides criteria to be used for classifying additional river reaches (16 U.S.C. 1272). "Wild river areas" are those rivers or sections of rivers that are free from impoundments and generally inaccessible except by trail, with watersheds or shorelines essentially primitive and waters unpolluted. These represent the vestiges of primitive America. "Scenic river areas" are those rivers or sections of rivers that are free from impoundments, with shorelines or watersheds still largely primitive and shorelines largely undeveloped, but accessible in places by roads. "Recreational river areas" are those rivers or sections of rivers that are readily accessible by road or railroad, that may have some development along their shorelines, and that may have undergone some impoundment or diversion in the past. (16 U.S.C. 1273)

The National Wild and Scenic River System was established to protect the environmental values of free-flowing streams from degradation by impacting activities, including water resources projects. The system is administered jointly by the U.S. Forest Service, Department of Agriculture, and the National Park Service, Department of the Interior. Corps activities on the streams included in the system are subject to review by whichever of these agencies is responsible for the specific stream. In all planning for the use and development of water and related land resources, consideration shall be given to potential national wild, scenic and recreational river areas, and all river basin and project plan reports submitted to the Congress shall consider and discuss such potentials (16 U.S.C. 1276(d)).

RESOURCES COVERED: Free flowing streams; Scenic, recreational, geologic, fish and wildlife, historic, cultural, or similar values of streams.

COMPLIANCE REQUIREMENTS: Discharges into streams, impoundments, diversions, channel alterations, and other measures can alter the stream discharge, velocity, and channel dimensions. These hydraulic changes may cause modifications to the free-flowing character of the stream, resulting in loss or diminution of its environmental values. The Wild and Scenic River Act requires consideration of the impacts and consultation with the responsible agency prior to implementation of a project. Corps activities on the streams included in the National Wild and Scenic River System are subject to review by whichever of these agencies is responsible for the specific stream. Plans to avoid or minimize impacts to wild and scenic rivers must be disclosed and evaluated in project reports and NEPA documents. Operation plans may be required to insure that impacts are avoided or minimized.

Regulatory program: In any 404 permit application, the Corps should consult with the National

Park Service or the Forest Service as appropriate to determine if the proposed project will be compatible with the Wild & Scenic designation. As for nationwide permits, it would be advisable to coordinate unofficially with these two agencies. Candidate rivers should also be considered during consultation.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: National Park Service, Department of the Interior; U.S. Forest Service, Department of Agriculture.

Process: Consult the Act and amendments, as well as with the appropriate agency to identify designated wild and scenic rivers (including potential rivers), or portions thereof, during the planning phases of water resources projects. Coordination shall be carried out with the agency having management or program responsibility for the particular river.

Product: Project reports and NEPA documents should include a description of potential impacts on designated rivers or reaches of designated rivers if applicable.

Timing/Schedule: For Corps projects, initial identification of designated rivers or river reaches in the vicinity of the project is done during the reconnaissance phase, with follow-up review of current listings during the feasibility and detailed design phases.

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 7, Planning Guidance; EP 1165-2-1, Digest of Water Resources Policies and Authorities

Civil Works Engineering: None specific to this statute.

Civil Works Construction: None specific to this statute.

Civil Works Operations: None specific to this statute

Regulatory: 33 C.F.R. 320 and 325

FOR MORE INFORMATION SEE: The Wilderness Act

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: Department of the Interior (National Park Service) and the Department of Agriculture (U.S. Forest Service).

Guidance Title: National Wild and Scenic Rivers System; Final Revised Guidelines for Eligibility, Classification and Management of River Areas, F.R. Volume 47, No. 173, September 7, 1982

Federal Register Citation: 47 F.R., No. 173

MANAGEMENT OPPORTUNITIES: The Corps may transfer jurisdiction of any project lands which include all or portions of a wild and scenic river to the Secretary of the Interior for administration in accordance with the environmental preservation aspects of the Act. Federal agencies, like the Corps, may provide assistance to States in developing plans for preserving and managing wild and scenic rivers under their jurisdiction.

WILDERNESS ACT

LEGISLATIVE TITLE: The Wilderness Act

UNITED STATES CODE CITATION: 16 U.S.C. § 1131 et seq

OTHER TITLES AND POPULAR NAMES: WA

SUMMARY: This Act establishes a National Wilderness Preservation System to be composed of Federally owned areas designated by Congress as "wilderness areas", which are to be managed in a manner that will leave them unimpaired for future use and enjoyment as wilderness, and so as to provide for the protection of these areas, the preservation of their wilderness character. With certain exceptions, the Act prohibits motorized equipment, structures, installations, roads, commercial enterprises, aircraft landings, and mechanical transport. The Act permits mining on valid claims, access to private lands, fire control, insect and disease control, grazing, water-resource structures (upon the approval of the President), and visitor use (16 U.S.C. 1133). Except as otherwise provided in this Act, each agency administering any area designated as wilderness shall be responsible for preserving the wilderness character of the area.

RESOURCES COVERED: National wilderness areas, and their associated ecological, geological and other features.

COMPLIANCE REQUIREMENTS: In planning a project, Federal agencies must determine whether or not the activity will affect a designated wilderness area. In making this determination, the Corps should consult with the appropriate administering agency. Typically, wilderness areas are located within either National Parks (administered by the National Park Service), National Wildlife Refuges (administered by U.S. Fish and Wildlife Service), National Forests (administered by the U.S. Forest Service), or public lands (administered by Bureau of Land Management). These contacts can assist the Corps in determining whether a proposed project falls among the activities prohibited in the wilderness area; how proposed activities may be mitigated; and whether exemptions to the prohibitions are necessary and can be obtained. For example, it may be possible to substitute temporary structures and roads, or certain kinds of equipment in order to avoid adverse effects on a wilderness area. The Corps of Engineers must get the appropriate agency approval and for some activities, a permit may be required.

REVIEW AND CONSULTATION REQUIREMENTS

Who Reviews or Consults: National Park Service, Fish and Wildlife Service, Forest Service, and Bureau of Land Management, Department of Agriculture, Department of the Interior

Process and Product: In planning a project, the Corps consults with the appropriate administering agency federal agencies to determine whether or not the activity will affect a designated wilderness area.

Timing/Schedule: None specified.

CORPS GUIDANCE

Civil Works Planning: ER 1105-2-100, Guidance for Conducting Civil Works Planning Studies, Chapter 7, Planning Guidance

Civil Works Engineering: None specific to this statute.

Civil Works Construction: None specific to this statute.

Civil Works Operations: None specific to this statute.

Regulatory: None specific to this statute.

FOR MORE INFORMATION SEE: Wild and Scenic Rivers Act

IMPLEMENTING GUIDANCE OF OTHER AGENCIES

Agency: U.S. Department of Interior; U.S. Forest Service; Bureau of Land Management

Guidance Title: See below

Code of Federal Regulations Citation: 50 C.F.R. 35; 43 C.F.R. 19: Office of the Secretary of Interior, Wilderness Preservation; 36 C.F.R. 293: U.S. Forest Service, Wilderness and Primitive Areas; 36 C.F.R. 261: U.S. Forest Service, Prohibitions; 36 C.F.R. 219: National Forest System Land & Resource Management Planning. 43 C.F.R. 8560: Bureau of Land Management, Designated Wilderness Areas; Procedures for Management.

MANAGEMENT OPPORTUNITIES: While unlikely, it is not impossible that Corps land could be included in a Wilderness Bill. The main requirement is that it consists of 5,000 acres of land in a generally roadless state. If a piece of land was found to be such a size on a Corps project, it could be kept in its primitive state so that it may included in a Wilderness Bill. This means no developments (campgrounds, roads, etc.) should take place in that property.

Executive Order 11472
ESTABLISHING THE ENVIRONMENTAL QUALITY COUNCIL AND THE CITIZENS'
ADVISORY COMMITTEE ON ENVIRONMENTAL QUALITY

May 29, 1969

By virtue of the authority vested in me as President of the United States, it is ordered as follows:

PART I. ENVIRONMENTAL QUALITY COUNCIL

SECTION 101. Establishment of the Council.

- (a) There is hereby established the Environmental Quality Council (hereinafter referred to as 'the Council').
- (b) The President of the United States shall preside over meetings of the Council. The Vice President shall preside in the absence of the President.
- (c) The Council shall be composed of the following members:
 - The Vice President of the United States
 - Secretary of Agriculture
 - Secretary of Commerce
 - Secretary of Health, Education and Welfare
 - Secretary of Housing and Urban Development
 - Secretary of the Interior
 - Secretary of Transportation and such other heads of departments and agencies and others as the President may from time to time direct.
- (d) Each member of the Council may designate an alternate, who shall serve as a member of the Council whenever the regular member is unable to attend any meeting of the Council.
- (e) When matters which affect the interest of Federal agencies the heads of which are not members of the Council are to be considered by the Council, the President or his representative may invite such agency heads or their alternates to participate in the deliberations of the Council.
- (f) The Director of the Bureau of the Budget, the Chairman of the Council of Economic Advisers, and the Executive Secretary of the Council for Urban Affairs or their representatives may participate in the deliberations of the Environmental Quality Council as observers.
- (g) The Science Adviser to the President shall be the Executive Secretary of the Council and shall assist the President in directing the affairs of the Council.

SECTION 102. Functions of the Council.

- (a) The Council shall advise and assist the President with respect to environmental quality matters and shall perform such other related duties as the President may from time to time prescribe. In addition thereto, the Council is directed to:
 - (1) Recommend measures to ensure that Federal policies and programs, including those for development and conservation of natural resources, take adequate account of environmental effects.
 - (2) Review the adequacy of existing systems for monitoring and predicting environmental changes so as to achieve effective coverage and efficient use of facilities and other resources.

- (3) Foster cooperation between the Federal Government, State and local governments, and private organizations in environmental programs.
- (4) Seek advancement of scientific knowledge of changes in the environment and encourage the development of technology to prevent or minimize adverse effects endanger man's health and well-being.
- (5) Stimulate public and private participation in programs and activities to protect against pollution of the Nation's air, water, and land and its living resources.
- (6) Encourage timely public disclosure by all levels of government and by private parties of plans that would affect the quality of environment.
- (7) Assure assessment of new and changing technologies for their potential effects on the environment.
- (8) Facilitate coordination among departments and agencies of the Federal Government in protecting and improving the environment.

(b) The Council shall review plans and actions of Federal agencies affecting outdoor recreation and natural beauty. The Council may conduct studies and make recommendations to the President on matters of policy in the fields of outdoor recreation and natural beauty. In carrying out the foregoing provisions of this subsection, the Council shall, as far as may be practical, advise Federal agencies with respect to the effect of their respective plans and programs on recreation and natural beauty, and may suggest to such agencies ways to accomplish the purposes of this order. For the purposes of this order, plans and programs may include, but are not limited to, those for or affecting: (1) Development, restoration, and preservation of the beauty of the countryside, urban and suburban areas, water resources, wild rivers, scenic roads, parkways and highways, (2) the protection and appropriate management of scenic or primitive areas, natural wonders, historic sites, and recreation areas, (3) the management of Federal land and water resources, including fish and wildlife, to enhance natural beauty and recreational opportunities consistent with other essential uses, (4) cooperation with the States and their local subdivisions and private organizations and individuals in areas of mutual interest, (5) interstate arrangements, including Federal participation where authorized and necessary, and (6) leadership in a nationwide recreation and beautification effort.

(c) The Council shall assist the President in preparing periodic reports to the Congress on the subjects of this order.

SECTION 103. Coordination. The Secretary of the Interior may make available to the Council for coordination of outdoor recreation the authorities and resources available to him under the Act of May 28, 1963, 77 Stat. 49; to the extent permitted by law, he may make such authorities and resources available to the Council also for promoting such coordination of other matters assigned to the Council by this order.

SECTION 104. Assistance for the Council. In compliance with provisions of applicable law, and as necessary to serve the purposes of this order, (1) the Office of Science and Technology shall provide or arrange for necessary administrative and staff services, support, and facilities for the Council, and (2) each department and agency which has membership on the Council under Section 101(c) hereof shall furnish the Council such

information and other assistance as may be available.

PART II. CITIZENS' ADVISORY COMMITTEE ON ENVIRONMENTAL QUALITY

SECTION 201. Establishment of the Committee. There is hereby established the Citizens' Advisory Committee on Environmental Quality (hereafter referred to as 'Committee'). The Committee shall be composed of a chairman and not more than 14 other members appointed by the President. Appointments to membership on the Committee shall be for staggered terms, except that the chairman of the Committee shall serve until his successor is appointed.

SECTION 202. Functions of the Committee. The Committee shall advise the President and the Council on matters assigned to the Council by the provisions of this order.

SECTION 203. Expenses. Members of the Committee shall receive no compensation from the United States by reason of their services under this order but shall be entitled to receive travel and expenses, including per diem in lieu of subsistence, as authorized by law (5 U.S.C. 5701-5708) for persons in the Government service employed intermittently.

SECTION 204. Continuity. Persons who on the date of this order are members of the Citizens' Advisory Committee on Recreation and Natural Beauty established by Executive Order No. 11278 of May 4, 1966, as amended, shall, until the expirations of their respective terms and without further action by the President, be members of the Committee established by the provisions of this Part in lieu of an equal number of the members provided for in section 201 of this order.

PART III. GENERAL PROVISIONS

SECTION 301. Construction. Nothing in this order shall be construed as subjecting any department, establishment, or other instrumentality of the executive branch of the Federal Government or the head thereof, or any function vested by law in or assigned pursuant to law to any such agency or head, to the authority of any other such agency or head or as abrogating, modifying, or restricting any such function in any manner.

SECTION 302. Prior bodies and orders. The President's Council on Recreation and Natural Beauty and the Citizens' Advisory Committee on Recreation and Natural Beauty are hereby terminated and the following are revoked:

- (1) Executive Order No. 11278 of May 4, 1966.
- (2) Executive Order No. 11359A of June 29, 1967.
- (3) Executive Order No. 11402 of March 29, 1968.

Richard Nixon
THE WHITE HOUSE,
May 29, 1969.
34 FR 8693, 1969 WL 9659 (Pres.)

Executive Order 11514
PROTECTION AND ENHANCEMENT OF ENVIRONMENTAL QUALITY

March 5, 1970

By virtue of the authority vested in me as President of the United States and in furtherance of the purpose and policy of the National Environmental Policy Act of 1969 (Public Law No. 91-190, approved January 1, 1970), it is ordered as follows:

SECTION 1. Policy

The Federal Government shall provide leadership in protecting and enhancing the quality of the Nation's environment to sustain and enrich human life. Federal agencies shall initiate measures needed to direct their policies, plans and programs so as to meet national environmental goals. The Council on Environmental Quality, through the Chairman, shall advise and assist the President in leading this national effort.

SECTION 2. Responsibilities of Federal agencies.

Consonant with Title I of the National Environmental Policy Act of 1969, hereafter referred to as the "Act", the heads of Federal agencies shall:

(a) Monitor, evaluate, and control on a continuing basis their agencies' activities so as to protect and enhance the quality of the environment. Such activities shall include those directed to controlling pollution and enhancing the environment and those designed to accomplish other program objectives which may affect the quality of the environment. Agencies shall develop programs and measures to protect and enhance environmental quality and shall assess progress in meeting the specific objectives of such activities. Heads of agencies shall consult with appropriate Federal, State and local agencies in carrying out their activities as they affect the quality of the environment.

(b) Develop procedures to ensure the fullest practicable provision of timely public information and understanding of Federal plans and programs with environmental impact in order to obtain the views of interested parties. These procedures shall include, whenever appropriate, provision for public hearings, and shall provide the public with relevant information, including information on alternative courses of action. Federal agencies shall also encourage State and local agencies to adopt similar procedures for informing the public concerning their activities affecting the quality of the environment.

(c) Insure that information regarding existing or potential environmental problems and control methods developed as part of research, development, demonstration, test, or evaluation activities is made available to Federal agencies, States, counties, municipalities, institutions, and other entities, as appropriate.

(d) Review their agencies' statutory authority, administrative regulations, policies, and procedures, including those relating to loans, grants, contracts, leases, licenses, or permits, in order to identify any deficiencies or inconsistencies therein which prohibit or limit full compliance with the purposes and provisions of the Act. A report on this review and the corrective actions taken or planned, including such measures to be proposed to the President as may be necessary to bring their authority and policies into conformance with the intent, purposes, and procedures of the Act, shall be provided to the Council on Environmental Quality not later than September 1, 1970.

- (e) Engage in exchange of data and research results, and cooperate with agencies of other governments to foster the purposes of the Act.
- (f) Proceed, in coordination with other agencies, with actions required by section 102 of the Act.
- (g) In carrying out their responsibilities under the Act and this Order, comply with the regulations issued by the Council except where such compliance would be inconsistent with statutory requirements.

SECTION 3. Responsibilities of Council on Environmental Quality.

The Council on Environmental Quality shall:

- (a) Evaluate existing and proposed policies and activities of the Federal Government directed to the control of pollution and the enhancement of the environment and to the accomplishment of other objectives which affect the quality of the environment. This shall include continuing review of procedures employed in the development and enforcement of Federal standards affecting environmental quality. Based upon such evaluations the Council shall, where appropriate, recommend to the President policies and programs to achieve more effective protection and enhancement of environmental quality and shall, where appropriate, seek resolution of significant environmental issues.
- (b) Recommend to the President and to the agencies priorities among programs designed for the control of pollution and for enhancement of the environment.
- (c) Determine the need for new policies and programs for dealing with environmental problems not being adequately addressed.
- (d) Conduct, as it determines to be appropriate, public hearings or conferences on issues of environmental significance.
- (e) Promote the development and use of indices and monitoring systems (1) to assess environmental conditions and trends, (2) to predict the environmental impact of proposed public and private actions, and (3) to determine the effectiveness of programs for protecting and enhancing environmental quality.
- (f) Coordinate Federal programs related to environmental quality.
- (g) Advise and assist the President and the agencies in achieving international cooperation for dealing with environmental problems, under the foreign policy guidance of the Secretary of State.
- (h) Issue regulations to Federal agencies for the implementation of the procedural provisions of the Act (42 USC 4332(2)). Such regulations shall be developed after consultation with affected agencies and after such public hearings as may be appropriate. They will be designed to make the environmental impact statement process more useful to decisionmakers and the public; and to reduce paperwork and the accumulation of extraneous background data, in order to emphasize the need to focus on real environmental issues and alternatives. They will require impact statements to be concise, clear, and to the point, and supported by evidence that agencies have made the necessary environmental analyses. The Council shall include in its regulations procedures (1) for the early

preparation of environmental impact statements, and (2) for the referral to the Council of conflicts between agencies concerning the implementation of the National Environmental Policy Act of 1969, as amended, and Section 309 of the Clean Air Act, as amended, for the Council's recommendation as to their prompt resolution.

(i) Issue such other instructions to agencies, and request such reports and other information from them, as may be required to carry out the Council's responsibilities under the Act.

(j) Assist the President in preparing the annual Environmental Quality Report provided for in section 201 of the Act.

(k) Foster investigations, studies, surveys, research, and analyses relating to (i) ecological systems and environmental quality, (ii) the impact of new and changing technologies thereon, and (iii) means of preventing or reducing adverse effects from such technologies.

SECTION 4 Amendments of E.O. 11472.

Executive Order 11593
PROTECTION AND ENHANCEMENT OF THE CULTURAL ENVIRONMENT

May 13, 1971

By virtue of the authority vested in me as President of the United States and in furtherance of the purposes and policies of the National Environmental Policy Act of 1969 (83 Stat. 852, 42 U.S.C. 4321 et seq.), the National Historic Preservation Act of 1966 (80 Stat. 915, 16 U.S.C. 470 et seq.), the Historic Sites Act of 1935 (49 Stat. 666, 16 U.S.C. 461 et seq.), and the Antiquities Act of 1906 (34 Stat. 225, 16 U.S.C. 431 et seq.), it is ordered as follows:

SECTION 1. Policy.

The Federal Government shall provide leadership in preserving, restoring and maintaining the historic and cultural environment of the Nation. Agencies of the executive branch of the Government (hereinafter referred to as 'Federal agencies') shall:

- (1) administer the cultural properties under their control in a spirit of stewardship and trusteeship for future generations,
- (2) initiate measures necessary to direct their policies, plans and programs in such a way that federally owned sites, structures, and objects of historical, architectural or archaeological significance are preserved, restored and maintained for the inspiration and benefit of the people, and
- (3), in consultation with the Advisory Council on Historic Preservation (16 U.S.C. 470i), institute procedures to assure that Federal plans and programs contribute to the preservation and enhancement of non-federally owned sites, structures and objects of historical, architectural or archaeological significance.

SECTION 2. Responsibilities of Federal agencies. Consonant with the provisions of the acts cited in the first paragraph of this order, the heads of Federal agencies shall:

- (a) no later than July 1, 1973, with the advice of the Secretary of the Interior, and in cooperation with the liaison officer for historic preservation for the State or territory involved, locate, inventory, and nominate to the Secretary of the Interior all sites, buildings, districts, and objects under their jurisdiction or control that appear to qualify for listing on the National Register of Historic Places.
- (b) exercise caution during the interim period until inventories and evaluations required by subsection (a) are completed to assure that any federally owned property that might qualify for nomination is not inadvertently transferred, sold, demolished or substantially altered. The agency head shall refer any questionable actions to the Secretary of the Interior for an opinion respecting the property's eligibility for inclusion on the National Register of Historic Places. The Secretary shall consult with the liaison officer for historic preservation for the State or territory involved in arriving at his opinion. Where, after a reasonable period in which to review and evaluate the property, the Secretary determines that the property is likely to meet the criteria prescribed for listing on the National Register of Historic Places, the Federal agency head shall reconsider the proposal in light of national environmental and preservation policy. Where, after such reconsideration, the Federal agency head proposes to transfer, sell, demolish or substantially alter the property he shall not act with respect to the property until the Advisory Council on Historic Preservation shall have been provided an opportunity to comment on the proposal.

(c) initiate measures to assure that where as a result of Federal action or assistance a property listed on the National Register of Historic Places is to be substantially altered or demolished, timely steps be taken to make or have made records, including measured drawings, photographs and maps, of the property, and that copy of such records then be deposited in the Library of Congress as part of the Historic American Buildings Survey or Historic American Engineering Record for future use and reference. Agencies may call on the Department of the Interior for advice and technical assistance in the completion of the above records.

(d) initiate measures and procedures to provide for the maintenance, through preservation, rehabilitation, or restoration, of federally owned and registered sites at professional standards prescribed by the Secretary of the Interior.

(e) submit procedures required pursuant to subsection (d) to the Secretary of the Interior and to the Advisory Council on Historic Preservation no later than January 1, 1972, and annually thereafter, for review and comment.

(f) cooperate with purchasers and transferees of a property listed on the National Register of Historic Places in the development of viable plans to use such property in a manner compatible with preservation objectives and which does not result in an unreasonable economic burden to public or private interests.

SECTION 3. Responsibilities of the Secretary of the Interior.

The Secretary of the Interior shall:

(a) encourage State and local historic preservation officials to evaluate and survey federally owned historic properties and, where appropriate, to nominate such properties for listing on the National Register of Historic Places.

(b) develop criteria and procedures to be applied by Federal agencies in the reviews and nominations required by section 2(a). Such criteria and procedures shall be developed in consultation with the affected agencies.

(c) expedite action upon nominations to the National Register of Historic Places concerning federally owned properties proposed for sale, transfer, demolition or substantial alteration.

(d) encourage State and Territorial liaison officers for historic preservation to furnish information upon request to Federal agencies regarding their properties which have been evaluated with respect to historic, architectural or archaeological significance and which as a result of such evaluations have not been found suitable for listing on the National Register of Historic Places.

(e) develop and make available to Federal agencies and State and local governments information concerning professional methods and techniques for preserving, improving, restoring and maintaining historic properties.

(f) advise Federal agencies in the evaluation, identification, preservation, improvement, restoration and maintenance of historic properties.

(g) review and evaluate the plans of transferees of surplus Federal properties transferred for historic monument purposes to assure that the historic character of such properties is preserved in rehabilitation, restoration, improvement, maintenance and repair of such properties.

(h) review and comment upon Federal agency procedures submitted pursuant to section 2(e) of this order.

Richard Nixon

THE WHITE HOUSE,

May 13, 1971.

Exec. Order No. 11593, 36 FR 8921, 1971 WL 17202 (Pres.)

Executive Order 11735
ASSIGNMENT OF FUNCTIONS UNDER SECTION 311 OF THE FEDERAL WATER
POLLUTION CONTROL ACT, AS AMENDED

August 3, 1973

By virtue of the authority vested in me by section 311 of the Federal Water Pollution Control Act, as amended by the Federal Water Pollution Control Act Amendments of 1972 (Public Law 92-500; 86 Stat. 816 at 862; 33 U.S.C. 1321), hereinafter referred to as the act, by section 301 of title 3 of the United States Code, and as President of the United States, it is hereby ordered as follows:

SECTION 1. Administrator of the Environment Protection Agency.

The Administrator of the Environmental Protection Agency is hereby designated and empowered to exercise, without the approval, ratification, or other action of the President, the following:

- (1) the authority of the President under subsection (b)(3) and (b)(4) of section 311 of the act relating to the determination of those quantities of oil and hazardous substances the discharge of which, at such times, locations, circumstances, and conditions, will be harmful to the public health or welfare of the United States and those which will not be harmful;
- (2) the authority of the President under subsection (c)(2)(G) of section 311 of the act, relating to identification of dispersants and other chemicals to be used;
- (3) the authority of the President under subsection (e) of section 311 of the act, relating to determinations of imminent and substantial threat because of actual or threatened discharges of oil or hazardous substances from non- transportation-related onshore and offshore facilities, and relating to securing relief necessary to abate such actual or threatened discharges through court action; and
- (4) the authority of the President under subsection (j)(1)(C) of section 311 of the act, relating to the establishment of procedures, methods, and equipment and other requirements for equipment to prevent discharges of oil and hazardous substances from non-transportation-related onshore and offshore facilities, and to contain such discharges.

SECTION 2. Secretary of Department in which the Coast Guard is Operating.

The Secretary of the Department in which the Coast Guard is operating is hereby designated and empowered to exercise, without the approval, ratification, or other action of the President, the following:

- (1) the authority of the President under subsection (e) of section 311 of the act, relating to determinations of imminent and substantial threat because of actual or threatened discharges of oil or hazardous substances from transportation-related onshore and offshore facilities, and relating to securing relief necessary to abate such actual or threatened discharges through court action;
- (2) the authority of the President under subsection (j)(1)(C) of section 311 of the act, relating to the establishment of procedures, methods, and equipment and other requirements for equipment to prevent discharges of oil and hazardous substances from vessels and transportation-related onshore and offshore facilities, and to contain such discharges;

(3) the authority of the President under subsection (j)(1)(D) of section 311 of the act, relating to the inspection of vessels carrying cargoes of oil and hazardous substances and the inspection of such cargoes;

(4) the authority to administer the revolving fund established pursuant to subsection (k) of section 311 of the act; and

(5) the authority under subsection (m) of section 311 of the act, relating to the boarding and inspection of vessels, the arrest of persons violating section 311, and the execution of warrants or other process pursuant to that section.

SECTION 3. Federal Maritime Commission.

The Federal Maritime Commission is designated and empowered to exercise, without the approval, ratification, or other action of the President, the following:

(1) the authority of the President under subsection (p)(1) of section 311 of the act, relating to the issuance of regulations governing evidence of financial responsibility for vessels to meet liability to the United States; and

(2) the authority under subsection (p)(2) of section 311 of the act, relating to the administration of subsection (p).

SECTION 4. Council on Environmental Quality.

The Council on Environmental Quality is hereby designated and empowered to exercise, without the approval, ratification, or other action of the President, the authority under subsection (c)(2) of section 311 of the act, providing for the preparation, publication, revision or amendment of a National Contingency Plan for the removal of oil and hazardous substance discharges (hereinafter referred to as the National Contingency Plan).

SECTION 5. Other Assignments.

(a) The head of each Federal department and agency having responsibilities under the National Contingency Plan (36 FR 16215), as now or hereafter amended, is designated and empowered to exercise, without the approval, ratification, or other action of the President, in accordance with that plan, the authority under subsection (c)(1) of section 311 of the act, relating to the removal of oil and hazardous substances discharged into or upon the navigable waters of the United States, adjoining shorelines, or into or upon the waters of the contiguous zone.

(b) The Administrator of the Environmental Protection Agency and the Secretary of the Department in which the Coast Guard is operating, respectively, in and for the waters and areas for which each has responsibility for providing or furnishing on-scene-coordinators under the National Contingency Plan, are designated and empowered to exercise, without approval, ratification, or other action of the President, the following:

(1) the authority under subsection (c)(2)(C) of section 311 of the act, relating to the determination of major ports for establishment of emergency task forces;

(2) the authority under subsection (d) of section 311 of the act, relating to the coordination and direction of the removal or elimination of threats of pollution

hazards from discharges, or imminent discharges, of oil or hazardous substances, and the removal and destruction of vessels;

(3) the authority of the President under subsection (j)(1)(A) of section 311 of the act, relating to the establishment of methods and procedures for the removal of discharged oil and hazardous substances; and

(4) the authority of the President under subsection (j)(1)(B) of section 311 of the act, relating to the establishment of criteria for the development and implementation of local and regional oil and hazardous substance removal contingency plans.

(c) The Administrator of the Environmental Protection Agency and the Secretary of the Department in which the Coast Guard is operating are designated and empowered to exercise, without the approval, ratification, or other action of the President, the authority of the President under section 311(j)(2) with respect to assessing and compromising civil penalties in connection with enforcement of the respective regulations issued by each pursuant to this order.

SECTION 6. Consultation.

Authorities and functions delegated or assigned by this order shall be exercised subject to consultation with the Secretaries of departments and the heads of agencies with operating or regulatory responsibilities which may be significantly affected.

SECTION 7. Agency to Receive Notices of Discharges of Oil or Hazardous Substances.

The Coast Guard is hereby designated the 'appropriate agency' for the purpose of receiving the notice of discharge of oil or hazardous substances required by subsection (b)(5) of section 311 of the act. The Commandant of the Coast Guard shall issue regulations implementing this designation.

SECTION 8. Without derogating from any action heretofore taken thereunder, Executive Order No. 11548 of July 20, 1970, is hereby superseded.

Richard Nixon
THE WHITE HOUSE,
August 3, 1973.

Exec. Order No. 11735, 38 FR 21243, 1973 WL 20499 (Pres.)

Executive Order 11987
EXOTIC ORGANISMS

May 24, 1977

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, in furtherance of the purposes and policies of the Lacey Act (18 U.S.C. 42) and the National Environmental Policy Act of 1969, as amended (42 USC 4321 et seq.), it is hereby ordered as follows:

SECTION 1. As used in this Order:

(a) "United States" means all of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands.

(b) "Introduction" means the release, escape, or establishment of an exotic species into a natural ecosystem.

(c) "Exotic species" means all species of plants and animals not naturally occurring, either presently or historically, in any ecosystem of the United States.

(d) "Native species" means all species of plants and animals naturally occurring, either presently or historically, in any ecosystem of the United States.

SECTION 2.

(a) Executive agencies shall, to the extent permitted by law, restrict the introduction of exotic species into the natural ecosystems on lands and waters which they own, lease, or hold for purposes of administration; and, shall encourage the States, local governments, and private citizens to prevent the introduction of exotic species into natural ecosystems of the United States.

(b) Executive agencies, to the extent they have been authorized by statute to restrict the importation of exotic species, shall restrict the introduction of exotic species into any natural ecosystem of the United States.

(c) Executive agencies shall, to the extent permitted by law, restrict the use of Federal funds, programs, or authorities used to export native species for the purpose of introducing such species into ecosystems outside the United States where they do not naturally occur.

(d) This Order does not apply to the introduction of any exotic species, or the export of any native species, if the Secretary of Agriculture or the Secretary of the Interior finds that such introduction or exportation will not have an adverse effect on natural ecosystems.

SECTION 3.

The Secretary of the Interior, in consultation with the Secretary of Agriculture and the heads of other

appropriate agencies, shall develop and implement, by rule or regulation, a system to standardize and simplify the requirements, procedures and other activities appropriate for implementing the provisions of this Order. The Secretary of the Interior shall ensure that such rules or regulations are in accord with the performance by other agencies of those functions vested by law, including this Order, in such agencies.

Executive Order 11988
FLOODPLAIN MANAGEMENT

May 24, 1977

[EDITOR'S NOTE: Executive Order 12148 --Federal Emergency Management, July 20, 1979, substituted "Director of the Federal Emergency Management Agency" for "Federal Insurance Administration" in Section 2(d).]

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, in furtherance of the National Environmental Policy Act of 1969, as amended (42 USC 4321 et seq.), the National Flood Insurance Act of 1968, as amended (42 USC 4001 et seq.), and the Flood Disaster Protection Act of 1973 (Public Law 93-234, 87 Stat. 975), in order to avoid to the extent possible the long and short term adverse impacts associated with the occupancy and modification of floodplains and to avoid direct or indirect support of floodplain development wherever there is a practicable alternative, it is hereby ordered as follows:

SECTION 1

Each agency shall provide leadership and shall take action to reduce the risk of flood loss, to minimize the impact of floods on human safety, health and welfare, and to restore and preserve the natural and beneficial values served by floodplains in carrying out its responsibilities for (1) acquiring, managing, and disposing of Federal lands and facilities; (2) providing Federally undertaken, financed, or assisted construction and improvements; and (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities.

SECTION 2

In carrying out the activities described in Section 1 of this Order, each agency has a responsibility to evaluate the potential effects of any actions it may take in a floodplain; to ensure that its planning programs and budget requests reflect consideration of flood hazards and floodplain management; and to prescribe procedures to implement the policies and requirements of this Order, as follows:

(a)(1) Before taking an action, each agency shall determine whether the proposed action will occur in a floodplain -- for major Federal actions significantly affecting the quality of the human environment, the evaluation required below will be included in any statement prepared under Section 102(2)(C) of the National Environmental Policy Act. This determination shall be made according to a Department of Housing and Urban Development (HUD) floodplain map or a more detailed map of an area, if available. If such maps are not available, the agency shall make a determination of the location of the floodplain based on the best available information. The Water Resources Council shall issue guidance on this information not later than October 1, 1977.

(2) If an agency has determined to, or proposes to, conduct, support, or allow an action to be located in a floodplain, the agency shall consider alternatives to avoid adverse effects and incompatible development in the floodplains. If the head of the agency finds that the only practicable alternative consistent with the law and with the policy set forth in this Order requires siting in a floodplain, the agency shall, prior to taking action, (i) design or modify its action in order to minimize potential harm to or within the floodplain, consistent with regulations issued in accord with Section 2(d) of this Order, and (ii) prepare and circulate a notice containing an explanation of why the action is proposed

to be located in the floodplain.

(3) For programs subject to the Office of Management and Budget Circular A-95, the agency shall send the notice, not to exceed three pages in length including a location map, to the state and area wide A-95 clearinghouses for the geographic areas affected. The notice shall include: (i) the reasons why the action is proposed to be located in a floodplain; (ii) a statement indicating whether the action conforms to applicable state or local floodplain protection standards and (iii) a list of the alternatives considered. Agencies shall endeavor to allow a brief comment period prior to taking any action.

(4) Each agency shall also provide opportunity for early public review of any plans or proposals for actions in floodplains, in accordance with Section 2(b) of Executive Order No. 11 514, as amended, including the development of procedures to accomplish this objective for Federal actions whose impact is not significant enough to require the preparation of an environmental impact statement under Section 102(2)(C) of the National Environmental Policy Act of 1969, as amended.

(b) Any requests for new authorizations or appropriations transmitted to the Office of Management and Budget shall indicate, if an action to be proposed will be located in a floodplain, whether the proposed action is in accord with this Order.

(c) Each agency shall take floodplain management into account when formulating or evaluating any water and land use plans and shall require land and water resources use appropriate to the degree of hazard involved. Agencies shall include adequate provision for the evaluation and consideration of flood hazards in the regulations and operating procedures for the licenses, permits, loan or grants-in-aid programs that they administer. Agencies shall also encourage and provide appropriate guidance to applicants to evaluate the effects of their proposals in floodplains prior to submitting applications for Federal licenses, permits, loans or grants.

(d) As allowed by law, each agency shall issue or amend existing regulations and procedures within one year to comply with this Order. These procedures shall incorporate the Unified National Program for Floodplain Management of the Water Resources Council, and shall explain the means that the agency will employ to pursue the nonhazardous use of riverine, coastal and other floodplains in connection with the activities under its authority. To the extent possible, existing processes, such as those of the Council on Environmental Quality and the Water Resources Council, shall be utilized to fulfill the requirements of this Order. Agencies shall prepare their procedures in consultation with the Water Resources Council, the Director of the Federal Emergency Management Agency, and the Council on Environmental Quality, and shall update such procedures as necessary.

SECTION 3

In addition to the requirements of Section 2, agencies with responsibilities for Federal real property and facilities shall take the following measures:

(a) The regulations and procedures established under Section 2(d) of this Order shall, at a minimum, require the construction of Federal structures and facilities to be in accordance with the standards and criteria and to be consistent with the intent of those promulgated under the National Flood Insurance Program. They shall deviate only to the extent that the standards of the Flood Insurance Program are demonstrably inappropriate for a given type of structure or facility.

(b) If, after compliance with the requirements of this Order, new construction of structures or facilities are to be located in a floodplain, accepted flood proofing and other flood protection measures shall be applied to new construction or rehabilitation. To achieve flood protection, agencies shall, wherever practicable, elevate structures above the base flood level rather than filling in land.

(c) If property used by the general public has suffered flood damage or is located in an identified flood hazard area, the responsible agency shall provide on structures, and other places where appropriate, conspicuous delineation of past and probable flood height in order to enhance public awareness of and knowledge about flood hazards.

(d) When property in floodplains is proposed for lease, easement, right-of-way, or disposal to non-Federal public or private parties, the Federal agency shall (1) reference in the conveyance those uses that are restricted under identified Federal, State or local floodplain regulations; and (2) attach other appropriate restrictions to the uses of properties by the grantee or purchaser and any successors, except where prohibited by law; or (3) withhold such properties from conveyance.

SECTION 4

In addition to any responsibilities under this Order and Sections 202 and 205 of the Flood Disaster Protection Act of 1973, as amended (42 U.S.C. 4106 and 4128), agencies which guarantee, approve, regulate, or insure any financial transaction which is related to an area located in a floodplain shall, prior to completing action on such transaction, inform any private parties participating in the transaction of the hazards of locating structures in the floodplain.

SECTION 5

The head of each agency shall submit a report to the Council on Environmental Quality and to the Water Resources Council on June 30, 1978, regarding the status of their procedures and the impact of this Order on the agency's operations. Thereafter, the Water Resources Council shall periodically evaluate agency procedures and their effectiveness.

SECTION 6

As used in this Order:

(a) The term "agency" shall have the same meaning as the term "Executive agency" in Section 105 of Title 5 of the United States Code and shall include the military departments; the directives contained in this Order, however, are meant to apply only to those agencies which perform the activities described in Section 1 which are located in or affecting floodplains.

(b) The term "base flood" shall mean that flood which has a one percent or greater chance of occurrence in any given year.

(c) The term "floodplain" shall mean the lowland and relatively flat areas adjoining inland and coastal waters including flood prone areas of offshore islands, including at a minimum, that area subject to a one percent or greater chance of flooding in any given year.

SECTION 7

Executive Order No. 11296 of August 10, 1966, is hereby revoked. All actions, procedures, and issuances taken under that Order and still in effect shall remain in effect until modified by appropriate authority under the terms of this Order.

SECTION 8

Nothing in this Order shall apply to assistance provided for emergency work essential to save lives and protect property and public health and safety, performed pursuant to Sections 305 and 306 of the Disaster Relief Act of 1974 (88 Stat. 148, 42 U.S.C. 5145 and 5146).

SECTION 9

To the extent the provisions of Section 2(a) of this Order are applicable to projects covered by Section 104(h) of the Housing and Community Development Act of 1974, as amended (88 Stat. 640, 42 U.S.C. 5304(h)), the responsibilities under those provisions may be assumed by the appropriate applicant, if the applicant has also assumed, with respect to such projects, all of the responsibilities for environmental review, decisionmaking, and action pursuant to the National Environmental Policy Act of 1969, as amended.

Executive Order 11990
PROTECTION OF WETLANDS

May 24, 1977

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, in furtherance of the National Environmental Policy Act of 1969, as amended (42 USC 4321 et seq.), in order to avoid to the extent possible the long and short term adverse impacts associated with the destruction or modification of wetlands and to avoid direct or indirect support of new construction in wetlands wherever there is a practicable alternative, it is hereby ordered as follows:

SECTION 1

(a) Each agency shall provide leadership and shall take action to minimize the destruction, loss or degradation of wetlands, and to preserve and enhance the natural and beneficial values of wetlands in carrying out the agency's responsibilities for (1) acquiring, managing, and disposing of Federal lands and facilities; and (2) providing Federally undertaken, financed, or assisted construction and improvements; and (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities.

(b) This Order does not apply to the issuance by Federal agencies of permits, licenses, or allocations to private parties for activities involving wetlands on non-Federal property.

SECTION 2

(1) In furtherance of Section 101(b)(3) of the National Environmental Policy Act of 1969 (42 USC 4331(b)(3)) to improve and coordinate Federal plans, functions, programs and resources to the end that the Nation may attain the widest range of beneficial uses of the environment without degradation and risk to health or safety, each agency, to the extent permitted by law, shall avoid undertaking or providing assistance for new construction located in wetlands unless the head of the agency finds (1) that there is no practicable alternative to such construction, and (2) that the proposed action includes all practicable measures to minimize harm to wetlands which may result from such use. In making this finding the head of the agency may take into account economic, environmental and other pertinent factors.

(b) Each agency shall also provide opportunity for early public review of any plans or proposals for new construction in wetlands, in accordance with Section 2(b) of Executive Order No. 11514, as amended, including the development of procedures to accomplish this objective for Federal actions whose impact is not significant enough to require the preparation of an environmental impact statement under Section 102(2)(C) of the National Environmental Policy Act of 1969, as amended.

SECTION 3

Any requests for new authorizations or appropriations transmitted to the Office of Management and Budget shall indicate, if an action to be proposed will be located in wetlands, whether the proposed action is in accord with this Order.

SECTION 4

When Federally-owned wetlands or portion wetlands are proposed for lease, easement, right-of or disposal to

non-Federal public or private parties Federal agency shall (a) reference in the conveyance those uses that are restricted under identified Federal, State or local wetlands regulations; and (b) attach other appropriate restrictions to the uses of properties by the grantee or purchaser and any successor, except where prohibited by law; or (c) withhold such properties from disposal.

SECTION 5

In carrying out the activities described in Section 1 of this Order, each agency shall consider factors relevant to a proposal's effect on the survival and quality of the wetlands. Among these factors are:

- (a) public health, safety, and welfare, including water supply, quality, recharge and discharge; pollution; flood and storm hazards; and sediment and erosion;
- (b) maintenance of natural systems, including conservation and long term productivity of existing flora and fauna, species and habitat diversity and stability, hydrologic utility, fish, wildlife, timber, and food and fiber resources; and
- (c) other uses of wetlands in the public interest, including recreational, scientific, and cultural uses.

SECTION 6

As allowed by law, agencies shall issue or amend their existing procedures in order to comply with this Order. To the extent possible, existing processes, such as those of the Council on Environmental Quality and the Water Resources Council, shall be utilized to fulfill the requirements of this Order.

SECTION 7

As used in this Order:

- (a) The term "agency" shall have the same meaning as the term "Executive agency" in Section 105 of Title 5 of the United States Code and shall include the military departments; the directives contained in this Order, however, are meant to apply only to those agencies which perform the activities described in Section 1 which are located in or affecting wetlands.
- (b) The term "new construction" shall include draining, dredging, channelizing, filling, diking, impounding, and related activities and any structures or facilities begun or authorized after the effective date of this Order.
- (c) The term "wetlands" means those areas that are inundated by surface or ground water with a frequency sufficient to support and under normal circumstances does or would support a prevalence of vegetative or aquatic life that requires saturated or seasonally saturated soil conditions for growth and reproduction. Wetlands generally include swamps, marshes, bogs, and similar areas such as sloughs, potholes, wet meadows, river overflows, mud flats, and natural ponds.

SECTION 8

This Order does not apply to projects presently under construction, or to projects for which all of the funds have been appropriated through Fiscal Year 1977, or to projects and programs for which a draft or final environmental impact statement will be filed prior to October 1, 1977. The provisions of Section 2 of this Order shall be implemented by each agency not later than October 1, 1977.

SECTION 9

Nothing in this Order shall apply to assistance provided for emergency work, essential to save lives and protect property and public health and safety, performed pursuant to Sections 305 and 306 of the Disaster Relief Act of 1974 (88 Stat. 148, 42 U.S.C. 5145 and 5146).

SECTION 10.

To the extent the provisions of Sections 2 and 5 of this Order are applicable to projects covered by Section 104(h) of the Housing and Community Development Act of 1974, as amended (88 Stat. 640, 42 U.S.C. 5304(h)), the responsibilities under those provisions may be assumed by the appropriate applicant, if the applicant has also assumed, with respect to such projects, all of the responsibilities for environmental review, decisionmaking, and action pursuant to the National Environmental Policy Act of 1969, as amended.

Jimmy Carter

Executive Order 11991
RELATING TO PROTECTION AND ENHANCEMENT OF ENVIRONMENTAL QUALITY

May 24, 1977

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, in furtherance of the purpose and policy of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 et seq.), the Environmental Quality Improvement Act of 1970 (42 U.S.C. 4371 et seq.), and Section 309 of the Clean Air Act, as amended (42 U.S.C. 1857h-7), it is hereby ordered as follows:

SECTION 1. Subsection (h) of Section 3 (relating to responsibilities of the Council on Environmental Quality) of Executive Order No. 11514, as amended, is revised to read as follows:

(h) Issue regulations to Federal agencies for the implementation of the procedural provisions of the Act (42 U.S.C. 4332(2)). Such regulations shall be developed after consultation with affected agencies and after such public hearings as may be appropriate. They will be designed to make the environmental impact statement process more useful to decisionmakers and the public; and to reduce paperwork and the accumulation of extraneous background data, in order to emphasize the need to focus on real environmental issues and alternatives. They will require impact statements to be concise, clear, and to the point, and supported by evidence that agencies have made the necessary environmental analyses. The Council shall include in its regulations procedures (1) for the early preparation of environmental impact statements, and (2) for the referral to the Council of conflicts between agencies concerning the implementation of the National Environmental Policy Act of 1969, as amended, and Section 309 of the Clean Air Act, as amended, for the Council's recommendation as to their prompt resolution.'

SECTION 2. The following new subsection is added to Section 2 (relating to responsibilities of Federal agencies) of Executive Order No. 11514, as amended:

(g) In carrying out their responsibilities under the Act and this Order, comply with the regulations issued by the Council except where such compliance would be inconsistent with statutory requirements.

Jimmy Carter
THE WHITE HOUSE,
May 24, 1977.
Exec. Order No. 11991, 42 FR 26967, 1977 WL 23622 (Pres.)

Executive Order 12088
FEDERAL COMPLIANCE WITH POLLUTION CONTROL STANDARDS
(Amended by Executive Order 12580)

October 13, 1978; January 23, 1987

By the authority vested in me as President by the Constitution and statutes of the United States of America, including Section 22 of the Toxic Substances Control Act (15 USC 2621), Section 313 of the Federal Water Pollution Control Act, as amended (33 USC 1323), Section 1447 of the Public Health Service Act, as amended by the Safe Drinking Water Act (42 USC 300j-6), Section 118 of the Clean Air Act, as amended (42 USC 7418(b)), Section 4 of the Noise Control Act of 1972 (42 USC 4903), Section 6001 of the Solid Waste Disposal Act, as amended (42 USC 6961), and Section 301 of Title 3 of the United States Code, and to ensure Federal compliance with applicable pollution control standards, it is hereby ordered as follows:

1-1. Applicability of Pollution Control Standards.

1-101. The head of each Executive agency is responsible for ensuring that all necessary actions are taken for the prevention, control, and abatement of environmental pollution with respect to Federal facilities and activities under the control of the agency.

1-102. The head of each Executive agency is responsible for compliance with applicable pollution control standards, including those established pursuant to, but not limited to, the following:

- (a) Toxic Substances Control Act (15 USC 2601 et seq.).
- (b) Federal Water Pollution Control Act, as amended (33 USC 1251 et seq.).
- (c) Public Health Service Act, as amended by the Safe Drinking Water Act (42 USC 300f et seq.).
- (d) Clean Air Act, as amended (42 USC 7401 et seq.).
- (e) Noise Control Act of 1972 (42 USC 4901 et seq.).
- (f) Solid Waste Disposal Act, as amended (42 USC 6901 et seq.).
- (g) Radiation guidance pursuant to Section 274(h) of the Atomic Energy Act of 1954, as amended (42 USC 2021(h); see also, the Radiation Protection Guidance to Federal Agencies for Diagnostic X Rays approved by the President on January 26, 1978 and published at page 4377 of the FEDERAL REGISTER on February 1, 1978).
- (h) Marine Protection, Research, and Sanctuaries Act of 1972, as amended (33 USC 1401, 1402, 1411-1421, 1441-1444 and 16 U.S.C. 1431-1434).
- (i) Federal Insecticide, Fungicide, and Rodenticide Act, as amended (7 USC 136 et seq.).

1-103. "Applicable pollution control standards" means the same substantive, procedural, and other requirements that would apply to a private person.

1-2. Agency Coordination.

1-201. Each Executive agency shall cooperate with the Administrator of the Environmental Protection Agency, hereinafter referred to as the Administrator, and State, interstate, and local agencies in the prevention, control, and abatement of environmental pollution.

1-202. Each Executive agency shall consult with the Administrator and with State, interstate, and local agencies concerning the best techniques and methods available for the prevention, control, and abatement of environmental pollution.

1-3. Technical Advice and Oversight.

1-301. The Administrator shall provide technical advice and assistance to Executive agencies in order to ensure their cost effective and timely compliance with applicable pollution control standards.

1-302. The administrator shall conduct such reviews and inspections as may be necessary to monitor compliance with applicable pollution control standards by Federal facilities and activities.

1-4. Pollution Control Plan.

1-401. Each Executive agency shall submit to the Director of the Office of Management and Budget, through the Administrator, an annual plan for the control of environmental pollution. The plan shall provide for any necessary improvement in the design, construction, management, operation, and maintenance of Federal facilities and activities, and shall include annual cost estimates. The Administrator shall establish guidelines for developing such plans.

1-402. In preparing its plan, each Executive agency shall ensure that the plan provides for compliance with all applicable pollution control standards.

1-403. The plan shall be submitted in accordance with any other instructions that the Director of the Office of Management and Budget may issue.

1-5. Funding.

1-501. The head of each Executive agency shall ensure that sufficient funds for compliance with applicable pollution control standards are requested in the agency budget.

1-502. The head of each Executive agency shall ensure that funds appropriated and apportioned for the prevention, control and abatement of environmental pollution are not used for any other purpose unless permitted by law and specifically approved by the Office of Management and Budget.

1-6. Compliance With Pollution Controls.

1-601. Whenever the Administrator or the appropriate State, interstate, or local agency notifies an Executive agency that it is in violation of an applicable pollution control standard (see Section 1-102 of this Order), the Executive agency shall promptly consult with the notifying agency and provide for its approval a plan to achieve and maintain compliance with the applicable pollution control standard. This plan shall include an implementation schedule for coming into compliance as soon as practicable.

1-602. The Administrator shall make every effort to resolve conflicts regarding such violation between Executive agencies and, on request of any party, such conflicts between an Executive agency and a State, interstate, or a local agency. If the Administrator cannot resolve a conflict, the Administrator shall request the Director of the Office of Management and Budget to resolve the conflict.

1-603. The Director of the Office of Management and Budget shall consider unresolved conflicts at the request of the Administrator. The Director shall seek the Administrator's technological judgment and determination with regard to the applicability of statutes and regulations.

1-604. These conflict resolution procedures are in addition to, not in lieu of, other procedures,

including sanctions, for the enforcement of applicable pollution control standards.

1-605. Except as expressly provided by a Presidential exemption under this Order, nothing in this Order, nor any action or inaction under this Order, shall be construed to revise or modify any applicable pollution control standard.

1-7. Limitation on Exemptions.

1-701. Exemptions from applicable pollution control standards may only be granted under statutes cited in Section 1-102(a) through 1-102(f) if the President makes the required appropriate statutory determination: that such exemption is necessary (a) in the interest of national security, or (b) in the paramount interest of the United States.

1-702. The head of an Executive agency may, from time to time, recommend to the President through the Director of the Office of Management and Budget, that an activity or facility, or uses thereof, be exempt from an applicable pollution control standard.

1-703. The Administrator shall advise the President, through the Director of the Office of Management and Budget, whether he agrees or disagrees with a recommendation for exemption and his reasons therefor.

1-704. The Director of the Office of Management and Budget must advise the President within sixty days of receipt of the Administrator's views.

1-8. General Provisions.

1-801. The head of each Executive agency that is responsible for the construction or operation of Federal facilities outside the United States shall ensure that such construction or operation complies with the environmental pollution control standards of general applicability in the host country or jurisdiction.

1-802. Nothing in this Order shall create any right or benefit, substantive or procedural, enforceable at law by a party against the United States, its agencies, its officers, or any person. [New 1-802 added by Executive Order 12580, 52 FR 2923]

1-803. Executive Order No. 11752 of December 17, 1973, is revoked. [Former 1-802 redesignated as 1-803 by Executive Order 12580, 52 FR 2923]

Executive Order 12114
ENVIRONMENTAL EFFECTS ABROAD OF MAJOR FEDERAL ACTIONS

January 4, 1979

By virtue of the authority vested in me by the Constitution and the laws of the United States, and as President of the United States, in order to further environmental objectives consistent with the foreign policy and national security policy of the United States, it is ordered as follows:

SECTION 1

Section 11-1. Purpose and Scope. The purpose of this Executive Order is to enable responsible officials of Federal agencies having ultimate responsibility for authorizing and approving actions encompassed by this Order to be informed of pertinent environmental considerations and to take such considerations into account, with other pertinent considerations of national policy in making decisions regarding such actions. While based on independent authority, this Order furthers the purpose of the National Environmental Policy Act and the Marine Protection Research and Sanctuaries Act and the Deepwater Port Act consistent with the foreign policy and national security policy of the United States and represents the United States government's exclusive and complete determination of the procedural and other actions to be taken by Federal agencies to further the purpose of the National Environmental Policy Act, with respect to the environment outside the United States, its territories and possessions.

SECTION 2

2-1. Agency Procedures. Every Federal agency taking major Federal actions encompassed hereby and not exempted here from having significant effects on the environment outside the geographical borders of the United States and its territories and possessions shall within eight months after the effective date of this Order have in effect procedures to implement this Order. Agencies shall consult with the Department of State and the Council on Environmental Quality concerning such procedures prior to placing them in effect.

2-2. Information Exchange. To assist in effectuating the foregoing purpose, the Department of State and the Council on Environmental Quality in collaboration with other interested Federal agencies and other nations shall conduct a program for exchange on a continuing basis of information concerning the environment. The objectives of this program shall be to provide information for use by decisionmakers, to heighten awareness of and interest in environmental concerns and, as appropriate, to facilitate environmental cooperation with foreign nations.

2-3 Actions Included. Agencies in their procedures under Section 2-1 shall establish procedures by which their officers having ultimate responsibility for authorizing and approving actions in one of the following categories encompassed by this Order, take into consideration in making decisions concerning such actions, a document described in Section 2-4(a):

(a) major Federal actions significantly affecting the environment of the global commons outside the jurisdiction of any nation (e.g., the oceans or Antarctica;)

(b) major Federal actions significantly affecting the environment of a foreign nation not participating with the United States and not otherwise involved in the action;

(c) major Federal actions significantly affecting the environment of a foreign nation which provide to that nation:

(1) a product or physical project producing a principal product or an emission or effluent which is prohibited or strictly regulated by Federal law in the United States because its toxic effects on the environment create a serious public health risk; or

(2) a physical project which in the United States is prohibited or strictly regulated by Federal law to protect the environment against radioactive substances.

(d) major Federal actions outside the United States, its territories and possessions which significantly affect natural or ecological resources of global importance designated for protection under this subsection by the President, or, in the case of such a resource protected by international agreements binding on the United States by the Secretary of State. Recommendations to the President under this subsection shall be accompanied by the views of the Council of Environmental Quality and the Secretary of State.

2-4 Applicable Procedures.

(a) There are the following types of documents to be used in connection with actions described in Section 2-3:

(i) environmental impact statements (including generic program and specific statements);

(ii) bilateral or multilateral environmental studies, relevant or related to the proposed action, by the United States and one more foreign nations, or by an international body or organization in which the United States is a member or participant; or

(iii) concise reviews of the environmental issues involved, including environmental assessments, summary environmental analyses or other appropriate documents.

(b) Agencies shall in their procedures provide for preparation of documents described in Section 2-4(a), with respect to actions described in Section 2-3 as follows:

(i) for effects described in Section 2-3(a), an environmental impact statement described in Section 2-4(a)(1).

(ii) for effects described in Section 2-3(b), a document described in Section 2-4(a)(ii) or (iii), as determined by the agency;

(iii) for effects described in Section 2-3(c), a document described in Section 2-4(a)(ii) or (iii), as determined by the agency;

(iv) for effects described in Section 2-3(d), a document described in Section 2-4(a)(i), (ii) or (iii), as determined by the agency. Such procedures may provide that an agency need not prepare a new document when a document described in Section 2-4(a) already exists.

(c) Nothing in this Order shall serve to invalidate any existing regulations of any agency which have been adopted pursuant to court order or pursuant to judicial settlement of any case or to prevent any

agency from providing in its procedures for measures in addition to those provided for herein to further the purpose of the National Environmental Policy Act and other environmental laws, including the Marine Protection Research and Sanctuaries Act and the Deepwater Port Act, consistent with the foreign and national security policies of the United States.

(d) Except as provided in Section 2-5(b), agencies taking action encompassed by this Order shall, as soon as feasible, inform other Federal agencies with relevant expertise of the availability of environmental documents prepared under this Order. Agencies in their procedures under Section 2-1 shall make appropriate provision for determining when an affected nation shall be informed in accordance with Section 3-2 of this Order of the availability of environmental documents prepared pursuant to those procedures. In order to avoid duplication of resources, agencies in their procedures shall provide for appropriate utilization of the resources of other Federal agencies with relevant environmental jurisdiction or expertise.

2-5 Exemptions and Considerations.

(a) Notwithstanding Section 2-3, the following actions are exempt from this Order;

(i) actions not having a significant effect on the environment outside the United States as determined by the agency;

(ii) actions taken by the President;

(iii) actions taken by or pursuant to the direction of the President or Cabinet officer when the national security or interest is involved or when the action occurs in the course of an armed conflict;

(iv) intelligence activities and arms transfers;

(v) export licenses or permits or export approvals, and actions relating to nuclear activities except actions providing to a foreign nation a nuclear production or utilization facility as defined in the Atomic Energy Act of 1954, as amended, or a nuclear waste management facility;

(vi) votes and other actions in international conferences and organizations;

(vii) disaster and emergency relief action.

(b) Agency procedures under Section 2-1 implementing Section 2-4 may provide for appropriate modifications in the contents, timing and availability of documents to other affected Federal agencies and affected nations, where necessary to:

(i) enable the agency to decide and act promptly as and when required;

(ii) avoid adverse impacts on foreign relations or infringement in fact or appearance of other nations, sovereign responsibilities, or

(iii) ensure appropriate reflection of:

- (1) diplomatic factors;
- (2) international commercial, competitive and export promotion factors;
- (3) needs for governmental or commercial confidentiality;
- (4) national security considerations;
- (5) difficulties of obtaining information and agency ability to analyze meaning-fully environmental effects of a proposed action; and
- (6) the degree to which the agency is involved in or able to affect a decision to be made.

(c) Agency procedure under Section 2-1 may provide for categorical exclusions and for such exemptions in addition to those specified in subsection (a) of this Section as may be necessary to meet emergency circumstances, situations involving exceptional foreign policy and national security sensitivity and other such special circumstances. In utilizing such additional exemptions agencies shall, as soon as feasible, consult with the Department of State and the Council on Environmental Quality.

(d) The provisions of Section 2-5 do not apply to actions described in Section 2-3(a) unless permitted by law.

SECTION 3.

3-1. Rights of Action. This Order is solely for the purpose of establishing internal procedures for Federal agencies to consider the significant effects of their actions on the environment outside the United States, its territories and possessions, and nothing in this Order shall be construed to create a cause of action.

3-2. Foreign Relations. The Department of State shall coordinate all communications by agencies with foreign governments concerning environmental agreements and other arrangements in implementation of this Order.

3-3. Multi-Agency Actions. Where more than one Federal agency is involved in an action or program, a lead agency, as determined by the agencies involved, shall have responsibility for implementation of this Order.

3-4. Certain Terms. For purposes of this Order, "environment" means the natural and physical environment and excludes social, economic and other environments; and an action significantly affects the environment if it does significant harm to the environment even though on balance the agency believes the action to be beneficial to the environment. The term "export approvals" in Section 2-5(a)(v) does not mean or include direct loans to finance exports.

3-5. Multiple Imports. If a major Federal action having effects on the environment of the United States or the global commons requires preparation of an environmental impact statement, and if the action also has effects on the environment of a foreign nation, an environmental impact statement need not be prepared with respect to the effects on the environment of the foreign nation.

Jimmy Carter

Executive Order 12148
FEDERAL EMERGENCY MANAGEMENT

July 20, 1979

By the authority vested in me as President by the Constitution and laws of the United States of America, including the Federal Civil Defense Act of 1950, as amended (50 U.S.C.App. 2251 et seq.), the Disaster Relief Act of 1970, as amended (42 U.S.C. Chapter 58 note), the Disaster Relief Act of 1974 (88 Stat. 143; 42 U.S.C. 5121 et seq.), the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7701 et seq.), Section 4 of Public Law 92-385 (86 Stat. 556), Section 43 of the Act of August 10, 1956, as amended (50 U.S.C.App. 2285), the National Security Act of 1947, as amended, the Defense Production Act of 1950, as amended (50 U.S.C.App. 2061 et seq.), Reorganization Plan No. 1 of 1958, Reorganization Plan No. 1 of 1973, the Strategic and Critical Materials Stock Piling Act, as amended (50 U.S.C. 98 et seq.), Section 202 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 581c), and Section 301 of Title 3 of the United States Code, and in order to transfer emergency functions to the Federal Emergency Management Agency, it is hereby ordered as follows:

SECTION 1. Transfers or Reassignments

1-1. Transfer or Reassignment of Existing Functions.

1-101. All functions vested in the President that have been delegated or assigned to the Defense Civil Preparedness Agency, Department of Defense, are transferred or reassigned to the Director of the Federal Emergency Management Agency.

1-102. All functions vested in the President that have been delegated or assigned to the Federal Disaster Assistance Administration, Department of Housing and Urban Development, are transferred or reassigned to the Director of the Federal Emergency Management Agency, including any of those functions are delegated or reassigned to the Department of Commerce with respect to assistance to communities in the development of readiness plans for severe weather-related emergencies.

1-103. All functions vested in the President that have been delegated or assigned to the Federal Preparedness Agency, General Services Administration, are transferred or reassigned to the Director of the Federal Emergency Management Agency.

1-104. All functions vested in the President by the Earthquake Hazards Reduction Act of 1977 (42 U.S.C. 7701 et seq.), including those functions performed by the Office of Science and Technology Policy, are delegated, transferred, or reassigned to the Director of the Federal Emergency Management Agency.

1-2. Transfer or Reassignment of Resources.

1-201. The records, property, personnel and positions, and unexpended balances of appropriations, available or to be made available, which relate to the functions transferred, reassigned, or are delegated by this Order are hereby transferred to the Director of the Federal Emergency Management Agency.

1-202. The Director of the Office of Management and Budget shall make such determinations, issue such orders, and take all actions necessary or appropriate to effectuate the transfers or reassignments provided by this Order, including the transfer of funds, records, property, and personnel.

2-1. General.

2-101. The Director of the Federal Emergency Management Agency shall establish Federal policies for, and coordinate, all civil defense and civil emergency planning, management, mitigation, and assistance functions of the Executive agencies.

2-102. The Director shall periodically review and evaluate the civil defense and civil emergency functions of the Executive agencies. In order to improve the efficiency and effectiveness of those functions, the Director shall recommend to the President alternative methods of providing Federal planning, management, mitigation, and assistance.

2-103. The Director shall be responsible for the coordination of efforts to promote dam safety, for the coordination of natural and nuclear disaster warning systems, and for the coordination or preparedness and planning to reduce the consequences of major terrorist incidents.

2-104. The Director shall represent the President in working with State and local governments and private sector to stimulate vigorous participation in civil emergency preparedness, mitigation, response, and recovery programs.

2-105. The Director shall provide an annual report to the President for subsequent transmittal to the Congress on all functions of the Federal Emergency Management Agency. The report shall assess the current overall state of effectiveness of Federal civil defense and civil emergency functions, organizations, resources, and systems and recommend measures to be taken to improve planning, management, assistance, and relief by all levels of governments, the private sector, and volunteer organizations.

2-2. Implementation.

2-201. In executing the functions under this Order, the Director shall develop policies which provide that all civil defense and civil emergency functions, resources and systems of Executive agencies are:

(a) founded on the use of existing organizations, resources, and systems to the maximum extent practicable;

(b) integrated effectively with organizations, resources, and programs of State and local governments, the private sector, and volunteer organizations; and,

(c) developed, tested and utilized to prepare for, mitigate, respond to and recover from the effects on the population of all forms of emergencies.

2-202. Assignments of civil emergency functions shall, whenever possible, be based on extensions (under emergency conditions) of the regular missions of the Executive agencies.

2-203. For purposes of this Order, "civil emergency" means any accidental, natural, man-caused, or wartime emergency or threat thereof, which causes or may cause substantial injury or harm to the population or substantial damage to or loss of property.

2-204. In order that civil defense planning continues to be fully compatible with the Nation's overall strategic policy, and in order to maintain an effective link between strategic nuclear planning and

nuclear attack preparedness planning, the development of civil defense policies and programs by the Director of the Federal Emergency Management Agency shall be subject to oversight by the Secretary of Defense and the National Security Council.

2-205. To the extent authorized by law and within available resources, the Secretary of Defense shall provide the Director of the Federal Emergency Management Agency with support for civil defense programs in the areas of program development and administration, technical support, research, communications, transportation, intelligence, and emergency operations.

2-206. All Executive agencies shall cooperate with and assist the Director in the performance of his functions.

2-3. Transition Provisions.

2-301. The functions which have been transferred, reassigned, or are delegated by Section 1 of this Order are recodified and revised as set forth in this Order at Section 4, and as provided by the amendments made at Section 5 to the provisions of other Orders.

2-302. Notwithstanding the revocations, revisions, codifications, and amendments made by this Order, the Director may continue to perform the functions transferred to him by Section 1 of this Order, except where they may otherwise be inconsistent with the provisions of this Order.

SECTION 3. Federal Emergency Management Council.

3-1. Establishment of the Council.

3-101. There is hereby established the Emergency Management Council.

3-102. The Council shall be composed of the Director of the Federal Emergency Management Agency, who shall be the Chairman, the Director of the Office of Management and Budget and such others as the President may designate.

3-2. Functions of the Council.

3-201. The Council shall advise and assist the President in the oversight and direction of Federal emergency programs and policies.

3-202. The Council shall provide guidance to the Director of the Federal Emergency Management Agency in the performance of functions vested in him.

3-3. Administrative and General Provisions.

3-301. The heads of Executive agencies shall cooperate with and assist the Council in the performance of its functions.

3-302. The Director of the Federal Emergency Management Agency shall provide the Council with such administrative services and support as may be necessary or appropriate.

SECTION 4. Delegations.

4-1. Delegation of Functions Transferred to the President.

4-101. The following functions were transferred to the Director of the Office of Defense Mobilization by Section 2 of Reorganization Plan No. 3 of 1953 (50 U.S.C. 404 note); they were

subsequently transferred to the President by Section 1(a) of Reorganization Plan No. 1 of 1958, as amended (50 U.S.C.App. 2271 note), and they are hereby delegated to the Director of the Federal Emergency Management Agency:

(a) The functions vested in the Secretaries of Army, Navy Air Force, and Interior by the Strategic and Critical Materials Stock Piling Act, as amended (50 U.S.C. 98 et seq.), including the functions vested in the Army and Navy Munitions Board by item (2) of Section 6 (a) of that Act (50 U.S.C. 98e(a)(2)), but excluding the functions vested in the Secretary of the Interior by Section 7 of the Act (50 U.S.C. 98f).

(b) The functions vested in the Munitions Board of the Department of Defense by Section 4 (h) of the Commodity Credit Corporation Charter Act, as amended (15 U.S.C. 714b(h)).

(c) The function vested in the Munitions Board of the Department of Defense by Section 204(f) [originally 204(e)] of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 485(f)).

4-102. The functions vested in the Director of the Office of Defense Mobilization by Sections 103 and 303 of the National Security Act of 1947, as amended by Sections 8 and 50 of the Act of September 3, 1954 (Public Law 779; 68 Stat. 128 and 1244) (50 U.S.C. 404 and 405), were transferred to the President by Section 1(a) of Reorganization Plan No. 1 of 1958, as amended (50 U.S.C.App. 2771 note), and they are hereby delegated to the Director of the Federal Emergency Management Agency.

4-103. (a) The functions vested in the Federal Civil Defense Administration or its Administrator by the Federal Civil Defense Act of 1950, as amended (50 U.S.C.App. 2251 et seq.), were transferred to the President by Reorganization Plan No. 1 of 1958, and they are hereby delegated to the Director of the Federal Emergency Management Agency.

(b) Excluded from the delegation in subsection (a) is the function under Section 205(a)(4) of the Federal Civil Defense Act of 1950, as amended (50 U.S.C.App. 2286 (a) (4)), relating to the establishment and maintenance of personnel standards on the merit basis that was delegated to the Director of the Office of Personnel Management by Section 1(b) of Executive Order No. 11589, as amended (Section 2-101(b) of Executive Order No. 12107).

4-104. The Director of the Federal Emergency Management Agency is authorized to redelegate, in accord with the provisions of Section 1(b) of Reorganization Plan No. 1 of 1958 (50 U.S.C.App. 2271 note), any of the functions delegated by Sections 4-101, 4-102, and 4-103 of this Order.

4-105. The functions vested in the Administrator of the Federal Civil Defense Administration by Section 43 of the Act of August 10, 1956 (70A Stat. 636) were transferred to the President by Reorganization Plan No. 1 of 1958, as amended (50 U.S.C.App. 2271 note), were subsequently revested in the Director of the Office of Civil and Defense Mobilization by Section 512 of Public Law 86-500 (50 U.S.C.App. 2285) [the office was changed to Office of Emergency Planning by Public Law 87-296 (75 Stat. 630) and then to the Office of Emergency Preparedness by Section 402 of Public Law 90-608 (82 Stat. 1194)], were again transferred to the President by Section 1 of Reorganization Plan No. 1 of 1973 (50 U.S.C.App. 2271 note), and they are hereby delegated to the

Director of the Federal Emergency Management Agency.

4-106. The functions vested in the Director of the Office of Emergency Preparedness by Section 16 of the Act of September 23, 1950, as amended (20 U.S.C. 646), and by Section 7 of the Act of September 30, 1950, as amended (20 U.S.C. 241-1), were transferred to the President by Section 1 of Reorganization Plan No. 1 of 1973 (50 U.S.C.App. 2271 note), and they are hereby delegated to the Director of the Federal Emergency Management Agency.

4-107. That function vested in the Director of the Office of Emergency Preparedness by Section 762(a) of the Education Amendments of 1972, and as further amended (20 U.S.C. 1132d-1(a)), to the extent transferred to the President by Reorganization Plan No. 1 of 1973 (50 U.S.C.App. 2271 note), is hereby delegated to the Director of the Federal Emergency Management Agency.

4-2. Delegation of Functions Vested in the President.

4-201. The functions vested in the President by the Disaster Relief Act of 1970, as amended (42 U.S.C. Chapter 58 note), are hereby delegated to the Director of the Federal Emergency Management Agency.

4-202. The functions (related to grants for damages resulting from hurricane and tropical storm Agnes) vested in the President by Section 4 of Public Law 92-385 (86 Stat. 556) are hereby delegated to the Director of the Federal Emergency Management Agency.

4-203. The functions vested in the President by the Disaster Relief Act of 1974 (88 Stat. 143; 42 U.S.C. 5121 et seq.), except those functions vested in the President by Sections 301 (relating to the declaration of emergencies and major disasters), 401 (relating to the repair, reconstruction, restorations, or replacement of Federal facilities), and 409 (related to food coupons and surplus commodities), are hereby delegated to the Director of the Federal Emergency Management Agency.

4-204. The functions vested in the President by the Earthquake Hazards Reduction Act of 1977 (91 Stat. 1098; 42 U.S.C. 7701 et seq.) Are hereby delegated to the Director of the Federal Emergency Management Agency.

SECTION 5. Other Executive Orders.

5-1. Revocations.

5-101. Executive Order No. 10242, as amended, entitled "Prescribing Regulations Governing the Exercise by the Federal Civil Defense Administrator of Certain Administrative Authority Granted by the Federal Civil Defense Act of 1950", is revoked.

5-102. Sections 1 and 2 of Executive Order No. 10296, as amended, entitled "Providing for the Performance of Certain Defense Housing and Community Facilities and Service Functions", is revoked.

5-103. Executive Order No. 10494, as amended, relating to the dispositions of remaining functions, is revoked.

5-104. Executive Order No. 10529, as amended, relating to federal employee participation in State and local civil defense programs, is revoked.

5-105. Section 3 of Executive Order No. 10601, as amended, which concerns the Commodity Set Aside, is revoked.

5-106. Executive Order No. 10634, as amended, relating to loans for facilities destroyed or damaged by a major disaster, is revoked.

5-107. Section 4(d)(2) of Executive Order No. 10900, as amended, which concerns foreign currencies made available to make purchases for the supplemental stockpile, is revoked.

5-108. Executive Order No. 10952, as amended, entitled "Assigning Civil Defense Responsibilities to the Secretary of Defense and Others", is revoked.

5-109. Executive Order No. 11051, as amended, relating to responsibilities of the Office of Emergency Preparedness, is revoked.

5-110. Executive Order No. 11415, as amended, relating to the Health Resources Advisory Committee, is revoked.

5-111. Executive Order No. 11795, as amended, entitled "Delegating Disaster Relief Functions Pursuant to the Disaster Relief Act of 1974", is revoked.

5-112. Executive Order No. 11725, as amended, entitled "Transfer of Certain Functions of the Office of Emergency Preparedness", is revoked.

5-113. Executive Order No. 11749, as amended, entitled "Consolidating Disaster Relief Functions Assigned to the Secretary of Housing and Urban Development", is revoked.

5-2. Amendments.

5-201. Executive Order No. 10421, as amended, relating to physical security of defense facilities is further amended by (a) substituting the "Director of the Federal Emergency Management Agency" for "Director of the Office of Emergency Planning" in Sections 1(a), 1(c) and 6(b); and (b) substituting "Federal Emergency Management Agency" for "Office of Emergency Planning" in Sections 6(b) and 7(b).

5-202. Executive Order No. 10480, as amended, is further amended by (a) substituting the "Director of the Federal Emergency Management Agency" for "Director of the Office of Emergency Planning" in Sections 101(a), 101(b), 201(a), 201(b), 301, 304, 307, 308, 310 (b), 311(b), 312, 313, 401(b), 401(e) and 605; and (b) substituting "Director of the Federal Emergency Management Agency" for "Administrator of General Services" in Section 610.

5-203. Section 3(d) of Executive Order No. 10582, as amended, which relates determinations under the Buy American Act is amended by deleting "Director of the Office of Emergency Planning" and substituting therefor "Director of the Federal Emergency Management Agency".

5-204. Paragraph 21 of Executive Order No. 10789, as amended, is further amended by adding "the Federal Emergency Management Agency" after "Government Printing Office".

5-205. Executive Order No. 11179, as amended, concerning the National Defense Executive Reserve, is further amended by deleting "Director of the Office of Emergency Planning" in Section 2 and substituting therefor "Director of the Federal Emergency Management Agency".

5-206. Section 7 of Executive Order No. 11912, as amended, concerning energy policy and conservation, is further amended by deleting "Administrator of General Services" and substituting therefore "Director of the Federal Emergency Management Agency".

5-207. Section 2(d) of Executive Order No. 11988, entitled "Floodplain Management" is amended by deleting "Federal Insurance Administration" and substituting therefor "Director of the Federal Emergency Management Agency".

5-208. Section 5-3 of Executive Order No. 12046 of March 29, 1978, is amended by deleting "General Services Administration" and substituting therefor "Federal Emergency Management Agency" and by deleting "Administrator of General Services" and substituting therefor "Director of the Federal Emergency Management Agency".

5-209. Section 1-201 of Executive Order No. 12065 is amended by adding "The Director of the Federal Emergency Management Agency" after "The Administrator, National Aeronautics and Space Administration" and by deleting "Director, Federal Preparedness Agency and to the" from the parentheses after "The Administrator of General Services".

5-210. Section 1-102 of Executive Order No. 12075 of August 16, 1978, is amended by adding in alphabetical order "(p) Federal Emergency Management Agency".

5-211. Section 1-102 of Executive Order No. 12083 of September 27, 1978 is amended by adding in alphabetical order "(x) the Director of the Federal Emergency Management Agency".

5-212. Section 9.11(b) of Civil Service Rule IX (5 CFR Part 9) is amended by deleting "the Defense Preparedness Agency and".

5-213. Section 3(2) of each of the following described Executive orders is amended by adding "Federal Emergency Management Agency" after "Department of Transportation".

(a) Executive Order No. 11331 establishing the Pacific Northwest River Basins Commission.

(b) Executive Order No. 11345, as amended, establishing the Great Lakes Basin Commission.

(c) Executive Order No. 11371, as amended, establishing the New England River Basins Commission.

(d) Executive Order No. 11578, as amended, establishing the Ohio River Basin Commission.

(e) Executive Order No. 11658, as amended, establishing the Mississippi River Basin Commission.

(f) Executive Order No. 11669, as amended, establishing the Upper Mississippi River Basin Commission.

5-214. Executive Order No. 11490, as amended, is further amended as follows:

(a) Delete the last sentence of Section 102(a) and substitute therefor the following: "The activities undertaken by the departments and agencies pursuant to this Order, except as provided in Section 3003, shall be in accordance with guidance provided by, and subject to, evaluations by the Director of the Federal Emergency Management Agency".

(b) Delete Section 103 entitled "Presidential Assistance" and substitute the following new Section 103: "Sec. 103. General Coordination. The Director of the Federal Emergency Management Agency (FEMA) shall determine national preparedness goals and policies for the performance of functions under this Order and coordinate the performance of such functions with the total national preparedness programs".

(c) Delete the portion of the first sentence of Section 401 prior to the colon and insert the following: "The Secretary of Defense shall perform the following emergency functions".

(d) Delete "Director of the Federal Preparedness Agency (GSA)" or "the Federal Preparedness Agency (GSA)" and substitute therefor "Director, FEMA", in Sections 401(3), 401(4), 401(5), 401(9), 401(10), 401(14), 401(15), 401(16), 401(19), 401(21), 401(22), 501(8), 601(2), 904(2), 1102(2), 1203(2), 1401(a), 1701, 1702, 2003, 2004, 2801(5), 3001, 3002(2), 3004, 3005, 3006, 3008, 3010, and 3013.

(e) The number assigned to this Order shall be substituted for "11051 of September 27, 1962" in Section 3001, and for "11051" in Sections 1802, 2002(3), 3002, and 3008(1).

(f) The number assigned to this Order shall be substituted for "10952" in Sections 1103, 1104, 1205, and 3002.

(g) Delete "Department of Defense" in Sections 502, 601(1), 804, 905, 1003, 1004, 1006(4), 1205, 2002(8), the first sentence of Section 3002, and Sections 3008(1) and 3010 and substituted therefor "Director of the Federal Emergency Management Agency".

SECTION 6. This Order is effective July 15, 1979.

Jimmy Carter
THE WHITE HOUSE
July 20, 1979
44 F.R. 43239

Executive Order 12555
PROTECTION OF CULTURAL PROPERTY

March 10, 1986

By the authority vested in me as President by the Constitution and laws of the United States of America, including the Convention on Cultural Property Implementation Act (Title III of Public Law 97-446; hereinafter referred to as the "Act"), and Section 301 of Title 3 of the United States Code, it is hereby ordered as follows:

SECTION 1. United States Information Agency.

The following functions conferred upon the President by the Act are hereby delegated to the Director of the United States Information Agency, acting in consultation with the Secretary of State and the Secretary of the Treasury:

- (a) The functions conferred by section 303(a)(1) concerning determinations to be made prior to initiation of negotiations of bilateral or multilateral agreements.
- (b) The functions conferred by section 303(d) with respect to the determinations concerning the failure of other parties to an agreement to take any or satisfactory implementation action on their agreement; provided, however, that the Secretary of State will remain responsible for interpretation of the agreement.
- (c) The functions conferred by section 303(e) relating to the determinations to be made prior to the initiation of negotiations for the extension of any agreement.
- (d) The functions conferred by section 303(f) relating to the actions to be taken upon receipt of a request made by a State Party to the Convention on the Means of Prohibiting and Preventing the Illicit Import, Export and Transfer of Ownership of Cultural Property adopted by the Sixteenth General Conference of the United Nations Educational, Scientific and Cultural Organization (hereinafter referred to as the "Convention").
- (e) The functions conferred by section 303(g)(1)(B) relating to the notification of Presidential action and the furnishing of reports to the Congress.
- (f) The functions conferred by section 304(b) to the extent that they involve determinations by the President that an emergency condition applies with respect to any archeological or ethnological material of any State Party to the Convention, subject to the limitations of section 304(c)(1), 304(c)(2), and 304(c)(3).
- (g) The functions conferred by section 304(c)(3) to the extent that they involve determinations to be made and the receipt and consideration of an advisory report from the Cultural Property Advisory Committee by the President prior to extensions of emergency import restrictions.
- (h) The functions conferred by sections 306(f)(6) and 306(g) relating to the receipt of reports prepared by the Cultural Property Advisory Committee.

(i) The functions conferred by section 306(h) relating to the determinations to be made about the disclosure of matters involved in the Cultural Property Advisory Committee's proceedings.

SECTION 2. Department of State.

The following functions conferred upon the President in the Act are hereby delegated to the Secretary of State, acting in consultation with and with the participation of the Director of the United States Information Agency and in consultation with the Secretary of the Treasury:

(a) The functions conferred by section 303(a)(2) relating to the negotiation and conclusion of bilateral or multilateral agreements under the Act, subject to the restrictions of section 303(c).

(b) The functions conferred by section 303(a)(4) relating to obtaining a commitment on the exchange of archeological and ethnological materials from a party to an agreement.

(c) The functions conferred by section 303(e) relating only to negotiation and conclusion of extensions of agreements under the Act.

(d) Except with respect to subsection 303(g)(1)(B), the functions conferred by section 303(g), relating to notification of Presidential action and the furnishing of reports to the Congress.

(e) The functions conferred by section 304(c)(4) to the extent that they involve the negotiation and conclusion of agreements subject to advice and consent to ratification by the Senate.

SECTION 3. Department of the Treasury.

The following functions conferred upon the President by the Act are hereby delegated to the Secretary of the Treasury, acting in consultation with the Director of the United States Information Agency and the Secretary of State:

(a) Subject to subsection (b) of Section 1 above, the functions conferred by section 303(d) to the extent that they involve suspension of import restrictions.

(b) Subject to subsection (f) and (g) of Section 1 above, the functions conferred by section 304 to the extent that they involve the application of import restrictions set forth in section 307 and the extension of such import restrictions pursuant to section 304(c)(3).

SECTION 4. Enforcement in Territories and Other Areas.

The Secretary of the Interior is designated to carry out the enforcement functions in section 314.

Ronald Reagan

THE WHITE HOUSE

March 10, 1986

51 F.R. 8475

Executive Order 12580
SUPERFUND IMPLEMENTATION

Jan. 23, 1987

By the authority vested in me as President of the United States of America by Section 115 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (42 USC 9615 et seq.) ("the Act"), and by Section 301 of Title 3 of the United States Code, it is hereby ordered as follows:

Section 1. National Contingency Plan.

(a)(1) The National Contingency Plan ("the NCP"), shall provide for a National Response Team ("the NRT") composed of representatives of appropriate Federal departments and agencies for national planning and coordination of preparedness and response actions, and Regional Response Teams as the regional counterparts to the NRT for planning and coordination of regional preparedness and response actions.

(2) The following agencies (in addition to other appropriate agencies) shall provide representatives to the National and Regional Response Teams to carry out their responsibilities under the NCP: Department of State, Department of Defense, Department of Justice, Department of the Interior, Department of Agriculture, Department of Commerce, Department of Labor, Department of Health and Human Services, Department of Transportation, Department of Energy, Environmental Protection Agency, Federal Emergency Management Agency, United States Coast Guard, and the Nuclear Regulatory Commission.

(3) Except for periods of activation because of response action, the representative of the Environmental Protection Agency ("EPA") shall be the chairman, and the representative of the United States Coast Guard shall be the vice chairman, of the NRT and these agencies' representative shall be co-chairs of the Regional Response Teams ("the RRTs"). When the NRT or an RRT is activated for a response action, the EPA representative shall be the chairman when the release or threatened release or discharge or threatened discharge occurs in the inland zone, and the United States Coast Guard representative shall be the chairman when the release or threatened release or discharge or threatened discharge occurs in the coastal zone, unless otherwise agreed upon by the EPA and the United States Coast Guard representatives (inland and coastal zones are defined in the NCP).

(4) The RRTs may include representatives from State governments, local governments (as agreed upon by the States), and Indian tribal governments. Subject to the functions and authorities delegated to executive departments and agencies in other sections of this order, the NRT shall provide policy and program direction to the RRTs.

(b)(1) The responsibility for the revision of the NCP and all the other functions vested in the President by Sections 105(a), (b), (c), and (g), 125, and 301(f) of the Act, by Section 311(d)(1) of the Federal Water Pollution Control Act, and by Section 4201(c) of the Oil Pollution Act of 1990 is delegated to the Administrator of the Environmental Protection Agency ("the Administrator").

(2) The function vested in the President by Section 118(p) of the Superfund Amendments and

Reauthorization Act of 1986 (Pub. L. 99-499) ("SARA") is delegated to the Administrator.

(c) In accord with Section 107(f)(2)(A) of the Act, Section 311(f)(5) of the Federal Water Pollution Control Act, as amended (33 USC 1321(f)(5)), and Section 1006(b)(1) and (2) of the Oil Pollution Act of 1990, the following shall be among those designated in the NCP as Federal trustees for natural resources:

- (1) Secretary of Defense;
- (2) Secretary of the Interior;
- (3) Secretary of Agriculture;
- (4) Secretary of Commerce;
- (5) Secretary of Energy.

In the event of a spill, the above named Federal trustees for natural resources shall designate one trustee to act as Lead Administrative Trustee, the duties of which shall be defined in the regulations promulgated pursuant to Section 1006(e)(1) of OPA. If there are natural resource trustees other than those designated above which are acting in the event of a spill, those other trustees may join with the Federal trustees to name a Lead Administrative Trustee which shall exercise the duties defined in the regulations promulgated pursuant to Section 1006(e)(1) of OPA.

(d) Revisions to the NCP shall be made in consultation with members of the NRT prior to publication for notice and comment.

(e) All revisions to the NCP, whether in proposed or final form, shall be subject to review and approval by the Director or the Office of Management and Budget ("OMB"). [Section 1 revised by E.O. 12777, Oct. 18, 1991]

SECTION 2. Response and Related Authorities.

(a) The functions vested in the President by the first sentence of Section 104(b)(1) of the Act relating to "illness, disease, or complaints thereof" are delegated to the Secretary of Health and Human Services who shall, in accord with Section 104(i) of the Act, perform those functions through the Public Health Service.

(b) The functions vested in the President by Sections 104(e)(7)(C), 113(k)(2), 119(c)(7), and 121(f)(1) of the Act, relating to promulgation of regulations and guidelines, are delegated to the Administrator, to be exercised in consultation with the NRT.

(c)(1) The functions vested in the President by Sections 104(a) and the second sentence of 126(b) of the Act, to the extent they require permanent relocation of residents, businesses, and community facilities or temporary evacuation and housing of threatened individuals not otherwise provided for, are delegated to the Director of the Federal Emergency Management Agency.

(2) Subject to subsection (b) of this Section, the functions vested in the President by Sections 117(a) and (c) and 119 of the Act, to the extent such authority is needed to carry out the functions delegated under paragraph (1) of this subsection, are delegated to the Director of the Federal Emergency Management Agency.

(d) Subject to subsections (a), (b) and (c) of this Section, the functions vested in the President by

Sections 104(a), (b) and (c)(4), 113(k), 117(a) and (c), 119, and 121 of the Act are delegated to the Secretaries of Defense and Energy, with respect to releases or threatened releases where either the release is on or the sole source of the release is from any facility or vessel under the jurisdiction, custody or control of their departments, respectively, including vessels bare-boat chartered and operated. These functions must be exercised consistent with the requirements of Section 120 of the Act.

(e)(1) Subject to subsections (a), (b), (c), and (d) of this Section, the functions vested in the President by Sections 104(a), (b), and (c)(4), and 121 of the Act are delegated to the heads of Executive departments and agencies, with respect to remedial actions for releases or threatened releases which are not on the National Priorities List ("the NPL") and removal actions other than emergencies, where either the release is on or the sole source of the release is from any facility or vessel under the jurisdiction, custody or control of those departments and agencies, including vessels bare-boat chartered and operated. The Administrator shall define the term "emergency", solely for the purposes of this subsection, either by regulation or by a memorandum of understanding with the head of an Executive department or agency.

(2) Subject to subsections (b), (c), and (d) of this Section, the functions vested in the President by Sections 104(b)(2), 113(k), 117(a) and (c), and 119 of the Act are delegated to the heads of Executive departments and agencies, with respect to releases or threatened releases where either the release is on or the sole source of the release is from any facility or vessel under the jurisdiction, custody or control of those departments and agencies, including vessels bare-boat chartered and operated.

(f) Subject to subsections (a), (b), (c), (d), and (e) of this Section, the functions vested in the President by Sections 104(a), (b) and (c)(4), 113(k), 117(a) and (c), 119, and 121 of the Act are delegated to the Secretary of the Department in which the Coast Guard is operating ("the Coast Guard"), with respect to any release or threatened release involving the coastal zone, Great Lakes waters, ports, and harbors.

(g) Subject to subsections (a), (b), (c), (d), (e), and (f) of this Section, the functions vested in the President by Sections 101(24), 104(a), (b), (c)(4) and (c)(9), 113(k), 117(a) and (c), 119, 121, and 126(b) of the Act are delegated to the Administrator. The Administrator's authority under Section 119 of the Act is retroactive to the date of enactment of SARA.

(h) The functions vested in the President by Section 104(c)(3) of the Act are delegated to the Administrator, with respect to providing assurances for Indian tribes, to be exercised in consultation with the Secretary of the Interior.

(i) Subject to subsections (d), (e), (f), (g) and (h) of this Section, the functions vested in the President by Section 104(c) and (d) of the Act are delegated to the Coast Guard, the Secretary of Health and Human Services, the Director of the Federal Emergency Management Agency, and the Administrator in order to carry out the functions delegated to them by this Section.

(j)(1) The functions vested in the President by Section 104(e)(5)(A) are delegated to the heads of Executive departments and agencies, with respect to releases or threatened releases where either the release is on or the sole source of the release is from any facility or vessel under the jurisdiction,

custody or control of those departments and agencies, to be exercised with the concurrence of the Attorney General.

(2) Subject to subsection (b) of this Section and paragraph (1) of this subsection, the functions vested in the President by Section 104(e) are delegated to the heads of Executive departments and agencies in order to carry out their functions under this Order or the Act.

(k) The functions vested in the President by Sections 104(f), (g), (h), (i)(11), and (j) of the Act are delegated to the heads of the Executive departments and agencies in order to carry out the functions delegated to them by this Section. The exercise of authority under Section 104(h) of the Act shall be subject to the approval of the Administrator of the Office of Federal Procurement Policy.

SECTION 3. Cleanup Schedules.

(a) The functions vested in the President by Sections 116(a) and the first two sentences of 105(d) of the Act are delegated to the heads of Executive departments and agencies with respect to facilities under the jurisdiction, custody or control of those departments and agencies.

(b) Subject to subsection (a) of this Section, the functions vested in the President by Sections 116 and 105(d) are delegated to the Administrator.

SECTION 4. Enforcement.

(a) The functions vested in the President by Sections 109(d) and 122(e)(3)(A) of the Act, relating to development of regulations and guidelines, are delegated to the Administrator, to be exercised in consultation with the Attorney General.

(b)(1) Subject to subsection (a) of this Section, the functions vested in the President by Section 122 (except subsection (b)(1)) are delegated to the heads of Executive departments and agencies, with respect to releases or threatened releases no on the NPL where either the release is on or the sole source of release is from any facility under the jurisdiction, custody or control of those Executive departments and agencies. These functions may be exercised only with the concurrence of the Attorney General.

(2) Subject to subsection (a) of this Section, the functions vested in the President by Section 109 of the Act, relating to violations of Section 122 of the Act, are delegated to the heads of Executive departments and agencies, with respect to releases or threatened releases no on the NPL where either the release is on or the sole source of the release is from any facility under the jurisdiction, custody or control of those Executive departments and agencies. These functions may be exercised only with the concurrence of the Attorney General.

(c)(1) Subject to subsection (a) and (b)(1) of this Section, the functions vested in the President by Sections 106(a) and 122 of the Act are delegated to the Coast Guard with respect to any release or threatened release involving the coastal zone, Great Lakes waters, ports, or harbors.

(2) Subject to subsection (a) and (b)(2) of this Section, the functions vested in the President by Section 109 of the Act, relating to violations of Section 103 (a) and (b), and 122 of the Act, are delegated to the Coast Guard with respect to any release or threatened release involving the coastal zone, Great Lakes waters, ports, and harbors.

(d)(1) Subject to subsections (a), (b)(2), and (c)(2) of this Section, the functions vested in the President by Sections 106 and 122 of the Act are delegated to the Administrator.

(2) Subject to subsections (a), (b)(2), and (c)(2) of this Section, the functions vested in the President by Section 109 of the Act, relating to violations of Sections 103 and 122 of the Act, are delegated to the Administrator.

(3) Notwithstanding any other provision of this Order, the authority under Sections 104(e)(5)(A) and 106(a) of the Act to seek information, entry, inspection, samples, or response actions from Executive departments and agencies may be exercised only with the concurrence of the Attorney General.

SECTION 5. Liability.

(a) The function vested in the President by Section 107(c)(1)(C) of the Act is delegated to the Secretary of Transportation.

(b) The functions vested in the President by Section 107(c)(3) of the Act are delegated to the Coast Guard with respect to any release or threatened release involving the coastal zone, Great Lakes waters, ports, and harbors.

(c) Subject to subsection (b) of this Section, the functions vested in the President by Section 107(c)(3) of the Act are delegated to the Administrator.

(d) The functions vested in the President by Section 107(f)(1) of the Act are delegated to each of the Federal trustees for natural resources designated in the NCP for resources under their trusteeship.

(e) The functions vested in the President by Section 107(f)(2)(B) of the Act, to receive notification of the state natural resources trustee designations, are delegated to the Administrator.

SECTION 6. Litigation.

(a) Notwithstanding any other provision of this Order, any representation pursuant to or under this Order in any judicial proceedings shall be by or through the Attorney General. The conduct and control of all litigation arising under the Act shall be the responsibility of the Attorney General.

(b) Notwithstanding any other provision of this Order, the authority under the Act to require the Attorney General to commence litigation is retained by the President.

(c) The functions vested in the President by Section 113(g) of the Act, to receive notification of a natural resource trustee's intent to file suit, are delegated to the heads of Executive departments and agencies with respect to response actions for which they have been delegated authority under Section 2 of this Order. The Administrator shall promulgate procedural regulations for providing such notification.

(d) The functions vested in the President by Sections 310(d) and (e) of the Act, relating to promulgation of regulations, are delegated to the Administrator.

SECTION 7. Financial Responsibility.

(a) The functions vested in the President by Section 107(k)(4)(B) of the Act are delegated to the

Secretary of the Treasury. The Administrator will provide the Secretary with such technical information and assistance as the Administrator may have available.

(b)(1) The functions vested in the President by Section 108(a)(1) of the Act, are delegated to the Coast Guard.

(2) Subject to Section 4(a) of this Order, the functions vested in the President by Section 109 of the Act, relating to violations of Section 108(a)(1) of the Act, are delegated to the Coast Guard.

(c)(1) The functions vested in the President by Section 108(b) of the Act, are delegated to the Secretary of Transportation with respect to all transportation related facilities, including any pipeline, motor vehicle, rolling stock, or aircraft.

(2) Subject to Section 4(a) of this Order, the functions vested in the President by Section 109 of the Act, relating to violations of Section 108(a)(3) of the Act, are delegated to the Secretary of Transportation.

(3) Subject to Section 4(a) of this Order, the functions vested in the President by Section 109 of the Act, relating to violations of Section 108(b) of the Act, are delegated to the Secretary of Transportation with respect to all transportation related facilities, including pipeline, motor vehicle, rolling stock, or aircraft.

(d)(1) Subject to subsection (c)(1) of this Section, the functions vested in the President by Section 108(a)(4) and (b) of the Act are delegated to the Administrator.

(2) Subject to Section 4(a) of this Order and subsection (c)(3) of this Section, the functions vested in the President by Section 109 of the Act, relating to violations of Section 108(a)(4) and (b) of the Act, are delegated to the Administrator.

SECTION 8. Employee Protection and Notice to Injured.

(a) The functions vested in the President by Section 110(e) of the Act are delegated to the Administrator.

(b) The functions vested in the President by Section 111(g) of the Act are delegated to the Secretaries of Defense and Energy with respect to releases from facilities or vessels under the jurisdiction, custody, or control of their departments, respectively, including vessels bare-boat chartered and operated.

(c) Subject to subsection (b) of this Section, the functions vested in the President by Section 111(g) of the Act are delegated to the Administrator.

SECTION 9. Management of Hazardous Substance Superfund and Claims.

(a) The functions vested in the President by Section 111(a) of the Act are delegated to the Administrator, subject to the provisions of this Section and other applicable provisions of this Order.

(b) The Administrator shall transfer to other agencies, from the Hazardous Substance Superfund out of sums appropriated, such amounts as the Administrator may determine necessary to carry out the

purposes of the Act. These amounts shall be consistent with the President's Budget, within the total approved by the Congress, unless a revised amount is approved by OMB. Funds appropriated specifically for the Agency for Toxic Substances and Disease Registry (ATSDR), shall be directly transferred to ATSDR, consistent with fiscally responsible investment of trust fund money.

(c) The Administrator shall chair a budget task force composed of representatives of Executive departments and agencies having responsibilities under this Order or the Act. The Administrator shall also, as part of the budget request for the Environmental Protection Agency, submit to OMB a budget for the Hazardous Substance Superfund which is based on recommended levels developed by the budget task force. The Administrator may prescribe reporting and other forms, procedures, and guidelines to be used by the agencies of the Task Force in preparing the budget request, consistent with budgetary reporting requirements issued by OMB. The Administrator shall prescribe forms to agency task force members for reporting the expenditure of funds on a site specific basis.

(d) The Administrator and each department and agency head to whom funds are provided pursuant to this Section, with respect to funds provided to them, are authorized in accordance with Section 111(f) of the Act to designate Federal officials who may obligate such funds.

(e) The functions vested in the President by Section 112 of the Act are delegated to the Administrator for all claims presented pursuant to Section 111 of the Act.

(f) The functions vested in the President by Section 111(o) of the Act are delegated to the Administrator.

(g) The functions vested in the President by Section 117(e) of the Act are delegated to the Administrator, to be exercised in consultation with the Attorney General.

(h) The functions vested in the President by Section 123 of the Act are delegated to the Administrator.

(i) Funds from the Hazardous Substance Superfund may be used, at the discretion of the Administrator or the Coast Guard, to pay for removal actions for releases or threatened releases from facilities or vessels under the jurisdiction, custody, or control of Executive departments and agencies but must be reimbursed to the Hazardous Substance Superfund by such Executive department or agency.

SECTION 10. Federal Facilities.

(a) When necessary, prior to selection of a remedial action by the Administrator under Section 120(e)(4)(A) of the Act, Executive agencies shall have the opportunity to present their views to the Administrator after using the procedures under Section 1-6 of Executive Order No. 12088 of October 13, 1978, or any other mutually acceptable process. Notwithstanding subsection 1-602 of Executive Order No. 12088, the Director of the Office of Management and Budget shall facilitate resolution of any issues.

(b) Executive Order No. 12088 of October 13, 1978, is amended by renumbering the current Section 1-802 as Section 1-803 and inserting the following new Section 1-802:

"1-802. Nothing in this Order shall create any right or benefit, substantive or procedural, enforceable at law by a party against the United States, its agencies, its officers, or any person."

SECTION 11. General Provisions.

- (a) The function vested in the President by Section 101(37) of the Act is delegated to the Administrator.
- (b)(1) The function vested in the President by Section 105(f) of the Act, relating to reporting on minority participation in contracts, is delegated to the Administrator.
- (2) Subject to paragraph 1 of this subsection, the functions vested in the President by Section 105(f) of the Act are delegated to the heads of Executive departments and agencies in order to carry out the functions delegated to them by this Order. Each Executive department and agency shall provide to the Administrator any requested information on minority contracting for inclusion in the Section 105(f) annual report.
- (c) The functions vested in the President by Section 126(c) of the Act are delegated to the Administrator, to be exercised in consultation with the Secretary of the Interior.
- (d) The functions vested in the President by Section 301(c) of the Act are delegated to the Secretary of the Interior.
- (e) Each agency shall have authority to issue such regulations as may be necessary to carry out the functions delegated to them by this Order.
- (f) The performance of any function under this Order shall be done in consultation with interested Federal departments and agencies represented on the NRT, as well as with any other interested Federal agency.
- (g) The following functions vested in the President by the Act which have been delegated or assigned by this Order may be delegated to the head of any Executive department or agency with his consent: functions set forth in Sections 2 (except subsection (b)), 3, 4(b), 4(c), 4(d), 5(b), 5(c), and 8(c) of this Order.
- (h) Executive Order No. 12316 of August 14, 1981, is revoked.

Amended by Executive Order 12777, Oct. 18, 1991;

56 FR 54757, Oct. 22, 1991

Executive Order 12780
FEDERAL AGENCY RECYCLING AND THE COUNCIL ON FEDERAL RECYCLING AND
PROCUREMENT POLICY

October 31, 1991

WHEREAS, this Administration is determined to secure for future generations of Americans their rightful share of our Nation's natural resources, as well as a clean and healthful environment in which to enjoy them; and

WHEREAS, two goals of this Administration's environmental policy, cost-effective pollution prevention and the conservation of natural resources, can be significantly advanced by reducing waste and recycling the resources used by this generation of Americans; and

WHEREAS, the Federal Government, as one of the Nation's largest generators of solid waste, is able through cost-effective waste reduction and recycling resources to conserve local government disposal capacity; and

WHEREAS, the Federal Government, as the Nation's largest single consumer, is able through affirmative procurement practices to encourage the development of economically efficient markets for products manufactured with recycled materials;

NOW, THEREFORE, I, GEORGE BUSH, by the authority vested in me as President by the Constitution and the laws of the United States of America, including the Solid Waste Disposal Act, Public Law 89-272, 79 Stat. 997, as amended by the Resource Conservation and Recovery Act ("RCRA"), Public Law 94-580, 90 Stat. 2795 (1976), hereby order as follows:

PART 1--PREAMBLE

Section 101. The purpose of this Executive order is to:

- (a) Require that Federal agencies promote cost-effective waste reduction and recycling of reusable materials from wastes generated by Federal Government activities.
- (b) Encourage economically efficient market demand for designated items produced using recovered materials by directing the immediate implementation of cost-effective Federal procurement preference programs favoring the purchase of such items.
- (c) Provide a forum for the development and study of policy options and procurement practices that will promote environmentally sound and economically efficient waste reduction and recycling of our Nation's resources.
- (d) Integrate cost-effective waste reduction and recycling programs into all Federal agency waste management programs in order to assist in addressing the Nation's solid waste disposal problems.
- (e) Establish Federal Government leadership in addressing the need for efficient State and local solid waste management through implementation of environmentally sound and economically efficient recycling.

Section 102. Consistent with section 6002(c)(1) of RCRA (42 U.S.C. 6962(c)(1)), activities and operations of the executive branch shall be conducted in an environmentally responsible manner, and waste reduction and recycling opportunities shall be utilized to the maximum extent practicable, consistent with economic efficiency.

Section 103. Consistent with section 6002(c)(2) of RCRA (42 U.S.C. 6962(c)(2)), agencies that generate energy from fossil fuel in systems that have the technical capacity of using energy or fuels derived from solid waste as a primary or supplementary fuel shall use such capability to the maximum extent practicable.

PART 2--DEFINITIONS

For purposes of this order:

Section 201. "Federal agency" means any department, agency, or other instrumentality of the executive branch.

Section 202. "Procurement" and "acquisition" are used interchangeably to refer to the processes through which Federal agencies purchase products.

Section 203. "Recovered materials" is used as defined in section 1004(19) and 6002(h) of the Resource Conservation and Recovery Act (42 U.S.C. 6903(19) and 6962(h)), as amended.

Section 204. "Recycling" means the diversion of materials from the solid waste stream and the beneficial use of such materials. Recycling is further defined as the result of a series of activities by which materials that would become or otherwise remain waste, are diverted from the solid waste stream by collection, separation and processing and are used as raw materials in the manufacture of goods sold or distributed in commerce or the reuse of such materials as substitutes for goods made of virgin materials.

Section 205. "Waste reduction" means any change in a process, operation, or activity that results in the economically efficient reduction in waste material per unit of production without reducing the value output of the process, operation, or activity, taking into account the health and environmental consequences of such change.

PART 3--SOLID WASTE RECYCLING PROGRAMS

Section 301. Recycling Programs. Each Federal agency that has not already done so shall initiate a program to promote cost-effective waste reduction and recycling of reusable materials in all of its operations and facilities. These programs shall foster (a) practices that reduce waste generation, and (b) the recycling of recyclable materials such as paper, plastic, metals, glass, used oil, lead acid batteries, and tires and the composting of organic materials such as yard waste. The recycling programs implemented pursuant to this section must be compatible with applicable State and local recycling requirements.

Section 302. Contractor Operated Facilities. Every contract that provides for contractor operation of a Government-owned or leased facility, awarded more than 210 days after the effective date of this Executive order, shall include provisions that obligate the contractor to comply with the requirements of this Part as fully as though the contractor were a Federal agency.

PART 4--VOLUNTARY STANDARDS

Section 401. Amendment of OMB Circular No. A-119. The Director of the Office of Management and

Budget ("OMB") shall amend, as appropriate, OMB Circular No. A-119, "Federal Participation in the Development and Use of Voluntary Standards," to encourage Federal agencies to participate in the development of environmentally sound and economically efficient standards and to encourage Federal agency use of such standards.

PART 5--PROCUREMENT OF RECOVERED MATERIALS

Section 501. Adoption of Affirmative Procurement Programs. Within 180 days after the effective date of this order, each Federal agency shall provide a report to the Administrator of the Environmental Protection Agency regarding the Agency's adoption of an affirmative procurement program; such programs are required by section 6002(i) of RCRA (42 U.S.C. 6962(i)). Within 1 year of the issuance of this order, the Administrator of the Environmental Protection Agency shall report to the President regarding the compliance of each Federal agency with this requirement.

Section 502. Annual Review of Affirmative Procurement Programs. In accordance with section 6002(i) of RCRA (42 U.S.C. 6962(i)), each Federal agency shall review annually the effectiveness of its affirmative procurement program and shall provide a report regarding its findings to the Environmental Protection Agency and to the Office of Federal Procurement Policy, beginning with a report covering fiscal year 1992. Such report shall be transmitted by December 15 each year. Reports required by this section shall be made available to the public.

PART 6--RECYCLING COORDINATORS AND THE COUNCIL ON FEDERAL RECYCLING AND PROCUREMENT POLICY

Section 601. Federal Recycling Coordinator. Within 90 days after the effective date of this order, the Administrator of the Environmental Protection Agency shall designate a senior official of that Agency to serve as the Federal Recycling Coordinator. The Federal Recycling Coordinator shall review and report annually to OMB, at the time of agency budget submissions, the actions taken by the agencies to comply with the requirements of this order.

Section 602. Designation of Recycling Coordinators. Within 90 days after the effective date of this order, the head of each Federal agency shall designate an agency employee to serve as Agency Recycling Coordinator. The Agency Recycling Coordinator shall be responsible for:

- (a) coordinating the development of an effective agency waste reduction and recycling program that complies with the comprehensive implementation plan developed by the Council on Federal Recycling and Procurement Policy;
- (b) coordinating agency action to develop benefits, costs, and savings data measuring the effectiveness of the agency program; and
- (c) coordinating the development of agency reports required by this Executive order and providing copies of such reports to the Environmental Protection Agency.

Section 603. The Council on Federal Recycling and Procurement Policy

- (a) A Council on Federal Recycling and Procurement Policy is hereby established. It shall comprise the Federal Recycling Coordinator, the Chairman of the Council on Environmental Quality, the Administrator of the Office of Federal Procurement Policy, and the Agency Recycling Coordinator and the Procurement Executive of each of the following agencies: the Environmental Protection

Agency, the Department of Defense, the General Services Administration, the National Aeronautics and Space Administration, the Department of Energy, the Department of Commerce, and the Department of the Interior. The Federal Recycling Coordinator shall serve as Chair of the Council.

(b) Duties. The Council on Federal Recycling and Procurement Policy shall: (1) identify and recommend, to OMB, initiatives that will promote the purposes of this order, including:

(A) the development of appropriate incentives to encourage the economically efficient acquisition by the Federal Government of products that reduce waste and of products produced with recycled materials;

(B) the development of appropriate incentives to encourage active participation in economically efficient Federal waste reduction and recycling programs; and

(C) the development of guidelines for cost-effective waste reduction and recycling activities by Federal agencies;

(2) review Federal agency specifications and standards and recommend changes that will enhance Federal procurement of products made from recycled and recyclable materials, taking into account the costs and the performance requirements of each agency;

(3) collect and disseminate Federal agencies' information concerning methods to reduce wastes, types of materials that can be recycled, the costs and savings associated with recycling, and the current market sources and prices of products that reduce waste and of products produced with recycled materials;

(4) assist the development of cost-effective waste reduction and recycling programs pursuant to this order by developing guidelines for agency waste reduction and recycling programs and by identifying long-range goals for Federal waste reduction and recycling programs;

(5) provide meaningful data to measure the effectiveness and progress of Federal waste reduction and recycling programs;

(6) provide guidance and assistance to the Agency Recycling Coordinators in setting up and reporting on agency programs; and

(7) review Federal agency compliance with section 103 of this order.

PART 7--LIMITATION

Section 701. This order is intended only to improve the internal management of the executive branch and shall not be interpreted to create any right or benefit, substantive or procedural, enforceable at law by a party against the United States, its officers, or any other person.

Section 702. Section 502 and Part 6 of this order shall be effective for 5 years only, beginning on the effective date of this order.

Section 703. This order shall be effective immediately.

George Bush
THE WHITE HOUSE

Executive Order 12843
PROCUREMENT REQUIREMENTS AND POLICIES FOR FEDERAL AGENCIES FOR
OZONE-DEPLETING SUBSTANCES

April 21, 1993

WHEREAS, the essential function of the stratospheric ozone layer is shielding the Earth from dangerous ultraviolet radiation; and

WHEREAS, the production and consumption of substances that cause the depletion of stratospheric ozone are being rapidly phased out on a worldwide basis with the support and encouragement of the United States; and

WHEREAS, the Montreal Protocol on Substances that Deplete the Ozone Layer, to which the United States is a signatory, calls for a phaseout of the production and consumption of these substances; and

WHEREAS, the Federal Government, as one of the principal users of these substances, is able through affirmative procurement practices to reduce significantly the use of these substances and to provide leadership in their phaseout; and

WHEREAS, the use of alternative substances and new technologies to replace these ozone-depleting substances may contribute positively to the economic competitiveness on the world market of U.S. manufacturers of these innovative safe alternatives;

NOW, THEREFORE, I, WILLIAM JEFFERSON CLINTON, by the authority vested in me as President by the Constitution and the laws of the United States of America, including the 1990 amendments to the Clean Air Act ("Clean Air Act Amendments"), Public Law 101-549, and in order to reduce the Federal Government's procurement and use of substances that cause stratospheric ozone depletion, do hereby order as follows:

SECTION 1. Federal Agencies.

Federal agencies shall, to the extent practicable:

- (a) conform their procurement regulations and practices to the policies and requirements of Title VI of the Clean Air Act Amendments, which deal with stratospheric ozone protection;
- (b) maximize the use of safe alternatives to ozone- depleting substances;
- (c) evaluate the present and future uses of ozone- depleting substances, including making assessments of existing and future needs for such materials and evaluate their use of and plans for recycling;
- (d) revise their procurement practices and implement cost-effective programs both to modify specifications and contracts that require the use of ozone-depleting substances and to substitute non-ozone-depleting substances to the extent economically practicable; and

- (e) exercise leadership, develop exemplary practices, and disseminate information on successful efforts in phasing out ozone-depleting substances.

SECTION. 2. Definitions.

- (a) "Federal agency" means any executive department, military department, or independent agency within the meaning of 5 U.S.C. 101, 102, or 104(1), respectively.
- (b) "Procurement" and "acquisition" are used interchangeably to refer to the processes through which Federal agencies purchase products and services.
- (c) "Procurement regulations, policies and procedures" encompasses the complete acquisition process, including the generation of product descriptions by individuals responsible for determining which substances must be acquired by the agency to meet its mission.
- (d) "Ozone-depleting substances" means the substances controlled internationally under the Montreal Protocol and nationally under Title VI of the Clean Air Act Amendments. This includes both Class I and Class II substances as follows:
 - (i) "Class I substance" means any substance designated as Class I in the Federal Register notice of July 30, 1992 (57 Fed. Reg. 33753), including chlorofluorocarbons, halons, carbon tetrachloride, and methyl chloroform and any other substance so designated by the Environmental Protection Agency ("EPA") by regulation at a later date; and
 - (ii) "Class II substance" means any substance designated as Class II in the Federal Register notice of July 30, 1992 (57 Fed. Reg. 33753), including hydrochlorofluorocarbons and any other substances so designated by EPA by regulation at a later date.
- (e) "Recycling" is used to encompass recovery and reclamation, as well as the reuse of controlled substances.

SECTION. 3. Policy.

It is the policy of the Federal Government that Federal agencies:

- (i) implement cost-effective programs to minimize the procurement of materials and substances that contribute to the depletion of stratospheric ozone; and
- (ii) give preference to the procurement of alternative chemicals, products, and manufacturing processes that reduce overall risks to human health and the environment by lessening the depletion of ozone in the upper atmosphere. In implementing this policy, prior to final promulgation of EPA regulations on Federal procurement, Federal agencies shall begin conforming their procurement policies to the general requirements of Title VI of the Clean Air Act Amendments by:
 - (a) minimizing, where economically practicable, the procurement of products containing or manufactured with Class I substances in anticipation of the phaseout schedule to be promulgated by EPA for Class I substances, and maximizing the use of safe alternatives. In developing their procurement policies, agencies should be aware of the phaseout schedule for Class II substances;
 - (b) amending existing contracts, to the extent permitted by law and where practicable, to be

consistent with the phaseout schedules for Class I substances. In awarding contracts, agencies should be aware of the phaseout schedule for Class II substances in awarding contracts;

(c) implementing policies and practices that recognize the increasingly limited availability of Class I substances as production levels capped by the Montreal Protocol decline until final phaseout. Such practices shall include, but are not limited to:

- (i) reducing emissions and recycling ozone-depleting substances;
- (ii) ceasing the purchase of nonessential products containing or manufactured with ozone-depleting substances; and
- (iii) requiring that new contracts provide that any acquired products containing or manufactured with Class I or Class II substances be labeled in accordance with section 611 of the Clean Air Act Amendments.

SECTION 4. Responsibilities.

Not later than 6 months after the effective date of this Executive order, each Federal agency, where feasible, shall have in place practices that, where economically practicable, minimize the procurement of Class I substances. Agencies also shall be aware of the phaseout schedule for Class II substances. Agency practices may include, but are not limited to:

- (a) altering existing equipment and/or procedures to make use of safe alternatives;
- (b) specifying the use of safe alternatives and of goods and services, where available, that do not require the use of Class I substances in new procurements and that limit the use of Class II substances consistent with section 612 of the Clean Air Act Amendments; and
- (c) amending existing contracts, to the extent permitted by law and where practicable, to require the use of safe alternatives.

SECTION 5. Reporting Requirements.

Not later than 6 months after the effective date of this Executive order, each Federal agency shall submit to the Office of Management and Budget a report regarding the implementation of this order. The report shall include a certification by each agency that its regulations and procurement practices are being amended to comply with this order.

SECTION 6. Exceptions.

Exceptions to compliance with this Executive order may be made in accordance with section 604 of the Clean Air Act Amendments and with the provisions of the Montreal Protocol.

SECTION 7. Effective Date.

This Executive order is effective 30 days after the date of issuance. Although full implementation of this order must await revisions to the Federal Acquisition Regulations ("FAR"), it is expected that Federal agencies will take all appropriate actions in the interim to implement those aspects of the order that are not dependent upon regulatory revision.

SECTION 8. Federal Acquisition Regulatory Councils.

Pursuant to section 6(a) of the Office of Federal Procurement Policy Act, as amended, 41 U.S.C. 405(a), the Defense Acquisition Regulatory Council and the Civilian Agency Acquisition Council shall ensure that the

policies established herein are incorporated in the FAR within 180 days from the date this order is issued.

SECTION 9. Judicial Review.

This order does not create any right or benefit, substantive or procedural, enforceable by a non-Federal party against the United States, its officers or employees, or any other person.

William J. Clinton
THE WHITE HOUSE
April 21, 1993

Executive Order 12844
FEDERAL USE OF ALTERNATIVE FUELED VEHICLES

April 21, 1993

By the authority vested in me as President by the Constitution and the laws of the United States of America, including the Energy Policy and Conservation Act, as amended (42 U.S.C. 6201 et seq.), the Motor Vehicle Information and Cost Savings Act, as amended (15 U.S.C. 1901 et seq.), the Energy Policy Act of 1992 (Public Law 102-486), and section 301 of title 3, United States Code, it is hereby ordered as follows:

SECTION 1. Federal Leadership and Goals.

The use of alternative fueled motor vehicles can, in some applications, substantially reduce pollutants in the atmosphere, create significant domestic economic activity and stimulate jobs creation, utilize domestic fuel sources as defined by the Energy Policy Act of 1992, and reduce vehicle maintenance costs.

Moreover, Federal action can provide a significant market impetus for the development and manufacture of alternative fueled vehicles, and for the expansion of the fueling infrastructure necessary to support large numbers of privately owned alternative fueled vehicles.

The Federal Government can exercise leadership in the use of alternative fueled vehicles. To that end, each agency shall adopt aggressive plans to substantially exceed the alternative fueled vehicle purchase requirements established by the Energy Policy Act of 1992.

SECTION 2. Alternative Fueled Vehicle Requirements.

The Federal Government shall acquire, subject to the availability of funds and considering life cycle costs, alternative fueled vehicles in numbers that exceed by 50 percent the requirements for 1993 through 1995 set forth in the Energy Policy Act of 1992. The Federal fleet vehicle acquisition program shall be structured with the objectives of:

- (a) continued reduction in the incremental cost associated with specific vehicle and fuel combinations;
- (b) long-term movement toward increasing availability of alternative fueled vehicles produced as standard manufacturers' models; and
- (c) minimizing life cycle costs in the acquisition of alternative fueled vehicles. In addition, there is established, for a period not to exceed 1 year, the Federal Fleet Conversion Task Force, a Federal interagency implementation committee to be constituted by the Secretary of Energy, in consultation with a Task Force Chairman to be named by the President. The Task Force will advise on the implementation of this Executive order. The Task Force will issue a public report within 90 days, setting forth a recommended plan and schedule of implementation and, no later than 1 year from the date of this order, in cooperation with the Secretary of Energy, file a report on the status of the conversion effort.

SECTION 3. Alternative Fueled Vehicle Acquisition Assistance.

Within available appropriations, and as required by the Energy Policy Act of 1992, the Secretary of Energy shall provide assistance to other agencies that acquire alternative fueled vehicles. This assistance includes payment of incremental costs of alternative fueled vehicles, including any incremental costs associated with

acquisition and disposal. All vehicles, whether conversions or purchases as original equipment manufacturer models, shall comply with all applicable Federal and State emissions and safety standards, consistent with those requirements placed on original equipment manufacturers, including years and mileage.

SECTION 4. Alternative Fueled Vehicle Purchase and Use Incentives.

The Administrator of the General Services Administration, to the extent allowed by law, may provide incentives to purchase alternative fueled vehicles, including priority processing of procurement requests, and, with the Secretary of Energy, provide any other technical or administrative assistance aimed at accelerating the purchase and use of Federal alternative fueled vehicles.

SECTION 5. Cooperation with Industry and State and Local Authorities on Alternative Fueled Vehicle Refueling Capabilities.

The Secretary of Energy shall coordinate Federal planning and siting efforts with private industry fuel suppliers, and with State and local governments, to ensure that adequate private sector refueling capabilities exist or will exist wherever Federal fleet alternative fueled vehicles are sited. Each agency's fleet managers are expected to work with appropriate organizations at their respective locations on initiatives to promote alternative fueled vehicle use.

SECTION 6 Reporting.

The head of each agency shall report annually to the Secretary of Energy on actions and progress under this order, consistent with guidance provided by the Secretary. The Secretary shall prepare a consolidated annual report to the President and to the Congress on the implementation of this order. As part of the report, the Secretary and the Director of the Office of Management and Budget shall complete a thorough, objective evaluation of alternative fueled vehicles. The evaluation shall consider operating and acquisition costs, fuel economy, maintenance, and other factors as appropriate.

SECTION 7. Definitions.

For the purpose of this order, the terms "agency" and "alternative fueled vehicle" have the same meanings given such terms in sections 151 and 301 of the Energy Policy Act of 1992, respectively.

SECTION 8. Exceptions.

The Secretary of Defense, the Secretary of the Treasury, and the Attorney General, consistent with the national security and protective and law enforcement activities of their respective agencies, shall determine the extent to which the requirements of this order apply to the national security and protective and law enforcement activities of their respective agencies.

SECTION 9. Judicial Review.

This order is not intended to create any right or benefit, substantive or procedural, enforceable by a non-Federal party against the United States, its officers or employees, or any other person.

William J. Clinton
THE WHITE HOUSE,
April 21, 1993

Executive Order 12856
FEDERAL COMPLIANCE WITH RIGHT-TO-KNOW LAWS AND
POLLUTION PREVENTION REQUIREMENTS

August 3, 1993

WHEREAS, the Emergency Planning and Community Right-to-Know Act of 1986 (42 U.S.C. 11001-11050) (EPCRA) established programs to provide the public with important information on the hazardous and toxic chemicals in their communities, and established emergency planning and notification requirements to protect the public in the event of a release of extremely hazardous substances;

WHEREAS, the Federal Government should be a good neighbor to local communities by becoming a leader in providing information to the public concerning toxic and hazardous chemicals and extremely hazardous substances at Federal facilities, and in planning for and preventing harm to the public through the planned or unplanned releases of chemicals;

WHEREAS, the Pollution Prevention Act of 1990 (42 U.S.C. 13101-13109) (PPA) established that it is the national policy of the United States that, whenever feasible, pollution should be prevented or reduced at the source; that pollution that cannot be prevented should be recycled in an environmentally safe manner; that pollution that cannot be prevented or recycled should be treated in an environmentally safe manner; and that disposal or other release into the environment should be employed only as a last resort and should be conducted in an environmentally safe manner;

WHEREAS, the PPA required the Administrator of the Environmental Protection Agency (EPA) to promote source reduction practices in other agencies;

WHEREAS, the Federal Government should become a leader in the field of pollution prevention through the management of its facilities, its acquisition practices, and in supporting the development of innovative pollution prevention programs and technologies;

WHEREAS, the environmental, energy, and economic benefits of energy and water use reductions are very significant; the scope of innovative pollution prevention programs must be broad to adequately address the highest-risk environmental problems and to take full advantage of technological opportunities in sectors other than industrial manufacturing; the Energy Policy Act of 1992 (Public Law 102-486 of October 24, 1992) requires the Secretary of Energy to work with other Federal agencies to significantly reduce the use of energy and reduce the related environmental impacts by promoting use of energy efficiency and renewable energy technologies; and

WHEREAS, as the largest single consumer in the Nation, the Federal Government has the opportunity to realize significant economic as well as environmental benefits of pollution prevention;

AND IN ORDER TO:

Ensure that all Federal agencies conduct their facility management and acquisition activities so that, to the maximum extent practicable, the quantity of toxic chemicals entering any waste stream, including any releases to the environment, is reduced as expeditiously as possible through source reduction; that waste that is generated is recycled to the maximum extent practicable; and that any wastes remaining are stored, treated or disposed of in a manner protective of public health and the environment;

Require Federal agencies to report in a public manner toxic chemicals entering any wastestream from their facilities, including any releases to the environment, and to improve local emergency planning, response, and accident notification; and help encourage markets for clean technologies and safe alternatives to extremely hazardous substances or toxic chemicals through revisions to specifications and standards, the acquisition and procurement process, and the testing of innovative pollution prevention technologies at Federal facilities or in acquisitions;

NOW THEREFORE, by the authority vested in me as President by the Constitution and the laws of the United States of America, including the EPCRA, the PPA, and section 301 of title 5, United States Code, it is hereby ordered as follows:

SECTION 1. Applicability.

1-101. As delineated below, the head of each Federal agency is responsible for ensuring that all necessary actions are taken for the prevention of pollution with respect to that agency's activities and facilities, and for ensuring that agency's compliance with pollution prevention and emergency planning and community right-to-know provisions established pursuant to all implementing regulations issued pursuant to EPCRA and PPA.

1-102. Except as otherwise noted, this order is applicable to all Federal agencies that either own or operate a "facility" as that term is defined in section 329(4) of EPCRA, if such facility meets the threshold requirements set forth in EPCRA for compliance as modified by section 3-304(b) of this order ("covered facilities"). Except as provided in section 1-103 and section 1-104 below, each Federal agency must apply all of the provisions of this order to each of its covered facilities, including those facilities which are subject, independent of this order, to the provisions of EPCRA and PPA (e.g., certain Government-owned/contractor-operated facilities (GOCO's), for chemicals meeting EPCRA thresholds). This order does not apply to Federal agency facilities outside the customs territory of the United States, such as United States diplomatic and consular missions abroad.

1-103. Nothing in this order alters the obligations which GOCO's and Government corporation facilities have under EPCRA and PPA independent of this order or subjects such facilities to EPCRA or PPA if they are otherwise excluded. However, consistent with section 1-104 below, each Federal agency shall include the releases and transfers from all such facilities when meeting all of the Federal agency's responsibilities under this order.

1-104. To facilitate compliance with this order, each Federal agency shall provide, in all future contracts between the agency and its relevant contractors, for the contractor to supply to the Federal agency all information the Federal agency deems necessary for it to comply with this order. In addition, to the extent that compliance with this order is made more difficult due to lack of information from existing contractors, Federal agencies shall take practical steps to obtain the information needed to comply with this order from such contractors.

SECTION 2-2. Definitions.

2-201. All definitions found in EPCRA and PPA and implementing regulations are incorporated in this order by reference, with the following exception: for the purposes of this order, the term "person", as defined in section 329(7) of EPCRA, also includes Federal agencies.

2-202. Federal agency means an Executive agency, as defined in 5 U.S.C. 105. For the purpose of this order, military departments, as defined in 5 U.S.C. 102, are covered under the auspices of the Department of Defense.

2-203. Pollution Prevention means "source reduction," as defined in the PPA, and other practices that reduce or eliminate the creation of pollutants through:

- (a) increased efficiency in the use of raw materials, energy, water, or other resources; or
- (b) protection of natural resources by conservation.

2-204. GOCO means a Government-owned/contractor-operated facility which is owned by the Federal Government but all or portions of which are operated by private contractors.

2-205. Administrator means the Administrator of the EPA.

2-206. Toxic Chemical means a substance on the list described in section 313(c) of EPCRA.

2-207. Toxic Pollutants. For the purposes of section 3-302(a) of this order, the term "toxic pollutants" shall include, but is not necessarily limited to, those chemicals at a Federal facility subject to the provisions of section 313 of EPCRA as of December 1, 1993. Federal agencies also may choose to include releases and transfers of other chemicals, such as "extremely hazardous chemicals" as defined in section 329(3) of EPCRA, hazardous wastes as defined under the Resource Conservation and Recovery Act of 1976 (42 U.S.C. 6901-6986) (RCRA), or hazardous air pollutants under the Clean Air Act Amendments (42 U.S.C. 7403-7626); however, for the purposes of establishing the agency's baseline under 3-302(c), such "other chemicals" are in addition to (not instead of) the section 313 chemicals. The term "toxic pollutants" does not include hazardous waste subject to remedial action generated prior to the date of this order.

SECTION 3-3. Implementation.

3-301. Federal Agency Strategy. Within 12 months of the date of this order, the head of each Federal agency must develop a written pollution prevention strategy to achieve the requirements specified in sections 3-302 through 3-305 of this order for that agency. A copy thereof shall be provided to the Administrator. Federal agencies are encouraged to involve the public in developing the required strategies under this order and in monitoring their subsequent progress in meeting the requirements of this order. The strategy shall include, but shall not be limited to, the following elements:

- (a) A pollution prevention policy statement, developed by each Federal agency, designating principal responsibilities for development, implementation, and evaluation of the strategy. The statement shall reflect the Federal agency's commitment to incorporate pollution prevention through source reduction in facility management and acquisition, and it shall identify an individual responsible for coordinating the Federal agency's efforts in this area.
- (b) A commitment to utilize pollution prevention through source reduction, where practicable, as the primary means of achieving and maintaining compliance with all applicable Federal, State, and local environmental requirements.

3-302. Toxic Chemical Reduction Goals.

(a) The head of each Federal agency subject to this order shall ensure that the agency develops voluntary goals to reduce the agency's total releases of toxic chemicals to the environment and off-site transfers of such toxic chemicals for treatment and disposal from facilities covered by this order by 50 percent by December 31, 1999. To the maximum extent practicable, such reductions shall be achieved by implementation of source reduction practices.

(b) The baseline for measuring reductions for purposes of achieving the 50 percent reduction goal for each Federal agency shall be the first year in which releases of toxic chemicals to the environment and off-site transfers of such chemicals for treatment and disposal are publicly reported. The baseline amount as to which the 50 percent reduction goal applies shall be the aggregate amount of toxic chemicals reported in the baseline year for all of that Federal agency's facilities meeting the threshold applicability requirements set forth in section 1-102 of this order. In no event shall the baseline be later than the 1994 reporting year.

(c) Alternatively, a Federal agency may choose to achieve a 50 percent reduction goal for toxic pollutants. In such event, the Federal agency shall delineate the scope of its reduction program in the written pollution prevention strategy that is required by section 3-301 of this order. The baseline for measuring reductions for purposes of achieving the 50 percent reduction requirement for each Federal agency shall be the first year in which releases of toxic pollutants to the environment and off-site transfers of such chemicals for treatment and disposal are publicly reported for each of that Federal agency's facilities encompassed by section 3-301. In no event shall the baseline year be later than the 1994 reporting year. The baseline amount as to which the 50 percent reduction goal applies shall be the aggregate amount of toxic pollutants reported by the agency in the baseline year. For any toxic pollutants included by the agency in determining its baseline under this section, in addition to toxic chemicals under EPCRA, the agency shall report on such toxic pollutants annually under the provisions of section 3-304 of this order, if practicable, or through an agency report that is made available to the public.

(d) The head of each Federal agency shall ensure that each of its covered facilities develops a written pollution prevention plan no later than the end of 1995, which sets forth the facility's contribution to the goal established in section 3-302(a) of this order. Federal agencies shall conduct assessments of their facilities as necessary to ensure development of such plans and of the facilities' pollution prevention programs.

3-303. Acquisition and Procurement Goals.

(a) Each Federal agency shall establish a plan and goals for eliminating or reducing the unnecessary acquisition by that agency of products containing extremely hazardous substances or toxic chemicals. Similarly, each Federal agency shall establish a plan and goal for voluntarily reducing its own manufacturing, processing, and use of extremely hazardous substances and toxic chemicals. Priorities shall be developed by Federal agencies, in coordination with EPA, for

implementing this section.

(b) Within 24 months of the date of this order, the Department of Defense (DOD) and the General Services Administration (GSA), and other agencies, as appropriate, shall review their agency's standardized documents, including specifications and standards, and identify opportunities to eliminate or reduce the use by their agency of extremely hazardous substances and toxic chemicals, consistent with the safety and reliability requirements of their agency mission. The EPA shall assist agencies in meeting the requirements of this section, including identifying substitutes and setting priorities for these reviews. By 1999, DOD, GSA and other affected agencies shall make all appropriate revisions to these specifications and standards.

(c) Any revisions to the Federal Acquisition Regulation (FAR) necessary to implement this order shall be made within 24 months of the date of this order.

(d) Federal agencies are encouraged to develop and test innovative pollution prevention technologies at their facilities in order to encourage the development of strong markets for such technologies. Partnerships should be encouraged between industry, Federal agencies, Government laboratories, academia, and others to assess and deploy innovative environmental technologies for domestic use and for markets abroad.

3-304. Toxics Release Inventory/Pollution Prevention Act Reporting.

(a) The head of each Federal agency shall comply with the provisions set forth in section 313 of EPCRA, section 6607 of PPA, all implementing regulations, and future amendments to these authorities, in light of applicable guidance as provided by EPA.

(b) The head of each Federal agency shall comply with these provisions without regard to the Standard Industrial Classification (SIC) delineations that apply to the Federal agency's facilities, and such reports shall be for all releases, transfers, and wastes at such Federal agency's facility without regard to the SIC code of the activity leading to the release, transfer, or waste. All other existing statutory or regulatory limitations or exemptions on the application of EPCRA section 313 shall apply to the reporting requirements set forth in section 3-304(a) of this order.

(c) The first year of compliance shall be no later than for the 1994 calendar year, with reports due on or before July 1, 1995.

3-305. Emergency Planning and Community Right-to-Know Reporting Responsibilities. The head of each Federal agency shall comply with the provisions set forth in sections 301 through 312 of EPCRA, all implementing regulations, and future amendments to these authorities, in light of any applicable guidance as provided by EPA. Effective dates for compliance shall be:

(a) With respect to the provisions of section 302 of EPCRA, emergency planning notification shall be made no later than 7 months after the date of this order.

(b) With respect to the provisions of section 303 of EPCRA, all information

necessary for the applicable Local Emergency Planning Committee (LEPC's) to prepare or revise local Emergency Response Plans shall be provided no later than 1 year after the date of this order.

(c) To the extent that a facility is required to maintain Material Safety Data Sheets under any provisions of law or Executive order, information required under section 311 of EPCRA shall be submitted no later than 1 year after the date of this order, and the first year of compliance with section 312 shall be no later than the 1994 calendar year, with reports due on or before March 1, 1995.

(d) The provisions of section 304 of EPCRA shall be effective beginning January 1, 1994.

(e) These compliance dates are not intended to delay implementation of earlier timetables already agreed to by Federal agencies and are inapplicable to the extent they interfere with those timetables.

SECTION. 4-4. Agency Coordination.

4-401. By February 1, 1994, the Administrator shall convene an Interagency Task Force composed of the Administrator, the Secretaries of Commerce, Defense, and Energy, the Administrator of General Services, the Administrator of the Office of Procurement Policy in the Office of Management and Budget, and such other agency officials as deemed appropriate based upon lists of potential participants submitted to the Administrator pursuant to this section by the agency head. Each agency head may designate other senior agency officials to act in his/her stead, where appropriate. The Task Force will assist the agency heads in the implementation of the activities required under this order.

4-402. Federal agencies subject to the requirements of this order shall submit annual progress reports to the Administrator beginning on October 1, 1995. These reports shall include a description of the progress that the agency has made in complying with all aspects of this order, including the pollution reductions requirements. This reporting requirement shall expire after the report due on October 1, 2001.

4-403. Technical Advice. Upon request and to the extent practicable, the Administrator shall provide technical advice and assistance to Federal agencies in order to foster full compliance with this order. In addition, to the extent practicable, all Federal agencies subject to this order shall provide technical assistance, if requested, to LEPC's in their development of emergency response plans and in fulfillment of their community right-to-know and risk reduction responsibilities.

4-404. Federal agencies shall place high priority on obtaining funding and resources needed for implementing all aspects of this order, including the pollution prevention strategies, plans, and assessments required by this order, by identifying, requesting, and allocating funds through line-item or direct funding requests. Federal agencies shall make such requests as required in the Federal Agency Pollution Prevention and Abatement Planning Process and through agency budget requests as outlined in Office of Management and Budget (OMB) Circulars A-106 and A-11, respectively. Federal agencies should apply, to the maximum extent practicable, a life cycle analysis and total cost accounting principles to all projects needed to meet the requirements of this order.

4-405. Federal Government Environmental Challenge Program. The Administrator shall establish a "Federal Government Environmental Challenge Program" to recognize outstanding environmental management performance in Federal agencies and facilities. The program shall consist of two components that challenge Federal agencies; (a) to agree to a code of environmental principles to be developed by EPA, in cooperation with other agencies, that emphasizes pollution prevention, sustainable development and state-of-the-art environmental management programs, and (b) to submit applications to EPA for individual Federal agency facilities for recognition as "Model Installations." The program shall also include a means for recognizing individual Federal employees who demonstrate outstanding leadership in pollution prevention.

SECTION 5-5. Compliance.

5-501. By December 31, 1993, the head of each Federal agency shall provide the Administrator with a preliminary list of facilities that potentially meet the requirements for reporting under the threshold provisions of EPCRA, PPA, and this order.

5-502. The head of each Federal agency is responsible for ensuring that such agency take all necessary actions to prevent pollution in accordance with this order, and for that agency's compliance with the provisions of EPCRA and PPA. Compliance with EPCRA and PPA means compliance with the same substantive, procedural, and other statutory and regulatory requirements that would apply to a private person. Nothing in this order shall be construed as making the provisions of sections 325 and 326 of EPCRA applicable to any Federal agency or facility, except to the extent that such Federal agency or facility would independently be subject to such provisions. EPA shall consult with Federal agencies, if requested, to determine the applicability of this order to particular agency facilities.

5-503. Each Federal agency subject to this order shall conduct internal reviews and audits, and take such other steps, as may be necessary to monitor compliance with sections 3-304 and 3-305 of this order.

5-504. The Administrator, in consultation with the heads of Federal agencies, may conduct such reviews and inspections as may be necessary to monitor compliance with sections 3-304 and 3-305 of this order. Except as excluded under section 6-601 of this order, all Federal agencies are encouraged to cooperate fully with the efforts of the Administrator to ensure compliance with sections 3-304 and 3-305 of this order.

5-505. Federal agencies are further encouraged to comply with all state and local right-to-know and pollution prevention requirements to the extent that compliance with such laws and requirements is not otherwise already mandated.

5-506. Whenever the Administrator notifies a Federal agency that it is not in compliance with an applicable provision of this order, the Federal agency shall achieve compliance as promptly as is practicable.

5-507. The EPA shall report annually to the President on Federal agency compliance with the provisions of section 3-304 of this order.

5-508. To the extent permitted by law and unless such documentation is withheld pursuant to section

6-601 of this order, the public shall be afforded ready access to all strategies, plans, and reports required to be prepared by Federal agencies under this order by the agency preparing the strategy, plan, or report. When the reports are submitted to EPA, EPA shall compile the strategies, plans, and reports and make them publicly available as well. Federal agencies are encouraged to provide such strategies, plans, and reports to the State and local authorities where their facilities are located for an additional point of access to the public.

SECTION 6-6. Exemption.

6-601. In the interest of national security, the head of a Federal agency may request from the President an exemption from complying with the provisions of any or all aspects of this order for particular Federal agency facilities, provided that the procedures set forth in section 120(j)(1) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (42 U.S.C. 9620(j)(1)), are followed. To the maximum extent practicable, and without compromising national security, all Federal agencies shall strive to comply with the purposes, goals, and implementation steps set forth in this order.

SECTION 7-7. General Provisions.

7-701. Nothing in this order shall create any right or benefit, substantive or procedural, enforceable by a party against the United States, its agencies or instrumentalities, its officers or employees, or any other person.

William J. Clinton
THE WHITE HOUSE,
August 3, 1993.
Exec. Order No. 12856, 58 FR 41981, 1993 WL 292835 (Pres.)

Executive Order 12873
FEDERAL ACQUISITION, RECYCLING, AND WASTE PREVENTION

October 20, 1993

WHEREAS, the Nation's interest is served when the Federal Government can make more efficient use of natural resources by maximizing recycling and preventing waste wherever possible;

WHEREAS, this Administration is determined to strengthen the role of the Federal Government as an enlightened, environmentally conscious and concerned consumer;

WHEREAS, the Federal Government should--through cost-effective waste prevention and recycling activities--work to conserve disposal capacity, and serve as a model in this regard for private and other public institutions; and

WHEREAS, the use of recycled and environmentally preferable products and services by the Federal Government can spur private sector development of new technologies and use of such products, thereby creating business and employment opportunities and enhancing regional and local economies and the national economy;

NOW, THEREFORE, I, WILLIAM J. CLINTON, by the authority vested in me as President by the Constitution and the laws of the United States of America, including the Solid Waste Disposal Act, Public Law 89-272, 79 Stat. 997, as amended by the Resource Conservation and Recovery Act ("RCRA"), Public Law 94-580, 90 Stat. 2795 as amended (42 USC 6901-6907), and section 301 of title 3, United States Code, hereby order as follows:

PART 1--PREAMBLE

Section 101. Consistent with the demands of efficiency and cost effectiveness, the head of each Executive agency shall incorporate waste prevention and recycling in the agency's daily operations and work to increase and expand markets for recovered materials through greater Federal Government preference and demand for such products.

Sec. 102. Consistent with policies established by Office of Federal Procurement Policy ("OFPP") Policy Letter 92-4, agencies shall comply with executive branch policies for the acquisition and use of environmentally preferable products and services and implement cost-effective procurement preference programs favoring the purchase of these products and services.

Sec. 103. This order creates a Federal Environmental Executive and establishes high-level Environmental Executive positions within each agency to be responsible for expediting the implementation of this order and statutes that pertain to this order.

PART 2--DEFINITIONS

For purposes of this order:

Sec. 201. "Environmentally preferable" means products or services that have a lesser or reduced effect on human health and the environment when compared with competing products or services that serve the same purpose. This comparison may consider raw materials acquisition, production, manufacturing, packaging,

distribution, reuse, operation, maintenance, or disposal of the product or service.

Sec. 202. "Executive agency" or "agency" means an Executive agency as defined in 5 U.S.C. 105. For the purpose of this order, military departments, as defined in 5 U.S.C. 102, are covered under the auspices of the Department of Defense.

Sec. 203. "Post consumer material" means a material or finished product that has served its intended use and has been discarded for disposal or recovery, having completed its life as a consumer item. "Post consumer material" is a part of the broader category of "recovered material".

Sec. 204. "Acquisition" means the acquiring by contract with appropriated funds for supplies or services (including construction) by and for the use of the Federal Government through purchase or lease, whether the supplies or services are already in existence or must be created, developed, demonstrated and evaluated. Acquisition begins at the point when agency needs are established and includes the description of requirements to satisfy agency needs, solicitation and selection of sources, award of contracts, contract financing, contract performance, contract administration and those technical and management functions directly related to the process of fulfilling agency needs by contract.

Sec. 205. "Recovered materials" means waste materials and by-products which have been recovered or diverted from solid waste, but such term does not include those materials and by-products generated from, and commonly reused within, an original manufacturing process (42 U.S.C. 6903(19)).

Sec. 206. "Recyclability" means the ability of a product or material to be recovered from, or otherwise diverted from, the solid waste stream for the purpose of recycling.

Sec. 207. "Recycling" means the series of activities, including collection, separation, and processing, by which products or other materials are recovered from the solid waste stream for use in the form of raw materials in the manufacture of new products other than fuel for producing heat or power by combustion.

Sec. 208. "Waste prevention," also known as "source reduction," means any change in the design, manufacturing, purchase or use of materials or products (including packaging) to reduce their amount or toxicity before they become municipal solid waste. Waste prevention also refers to the reuse of products or materials.

Sec. 209. "Waste reduction" means preventing or decreasing the amount of waste being generated through waste prevention, recycling, or purchasing recycled and environmentally preferable products.

Sec. 210. "Life Cycle Cost" means the amortized annual cost of a product, including capital costs, installation costs, operating costs, maintenance costs and disposal costs discounted over the lifetime of the product.

Sec. 211. "Life Cycle Analysis" means the comprehensive examination of a product's environmental and economic effects throughout its lifetime including new material extraction, transportation, manufacturing, use, and disposal.

PART 3--THE ROLE OF THE FEDERAL ENVIRONMENTAL EXECUTIVE AND AGENCY ENVIRONMENTAL EXECUTIVES

Sec. 301. Federal Environmental Executive. (a) A Federal Environmental Executive shall be designated by the President and shall be located within the Environmental Protection Agency ("EPA"). The Federal Environmental Executive shall take all actions necessary to ensure that the agencies comply with the requirements of this order and shall generate an annual report to the Office of Management and Budget ("OMB"), at the time of agency budget submissions, on the actions taken by the agencies to comply with the requirements of this order. In carrying out his or her functions, the Federal Environmental Executive shall consult with the Director of the White House Office on Environmental Policy.

(b) Staffing. A minimum of four (4) full time staff persons are to be provided by the agencies listed below to assist the Federal Environmental Executive, one of whom shall have experience in specification review and program requirements, one of whom shall have experience in procurement practices, and one of whom shall have experience in solid waste prevention and recycling. These four staff persons shall be appointed and replaced as follows:

(1) a representative from the Department of Defense shall be detailed for not less than one year and no more than two years;

(2) a representative from the General Services Administration ("GSA") shall be detailed for not less than one year and no more than two years;

(3) a representative from EPA shall be detailed for not less than one year and no more than two years; and

(4) a representative from one other agency determined by the Federal Environmental Executive shall be detailed on a rotational basis for not more than one year.

(c) Administration. Agencies are requested to make their services, personnel and facilities available to the Federal Environmental executive to the maximum extent practicable for the performance of functions under this order.

(d) Committees and Work Groups. The Federal Environmental Executive shall establish committees and work groups to identify, assess, and recommend actions to be taken to fulfill the goals, responsibilities, and initiatives of the Federal Environmental Executive. As these committees and work groups are created, agencies are requested to designate appropriate personnel in the areas of procurement and acquisition, standards and specifications, electronic commerce, facilities management, waste prevention, and recycling, and others as needed to staff and work on the initiatives of the Executive.

(e) Duties. The Federal Environmental Executive, in consultation with the Agency Environmental Executives, shall:

(1) identify and recommend initiatives for government-wide implementation that will promote the purposes of this order, including:

(A) the development of a federal plan for agency implementation of this order and appropriate incentives to encourage the acquisition of recycled and environmentally preferable products by the Federal Government;

(B) the development of a federal implementation plan and guidance for instituting economically efficient federal waste prevention, energy and water efficiency programs, and recycling programs within each agency; and

(C) the development of a plan for making maximum use of available funding assistance programs;

(2) collect and disseminate information electronically concerning methods to reduce waste, materials that can be recycled, costs and savings associated with waste prevention and recycling, and current market sources of products that are environmentally preferable or produced with recovered materials;

(3) provide guidance and assistance to the agencies in setting up and reporting on agency programs and monitoring their effectiveness; and

(4) coordinate appropriate government-wide education and training programs for agencies.

Sec. 302. Agency Environmental Executives.

Within 90 days after the effective date of this order, the head of each Executive department and major procuring agency shall designate an Agency Environmental Executive from among his or her staff, who serves at a level no lower than at the Deputy Assistant Secretary level or equivalent. The Agency Environmental Executive will be responsible for:

(a) coordinating all environmental programs in the areas of procurement and acquisition, standards and specification review, facilities management, waste prevention and recycling, and logistics;

(b) participating in the interagency development of a Federal plan to:

(1) create an awareness and outreach program for the private sector to facilitate markets for environmentally preferable and recycled products and services, promote new technologies, improve awareness about federal efforts in this area, and expedite agency efforts to procure new products identified under this order;

(2) establish incentives, provide guidance and coordinate appropriate educational programs for agency employees; and

(3) coordinate the development of standard agency reports required by this order;

(c) reviewing agency programs and acquisitions to ensure compliance with this order.

PART 4--ACQUISITION PLANNING AND AFFIRMATIVE PROCUREMENT PROGRAMS

Sec. 401. Acquisition Planning.

In developing plans, drawings, work statements, specifications, or other product descriptions, agencies shall consider the following factors: elimination of virgin material requirements; use of recovered materials; reuse of product; life cycle cost; recyclability; use of environmentally preferable products; waste prevention (including toxicity reduction or elimination); and ultimate disposal, as appropriate. These factors should be considered in acquisition planning for all procurements and in the evaluation and award of contracts, as

appropriate. Program and acquisition managers should take an active role in these activities.

Sec. 402. Affirmative Procurement Programs.

The head of each Executive agency shall develop and implement affirmative procurement programs in accordance with RCRA section 6002 (42 USC 6962) and this order. Agencies shall ensure that responsibilities for preparation, implementation and monitoring of affirmative procurement programs are shared between the program personnel and procurement personnel. For the purposes of all purchases made pursuant to this order, EPA, in consultation with such other Federal agencies as appropriate, shall endeavor to maximize environmental benefits, consistent with price, performance and availability considerations, and shall adjust bid solicitation guidelines as necessary in order to accomplish this goal.

(a) Agencies shall establish affirmative procurement programs for all designated EPA guideline items purchased by their agency. For newly designated items, agencies shall revise their internal programs within one year from the date EPA designated the new items.

(b) For the currently designated EPA guideline items, which are: (i) concrete and cement containing fly ash; (ii) recycled paper products; (iii) re-refined lubricating oil; (iv) retread tires; and (v) insulation containing recovered materials; and for all future guideline items, agencies shall ensure that their affirmative procurement programs require that 100 percent of their purchases of products meet or exceed the EPA guideline standards unless written justification is provided that a product is not available competitively within a reasonable time frame, does not meet appropriate performance standards, or is only available at an unreasonable price.

(c) The Agency Environmental Executives will track agencies' purchases of designated EPA guideline items and report agencies' purchases of such guideline items to the Federal Environmental Executive. Agency Environmental Executives will be required to justify to the Federal Environmental Executive as to why the item(s) have not been purchased or submit a plan for how the agencies intend to increase their purchases of the designated item(s).

(d) Agency affirmative procurement programs, to the maximum extent practicable, shall encourage that:

- (1) documents be transferred electronically,
- (2) all government documents printed internally be printed double-sided, and
- (3) contracts, grants, and cooperative agreements issued after the effective date of this order include provisions that require documents to be printed double-sided on recycled paper meeting or exceeding the standards established in this order or in future EPA guidelines.

Sec. 403. Procurement of Existing Guideline Items.

Within 90 days after the effective date of this order, the head of each Executive agency that has not implemented an affirmative procurement program shall ensure that the affirmative procurement program has been established and is being implemented to the maximum extent practicable.

Sec. 404. Electronic Acquisition System.

To reduce waste by eliminating unnecessary paper transactions in the acquisition process and to foster accurate data collection and reporting of agencies' purchases of recycled content and environmentally preferred products, the executive branch will implement an electronic commerce system consistent with the

recommendations adopted as a result of the National Performance Review.

PART 5--STANDARDS, SPECIFICATIONS AND DESIGNATION OF ITEMS

Sec. 501. Specifications, Product Descriptions and Standards. Where applicable, Executive agencies shall review and revise federal and military specifications, product descriptions and standards to enhance Federal procurement of products made from recovered materials or that are environmentally preferable. When converting to a Commercial Item Description (CID), agencies shall ensure that environmental factors have been considered and that the CID meets or exceeds the environmentally preferable criteria of the government specification or product description. Agencies shall report annually on their compliance with this section to the Federal Environmental Executive for incorporation into the annual report to OMB referred to in section 301 of this order.

(a) If an inconsistency with RCRA Section 6002 or this order is identified in a specification, standard, or product description, the Federal Environmental Executive shall request that the Environmental Executive of the pertinent agency advise the Federal Environmental executive as to why the specification cannot be revised or submit a plan for revising it within 60 days.

(b) If an agency is able to revise an inconsistent specification but cannot do so within 60 days, it is the responsibility of that agency's Environmental Executive to monitor and implement the plan for revising it.

Sec. 502. Designation of Items that Contain Recovered Materials.

In order to expedite the process of designating items that are or can be made with recovered materials, EPA shall institute a new process for designating these items in accordance with RCRA section 6002(e) as follows. (a) EPA shall issue a Comprehensive Procurement Guideline containing designated items that are or can be made with recovered materials.

(1) The proposed guideline shall be published for public comment in the Federal Register within 180 days after the effective date of this order and shall be updated annually after publication for comment to include additional items.

(2) Once items containing recovered materials have been designated by EPA through the new process established pursuant to this section and in compliance with RCRA section 6002, agencies shall modify their affirmative procurement programs to require that, to the maximum extent practicable, their purchases of products meet or exceed the EPA guideline standards unless written justification is provided that a product is not available competitively, not available within a reasonable time frame, does not meet appropriate performance standards, or is only available at an unreasonable price.

(b) Concurrent with the issuance of the Comprehensive Procurement Guideline required by section 502(a) of this order, EPA shall publish for public comment in the Federal Register Recovered Material Advisory Notice(s) that present the range of recovered material content levels within which the designated recycled items are currently available. These levels shall be updated periodically after publication for comment to reflect changes in market conditions.

Sec. 503. Guidance for Environmentally Preferable Products.

In accordance with this order, EPA shall issue guidance that recommends principles that Executive agencies

should use in making determinations for the preference and purchase of environmentally preferable products.

(a) Proposed guidance shall be published for public comment in the Federal Register within 180 days after the effective date of this order, and may be updated after public comment, as necessary, thereafter. To the extent necessary, EPA may issue additional guidance for public comment on how the principles can be applied to specific product categories.

(b) Once final guidance for environmentally preferable products has been issued by EPA, Executive agencies shall use these principles, to the maximum extent practicable, in identifying and purchasing environmentally preferable products and shall modify their procurement programs by reviewing and revising specifications, solicitation procedures, and policies as appropriate.

Sec. 504. Minimum Content Standard for Printing and Writing Paper.

Executive agency heads shall ensure that agencies shall meet or exceed the following minimum materials content standards when purchasing or causing the purchase of printing and writing paper:

(a) For high speed copier paper, offset paper, forms bond, computer printout paper, carbonless paper, file folders, and white woven envelopes, the minimum content standard shall be no less than 20 percent Post consumer materials beginning December 31, 1994. This minimum content standard shall be increased to 30 percent beginning on December 31, 1998.

(b) For other uncoated printing and writing paper, such as writing and office paper, book paper, cotton fiber paper, and cover stock, the minimum content standard shall be 50 percent recovered materials, including 20 percent Post consumer materials beginning on December 31, 1994. This standard shall be increased to 30 percent beginning on December 31, 1998.

(c) As an alternative to meeting the standards in sections 504(a) and (b), for all printing and writing papers, the minimum content standard shall be no less than 50 percent recovered materials that are a waste material byproduct of a finished product other than a paper or textile product which would otherwise be disposed of in a landfill, as determined by the State in which the facility is located.

(1) The decision not to procure recycled content printing and writing paper meeting the standards specified in this section shall be based solely on a determination by the contracting officer that a satisfactory level of competition does not exist, that the items are not available within a reasonable time period, or that the available items fail to meet reasonable performance standards established by the agency or are only available at an unreasonable price.

(2) Each agency should implement waste prevention techniques, as specified in section 402(d) of this order, so that total annual expenditures for recycled content printing and writing paper do not exceed current annual budgets for paper products as measured by average annual expenditures, adjusted for inflation based on the Consumer Price Index or other suitable indices. In determining a target budget for printing and writing paper, agencies may take into account such factors as employee increases or decreases, new agency or statutory initiatives, and episodic or unique requirements (e.g., census).

(3) Effective immediately, all agencies making solicitations for the purchase of printing and

writing paper shall seek bids for paper with Post consumer material or recovered waste material as described in section 504(c).

Sec. 505. Revision of Brightness Specifications and Standards.

The General Services Administration and other Federal agencies are directed to identify, evaluate and revise or eliminate any standards or specifications unrelated to performance that present barriers to the purchase of paper or paper products made by production processes that minimize emissions of harmful byproducts. This evaluation shall include a review of unnecessary brightness and stock clause provisions, such as lignin content and chemical pulp requirements. The GSA shall complete the review and revision of such specifications within six months after the effective date of this order, and shall consult closely with the Joint Committee on Printing during such process. The GSA shall also compile any information or market studies that may be necessary to accomplish the objectives of this provision.

Sec. 506. Procurement of Re-refined Lubricating Oil and Retread Tires.

Within 180 days after the effective date of this order, agencies shall implement the EPA procurement guidelines for re-refined lubricating oil and retread tires.

(a) Commodity managers shall finalize revisions to specifications for re-refined oil and retread tires, and develop and issue specifications for tire retreading services, as commodity managers shall take affirmative steps to procure these items in accordance with RCRA section 6002.

(b) Once these items become available, fleet managers shall take affirmative steps to procure these items in accordance with RCRA section 6002.

Sec. 507. Product Testing.

The Secretary of Commerce, through the National Institute of Standards and Technology ("NIST"), shall establish a program for testing the performance of products containing recovered materials or deemed to be environmentally preferable. NIST shall work with EPA, GSA and other public and private sector organizations that conduct appropriate life cycle analyses to gather information that will assist agencies in making selections of products and services that are environmentally preferable.

(a) NIST shall publish appropriate reports describing testing programs, their results, and recommendations for testing methods and related specifications for use by Executive agencies and other interested parties.

(b) NIST shall coordinate with other Executive and State agencies to avoid duplication with existing testing programs.

PART 6--AGENCY GOALS AND REPORTING REQUIREMENTS

Sec. 601. Goals for Waste Reduction.

Each agency shall establish a goal for solid waste prevention and a goal for recycling to be achieved by the year 1995. These goals shall be submitted to the Federal Environmental Executive within 180 days after the effective date of this order. Progress on attaining these goals shall be reported by the agencies to the Federal Environmental Executive for the annual report specified in section 301 of this order.

Sec. 602. Goal for Increasing the Procurement of Recycled and Other Environmentally Preferable Products.

Agencies shall strive to increase the procurement of products that are environmentally preferable or that are made with recovered materials and set annual goals to maximize the number of recycled products purchased, relative to non-recycled alternatives.

Sec. 603. Review of Implementation.

The President's Council on Integrity and Efficiency ("PCIE") will request that the Inspectors General periodically review agencies' affirmative procurement programs and reporting procedures to ensure their compliance with this order.

PART 7--APPLICABILITY AND OTHER REQUIREMENTS

Sec. 701. Contractor Operated Facilities.

Contracts that provide for contractor operation of a government-owned or leased facility, awarded after the effective date of this order, shall include provisions that obligate the contractor to comply with the requirements of this order within the scope of its operations. In addition, to the extent permitted by law and where economically feasible, existing contracts should be modified.

Sec. 702. Real Property Acquisition and Management. Within 90 days after the effective date of this order, and to the extent permitted by law and where economically feasible, Executive agencies shall ensure compliance with the provisions of this order in the acquisition and management of federally owned and leased space. GSA and other Executive agencies shall also include environmental and recycling provisions in the acquisition of all leased space and in the construction of new federal buildings.

Sec. 703. Retention of Funds

Within 90 days after the effective date of this order, the Administrator of GSA shall develop a legislative proposal providing authority for Executive agencies to retain a share of the proceeds from the sale of materials recovered through recycling or waste prevention programs and specifying the eligibility requirements for the materials being recycled.

Sec. 704. Model Facility Programs.

Each Executive department and major procuring agency shall establish model facility demonstration programs that include comprehensive waste prevention and recycling programs and emphasize the procurement of recycled and environmentally preferable products and services using an electronic data interchange (EDI) system.

Sec. 705. Recycling Programs

Each Executive agency that has not already done so shall initiate a program to promote cost effective waste prevention and recycling of reusable materials in all of its facilities. The recycling programs implemented pursuant to this section must be compatible with applicable State and local recycling requirements. Federal agencies shall also consider cooperative ventures with State and local governments to promote recycling and waste reduction in the community.

PART 8--AWARENESS

Sec. 801. Agency Awards Program. A government-wide award will be presented annually by the White House to the best, most innovative program implementing the objectives of this order to give greater visibility to these efforts so that they can be incorporated government-wide.

Sec. 802. Internal Agency Awards Programs. Each agency shall develop an internal agency-wide awards program, as appropriate, to reward its most innovative environmental programs. Winners of agency-wide awards will be eligible for the White House award program.

PART 9--REVOCATION, LIMITATION AND IMPLEMENTATION

Sec. 901. Executive Order No. 12780, dated October 31, 1991, is hereby revoked.

Sec. 902. This order is intended only to improve the internal management of the executive branch and is not intended to create any right or benefit, substantive or procedural, enforceable at law by a party against the United States, its agencies, its officers, or any other person.

Sec. 903. The policies expressed in this order, including the requirements and elements for effective agency affirmative procurement programs, shall be implemented and incorporated in the Federal Acquisition Regulation (FAR) within 180 days after the effective date of this order. The implementation language shall consist of providing specific direction and guidance on agency programs for preference, promotion, estimation, certification, reviewing and monitoring.

Sec. 904. This order shall be effective immediately.

William J. Clinton
THE WHITE HOUSE
October 20, 1993.
58 FR 54911

Executive Order 12898
FEDERAL ACTIONS TO ADDRESS ENVIRONMENTAL JUSTICE IN MINORITY
POPULATIONS AND LOW-INCOME POPULATIONS

February 11, 1994

By the authority vested in me as President by the Constitution and the laws of the United States of America, it is hereby ordered as follows:

SECTION 1-1. Implementation.

1-101. Agency Responsibilities. To the greatest extent practicable and permitted by law, and consistent with the principles set forth in the report on the National Performance Review, each Federal agency shall make achieving environmental justice part of its mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of its programs, policies, and activities on minority populations and low-income populations in the United States and its territories and possessions, the District of Columbia, the Commonwealth of Puerto Rico, and the Commonwealth of the Mariana Islands.

1-102. Creation of an Interagency Working Group on Environmental Justice.

(a) Within 3 months of the date of this order, the Administrator of the Environmental Protection Agency ("Administrator") or the Administrator's designee shall convene an interagency Federal Working Group on Environmental Justice ("Working Group"). The Working Group shall comprise the heads of the following executive agencies and offices, or their designees: (a) Department of Defense; (b) Department of Health and Human Services; (c) Department of Housing and Urban Development; (d) Department of Labor; (e) Department of Agriculture; (f) Department of Transportation; (g) Department of Justice; (h) Department of the Interior; (i) Department of Commerce; (j) Department of Energy; (k) Environmental Protection Agency; (l) Office of Management and Budget; (m) Office of Science and Technology Policy; (n) Office of the Deputy Assistant to the President for Environmental Policy; (o) Office of the Assistant to the President for Domestic Policy; (p) National Economic Council; (q) Council of Economic Advisers; and (r) such other Government officials as the President may designate. The Working Group shall report to the President through the Deputy Assistant to the President for Environmental Policy and the Assistant to the President for Domestic Policy.

(b) The Working Group shall: (1) provide guidance to Federal agencies on criteria for identifying disproportionately high and adverse human health or environmental effects on minority populations and low-income populations; (2) coordinate with, provide guidance to, and serve as a clearinghouse for, each Federal agency as it develops an environmental justice strategy as required by section 1-103 of this order, in order to ensure that the administration, interpretation and enforcement of programs, activities and policies are undertaken in a consistent manner; (3) assist in coordinating research by, and stimulating cooperation among, the Environmental Protection Agency, the Department of Health and Human Services, the Department

of Housing and Urban Development, and other agencies conducting research or other activities in accordance with section 3-3 of this order; (4) assist in coordinating data collection, required by this order; (5) examine existing data and studies on environmental justice; (6) hold public meetings as required in section 5-502(d) of this order; and (7) develop interagency model projects on environmental justice that evidence cooperation among Federal agencies.

1-103. Development of Agency Strategies.

(a) Except as provided in section 6- 605 of this order, each Federal agency shall develop an agency-wide environmental justice strategy, as set forth in subsections (b)-(e) of this section that identifies and addresses disproportionately high and adverse human health or environmental effects of its programs, policies, and activities on minority populations and low-income populations. The environmental justice strategy shall list programs, policies, planning and public participation processes, enforcement, and/or rulemakings related to human health or the environment that should be revised to, at a minimum: (1) promote enforcement of all health and environmental statutes in areas with minority populations and low-income populations; (2) ensure greater public participation; (3) improve research and data collection relating to the health of and environment of minority populations and low-income populations; and (4) identify differential patterns of consumption of natural resources among minority populations and low-income populations. In addition, the environmental justice strategy shall include, where appropriate, a timetable for undertaking identified revisions and consideration of economic and social implications of the revisions.

(b) Within 4 months of the date of this order, each Federal agency shall identify an internal administrative process for developing its environmental justice strategy, and shall inform the Working Group of the process.

(c) Within 6 months of the date of this order, each Federal agency shall provide the Working Group with an outline of its proposed environmental justice strategy.

(d) Within 10 months of the date of this order, each Federal agency shall provide the Working Group with its proposed environmental justice strategy.

(e) Within 12 months of the date of this order, each Federal agency shall finalize its environmental justice strategy and provide a copy and written description of its strategy to the Working Group. During the 12 month period from the date of this order, each Federal agency, as part of its environmental justice strategy, shall identify several specific projects that can be promptly undertaken to address particular concerns identified during the development of the proposed environmental justice strategy, and a schedule for implementing those projects.

(f) Within 24 months of the date of this order, each Federal agency shall report to the Working Group on its progress in implementing its agency-wide environmental justice strategy.

(g) Federal agencies shall provide additional periodic reports to the Working Group as requested by the Working Group.

1-104. Reports to the President.

Within 14 months of the date of this order, the Working Group shall submit to the President, through the Office of the Deputy Assistant to the President for Environmental Policy and the Office of the Assistant to the President for Domestic Policy, a report that describes the implementation of this order, and includes the final environmental justice strategies described in section 1-103(e) of this order.

SECTION 2-2. Federal Agency Responsibilities for Federal Programs.

Each Federal agency shall conduct its programs, policies, and activities that substantially affect human health or the environment, in a manner that ensures that such programs, policies, and activities do not have the effect of excluding persons (including populations) from participation in, denying persons (including populations) the benefits of, or subjecting persons (including populations) to discrimination under, such programs, policies, and activities, because of their race, color, or national origin.

SECTION. 3-3. Research, Data Collection, and Analysis.

3-301. Human Health and Environmental Research and Analysis.

(a) Environmental human health research, whenever practicable and appropriate, shall include diverse segments of the population in epidemiological and clinical studies, including segments at high risk from environmental hazards, such as minority populations, low-income populations and workers who may be exposed to substantial environmental hazards.

(b) Environmental human health analyses, whenever practicable and appropriate, shall identify multiple and cumulative exposures.

(c) Federal agencies shall provide minority populations and low-income populations the opportunity to comment on the development and design of research strategies undertaken pursuant to this order.

3-302. Human Health and Environmental Data Collection and Analysis.

To the extent permitted by existing law, including the Privacy Act, as amended (5 U.S.C. section 552a):

(a) each Federal agency, whenever practicable and appropriate, shall collect, maintain, and analyze information assessing and comparing environmental and human health risks borne by populations identified by race, national origin, or income. To the extent practical and appropriate, Federal agencies shall use this information to determine whether their programs, policies, and activities have disproportionately high and adverse human health or environmental effects on minority populations and low-income populations;

(b) In connection with the development and implementation of agency strategies in section 1-103 of this order, each Federal agency, whenever practicable and appropriate, shall collect, maintain and analyze information on the race, national

origin, income level, and other readily accessible and appropriate information for areas surrounding facilities or sites expected to have a substantial environmental, human health, or economic effect on the surrounding populations, when such facilities or sites become the subject of a substantial Federal environmental administrative or judicial action. Such information shall be made available to the public, unless prohibited by law; and

(c) Each Federal agency, whenever practicable and appropriate, shall collect, maintain, and analyze information on the race, national origin, income level, and other readily accessible and appropriate information for areas surrounding Federal facilities that are: (1) subject to the reporting requirements under the Emergency Planning and Community Right-to-Know Act, 42 U.S.C. section 11001-11050 as mandated in Executive Order No. 12856; and (2) expected to have a substantial environmental, human health, or economic effect on surrounding populations. Such information shall be made available to the public, unless prohibited by law.

(d) In carrying out the responsibilities in this section, each Federal agency, whenever practicable and appropriate, shall share information and eliminate unnecessary duplication of efforts through the use of existing data systems and cooperative agreements among Federal agencies and with State, local, and tribal governments.

SECTION 4-4. Subsistence Consumption of Fish and Wildlife.

4-401. Consumption Patterns. In order to assist in identifying the need for ensuring protection of populations with differential patterns of subsistence consumption of fish and wildlife, Federal agencies, whenever practicable and appropriate, shall collect, maintain, and analyze information on the consumption patterns of populations who principally rely on fish and/or wildlife for subsistence. Federal agencies shall communicate to the public the risks of those consumption patterns.

4-402. Guidance. Federal agencies, whenever practicable and appropriate, shall work in a coordinated manner to publish guidance reflecting the latest scientific information available concerning methods for evaluating the human health risks associated with the consumption of pollutant-bearing fish or wildlife. Agencies shall consider such guidance in developing their policies and rules.

SECTION 5-5. Public Participation and Access to Information.

(a) The public may submit recommendations to Federal agencies relating to the incorporation of environmental justice principles into Federal agency programs or policies. Each Federal agency shall convey such recommendations to the Working Group.

(b) Each Federal agency may, whenever practicable and appropriate, translate crucial public documents, notices, and hearings relating to human health or the environment for limited English speaking populations.

(c) Each Federal agency shall work to ensure that public documents, notices, and hearings relating to human health or the environment are concise, understandable, and readily accessible to the public.

(d) The Working Group shall hold public meetings, as appropriate, for the purpose of fact-finding, receiving public comments, and conducting inquiries concerning environmental justice. The Working Group shall prepare for public review a summary of the comments and recommendations discussed at the public meetings.

SECTION 6-6. General Provisions.

6-601. Responsibility for Agency Implementation. The head of each Federal agency shall be responsible for ensuring compliance with this order. Each Federal agency shall conduct internal reviews and take such other steps as may be necessary to monitor compliance with this order.

6-602. Executive Order No. 12250. This Executive order is intended to supplement but not supersede Executive Order No. 12250, which requires consistent and effective implementation of various laws prohibiting discriminatory practices in programs receiving Federal financial assistance. Nothing herein shall limit the effect or mandate of Executive Order No. 12250.

6-603. Executive Order No. 12875. This Executive order is not intended to limit the effect or mandate of Executive Order No. 12875.

6-604. Scope. For purposes of this order, Federal agency means any agency on the Working Group, and such other agencies as may be designated by the President, that conducts any Federal program or activity that substantially affects human health or the environment. Independent agencies are requested to comply with the provisions of this order.

6-605. Petitions for Exemptions. The head of a Federal agency may petition the President for an exemption from the requirements of this order on the grounds that all or some of the petitioning agency's programs or activities should not be subject to the requirements of this order.

6-606. Native American Programs. Each Federal agency responsibility set forth under this order shall apply equally to Native American programs. In addition, the Department of the Interior, in coordination with the Working Group, and, after consultation with tribal leaders, shall coordinate steps to be taken pursuant to this order that address Federally-recognized Indian Tribes.

6-607. Costs. Unless otherwise provided by law, Federal agencies shall assume the financial costs of complying with this order.

6-608. General. Federal agencies shall implement this order consistent with, and to the extent permitted by, existing law.

6-609. Judicial Review. This order is intended only to improve the internal management of the executive branch and is not intended to, nor does it create any right, benefit, or trust responsibility, substantive or procedural, enforceable at law or equity by a party against the United States, its agencies, its officers, or any person. This order shall not be construed to create any right to judicial review involving the compliance or noncompliance of the United States, its agencies, its officers, or any other person with this order.

William J. Clinton
THE WHITE HOUSE,

Exec. Order No. 12898, 59 FR 7629, 1994 WL 43891 (Pres.)

Executive Order 12948
AMENDMENT TO EXECUTIVE ORDER NO. 12898

January 30, 1995

By the authority vested in me as President by the Constitution and the laws of the United States of America and in order to amend Executive Order No. 12898, it is hereby ordered that section 1-103(e) of that order is amended by deleting the phrase "Within 12 months of the date of this order," and inserting the phrase "By March 24, 1995," in lieu thereof and by deleting, in the second sentence of section 1-103(e), the phrase "During the 12 month period from the date of this order," and inserting the phrase "From the date of this order through March 24, 1995," in lieu thereof.

William J. Clinton
THE WHITE HOUSE,
January 30, 1995.
Exec. Order No. 12948, 60 FR 6381, 1995 WL 35929 (Pres.)

Executive Order 12962
RECREATIONAL FISHERIES

June 7, 1995

By the authority vested in me as President by the Constitution and the laws of the United States of America, and in furtherance of the purposes of the Fish and Wildlife Act of 1956 (16 U.S.C. 742a-d, and e- j), the Fish and Wildlife Coordination Act (16 U.S.C. 661-666c), the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), and the Magnuson Fishery Conservation and Management Act (16 U.S.C. 1801-1882), and other pertinent statutes, and in order to conserve, restore, and enhance aquatic systems to provide for increased recreational fishing opportunities nationwide, it is ordered as follows:

SECTION 1. Federal Agency Duties.

Federal agencies shall, to the extent permitted by law and where practicable, and in cooperation with States and Tribes, improve the quantity, function, sustainable productivity, and distribution of U.S. aquatic resources for increased recreational fishing opportunities by:

- (a) developing and encouraging partnerships between governments and the private sector to advance aquatic resource conservation and enhance recreational fishing opportunities;
- (b) identifying recreational fishing opportunities that are limited by water quality and habitat degradation and promoting restoration to support viable, healthy, and, where feasible, self-sustaining recreational fisheries;
- (c) fostering sound aquatic conservation and restoration endeavors to benefit recreational fisheries;
- (d) providing access to and promoting awareness of opportunities for public participation and enjoyment of U.S. recreational fishery resources;
- (e) supporting outreach programs designed to stimulate angler participation in the conservation and restoration of aquatic systems;
- (f) implementing laws under their purview in a manner that will conserve, restore, and enhance aquatic systems that support recreational fisheries;
- (g) establishing cost-share programs, under existing authorities, that match or exceed Federal funds with nonfederal contributions;
- (h) evaluating the effects of Federally funded, permitted, or authorized actions on aquatic systems and recreational fisheries and document those effects relative to the purpose of this order; and
- (i) assisting private landowners to conserve and enhance aquatic resources on their lands.

SECTION. 2. National Recreational Fisheries Coordination Council.

A National Recreational Fisheries Coordination Council ("Coordination Council") is hereby established. The Coordination Council shall consist of seven members, one member designated by each of the following Secretaries--Interior, Commerce, Agriculture, Energy, Transportation, and Defense--and one by the Administrator of the Environmental Protection Agency.

The Coordination Council shall:

- (a) ensure that the social and economic values of healthy aquatic systems that support recreational fisheries are considered by Federal agencies in the course of their actions;
- (b) reduce duplicative and cost-inefficient programs among Federal agencies involved in conserving or managing recreational fisheries;
- (c) share the latest resource information and management technologies to assist in the conservation and management of recreational fisheries;
- (d) assess the implementation of the Conservation Plan required under section 3 of this order; and
- (e) develop a biennial report of accomplishments of the Conservation Plan.

The representatives designated by the Secretaries of Commerce and the Interior shall co-chair the Coordination Council.

SECTION. 3. Recreational Fishery Resources Conservation Plan.

- (a) Within 12 months of the date of this order, the Coordination Council, in cooperation with Federal agencies, States, and Tribes, and after consulting with the Federally chartered Sport Fishing and Boating Partnership Council, shall develop a comprehensive Recreational Fishery Resources Conservation Plan ("Conservation Plan").
- (b) The Conservation Plan will set forth a 5-year agenda for Federal agencies identified by the Coordination Council. In so doing, the Conservation Plan will establish, to the extent permitted by law and where practicable; (1) measurable objectives to conserve and restore aquatic systems that support viable and healthy recreational fishery resources, (2) actions to be taken by the identified Federal agencies, (3) a method of ensuring the accountability of such Federal agencies, and (4) a comprehensive mechanism to evaluate achievements. The Conservation Plan will, to the extent practicable, be integrated with existing plans and programs, reduce duplication, and will include recommended actions for cooperation with States, Tribes, conservation groups, and the recreational fisheries community.

SECTION. 4. Joint Policy for Administering the Endangered Species Act of 1973.

All Federal agencies will aggressively work to identify and minimize conflicts between recreational fisheries and their respective responsibilities under the Endangered Species Act of 1973 ("ESA") (16 U.S.C. 1531 et seq.). Within 6 months of the date of this order, the Fish and Wildlife Service and the National Marine Fisheries Service will promote compatibility and reduce conflicts between the administration of the ESA and recreational fisheries by developing a joint agency policy that will; (1) ensure consistency in the administration of the ESA between and within the two agencies, (2) promote collaboration with other Federal, State, and Tribal fisheries managers, and (3) improve and increase efforts to inform nonfederal entities of the requirements of the ESA.

SECTION 5. Sport Fishing and Boating Partnership Council.

To assist in the implementation of this order, the Secretary of the Interior shall expand the role of the Sport Fishing and Boating Partnership Council to:

- (a) monitor specific Federal activities affecting aquatic systems and the recreational fisheries they support;
- (b) review and evaluate the relation of Federal policies and activities to the status and conditions of recreational fishery resources; and
- (c) prepare an annual report of its activities, findings, and recommendations for submission to the Coordination Council.

SECTION 6. Judicial Review.

This order is intended only to improve the internal management of the executive branch and it is not intended to create any right, benefit or trust responsibility, substantive or procedural, enforceable at law or equity by a party against the United States, its agencies, its officers, or any other person.

William J. Clinton
THE WHITE HOUSE,
June 7, 1995.

Exec. Order No. 12962, 60 FR 30769, 1995 WL 341522 (Pres.)

Executive Order 13007
INDIAN SACRED SITES

May 24, 1996

By the authority vested in me as President by the Constitution and the laws of the United States, in furtherance of Federal treaties, and in order to protect and preserve Indian religious practices, it is hereby ordered:

SECTION 1. Accommodation of Sacred Sites.

(a) In managing Federal lands, each executive branch agency with statutory or administrative responsibility for the management of Federal lands shall, to the extent practicable, permitted by law, and not clearly inconsistent with essential agency functions, (1) accommodate access to and ceremonial use of Indian sacred sites by Indian religious practitioners and (2) avoid adversely affecting the physical integrity of such sacred sites. Where appropriate, agencies shall maintain the confidentiality of sacred sites.

(b) For purposes of this order:

(i) "Federal lands" means any land or interests in land owned by the United States, including leasehold interests held by the United States, except Indian trust lands;

(ii) "Indian tribe" means an Indian or Alaska Native tribe, band, nation, pueblo, village, or community that the Secretary of the Interior acknowledges to exist as an Indian tribe pursuant to Public Law No. 103-454, 108 Stat. 4791, and "Indian" refers to a member of such an Indian tribe; and

(iii) "Sacred site" means any specific, discrete, narrowly delineated location on Federal land that is identified by an Indian tribe, or Indian individual determined to be an appropriately authoritative representative of an Indian religion, as sacred by virtue of its established religious significance to, or ceremonial use by, an Indian religion; provided that the tribe or appropriately authoritative representative of an Indian religion has informed the agency of the existence of such a site.

SECTION 2. Procedures.

(a) Each executive branch agency with statutory or administrative responsibility for the management of Federal lands shall, as appropriate, promptly implement procedures for the purposes of carrying out the provisions of section 1 of this order, including, where practicable and appropriate, procedures to ensure reasonable notice is provided of proposed actions or land management policies that may restrict future access to or ceremonial use of, or adversely affect the physical integrity of, sacred sites. In all actions pursuant to this section, agencies shall comply with the Executive memorandum of April 29, 1994, "Government-to-Government Relations with Native American Tribal Governments."

(b) Within 1 year of the effective date of this order, the head of each executive branch agency with statutory or administrative responsibility for the management of Federal lands shall report to the President, through the Assistant to the President for Domestic Policy, on the implementation of this

order. Such reports shall address, among other things, (i) any changes necessary to accommodate access to and ceremonial use of Indian sacred sites; (ii) any changes necessary to avoid adversely affecting the physical integrity of Indian sacred sites; and (iii) procedures implemented or proposed to facilitate consultation with appropriate Indian tribes and religious leaders and the expeditious resolution of disputes relating to agency action on Federal lands that may adversely affect access to, ceremonial use of, or the physical integrity of sacred sites.

SECTION 3. Nothing in this order shall be construed to require a taking of vested property interests. Nor shall this order be construed to impair enforceable rights to use of Federal lands that have been granted to third parties through final agency action. For purposes of this order, "agency action" has the same meaning as in the Administrative Procedure Act (5 U.S.C. 551(13)).

SECTION 4. This order is intended only to improve the internal management of the executive branch and is not intended to, nor does it, create any right, benefit, or trust responsibility, substantive or procedural, enforceable at law or equity by any party against the United States, its agencies, officers, or any person.

WILLIAM J. CLINTON

THE WHITE HOUSE,

13. ABSTRACT (Maximum 200 words) Numerous environmental laws and executive orders influence and guide water resources planning, development and management within the Civil Works program of the U.S. Army Corps of Engineers. Many of these laws identify compliance requirements, and several establish regulatory programs that the Corps of Engineers implements in support of National environmental objectives. These directives also support Federal responsibility for environmental quality and Corps involvement in the restoration of ecological resources. This document contains summary profile of 62 environmental laws, full text of 22 Executive Orders, as well as several cross-reference tables to assist in finding citations and guidance. The information in this document is for reference purposes, and is not intended as a substitute for HQUSACE policy or implementation guidance. Nor is this reference intended to replace the advice of Corps counsel.
